Ed:

No, it was an attempt at humor, as indicated by the <BSEG>. I don't employ "smileys," since I don't consider them a valid method of indicating a humorous intent -- they're just trendy/cute and too 8-year-old-girlish for me to consider using, personally. I prefer the acronym-style humor indicators as developed on the old Fidonet and the original newsgroups before they were infected with AOL users and their "emoticons."

So go PUAR, Ed.

Denied it? I maintained then and maintain now that I am only
responsible for operating my station within band segments authorized to
me. I have no responsibility for the operation of others inside or
outside the country where I am living. Surely one with your superior
memory remembers me mentioning something like this a dozen or two times.

> Dave, congratulations on winning the moldy Wonder Bread award and taking

How does telling you that I didn't read something which someone posted
become burying my head in the sand. You asked a question. I provided
an answer. That you don't care for the answer is your problem.

Let's get it straight, Len. You told me I was denigrating the magazine.
Then you told me that I couldn't denigrate it because I don't undertand
the magazine. Are you now telling me that I am denigrating the magazine
but not the magazine?

> >> >> You insist on having some "last word" on a subject you do not under-

I do understand what you have said; I have used random numbers myself many times. Never won the lottery however; then again, I heard you had to buy a ticket. The thing is that I enjoy a fist that is as close as possible to machine code - then, how do you determine if the sender is actually incapable of sending/receiving Morse other than by using a compooter? Oh well ...

>commercial application for on-off codings that it must be just a
>hobby exercise.

Probably for the same reason that some people persued a "career" in the comercially un-viable fields of 'wireless" and "aeronautics". Someone had a vision.

Can you state, with absolute and certain knowledge, that these basic communications techniques will NEVER be used again, nor will they ever have ANY commecial application? Or ANY military application? Or any EMERGENCY applicaiotn?

If the answer is "no" (and there is no way that a professionally trained engineer can say "yes" to it) then "on-off keying" will continue to be entertained for SOME applications. It will never be the "mode du jour" it was in the 20's and 30's, but it will always have practical applications.

>on the market today? Try explaining that CDs "aren't published
>items" to the copyright lawyers and US law. Do you need a link
>to the US government's regulations on copyrights?

They are reprints, Lennie. Nothing but reprints. No more different than
the 2AM late nite TV sales pitch for "K-Tel's Greatest All-time Hits"
collections of any number of artists.

>Poor baby, still doesn't understand the term "published" or its
>application. Worse yet, the poor feller thinks he's someone else...

I understand "published", Lennie. The real pitty is that after 15 years
of night school, YOU don't.

>>Now wait a minute, Your Twofacedness...YOU have been telling us for
>years
>>that there is no such thing as an "amateur" technolgy...You quite adamandtly
>>assert that radio physics is radio physics.
>
>Poor baby is still confused.

Nope. Caught you in another twist of your own tale. Sorry you didn't
like it.

>Unfortunately, so many radio amateurs have so
>little knowledge of basics in radio that they think the only
>"correct" technology is that shown in ARRL publications.

Lennie, PLEASE provide SOME verifyable quote from ANYONE in this forum who
has stated ANYTHING like "...they think the only "correct" technology is that
shown in ARRL publications".

Larry? Dave? Ed? Steve Adell? Jim? I don't think so, and I know >>I<<
have not.....

>> You forgot the question mark, Lennie. Of course your night school
>>education probably skipped punctuation.
>
>Still on this "denigration of night school" kick, ey?

Actually, the correct application for the colloquial interrogative is
"eh?", not "ey".

And it's not a denigration of the school. It's a denigration of the time
you wasted since you keep making such glaring errors, Your Ignorantness.

>College credit courses at night are a very convenient time for all
>those who must work during daytime hours.

Too bad you wasted both.

>"Write trash?" I've written professionally on several different subjects
>but none of them concerned sanitation departments or refuse
>collecting. You must have someone else in mind.

In this forum, all you write is trash. I am not the only one who holds
that opinion. It's you alright, Your Wastefullness.

>"Denigrate amateur radio?" Not at all.

Pinnochhio's nose just grew an inch.

> There are certain regulations
>in US amateur radio which I would prefer to be changed, but I think
>(and have stated many times) that amateur radio is a fine hobby.

Un huh...You have only spent the last several years berating every single
aspect of Amateur Radio without quarter.

>"Denigrate amateur radio operators?" Only certain ones, most
>notably those who are "pre-restructuring amateur extras" that
>emphasize morse code skill over everything else in ham radio.
>It is the INDIVIDUAL that may be a target of negative criticsm,
>not the hobby.

Only everyone that is in this forum, save for Brian, and I am not so sure
about him, either. And of course let's not forget your anonymous buddy "MegHz"
(whom I see has resurfaced lately), and I am not so sure "he" is not you
anyway.

You are a pathological liar, Lennie, and then you lie about your lying.

What a Putz.

>up my mirror?

There are a number of ways that VE teams can accomodate physical disabilities. Talk to the VE team you want to have test you and they can explain to you what can be done and what they might need from you in terms of documentation, if any.

A sending test is one of the possibilities. Others can include testing with a different tone than the usual 725 Hz, blinking lights, or having you feel a vibrating buzzer or speaker. In some cases, a combination of one of these techniques can really help, much as someone who is hard of hearing "hears" better if he can see the person talking.

Cute play on words. Meaningless and petty, but cute.

The only bullstuff I have seen is the very premise of the thread. If you sense of self esteem is so low, perhaps you could try actually achieving something useful to make yourself feel better. It would be a much better therapy than starting mean-spirited posts that have not seen any support. To the contrary, many hams here have decided that they will go out of their way to make these new hams feel welcomed into the Service.

If I've "proven" myself to you to be a liar, that bothers me not at all. Your proof standards are beyond the comprehension of anyone of normal intelligence. YOU, on the other hand, utter falsehoods with abandon. Problem is, you're too far out of touch with reality to know it.

I suggest that, if it's at all possible, she could at least try for General.
The written is not that much more difficult than the Tech, and it gives a lot
more HF.

While the HR-2510 is a decent rig, there isn't a lot of casual CW on 10 meters
compared to other bands. And we're heading right into the sunspot downturn.
She'd be better off with a rig that covers the other amateur HF bands, too.
Used ones are not that expensive.

Just some thouhts and a BRAVO on your efforts.

I think there's more to it than that, Ed.

The new "Foundation" license was not the result of a G-land NPRM-type process. Rather, it "just growed" without open input from the G-land public or hams.

The Foundation license requires an extremely simplified written test and a "Morse assessment" test, both of which are looked upon as a joke by some G-land hams. The details of these tests have been given by others. They have to be judged by G-land standards, though. The RAE is not multiple-choice-from-a-published-pool.

Problem is that the protest needs to be against the powers that be, not against those who ot the license. Remember "no kids, no lids, no space cadets"? This is just the 2002 version.

Ah, I see. So your first marriage mirrors your Novice ham radio
experience. I really and truly hope that portends nothing for your
second. But your time spent - dare I say wasted? posting on rrap has no
effect. Getcher head outta there, man, and smell the coffee. Do
something pleasant and constructive for a change.

Looks like our marriages parallel our ham radio experiences. I'm on my
46th year as a ham and my 38th in my first and only happy marriage.
Maybe that tells something about who is "mean".

> Out of necessity, I devote a lot of time to my career. Out of love I devote

> experience?

Reading comprehension troubles still, I see. I would have loved to have
something meaningful for a code test, but I didn't make the rules, just
operated a testing team under them. If you think I particularily enjoyed
licensing as code operators those who couldn't operate CW..... you
should have some sort of a clue by now.

> You'll do or say anything to get at me, won't you? Which is
> part of your lying career.
>

A bit of paranoia raising its ugly head, Brian? You are so low on my
radar screen, nowdays particularly, that I don't even open your posts -I
don't really care for endless spam all that much- except when someone
quotes one of them that obviously involved me, then I *may* go take a
look to see if it's more of your clearly erroneous drivel that must be
batted back down yet again.
I'm beginning to believe that you really don't lie, you just don't know
any better. But Cecil's dictionary says that doesn't matter, you're a
liar anyway. So check with him to see for sure.

> > Why the heck do you think I'm so disgusted with characters like you?

Still hung up on the tables, huh? See below.

> > I'll read it in QST, "Liar Dick joins SK's."

Last guy I heard say something like that was himself dead within a
week, the victim of a freak accident. He and his working partner stopped
to check on a blasting site, an as he turned to get back in his truck, a
small piece of rock from a dynamite charge went astray -WAY astray,
about 300 feet, and struck him in the back of the head. He never
regained conscienceness. So be careful what you visit onto others, it
can easily home home to you.
The actuarial tables tell nothing meaningful about anything but trends.
But you already knew that. You keep pounding that point just trying to
make anyone a few years older than you feel bad. Sorry, that doesn't
work any more than your teary-eyed Novice story engenders much sympathy
for your self-imposed plight. Get your head out and start thinking with
it up on top for once.

Dan you should have been here a couple of years ago. Your cronies were
doing exactly what you are accusing me of.

I am not poking fun of peoples disabilities. I asked you a simple question.
What was your waiver for?

Dsve, I'm going home because there's nothing left to discuss. You engage in
something other than Good Amateur Practice, then spend years denying it.

What else is there to discuss?

Jim, I suggest going the route as Dick suggests: Code Tape Extra.

Forget about on-the-air practice or steering her toward the Novice CW subbands. Unless you want her to wait for Novice refarming. Then she might actually run in to a CW QSO or two in the General CW portion.

ARRL shortwave CW practice might be useable if there is only a little interference.

No, I blame myself for my troubles. I also learn from my mistakes. I'll
not spend another moment on code practice unless I'm working on it as part
of a father/son activity, or when I'm in my Golden Years of retirement in
2027. I've told you this numerous times, Dick. Please try to remember it
next time, or simply go on lying as you will.

> Oh, I see! CW practice harms your family but you spending copious

The credibility problem is in your camp.

I have passed the Novice, General, Advanced, and Extra exams - years before
the latest round of restructuring. Thus the CSCE's have expired. Expired
CSCE's aren't permitted for upgrade.

> > > > I have spent an enormous amount of my own free time learning the

Most PCs that I've worked on send audible error codes when they are in trouble. Big help when the video isn't working. It's not Morse, but it IS an on-off tone code.
Much simpler to implement than voice synthesis, and it's language-independent.

The ID on many repeaters around here is voice when the repeater is idle and just identifying itself, but switches to Morse when there's a signal on the input. Thsi is done because it's easier for most people to discriminate between a voice and a Morse signal than between two voices coming through a monaural channel.

It's not about "need" but about demonstrating that it's not just idle talk.

Those of us who want CW to continue and grow in the future will do well to take a page from the book of the APRS, packet and PSK31 folks. They don't just talk about their mode, they demo it at any opportunity, like hamfests, club meetings and Field Day.

The AM/military/BA folks have taken to setting up demo stations at hamfests and airshows. CW can be a part of that, too.

Some hams on this newsgroup have predicted that new hams will not choose
to learn Morse code and therefore not use CW. If they try and succeed
in recruiting new hams to CW, they will have proven their predictions
wrong. Do you think those hams can really bring themselves to recommend
CW to new hams?

Hmmm, I leave a.f. for a short while to enjoy the summer and focus on my dragonboat racing to help raise money for disabled children and notice that nothing has changed. Surprise. Surprise. Same old boring fuckheads. Of course, the most unexciting aspect to all this is chickenshit Suzielame poking her fat ugly beaver in to brag about her pathetic retard lame awards and Roger ineloquently autolaming himself to death - competing with the most dried up of old used sponges in the "blow the guage on the stoopid meter" division. If this were dragonboating between me and a.f., it would be like winning against a boatfull of overweight arm-amputees.
==========

Feeling pathetic? Thinking maybe it's time to end it all, or at least the portion of it all that keeps girls from talking to you? Cheer up, gloomypants! The fact is, you could be even MORE pathetic! Here's how:

Your name could be Roger Wiseman.

You take a break from usenet only to find that the content contains mainly of Suzielame trying to intimidate some newbie with her a.f. retard "awards" and Roger continuing in his best tradition to out-stoopid the most braindead of sponges. You leave in disgust and ask yourself, why did I even bother?

You could get demoted from scaling fish to gutting Roger Wiseman.

Your shirts could be pee-stained and your underwear mustard-stained, instead of vice-versa. Or the name Roger Wiseman could be sewn into the backs of those soiled diapers while you're spewing filth on usenet and calling everyone a pedophile who doesn't agree with you.

You could still be addressing your pillow as "Kathy Ireland" instead of having switched to Cindy Crawford in 1999. Or you could be cooing in the ear of your dead mother underneath your Inspector Gadget sheets.

You might only have the FIFTH most popular collection of Roger Wiseman PKB's, Autolames, & IKYABWAI's on usenet.

Your mom could take that one old video of you dressed up as Batman, singing the Batman song and playing air guitar, and she could show it to everyone at work instead of only those who make it to the annual Christmas party. Or you could be more like Roger Wiseman and spend the days felching the worms from her decomposing arse.

If you hadn't torn your Inspector Gadget sheets, you might still be using them today. Or your name could be Roger Wiseman and you could be over forty and find yourself sharing those same sheets with your dead mother.

You could have completely lost that one online argument about how a eighth-level druid could completely kick an eighth-level ranger's ass. Or you could be the first to lose an argument to Roger Wiseman on usenet.

You could still be pronouncing "ebullient" wrong. Or you could be creating typo's all over the place while posting spell-lames just like Roger Wiseman.

It could have been a supervisor who walked in on you masturbating into the bathroom sink, instead of just a janitor. Or it could have been Roger Wiseman offering your kid a candy in the park.

You could forget to omit breed when people ask you about your corgi-bite scar. Or you could have caught scabies while sleeping over at the Wiseman trailer household.

You could have failed to make any progress whatsoever in your efforts to not automatically look around in a panic whenever someone yells "Hey, loser!" Or your name could be Roger Wiseman and you could be absolute clueless to know what that means.

Your left testicle might not have finally descended. Or Roger Wiseman could be offering to help you with that left testy.

Someone might have seen you that day you almost fainted after stepping on a slug. Or someone might have seen you with Roger Wiseman.

If you knew more people, that'd just be more people who know how pathetic you are. Or you could be advertising it on usenet and ham radio like Roger Wiseman.

Oh, come now, Cecil. The implicit point in your logic is that we care
more for the analytical prediction than the mode; you may find it
descriptive, I find it insulting.

Besides, you do a similar bit of mental gymnastics every Sunday singing
bass in the choir and stirring up all those older ladies (don't tell,
don't yell, don't swell). Neither you nor most of the congregation
seriously expect it to work but it doesn't quell the preaching.

Beers, Dick NBK

What I have seen is similar claims by Cecil and Lenover21. They cite being older than me as a reason that my arguments are supposedly invalid. Cecil gave up on that game long ago but Lenover21 keeps at it for some reason.

Both are mistaken, of course.

Regardless of whether you get into Amateur Radio, R/C model flying, or playing Bridge, there will always be "someone" who wants to be King of the Hill, with or without the qualifications to BE King.

Don't sweat it.

Unfortunately this medium (USENET) allowws some very arrogant and very antagonistic creeps to have a "loud" voice.

>I don't think it was the difficulty of the exam that stopped newcommers
>becomeing Radio Amamteurs, it was that no one wanted to associate with such
>stuck up snobs as yourselves. I don't know about boycotting M3's, maybe we

How to win friends and influence people! If you come into amateur
radio with that attitude, no wonder you have difficulty in being
accepted.

> Wait to you contact an M3 on the air and then make your decision about
>how good a broadcater they are then.

We do not need 'broadcaters' (sic) in amateur radio.

Oh yes you are!

And you know what? Life has a way of paying back people who make fun of handicapped individuals. And you did it right in front of the whole amateur radio community. What ever got you started on this, i.e. to state that I obtained a Physician's certificate in the first place? I only said, and any person with an ounce of compassion would agree, that the Physician's certificate was very, morally legitimate when obtained as intended.
Some people see themselves as the center of the universe, just because they happen to be healthy (at the present time, at least).

"You can't answer a question with another question." Your own words.

It's clear you're avoiding the simple truth that, in fact, the transmitters
were designed, built and installed by others at taxpayer's expense. And a whole
team kept them going. You were part of that team - and not the leader of it.

Is any of the above not true?

>>>150 MHz.
>>
>>Can they be used to build all of the projects in HR?
>
>Pathetic, spiteful commentary from an alleged working electronics
>engineer...or just a spiteful commentary from an ignorant engineer
>who doesn't know his PNP from an NPN. :-)

Again, you avoid the question. Truth is, many semiconductors have become
unobtainable, particularly those more advanced than general purpose
transistors.
>
>Do you really know the meaning of "general purpose" or
>"complementary symmetry?" Or even "f-sub-t?"

Pathetic, spiteful commentary from an alleged electronics
"engineer" without degree...or just a spiteful commentary from a wannabe.

Yes, I know what those terms mean - all of them. High school stuff.

Do you know what a premixer is?
>
>>>THEORY is hardly ever out of date, is it?
>>
>>Of course not. But you're the one who complains about things being OLD, and
>>a part of HISTORY. How come it's all right for you but not all right for
>>others to say those things?
>
>Don't misdirect into the "defunct" area... :-)

Typical Lenover21 double standard.

>Is theory out of date or isn't it? Try answering the question.

Why? You never answer mine.

But I'll answer anyway: Theory rarely goes out of date. And old technology
often holds the answer to modern problems. Old technology is not necessarily
"bad" or "obsolete".

>>>Or do you think ham
>>>radio theory only comes from the Big Brother in Newington?
>>
>>More put-downs. Civil deportment very lacking in Lenover21.
>
>Pardon me, your memberhighnessship, let me rephrase:
>
>Do you think ham radio theory only comes from the ARRL?

Nope. HR was a great magazine. Too bad it's defunct. All we have left is old
copies and reprints.

There's an online index of HR articles. Turns out the vast majority of them
were written by hams. Also turns out I know several of the authors.

>>>Jimmie needs a lesson in civil comportment on newsgroups.
>>
>>HAW!
>
>You do.
>
>>Explain how you are being "civil" by calling people names and ridiculing
>>their accomplishments.
>
>Why do you consider lack of praise to be "ridicule?"

It's the name-calling ("Jimmie", "Nursie", "Herr Heil", etc.) that I refer to.
Many other examples.

>>>So...I can't buy those common transistors from, say, Digi-Key
>>>today? No problem. Single-piece price for them are 21 cents
>>>each (less in quantity), maybe another 4 cents each for the
>>>small-quantity shipping charge. Need some common rectifier
>>>diodes like the 1N4001 through 1N4007? Digi-Key's price is
>>>10 for $1.36 "cut tape" (they come on an ammo-belt like tape)
>>>or 13.6 cents apiece.
>>
>>Those are just a small subset of the devices needed to build a useful
>>project.
>
>OK, Mr. Extreme Literalist, I'll just name the ENTIRE Digi-Key catalog
>as containing the parts that would be "useful" for a project. :-)

Of course it's "useful" - but it's not adequate. And the main point is that
home constructing from new parts is usually not cost effective
>

>>How many amateur radio transceivers have you built with your own money and
>>time? How many have you designed?
>

>wrong.

Nope. They will have altered the boundary conditions by actively recruiting
more than was done in the past.

>Do you think those hams can really bring themselves to recommend
>CW to new hams?

Of course. In fact, I think many of "those hams" are already active recruiters
for the mode. Whether they succeed or not is another question.

See N0BK's excellent post, too.

Anybody can "recommend" or "recruit", but an actual demo speaks much louder.

The tests "back then" involved writing essays, blue-book and all. Memorization would not get you past the RI.

>Of course, by the time I took my tests in the 60s, all I had
>to do in the schematic department was to recognize a few schematics on a
>multiple-choice test.

My experience was that the diagram (block and schematic) questions were of several types, such as recognizing a circuit or system, filling in a missing block, or completing a schematic.

But since we didn't know what the exact questions would be, it was a bit of a different game.

I remember the schematic diagram on my General written exam. It was a colpitts oscillator. The only reason I knew that was that I had memorized that the split capacitors were a colpitts oscillator and a tapped coil was a hartley.

Has ham radio been ruined since the day I memorized that for the General? :-)

> They're scum.

Even I don't have enough information on those involved to make such an accusation. How can you do so based on a complete lack of knowledge of the individuals involved? What steps have you taken to see that these French lawbreakers do not repeat their crime and that they are brought to justice?

> > > I've been vindicated.

I've never denied operating below 50.200 and having French stations call and work me. In fact, if I hadn't stated so, you'd never have known anything about it.

I get the impression Ed is sorely vexed and he is trying to Get Back
at those who don't accept his lofty, important position.

He's gone over to the snarly dark side of the force and is using
the Word of (PR) Extras:

There shall be NO argument or negative criticsm of anything
spoken by (PR) Extras. There shall be Obedience to Orders
and everyone must march to the same drumbeat. To question
the ARRL or anything it says is heresy and shall be punished
by innuendo, implication of wrongdoing...eventually resulting
in excommunication.

That's called "Freedom of Expression" in the democratic process.
Everyone is free to say what they want, but only if they agree to
side with the Word of (PR) Extras...and the ARRL. :-)

Always happy to have the Word from an Amateur Radio Historian. Too bad the poor baby isn't one of those... :-)

> Can you state, with absolute and certain knowledge, that these basic
>communications techniques will NEVER be used again, nor will they ever have
>ANY commecial application?

On-off codings are in use today in keyless auto lock systems. The difference is that they do NOT use any morse codings or anything similar.

>Or ANY military application?

Yes...by the US military's own descriptions of its communications capabilities, doctrine, and future planning. The future of the US military lies in the "digital battlefield." The "digital battlefield" does not include morse codings.

>Or any EMERGENCY applicaiotn?

Whevever I encounter ANY public safety radio service use of morse codings to handle any kind of emergency, whether "applicatiotn" or application, I will acknowledge it.

> If the answer is "no" (and there is no way that a professionally trained
>engineer can say "yes" to it) then "on-off keying" will continue to be
>entertained for SOME applications.

How can a nurse who is without practical experience in the professional world of radio (except for being an amateur) be able to "judge" what is "possible?" :-)

Is this another "do as I say, not what I know" kind of things?

Are morse coding systems "entertaining?" Only to a select few...and apparently most of them overly-prideful amateurs. :-)

>It will never be the "mode du jour" it was
>in the 20's and 30's, but it will always have practical applications.

In this new millennium, the standards and practices of 80+ years ago are passe' and of little use except to a minority of overly-prideful amateurs. Radio as a communications medium is only about 108 years old.

The US military disestablished morse codings for long-haul HF communications a half century ago and commercial communications carriers were in the process of eliminating morse codings at that time.

The "practical applications" of morse codings in on-off keying exist only the amateur world. On-off keying still exists in automotive keyless entry systems but the coding in a much more complex and secure digital system far from morse methods.

Public safety radio services long ago gave up on morse codings. Their primary modes are voice, followed closely by data of various kinds.

The Titanic disaster happened in 1912, 90 years ago. Quit dreaming of "saving anyone" by morse code modes today and concentrate on what mode DOES work.

Hate Australians, do you? Ey? :-)

> And it's not a denigration of the school. It's a denigration of the time
>you wasted since you keep making such glaring errors, Your Ignorantness.

Poor baby, had your own night classes' grades in "failure?" Keep trying.
You are very trying in here so extend that to your own night classes.
Perseverence is the key, but try not to insult the instructor again. :-)

>>College credit courses at night are a very convenient time for all
>>those who must work during daytime hours.
>
> Too bad you wasted both.

Oh? Who has the comfortable retirement, good income, and two
houses (mortage and lien free)? Who has had a career in electronics
engineering design, covering a wide range of electronic disciplines
that include different types of radio?

Who actually "worked" on HF long-distance radio communications
nearly a half century ago? Who actually earned a formal degree in
electrical engineering?

Did the poor baby do all those things?

>>"Write trash?" I've written professionally on several different subjects
>>but none of them concerned sanitation departments or refuse
>>collecting. You must have someone else in mind.
>
> In this forum, all you write is trash. I am not the only one who holds
>that opinion. It's you alright, Your Wastefullness.

I'll put that down in the "Word of (pre-restructuring) Extras" list.

No one may contradict a (PR) Extra without incurring all sorts of insults
and personal attacks...all of which being due to some petty jealousy
and perceived wounding of egos. No problem...it seems to be SOP
among the baby-boomer Extras.

>> There are certain regulations
>>in US amateur radio which I would prefer to be changed, but I think
>>(and have stated many times) that amateur radio is a fine hobby.
>
> Un huh...You have only spent the last several years berating every
>single aspect of Amateur Radio without quarter.

Incorrect again. Oh, my, how those baby-boomer Extras are stubborn!
:-)

>>"Denigrate amateur radio operators?" Only certain ones, most
>>notably those who are "pre-restructuring amateur extras" that
>>emphasize morse code skill over everything else in ham radio.
>>It is the INDIVIDUAL that may be a target of negative criticsm,
>>not the hobby.
>
> Only everyone that is in this forum, save for Brian, and I am not so sure
>about him, either. And of course let's not forget your anonymous buddy "MegHz"
>(whom I see has resurfaced lately), and I am not so sure "he" is not you
anyway.

Poor baby is still seeing monsters under his bed, even in late fortysomething
age!

The poor baby can automatically "see" everyone else accessing this
newsgroup? I don't think so. That is a metaphysical quality that doesn't
come with the amateur radio license, any class. It's an emotional thing,
a surrogate for failing to remain a non-commissioned ranking in some
military service...the Total Obediance To Orders as they are Issued by a
Higher Authority (such as the ARRL). Not uncommon, but it is perverse.

> You are a pathological liar, Lennie, and then you lie about your lying.

:-)

You can extend this to (1). Being an alien from outer space, out to destroy all amateurkind; (2). Being a sleeper Al-Queada member out to air-bomb the W1AW twin towers with a hijacked R/C aircraft; (3). Being part of a Secret Plot to destroy Heroes of the State (aka amateur radio extra classes) and prevent their Ruling of Radio (as they deserve to do).

[...just some suggestions to spark creativity...]

Now it is rather well-known that those whose opinions are countered in newsgroups are justified in their paranoia. They "know" that Others Are Against Them. All those "Others" lie, cheat, steal, and probably have underarm odor. They do not Know The True Condition as exemplified by the Masters Of The Amateur Universe (such as poor baby). They will never know because only the amateur paranoids can KNOW what is best...and that justifies the use of all manner of insults and personal attacks.

> What a Putz.

QED. Failure to Listen To Orders while in ranks...or not appreciating the Glory and Wisdom of the Codes of Morse...is automatic permission to insult and engage in personal attacks. It is the Word of (PR) Extras.

That is Soooo encouraging to enticing others to join amateur radio. :-)

Lots of radio amateurs use morse daily. Maybe you've heard about it. So
in amateur radio, morse isn't passe' and little used at all.

Just what constitutes "overly-prideful", Len? Would that be anyone who
enjoys participating in something which you've never attempted?

The ham radio bands are a small fraction of radio space, and in fact just one of several services available to the public (e.g. ham, CB, GMRS, FRS). With this said, I agree with armageddon that a no-code HF/DX service is warranted. It's like the internet; enabling people to communicate freely is good policy.

Jim Hampton is also right about the need for regulation in my opinion, but this must serve the general public and not just the monied commercial interests. Ham radio has been under fire lately because it cannot match the economic arguments and resources of big businesses that are competing for its frequencies. Ham radio must win using public safety / emergency preparedness arguments. In a direct competition with business, it will never win using just a "rights of people to talk about their hobbies and passions" argument.

Truly public no-code / no-theory radio is worth lobbying for, but it's not the same as ham radio. It must be a distinct service with its own set of frequencies, and ham radio must continue as a high-quality technical and operational craft. The two can coexist and even benefit each other, perhaps through shared technology and compatible operating practices.

I am amazed by the depth of training that the ARRL provides for emergency network control operators. I thought for a minute about how rewarding it would be to help run communications during a hurricane or other disaster. But when I saw the Amateur Radio Emergency Communications courses, I realized that the people who do this are really, really good at what they do. And what they provide is certainly in the public interest. I want these people on my side and can understand their need for protected frequencies on all bands to do what they do best. Maybe someday I'll take the plunge myself.

What constitutes a good ham is both operational and technical depth. Thankfully, ham radio has been self-policing in training good operators. It has addressed technical depth mainly through theory exams. One can argue about the effectiveness of these exams, but at least it's an effort.

Morse code is both technical and operational in my opinion. Technically, it's easier to bring a damaged radio back online for CW transmission than for voice. CW can be sent even if a microphone has been damaged. CW can be sent as modulated RF splatter even if a radio's narrowband circuits have been damaged. Anti-code people will say, "yeah right, how often is that necessary?", but ham radio as it has defined itself is all about being technically and operationally *ready* to do this. I guess that's the point; ham radio has shown

itself throughout the years as more than just a recreational communications service.

Not all public communication has to define itself in these terms however. Armageddon should have the right to DX freely somewhere on the HF spectrum, without having to fight government bureaucracy or the ARRL. Likewise, ham radio should have the right to continue protecting its unique purpose. In these terms, ham radio should be protected like any other "commercial" service that Jim listed - air, police, broadcast, etc. It's ultimately up to the FCC to make sure all these needs, including armageddon's need for truly public services, are met.

Sky
(Opinions are my own, etc.)

>>the theory and application of transistors. Further, it used the
>>standard symbolism of the transistor whereas many textbooks
>>of the 50s and some of the 60s used a non-standard symbolism.
>
>Yeah, I know. I had one. Still around somewhere.

Ah, but did you LEARN anything from it? :-)

>Doesn't answer the question though - was RCA behind the times by not
>including transistors in the "Radiotron"?

Which "RCA" are you talking about? RCA-Montreal? RCA-Camden?

At RCA EASD we used mostly solid-state active devices, the only exceptions being CRTs, magnetrons for the civil aircraft radars, and TWTs in the EW group.

>It's clear you're avoiding the simple truth that, in fact, the transmitters
>were designed, built and installed by others at taxpayer's expense. And a
whole
>team kept them going. You were part of that team - and not the leader of it.
>
>Is any of the above not true?

Not true. "Trick Chiefs" (shift supervisors, as I was as an E-5) were the leaders on swing and midnight shifts. Since all teams worked all shifts, shift supervisors were leaders 2/3 of the time.

At ADA we also installed some of the transmitters. Considering that there were 43 HF transmitters there at the beginning of 1956, we couldn't have all "built them," could we? Could you or have you built a 1 KW transmitter? A 5 KW transmitter? A 15 KW transmitter? A 50 KW transmitter that was used as a 40 KW output linear amplifier for SSB?

Would you not accept "being a leader" unless one had the rank of Chief Signal Officer, United States Army?!? :-)

>I was born in 1954. Being older doesn't make you right, yet you talk as
>though it does.

True, and neither does being "an Extra since 1970" make you some
great guru of amateur radio by the same logic... :-)

>Pathetic, spiteful commentary from an alleged electronics
>"engineer" without degree...or just a spiteful commentary from a wannabe.

I was an engineer without formal degree for years and I was an engineer
with a formal degree for a few more years. In the former I did want to
be one, studied, learned, and applied and I was given full engineering
design responsibility at work to do so. My patent was granted under
the former period.

My employers kept giving me regular salary checks and that was
what really counted...or was it? Can you pay off a mortgage with
some certificates suitable for framing? Will they automatically buy
food?

>>Is theory out of date or isn't it? Try answering the question.
>
>Why? You never answer mine.

Aw, poor baby...gonna take your ball and go home? :-)

>But I'll answer anyway: Theory rarely goes out of date. And old technology
>often holds the answer to modern problems. Old technology is not necessarily
>"bad" or "obsolete".

True enough. If so, why must old standards and practices be kept because
a few want to keep a hobby static and unchanging?

>Nope. HR was a great magazine. Too bad it's defunct. All we have left is old
>copies and reprints.

Up to 1990...just a dozen years ago. How old is "old," James?

Ham Radio Magazine is still being published... :-)

>There's an online index of HR articles. Turns out the vast majority of them
>were written by hams. Also turns out I know several of the authors.

Do you channel Jim Fisk to get to "know" those several? :-)

Do you know any of the HR staff? :-)

>>Why do you consider lack of praise to be "ridicule?"
>
>It's the name-calling ("Jimmie", "Nursie", "Herr Heil", etc.) that I refer

How do you wish to be addressed? Should I use "sir?" Do you want
a salute each time you enter a newsgroup? Should we bow and
genuflect? Let us know the proper court protocol.

>>>How many amateur radio transceivers have you built with your own money and
>>>time? How many have you designed?
>>

>>Six, but those were not solely for amateur radio although each one could
>>cover at least one amateur band.
>
>Sounds like they were not ham gear in the usual sense. A CB set can be used
>on 10 meters, for example.

I never stated that they were FOR amateur radio, did I?

A standard "CB set" (the ones tuning the 27 MHz CB band) cannot work
directly on 10 meters in any example. They aren't designed to do so
and are not front-panel retunable to do so. Legal "Standard CB sets"
have to be modified behind the front panel to work on 10 meters.

>Uh huh. Give us some more than that. Were they HF?

Sorry. The Word of (PR) Extras, others that is, does not allow
non-Extra curricula vitae to be posted in here. :-)

>A receiver-transmitter is not a transceiver.

The word "transceiver" is a contraction of "transmitter-receiver."

The etymology of the contraction did not start in amateur radio.

If those contractions come too quickly, better call your doctor
soon...

>>>Sure - I buy from them regularly.
>>
>>Of course you do...you access their web site, imagine things, then
>>say you "buy" from them regularly. :-)
>
>No, I buy parts from them.

Please make up your mind. Do you "buy regularly" or have you just
"bought" from them on a casual basis?

>>>Back in 1975 I desined and built a digital dial adapter using TTL ICs. Would
>>>work with almost any HF receiver. Pretty advanced for the time.
>>
>>I'd say it was damn well advanced if you could get TTLs to display
>>anything! :-)
>
>7 segment LED readouts

Now, now, Mr. Extreme Literalist, you described your "digital dial adapter"
as "using TTL ICs." There are NO TTL ICs that display anything and, by
themselves, are useless as "dial" indicators of any kind.
:-)

>Not patentable - it was obvious to anyone skilled in the art. I wrote it up
but
>a few months later a similar design appeared in QST. Author was W1DBM - Phil
>Rand. Great minds think alike..

I'm sure "great minds" think highly of themselves... :-)

>>You built "heterodyne transmitters?!?"
>
>Yes. The output frequency ius generated by heterodyning rather than
>multiplication. Didn't you know that?
>
>> Did the FCC ever catch you
>>"heterodyning?" What did you convert those receivers from? :-)
>
>Obviously you didn't know it.

Mr. Extreme Literalist, to "heterodyne" someone is to put a transmitter frequency very close to theirs so as to make the listening party hear only the squeal of a "heterodyne" beat note. Deliberate interference is against US amateur regulations. It's illegal. Tsk, tsk.

Transmitter frequency generation by "methods other than multiplication" has been done for years in commercial or military radios. One of the first commercial uses was in the civil aircraft radio band 108 to 137 MHz beginning with mixing two selectable-crystal oscillators to achieve a "channel" tuning. The term "heterodyne transmitter" seems to be common only to VERY old ham radio literature... :-)

>>No problem. You are welcome to rummage through our recycling can
>>any week before Monday (pick-up day in my neighborhood). All kinds
>>of "neat" things in there... :-)
>
>More putdowns.

According to K4YZ, the Word from (PR) Extras says I have dismembered human remains in my recycling can!

Do you think anyone in my neighborhood has dismembered human remains in their refuse cans?

>>Or will you deride it, denigrate it, and otherwise damn it if it doesn't have
>>"CW" capability?
>
>You're the expert at deriding and denigrating.

You didn't answer the question. What if it doesn't have "CW" capability?

>>>Like your nostalgia for 1954?
>>
>>What "nostalgia?"
>
>You mention it ad infinitum, as if it had some significance to today's
>amateur radio policies.

Wrong year. I mention 1953, specifically late February of that year, to illustrate a point about HF radio communications in the US military.

In 1948 the US military decided to eliminate morse codings in long-haul HF communications, all branches. They did.

>>So...you did NOT design something, but rather assembled a kit that
>>someone else designed. [at least you admitted it outright...there's
>>hope for you...]
>
>That is only one of my transceivers.

The word "transceiver" is a contraction of "transmitter-receiver." At one time there was a word called "remitter" that was a contraction of "receiver-transmitter" but few used it, being replaced by "transponder," a contraction of "responding transmitter."

>>Just a minute while I get a notepad and start scribbling
>>an endorsement of you for a medal from some important scientific
>>institution.
>
>I don't need or want your endorsement.

Oh? Your coming medal is a "done deal?" :-)

Let us know of the Great Event and when the news is posted on the ARRL website.

Cecil, sometimes yo're the poster boy for all he illiterate genuises
in the world. On this issue you have nary a clue. At the outsetther was
no problem with medical waivers- for those who truly had medical
conditions. It was when the scammers realized that no one was minding
the store that the trouble, and opposition, began. All that was needed
was some effective means of making sure that people who claimed
disability actually had one. Didn't happen.

We US hams don't realize how fortunate we are in having a public
input process. Most countries - including the one where I was the
specialist who re-wrote the amateur regulations several decades ago -
do not, and whatever rules the Radio Administrtion folks come up with
are the ones that go into effect with no recourse. Lucky and rare
is the country where the rule writer is a knowlegeable ham. Fortuneatley
for us hams many of them look to the FCC rules - minus the obvious goofs -
as a startinh point.

I will take that as a "NO" in as much as yo agreed with my assertion.

I win.

>>Or ANY military application?
>
>Yes...by the US military's own descriptions of its communications
>capabilities, doctrine, and future planning. The future of the US
>military lies in the "digital battlefield." The "digital battlefield" does
>not include morse codings.

"Morse codings" was not the subject, Oh Misguided One. "On Off Keying"
was.

You spun, got disoriented and went the wrong direction again.

>>Or any EMERGENCY applicaiotn?
>
>Whevever I encounter ANY public safety radio service use of morse
>codings to handle any kind of emergency, whether "applicatiotn" or
>application, I will acknowledge it.
>

ON OFF KEYING, Lennie. The term "morse codings" (sic) was your
introduction.

Losing your "focuss" Lennie? Wal-Mart has some fine reading glasses under
$15.00.

>How can a nurse who is without practical experience in the
>professional world of radio (except for being an amateur) be
>able to "judge" what is "possible?"

Who (other than you) said I am "without practical experience", Lennie?

I acknowledge that you have greater theoretical knowledge, however that does not preclude me from ALL knowledge or experiece, your wishes to the contrary notwithstanding.

>In this new millennium, the standards and practices of 80+ years
>ago are passe' and of little use except to a minority of overly-
>prideful amateurs

The subject was "on-off keying". Nothing was ever said about Morse Code or Amateur Radio.

The introduction of that was your doing...Sleight of Amateur Radio noted.

>Radio as a communications medium is only
>about 108 years old.

As is your hatred of it.

>The US military disestablished morse codings...SNIP

ON-OFF KEYING, Your Putziness.

Sheesh! What a short attention span!

>The "practical applications" of morse codings in on-off keying...SNIP

No one said anything about Morse. That was yours, Lennie.

>The Titanic disaster happened in 1912, 90 years ago. Quit
>dreaming of "saving anyone" by morse code modes today and
>concentrate on what mode DOES work.

On Off keying works. That YOU can only conceptualize that as being "encoded" via Morse Code is your own failing and narrowsightedness, Lennie.

Butthead.

Hi Phil,

>Using a radio transmitter to work DX is a privilege granted by the
> government, not a "right".

Using a radio transmitter period is a privilege granted by the government. This is a good thing.

Responding to the "natural" propagational characteristics of the alloted band of operation, as long as one observes the power and frequency limits, antenna height restrictions, etc. of said band, should NOT be.

This of course is IMHO.

>>(Opinions are my own, etc.)
>
> The above is settled law, not "opinion".

That may be so, but let's not forget...most "settled law" began as someone's opinion. Just because it's on the books, doesn't necessarily make it right.

>
>True enough. If so, why must old standards and practices be kept because
>a few want to keep a hobby static and unchanging?

Who in this forum has promoted the ideas of "unchanging", 'static" or "old
standards"..???

The only "old standards" I have seen anyone truly promote is those of
decency, responsibility and gentlemanly conduct on the air.

Do you suggest that THOSE "old standards" be discarded?

In Amatuer radio or ANY avocation, Lennie?

>Ham Radio Magazine is still being published..

It's been reprinted. Perhaps even RE-published. "Ham Radio" magazine is
not currently being published.

>>There's an online index of HR articles. Turns out the vast majority of them
>>were written by hams. Also turns out I know several of the authors.
>
>Do you channel Jim Fisk to get to "know" those several?

You obviously do since you think the magazine is still being published in
2002.

>>It's the name-calling ("Jimmie", "Nursie", "Herr Heil", etc.) that I refer
>>to. Many other examples.
>
>How do you wish to be addressed? Should I use "sir?" Do you want
>a salute each time you enter a newsgroup? Should we bow and
>genuflect? Let us know the proper court protocol.

You yourself have stated that like begets like, Lennie, and I cannot recall
a single instance where Jim Miccolis has called you ANYTHING except "Len".

So where do YOU get off calling him "Jimmie" and other such things? he
continues to steadfastly avoid such conduct, yet you egg it on.

Of course everyone EXCEPT you knows where that comes from.

>>A receiver-transmitter is not a transceiver.

>The word "transceiver" is a contraction of "transmitter-receiver."

Under current technology, a "transceiver" has components that are shared
for the transmit and receive cycles.

A receiver-transmitter does not. It is a seperate transmitter and
seperate receiver in the same package.

Miss that at the K-tel School of Fly-by-Night Radio Engineering, did you?

>The etymology of the contraction did not start in amateur radio.

Doesn't matter WHERE it started, now does it?

>If those contractions come too quickly, better call your doctor
>soon...

And he'll tell you you just wasted time when what your SHOULD have been
doing was going to the hospital...But I bet that's something else you have no
practical experience in, eh Lennie?

>I'm sure "great minds" think highly of themselves

Then I acknowledge what a "great mind" you are, Lennie, cuz you suuuuure do
think a lot of YOUR self!

>Transmitter frequency generation by "methods other than
multiplication"...(SNIP)

Lennie, Lennie, LENNIE! This is a newsgroup for the discussion of the
Morse Code TEST issue! NOT the discussion of RF generation techniques.

Or have you forgotten your OWN admonishments to others on that issue...????

>According to K4YZ, the Word from (PR) Extras says I have dismembered
>human remains in my recycling can!

Oh no, Lennie...I don't think you are so stupid as to leave them in the
recycling can...you DO have (I think...) enough sense to put them in a trash
bag. Hopefully one that does NOT ahve anything with your address in it.

>Do you think anyone in my neighborhood has dismembered human
>remains in their refuse cans?

Do YOU think that it's impossible? Never happened? Never will?

>In 1948 the US military decided to eliminate morse codings in long-
>haul HF communications, all branches. They did.

No, they have not.

>The word "transceiver" is a contraction of "transmitter-receiver." At one
>time there was a word called "remitter" that was a contraction of
>"receiver-transmitter" but few used it, being replaced by "transponder,"

>a contraction of "responding transmitter."

Now with Lennie's appearence in rrap, we also have the transputzer
(transmitting Putz) and the rebuttheader (responding butthead)

This is a candidate for the LATOTY award (Lame Assed Troll Of The Year).

There is no requirement for anyone to know the call letters of the repeater through which they are communicating. The FCC requires identification (it can be voice or Morse) so that they can track down the owner of the repeater in case of problems.

Actually, it happened by becoming irrelevant. Next time, be careful
what you wish for.

Which begs the whole question of who gives a rats ass how fast you can beep?
For the record, I don't care one way or the other whether you can copy Morse
or not. In fact I kinda hope you can't, since then I'll probably not run
into you on the band, since the majority of my operation is on Morse.

So Phil, the law's never "settled" in the favor of the "opinion?" Many were of the opinion that the speed limit should be raised to 65 m.p.h. in certain areas of the country...it subsequently became the law.

I understand that passion can cloud one's objectivity and your point is well taken, HOWEVER, things can be changed...particularly if the opinions of enough like-minded folks are translated into legislation. It bears repeating, just because something's "on the books," doesn't necessarily mean it's right.

Not tonight. The Morse disability to proceed beyond 5wpm became
irrelevant so the associated waiver became irrelevant.

Funny, that. One of his sock puppets claimed to operate QRP on "3M56",
but despite a receiver running on that frequency for nights on end,
haven't heard the callsign in question.

There's neither snobbism nor elitism, merely a
wish to maintain standards in what is a technical hobby.

It is not lawful to be a broadcaster in Ham Radio.

However, if your refer to operating, and your perceptions
are that of operating, then you are a CBer, for that is nothing
but operating, and does not need examination.

Ham Radio, however, is a technical pursuit for those suitable
qualified. As I said, there's no elitism here - you yourself are welcome
and, indeed, invited, to make the grade.

Sorry, but all the M3 exam test is operating, and that's silly. You wouldn't
test for the ability to operate a mobile phone, neither are you tested for
such
for the CB licence.

Cecil, where do you hear Neal Boortz? I heard him only once while working in the very southern part of Illinois and thought he was pretty funny. He had Dick Gephardt/MO on as guest, and introduced him as "My favorite Bed-wetting Liberal."

The syndicated Neal Boortz Show appears on WTAW in College Station, TX.
Years ago, he was a disk jockey on that station while attending Texas A&M.
Neal's a Libertarian so he gives both Democrats and Republicans holy heck.
He's got a web page at: http://www.boortz.com/

Sure there is - "Never try to resaon a man out of something he wasn't
reasoned into".
There's no reasoning NCTAs into the fact that learning CW is merely
learning the most basic radio communications.

More claptrap from this source.

What he said is _WRONG!_

BR68 (which Mr Sockpuppet refuses to discuss) has "self-training in communications" as the reason for the Amateur Licence. It goes on to add "...which use includes technical investigations" As a subset repeat subset (as in SUBSET) of this.

Little wonder really why Mr Sockpuppet refuses to discuss it. It doesn't fit in with the law of the land in his Liberal Republic.

No, just to put a label on it...the Word of (PR) Extras!

That's far more civil than being accused of dismembered
human remains in my recycling can.

Is telling them that they won't learn CW if there is no Morse code
requirement your way of reasoning with them?

>
>I thought Curt LeMay wanted SSB radios in his airplanes?

Yes he did...probably didn't think much of OOK CW for SAC purposes.

But, Brian, remember the dictatorial policy in here...nobody but nobody can discuss anything but "amatuer" or amateur radio in this newsgroup. Any mention of non-amateur radio applications is expressly forbidden by the PCTA.

It's okay to mention Curt LeMay because he was a HAM-general...as the ARRL would describe him. :-)

> When it comes to PRESENT day HF long distance communications, who has MORE
>practical experience in Military, Amateur and point-to-point emergency systems,
>Lennie?
>
> It's NOT you.

Okay, give us the "answer." Cite your "military HF long distance communications experience" in detail, including number of hours and duties as a military person.

You are going to trot out your "commission" in the TN State Guard, right? :-) Yes, a once-a-month good 'ole boys get-together where everyone gets to wear cammies and act tuff. You were the "radio officer" of a whole brigade, right? Only problem is that the "brigade" was less than the size of a normal Army battalion. A first john as THE radio officer of a brigade? Never happen in the real army. Of course the real army doesn't use WW2 surplus field radios, either.

Oh, yes, "point to point emergency communications." That implies NOT being mobile, thus negating those stories of being a Clooney clone riding them ambulances. Did you pay for those hospital radios, James? [or is it another personna you are attempting to imitate?] .

Did the first john (at fortysomething) do all kinds of "emergency communications" in amateur radio? If so, where are all the "numerous awards" or other citations that should have appeared on the ARRL news?

Stevie, or whatever name you think you are now, the answer to your own question is NOT YOU!

>
>>> Un huh...You have only spent the last several years berating every
>>>single aspect of Amateur Radio without quarter.
>>
>>Incorrect again. Oh, my, how those baby-boomer Extras are stubborn!
>
> Damn, Lee-o-nar-doh...Just how many times can you lie in one day and
>still look yorself in the mirror to shave? But then to, I guess you don't ahve to
>look yourself in the eyes, now do you...???

You are using swear words again.

Go back to accusations of murder and dismemberment. That's more
in your line of "practical experience."

> How many people are licensed Amateurs due to YOUR tutelage, Lennie?

None. Only professionals. Since you've never been a professional in
engineering, you have no "practical experience" in understanding such.

NAME all those who you have "tootled," tootles. Try to exclude family
members. Remember that anyone may ask them for confirmation so
set that up quickly. You are welcome to use the Deignan Hawaiian
post box technique since that delays confirmation.

>How many Amateur test have YOU proctored?

None. I'm a professional, remember?

But I have "proctored" tests in electronics. No amateur license required
there.

How many amateur or "amatuer" tests has the big Stevie proctored?
With what VEC? At what times? Be accurate and include a full count
in numbers. Remember that anyone can research that and verify if you've
been telling the truth.

>How many classes have YOU taught...???

Only two. But those were professional classes on specialized subjects
in electronics.

> WE know the answer.

You "know" nothing. Quit shaking your "we-we" again, it looks obscene.

But it does fit the kind of person who accuses others of murder and
dismemberment because he can't succeed in "getting others" in a
newsgroup.

Get medical-psychiatric help, Stevie. This may be your last chance
before you go totally over the hill.

Oh? You've been pregnant? Did Arnold Schwarzennegger build
his comedy film on your experience? :-)

>>I'm sure "great minds" think highly of themselves
>
> Then I acknowledge what a "great mind" you are, Lennie, cuz you suuuuure
>do think a lot of YOUR self!

Looking in the mirror again? You do that a lot...

>>Transmitter frequency generation by "methods other than
>multiplication"...(SNIP)
>
> Lennie, Lennie, LENNIE! This is a newsgroup for the discussion of the
>Morse Code TEST issue! NOT the discussion of RF generation techniques.

Is it? I thought it was expressly for Stevie to "get off" by having
tantrums anytime she wished...bashing all those "civilians" who
didn't Obey His Commands as an Authorized Dill Instructor.

> Or have you forgotten your OWN admonishments to others on that
>issue...????
>
>>According to K4YZ, the Word from (PR) Extras says I have dismembered
>>human remains in my recycling can!
>
> Oh no, Lennie...I don't think you are so stupid as to leave them in the
>recycling can...you DO have (I think...) enough sense to put them in a trash
>bag. Hopefully one that does NOT ahve anything with your address in it.

Are you now trying to say I engage in murder and dismemberment
of my neighbors?

That's a strange accusation. Does it come from one who has
"practical experience" in that activity?

>>Do you think anyone in my neighborhood has dismembered human
>>remains in their refuse cans?
>
> Do YOU think that it's impossible? Never happened? Never will?

So...you are still accusing me of MURDER and
DISMEMBERMENT of human beings. Why?

Are you so starved of material for "getting back" at your
"enemies" that you invent baseless accusations and set
yourself up for libel?

>>In 1948 the US military decided to eliminate morse codings in long-
>>haul HF communications, all branches. They did.

>
> No, they have not.

Sorry, but you aren't the US military and you weren't even born in
1948. You have no "practical experience" in US military long-haul
HF communications nor were you in any service branch that did.

Go back to accusing me of murder and dismemberment. That's
more in your field of "practical experience."

>>The word "transceiver" is a contraction of "transmitter-receiver." At one
>>time there was a word called "remitter" that was a contraction of
>>"receiver-transmitter" but few used it, being replaced by "transponder,"
>>a contraction of "responding transmitter."
>
> Now with Lennie's appearence in rrap, we also have the transputzer
>(transmitting Putz) and the rebuttheader (responding butthead)

No. All anyone has is a very sick, very amateur extra who is in
dire need of medical and psychiatric help.

AH, but he hasn't read about "Rabbit Ears" yet, has he? That was a most
gratifying
photo of him being led back to jail in CHAINS and LEG IRONS. Many of these
cats think they have the biggest radio cajones in the world--until Uncle
Charlies busts 'em! I like the way the spectrum is managed now. I can't
see any reason for
valuable HF space to be wasted for someone to be able to go "tan-fer, thar,
shore
thang thar, garantole ye thar, mercy me thar, I heered that thar, I did
thar, git back
that" (shudder).

Well, there's a way to upgrade his status. Sked a CW QSO with him and use
13 or 20 WPM, and then assuming success, send him a QSL card. Then
he can post it on the wall in his shack next to his license.

> All of them.
>

Larry must have gotten his extra before, when was it, 1983, when
the VE program was started. I took my Tech in 76 at the field
office in New York City. Novice code and general written.
Part of the code test was sending. They had a straight key attached
to a small table you used to send a message. Did about a minute
and the examiner said "You're good, now to the written".

Larry said "all of 'em" so that means no retests.

Dave, what are "principles of the moment?"

I've been consistent over my entire amateur career about not working DX out
of band.
I've been consistent over the past 5 or so years that I think there should
be no Morse Code exam.
I've been consistent over the past 5 years that I think Incentive Licensing
is arbitrary and unnecessary.

You've been consistent that you will work any amateur out of band even after you learn they are out of band.
You've been consistent in belittling my DX experiences.
You've been consistently a jerk.

Nice idea, but I doubt it will fly. Sets up a whole set of arguments about what is a "reasonable number" of questions, and whether other modes get a similar requirement of "reasonable number". Plus the complexity of giving everyone a code test as part of the written, and correlating text sent, etc.

I doubt NCVEC or FCC will go for it.

The fire zone (six small fires so far) is all the way across the other
side of the stste, but if it was possible to siphon off some of your
water to put them out we would gladly oblige.

The six day 90-100 degree heat wave finally broke today but it's
still pretty warm out. Fortunately our house has central air
conditioning as does our car and most places that we go to so we'll
survive.

Good excuse to do some daytime hamming.....

>>recall a single instance where Jim Miccolis has called you ANYTHING except
>"Len".
>
> Attention Deficit Disorder? Miccolis called me "Lenover21" and
> has used my full "signature" name.

Hmmmmm.....Your tagline in the e mail address is "Lenover21". It can only be that way if YOU set it up that way, so one can assume this is OK by you. Furthermore, if you don't want people calling you "Leonard H. Anderson", perhaps you shouldn't SIGN your posts that way.

In either case, neither is belittling nor deminutive. "Jimmie" is.

>>So where do YOU get off calling him "Jimmie" and other such things?
>he
>>continues to steadfastly avoid such conduct, yet you egg it on.
>
> Where do YOU get off using "Lennie?"

That was not the question. Where do YOU get off calling Jim Miccolis "Jimmie" whan all he refers to YOU by are identifiers and signatures YOU have promulgated?

This is about YOU, Lennie...Not me.

>Do you really "get off" doing things like that?

Big, fat JUICY one's, Lennie. Blow's by cork eery time I see how well it causes you to pop yours. And you just let me have a big one right then! Thanks!

>> Of course everyone EXCEPT you knows where that comes from.
>

I'd dare say I have been to the hospital with more than one pregnant
woman. I have yet to meet one who said "Sure am glad I stayed at home just a
few minutes longer talking on the telephone".

>> Lennie, Lennie, LENNIE! This is a newsgroup for the discussion of the
>>Morse Code TEST issue! NOT the discussion of RF generation techniques.
>
> Is it? I thought it was expressly for Stevie to "get off" by having
> tantrums anytime she wished...bashing all those "civilians" who
> didn't Obey His Commands as an Authorized Dill Instructor.

Now that you've cleared that up for everyone, Lennie, do we have your
permission to discuss anything OTHER than the Morse test issue? Or is this
still on a case-by-case basis as YOU seem fit?

So far, Lennie, YOU are then only one suggesting what others should and
should not discuss. Been very rude and demanding about it on more than one
occassion.

Or is that how you provide incentive to college candidates to go into
"professional electrical engineering"...?!?!

>Are you now trying to say I engage in murder and dismemberment
>of my neighbors?

Who said your neighbors, Lennie?

>That's a strange accusation. Does it come from one who has
> "practical experience" in that activity?

Why? Are any of yors missing lately?

>>>Do you think anyone in my neighborhood has dismembered human
>>>remains in their refuse cans?
>>
>> Do YOU think that it's impossible? Never happened? Never will?
>
> So...you are still accusing me of MURDER and
> DISMEMBERMENT of human beings. Why?

No, Lennie....YOU asked me if I though any of your neighbors had
participated in that. I asked you if it was beyond the realm of the
impossible.

I DO know that there are licensed Amateurs in your neighborhood that might take up the sport if they knew what an insulting Putz you are.

>Are you so starved of material for "getting back" at your
> "enemies" that you invent baseless accusations and set
> yourself up for libel?

It was your insinuation, Lennie. I've just had fun with it. You should keep track of the thread better.

>>>In 1948 the US military decided to eliminate morse codings in long-
>>>haul HF communications, all branches. They did.
>>
>> No, they have not.
>
> Sorry, but you aren't the US military and you weren't even born in
> 1948. You have no "practical experience" in US military long-haul
> HF communications nor were you in any service branch that did.

Sorry, Lennie. Not true. Since you delight in digging up personal tidbits from records, you should review my duty status from June of 1981 to December of 1981.

Furthermore, the United States Army still trains and uses certain members of their forces in manual telegraphy. Sorry it irks you. You have been provided names, references and even phone numbers as to who can verify this.

Sucks to be you, Eh Lennie?

>> Now with Lennie's appearence in rrap, we also have the transputzer
>>(transmitting Putz) and the rebuttheader (responding butthead)
>
> No. All anyone has is a very sick, very amateur extra who is in

> Okay, give us the "answer." Cite your "military HF long distance
> communications experience" in detail, including number of hours and
> duties as a military person.

Not necessary, Lennie. I am not as impressed with myself as you are with
you.

>You are going to trot out your "commission" in the TN State Guard,
> right?

Nope. United States Marines. Federal (not State) service. Active Duty.

>Oh, yes, "point to point emergency communications." That implies
> NOT being mobile, thus negating those stories of being a Clooney
> clone riding them ambulances.

Hmmmmm..."Clooney clone riding ambulances". Cute...very cute. But nope.
Not in EMS.

>Did the first john (at fortysomething) do all kinds of "emergency
> communications" in amateur radio? If so, where are all the
> "numerous awards" or other citations that should have appeared on
> the ARRL news?

Who said anything about the ARRL, Lennie? And is the ARRL the ONLY agency
that would promulgate an award or certificate for public service?

I think not.

>Stevie, or whatever name you think you are now, the answer to your
> own question is NOT YOU!

Nope. Sorry, Lennie. Not true. Sorry you don't believe it. But you
don't have to. It's not required.

>> How many people are licensed Amateurs due to YOUR tutelage, Lennie?
>
> None.

That's right, Lennie. None. Zero. Nada. Yor experience in training and
license testing is ZERO.

>Only professionals.

How'd you get them off thier backs long enough to study?

> Since you've never been a professional in
> engineering, you have no "practical experience" in understanding such.

First of all, you make assertions you have no evidence of.

Secondly, we are not discussing "professionals". We are discussing
AMATEUR RADIO.

SOMEthing in which YOU have NO practical experience.

When I show up in "pro.retired.radio.putz", you can safely and accurately
state I have no experience, practical or othrwise. In this forum, however, any
STATEMENTS you make are strictly opinion...and poorly informed opinion at that.

>>How many Amateur test have YOU proctored?
>
> None. I'm a professional, remember?

Not in THIS forum, you're not. At elast if you were an "amateur", it
would be expected that you had some knowledge base to draw from. You don't.
THAt makes you simply ignorant. That we can ALL confirm.

>How many amateur or "amatuer" tests has the big Stevie proctored?
> With what VEC? At what times? Be accurate and include a full count
> in numbers. Remember that anyone can research that and verify if
>you've
> been telling the truth.

Even if the answer were only "1", Lennie, it's still one more than you have
done. That's fine by me.

>>How many classes have YOU taught...???
>
> Only two. But those were professional classes on specialized subjects
> in electronics.

Whew, Lennie! Have you beat THERE too! You taught only TWO classes in
over 40 years of professional endeavour...???

BBBWWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA ! ! ! !

>> WE know the answer.
>
> You "know" nothing. Quit shaking your "we-we" again, it looks obscene.

What are YOU doing looking, Lennie? It's only obscene if you are
watching!

>But it does fit the kind of person who accuses others of murder and
> dismemberment because he can't succeed in "getting others" in a
> newsgroup.

I have "got you" far more times than you THINK you have me, Lennie. Sorry.

>Get medical-psychiatric help, Stevie. This may be your last chance
> before you go totally over the hill.

As opposed to you, who IS over the hill, Lennie?

He had some company. Another signer of the Declaration, one Gouvenour
(sp) Morris managed:

1) to have a wooden leg from one of the few glass windows in the Colonies
as her husband came thru the door.

2) Steal the mistress of the French poobah and start an undeclared naval
war (the XYZ affair).

3) Get sued for paternity at the age of 71.

At the very least he should have a fan club.

Probably not. The rage might cause him to activate an extra
in the marine corpse and they would do a "street gang" hit
on the VE place? :-)

In article <20020714192822.02101.00000412@mb-dd.aol.com>, k4yz@aol.com (Steve Robeson K4YZ) writes:

>> Okay, give us the "answer." Cite your "military HF long distance
>> communications experience" in detail, including number of hours and
>> duties as a military person.
>
> Not necessary, Lennie. I am not as impressed with myself as you are with
>you.

Not an answer. Trot out your qualifications for claiming that the US military planned for NO OOK morse codings in long-distance HF radio communications. Hint: It was explained in US Army Signal Officer TMs which became available through the US Government Printing Office. It has been explained in statements and papers by the US military for public viewing.

Show us the statements to the effect that either long-distance or short-distance or medium-distance radio communications in the US military now uses OOK morse codings.

Note: There are only two US Army MOSs requiring morsemanship. One is for Military Intelligence, one-way intercepting that is not considered "communications." The other is as Special Forces communications sergeant...which only requires the knowledge but does not state that Special Forces USE morse code.

Above all, explain how your USMC training involved the use of HF radio and morsemanship skills. Robeson has never explained his USMC MOS other than making some general, ambiguous statements of "working on a flight line."

>>You are going to trot out your "commission" in the TN State Guard,
>> right?
>
> Nope. United States Marines. Federal (not State) service. Active
>Duty.

Oh, oh, now the poor baby is a commissioned officer in the "active" USMC?!? After receiving a medical discharge? How odd.

> Who said anything about the ARRL, Lennie? And is the ARRL the ONLY
>agency that would promulgate an award or certificate for public service?
>
> I think not.

"Promulgate?!?" :-)

Robeson should not try to use English words beyond his
comprehension. He should not engage in word-play where he
is a mere novice class and is sure to lose.

The ARRL is NOT an "agency." It is merely a membership
organization and a special-interest lobbying group.

>>> How many people are licensed Amateurs due to YOUR tutelage, Lennie?
>>
>> None.
>
> That's right, Lennie. None. Zero. Nada. Yor experience in training
>and license testing is ZERO.

Explain how a hobby activity requires "training."

Explain how amateur radio has different physics than non-amateur
radio.

Explain how no one can possibly discuss getting into amateur
radio without first getting into it...

>>Only professionals.
>
> How'd you get them off thier backs long enough to study?

Are you now thinking of what kind of professionalism?

[it's spelled "their" not "thier"]

>> Since you've never been a professional in
>> engineering, you have no "practical experience" in understanding such.
>
> First of all, you make assertions you have no evidence of.

Purchasing Agents are not considered either "in engineering" or
as "professional engineers."

Robeson has not claimed any other "engineering" experience
other than being a purchasing agent.

> Secondly, we are not discussing "professionals". We are discussing
>AMATEUR RADIO.

It is clear that you think that amateur radio physics differ from
non-amateur radio physics. Ignorance is thus your bliss.

> SOMEthing in which YOU have NO practical experience.

Right now I'm puzzled trying to figure out why US amateur radio
seemed like an interesting hobby to me.

It can't be the emotional instability, the insulting nature of the
frustrated amateurs who think they are "better" than professionals.

>>>How many Amateur test have YOU proctored?
>>

>> None. I'm a professional, remember?
>
> Not in THIS forum, you're not. At elast if you were an "amateur", it
>would be expected that you had some knowledge base to draw from. You don't.
>THAt makes you simply ignorant. That we can ALL confirm.

I am a radio professional regardless of the forum.

That frustrates poor Robeson no end and he obsesses on
trying to "get even" with his imaginary "enemy."

US amateur radio is one of the most highly-publicized hobbies
in the USA. Anyone can find out about it, the activities, the
technology. Since it is a hobby and NOT a trade, guild, or
union, there is NO "training" or "experience" necessary to
either know about it or be interested in it or be disinterested
in it.

Robeson manufactures an Artificial Construct on the "practical
experience" ploy. If that is "necessary" to enter ham radio,
then there would be NO entrants. Without a license they would
have no "practical experience." If someone does have a license,
then they are NOT entering but have already entered.

>>How many amateur or "amatuer" tests has the big Stevie proctored?
>> With what VEC? At what times? Be accurate and include a full count
>> in numbers. Remember that anyone can research that and verify if
you've
>> been telling the truth.
>
> Even if the answer were only "1", Lennie, it's still one more than you
have
>done. That's fine by me.

Robeson has avoided an answer. Everyone has to assume that
he can only answer "none." He has not given any quantity, the
subject or class, or the individuals involved.

>>>How many classes have YOU taught...???
>>
>> Only two. But those were professional classes on specialized subjects
>> in electronics.
>
> Whew, Lennie! Have you beat THERE too! You taught only TWO classes in
>over 40 years of professional endeavour...???

Teaching is not a normal part of professional engineering.

It may be a part of duties such as explanation of a new radio
system and its operation. In that case the "students" are
already knowledgeable on electronics theory and need only
concentrate on the system configuration.

Such professional classes do not involve elementary electricity
or electronics or the standards and practices of over-half-century
communications modes and skills.

>>But it does fit the kind of person who accuses others of murder and
>> dismemberment because he can't succeed in "getting others" in a
>> newsgroup.
>
> I have "got you" far more times than you THINK you have me, Lennie.
>Sorry.

Incorrect. Robeson only imagines what he wants to imagine.

Robeson cannot discuss or debate subjects, only become uncivil
and emotionally unstable in attacking "opponents."

Robeson has to realize that his behavior reflects on the US amateur
radio service...a hobby activity involving radio, NOT some military
service branch or any guild, craft, union, or occupational skill area.
Robeson repeatedly reverts to the immature emotional behavior
pattern of excessive obsession with those who object to him,
displaying that with personal attacks and pejoratives.

Robeson is not a good example of a radio ham away from his
imagined radio conduct.

He asked how I got a waiver. That effectively asserts that I said that I
obtained a waiver. However, that is a lie. I never stated as such but one
would have to go back through everyone of my posts to know that to be true.
This is one of the more dishonest tactics that N0iMD uses in his debates and
it is not the first time he has used it. Of course I nipped it at the bud,
recognizing it to be a somewhat juvenile and rather passe debating tactic.

> >I only said, and any

Sort of like your very abnormal and irrational over-reaction to my little joke about your so-called 'porno' solicitation? I demand an apology.

That is really cool, Bert.

Do you have the June, 1994 copy of QST? Check out page 55.

It could be argued that truckers are among the few users who actually use cb
for its intended purpose - short range land mobile communications not covered

by other services.

The 2 million number seems very high. But even if true, then how many
nontrucker cb users are there?
>

> is arbitrary and unnecessary.

But you certainly blew on making your strong statement about us not having Dick Nixon...er, Brian Burke to kick around any more. I've noted that two of your three fundamental beliefs would involve personal benefit to you.

> You've been consistent that you will work any amateur out of band even after you learn they are out of band.

I need only concern myself with operating where I am supposed to be. The other station is responsible for where he is supposed to be.

> You've been consistent in belittling my DX experiences.

...only in the interest of accuracy.

> You've been consistently a jerk.

...and this coming from a fellow who cranks up three or four incarnations of the same misdirected crusade in which he ends up looking like a goober each time. Now THAT'S consistency.

The FCC feels differently:

Q. I don't hear any other stations on "my" frequency, which is not
one of the 40 allocated C.B. radio channels. So what is wrong with
operating my radio station here?

A. You may unknowingly cause interference to legitimate
communications. Many of these frequencies may appear, to the casual
listener, to be unused. Some of the authorized users may be using
emission types which can not be plainly detected. Or, their
transmissions may be intermittent. You will not hear any legitimate
signals within the designated radioastronomy bands. However, just
because a frequency sounds clear, that does not mean that it can be
used without proper authorization.

Q. What are these other frequencies between 24 and 32 MHz used for?

A. These frequencies are assigned to many different licensed radio
services, both in the United States, as well as in other countries.
Authorized users include Maritime and Aeronautical radio stations,
standard time and frequency stations, international broadcasting
stations, amateur radio, and government stations. A portion of this
spectrum is also allocated to radioastronomy, where scientists are
attempting to listen to very weak radio signals coming from distant
stars and galaxies. No radio transmitters of any kind are permitted
within these radioastronomy bands, so any earth-bound transmitted
signals can completely disrupt radioastronomy observations.

I'm not confused, Len--I was guessing at the answers to your pop quiz.

How exactly will that upgrade my status? And more importantly, to who?

People can go overboard on both sides of the Pro/Anti Morse code issue.
And those who show no respect for a person besed on just that one
criterion are doing just that.

> Larry said "all of 'em" so that means no retests.

The call database shows his license issue/renewal date of 4/8/97,
so even if he got the extra 10 years before that it would have
been in 87. He has only been in amateur radio since 81. So
doubtful that he took the extra in front of an FCC examiner at the
FCC field office. Since I got my license some 20 years before him
and I did take all my exams except Novice (which could only be
take via mail and administered by a General class or higher), then
according to Larry's reasoning, I am much more of an amateur radio
operator than he even if I don't operate CW.

>>
>> It does? How does Life do that?
>
>Certainly by causing a guilty conscience, that is if he has a conscience.
>You may have a difficult time with this one I realize.

I see...so, challenging a PCTA in anything, however mildly
results in more insults and denigrations?

Why not...another in here accused me of having "dismembered
body parts" in my recycling can, all because that poor baby
couldn't take criticsm. Now you, too.

>> >And you did it right in front of the whole amateur
>> >radio community.
>>
>> If Finn made the Charge, then the Charge stays... :-)
>
>I cannot erase what Brian has already imprinted onto Google forever.

Neither can you erase what YOU have already "imprinted onto
Google forever." The charges remain, Judge Bean.

>> I thought Brian just asked a question of you. Did he state
>> outright that you HAD used one or not? I don't think so.
>>
>He asked how I got a waiver. That effectively asserts that I said that I
>obtained a waiver.

Anyone else would say you are being wayyyyy over-sensitive
to that question.

All that was "effectively asserted" was that a question had been
posed to you.

Brian never asked a "Do you still beat your wife?" question.

Okay, have you ever gotten a waiver in amateur radio or for
amateur radio?

If so, why are you so sensitive to the question?

>However, that is a lie.

A "lie?!?" I saw only a question.

>I never stated as such but one
>would have to go back through everyone of my posts to know that to be true.

Nobody has to go through "everyone of your posts." Not even
every one of them.

Did you or did you not get a waiver?

>This is one of the more dishonest tactics that N0iMD uses in his debates and
>it is not the first time he has used it. Of course I nipped it at the bud,
>recognizing it to be a somewhat juvenile and rather passe debating tactic.

Oh? Has Brian asked you about your waiver before?

"Somewhat juvenile and rather passe debating tactic." Is that anything
like suddenly feigning outrage at some imagined slight because you
are overly-sensitive to something personal?

Congratulations...you've now ignited a small Flame War. Are you
proud of that?

>> Real Hams and Real Men don't have any need for "physician
>> certificates," do they?
>
>You're getting as bad as Brian.

Feel free to accuse me of dismemberment and putting human
body parts in my recycling can. That charge is all the rage in
the southeast.

Real Hams work DX on HF with CW.

Real Men can act as childishly macho as they imagine they are
on the Internet.

>> Heh heh heh...I have yet to see ANY pro-code-test advocate say
>> or even imply that a medical waiver to skip a code test was
>> "very, morally legitimate" to become a Real Ham. :-)

>Brian.

Now, now...bad over-reacting. :-)

>Do you perceive anything out of the ordinary in that statement? Brian and
>you continuously need to be reminded that there are others in this world who
>may be just as important as you are.

Of course there are others...all there to insure that ham radio is
all about working DX on HF with CW. Nobody is as important
as those who strive to preserve the CW test forever and ever
regardless of anyone else.

You are a licensed radio amateur and thus you claim turf to demand
of others the same regulations that you had to meet. Understood.

>> With some perseverence and courage, you too can have the
>> Word of (PR) Extras...be noble and oh, so correct. Just work
>> on the morsemanship some more and get that rate up there.
>> :-)
>
>Please translate that sentence into English.

It's difficult, that Word of (PR) Extras. They over-react so much
that their own words get twisted up in knots and often they
forget what year or even what century they are talking about.

I'm still working on the translation. Keep getting bogged down on
the "important, necessary" qualifications posed by them to
retain the code test forever. I will keep working on it... :-)

>> Not necessary, Lennie. I am not as impressed with myself as you are
>with
>>you.
>
>Not an answer. Trot out your qualifications...(SNIP)

They've been published here before. That you ignore or forget them as your needs require is not my problem.

>Show us the statements to the effect that either long-distance or
>short-distance or medium-distance radio communications in the
>US military now uses OOK morse codings.

You've been provided the information before. Additionally, the U S Army continues to train some of it's soldiers in the technique.

Sorry it chaps your hide. Want some Corn Husker's lotion?

>Note: There are only two US Army MOSs requiring morsemanship.

Actually there are no Army MOS's that requires "morsemanship". Such is not found in any spcification for any MOS, Army, Navy, Marine Corps, Coast Guard OR Air Force. That includes thier Reserves, applicable Guards and the Auxiliaries.

>The other is as Special Forces
>communications sergeant...which only requires the knowledge but
>does not state that Special Forces USE morse code.

You've been asked to please explain why Special Forces operatives, who are already tasked with maintaining proficiency in a great number of critical warfighting skills, would be required to master skills they are no going to use. Especially at 16 WPM.

>Above all, explain how your USMC training involved the use of HF
>radio and morsemanship skills.

I didn't say anything involved "morsemanship" skills, Lennie. YOU did.

You've taken this from "on-off keying" as a basic technology and "read into it" some spectre of "morsemanship"

I never mentioned Morse Code.

>Robeson has never explained
>his USMC MOS other than making some general, ambiguous
>statements of "working on a flight line."

And "Anderson" only reads what he wants to read, and if it s not in line
with HIS opinions, spends the rest of his time trying to denigrate the
"opponent".

I once upon a time discussed all my previous MOS's, Lennie. Sorry you
didn't pay atention then.

Sucks to be you, I guess.

>Oh, oh, now the poor baby is a commissioned officer in the "active"
> USMC?!? After receiving a medical discharge? How odd.

Nope. Never said that.

>The ARRL is NOT an "agency." It is merely a membership
>organization and a special-interest lobbying group.

"Merely", Lennie? In YOUR mind, I am sure, but that's only because you
are again trying to mitigate it's importance to Amateur Radio as a whole. You
fail in that attempt.

Anything to get yourself a rung-up higher, huh Lennie?

Your angst is showing again, Lennie. Calm down..

>Robeson should not try to use English words beyond his
> comprehension. He should not engage in word-play where he
> is a mere novice class and is sure to lose.

From someone who can't seem to accept the difference between "Amateur" and
"professional", this is a hoot!

>>That's right, Lennie. None. Zero. Nada. Yor experience in training
>>and license testing is ZERO.
>
> Explain how a hobby activity requires "training."

Some people actaully take the time to "teach" the theory, Lennie. I am
one of them. Also, I don't just put these folks through a course and say "Have
A Nice Day". There are finer points of using the radio not taught in the
books.

This includes the Emergency Services aspects that you are constantly
maligning. It does actually require some training to do well.

Sorry that irks you.

>Explain how amateur radio has different physics than non-amateur
> radio.

That monkey is on your back, Lennie. I never said it was.

>Explain how no one can possibly discuss getting into amateur
> radio without first getting into it...

One can "discuss" it, Lennie. You have spent more time trying to
undermine it than some people ever spend actaully doingit.

>Purchasing Agents are not considered either "in engineering" or
> as "professional engineers."

Of course they are not. Who said they were?

>Robeson has not claimed any other "engineering" experience
> other than being a purchasing agent.

You never asked. And at this point, it's none of your business.

>It is clear that you think that amateur radio physics differ from
> non-amateur radio physics.

Nope. We were discussing policy. You seem to have a hard time staying
focused, Lennie. Too much Geritol?

>Right now I'm puzzled trying to figure out why US amateur radio
> seemed like an interesting hobby to me.

It never was, Lennie. I am sure that at some point, wallowing in your own
self importance, you were aghast to find out that the FCC was going to make you
sit in a room with the non-professional unwashed masses and take the test like
everyone elsse.

>It can't be the emotional instability, the insulting nature of the
> frustrated amateurs who think they are "better" than professionals.

No, Lennie...better than YOU. That you claim to have once recieved a
salary for your services as a technician is accepted. That you were ever very
"professional" is another.

Furthermore, I know a great many people who ARE EE's, and do not feel the
need to verbally plunder Amateur Radio in order to establish themselves as
"corporate knowledge" within Amateur Radio...they just go about the business of
BEING "professional", and the rest of us just stand back and applaud.

Therein lies your failure. You keep telling us how good you allegedly
are. We see no evidence of it save for a few theoretical articles 15-20 years
ago in a now-defunct magazine.

On the otherhand, the Jon Bloom's and the Ed Hare's of the world just
continue to SHOW us what professionalism is...we see it delivered to our door's
once a month.

Where's Lennie? In re-runs. Old news being re-run, and just as unlikely
to affect Amateur Radio today as it did when it was first published.

>I am a radio professional regardless of the forum.

Not in my opinion, you aren't. You have yet to show me ANY sign of
professional character or conduct.

>That frustrates poor Robeson no end and he obsesses on
> trying to "get even" with his imaginary "enemy."

Thank God you are imaginary...now if I will just wake up and see you
disappear.

>US amateur radio is one of the most highly-publicized hobbies
> in the USA.

Not according to YOU it isn't, Lennie. You have wasted acres of bandwidth
"telling" us how Amateur Radio has missed the boat on media exposure.

UNLESS, of course, you now recant that asssertion and are stating
otherwise?

>Robeson manufactures an Artificial Construct on the "practical
> experience" ploy.

There's no "ploy", Lennie. You do not have any practical experience in
matters of Amateur Radio policy outside of this forum.

> If that is "necessary" to enter ham radio, then there would be NO entrants.

If you were an "entrant", there'd be no discussion. However you left the
"can anyone tell me about Ham Radio" phase a long time ago.

Now you are an antagonist. Nothing more...Nothing less.

>Robeson has avoided an answer. Everyone has to assume that
> he can only answer "none." He has not given any quantity, the
> subject or class, or the individuals involved.

The numbers tested are in the scores. The numbers taught as many. I know
it...they know it. Had you been one of them, YOU'D know it.

>Teaching is not a normal part of professional engineering.

It's not if you have nothing to teach.

>Robeson cannot discuss or debate subjects, only become uncivil
> and emotionally unstable in attacking "opponents."

Answeed before, Your Geezerness...You reap what you sew.

>Robeson has to realize that his behavior reflects on the US amateur
> radio service...a hobby activity involving radio, NOT some military
> service branch or any guild, craft, union, or occupational skill area.

And YOUR conduct doesn't reflect on "professional radio"?

Do you think your profanities, lies and frequent misdeeds go unnoticed by
anyone ut me?

BBBBWWAAAAHAHAHAHAHAHAHAHAHAHAHAHAHA ! ! !

>Robeson is not a good example of a radio ham away from his
> imagined radio conduct.

Nothing imagined about "radio conduct" here, Lennie. Ask Jim or Hans.
I've spoke with both of them on the air, and I am sure they will tell you that our QSO's were, at the very least, courteous and well conducted.

Sorry if that irks you. I'd have a QSO with you, too, but Part 95 has a mileage limit on how far you can legally communicate, and since you don't have an Amateur license, that is the only remote possibility that we'd ever meet on the air.

And although I do have a CB radio and could potentially "work" you, I won't hazard the priviledge of being a Commission licensee in the Amateur Service just to be able to say "been there, done that" with you.

So, Good Night, Your Putziness.

It's really not that hard receiving as long as I take notes, I couod
probobly handle a QSO to some extent with a little practice. I would
probably a lot of practice sending.

How about you, Dr. Evil? Can you beep up a storm?

If I answer this question will you again ask why I am trying to keep the
sub-thread going? Or shall I consider this a rhetorical question only?

Dan, if you haven't noticed yet, Lennie the Liar is all about being offensive and antagonistic. There is no one (save, perhaps, for brian and his anonymous buddy "MegHz") that he's not cursed, slandered, libeled or otherwise just ticked off.

He IS a creep.

You guys would seem to be real bumblers as a tag team. One who has no knowledge whatever of what the State Dept. has used for communications and who still doesn't understand the reasoning behind use of CW rather than RTTY, calls me a liar and periodically revives the subject. The other has gone through several iterations of a 6m saga he wasn't involved in and marches toward the wrong target, accusing me of denials I've never made.

Yep, Doctor Evil and Mini-Me are the self-declared victors despite being heckled by the audience and being pelted with verbal tomatoes. I can't wait for your encore.

The typo notwithstanding, at least I am active. I see patients 10 years
younger than me leaning on "disability" crutches all the time. I won't be one
of them.

I may die hang gliding, but I WON'T die bored!

>I thought you had children to raise? Save the stupid irresponsible stuff
>till they're emancipated.

I do have children to raise. But I won't be one of these wallowing,
whining losers like Lennie the Limp, seething in hatred over perceived wrongs
done to me by some "hobbyists" and NOT doing the things I profess to enjoy, all
the while sitting around molding.

>Betcha got a motorscooter, too.

Nope..those ARE dangerous. No seatbelt, no parachute, and no where to go
but Trauma/ICU (if you are "lucky") if you screw up.

Sitting at home while I still have the wherewithall to enjoy my health is not my "style".

YOU stay at home. The kids can come with me.

Steve

PS: BTW, Lennie, where ARE your kids?

Hey, do you always answer a question with a question? ;^)

But let's look at the situation:

When you took your tests in front of the FCC, you were obviously performing at the height of human ability, taking the much harder written test, and performing the Morse code test with the added distraction of a Federal employee who might at any time find out about the tags you ripped off all your furniture - but that is okay, as after you passed this superior testing regimen, you were now among an elite, and could hold your head high and without shame.

But when you took your Extra test in front of the VE, all this came to naught. The Extra test was so dumbed down that it latched onto your intellect and drug it down into the pits of perdition! You performed the test in front of a plain old VE, which caused you to lose all respect for both the testing process and Ham radio itself, and you have been fighting off the urge to buy a 40 channel CB rig ever since!

Of course this is all a joke Cecil! I assume since you asked the question that you don't draw any distinction between the two different testing methods. Nor do I.

Actually, I was drunk, which for me, may be the height.

> ... and performing the Morse code test ...

No Morse code test for Advanced upgrading from General.

> Of course this is all a joke Cecil!

How can you possibly joke about such serious stuff?

I'm reminded of Neville Chamberlain's assurances about Hitler: "All the Nazis want is a little extra elbow room. Let's just let them take Poland," he said, "and they'll certainly stop there".

To see how the "freeband/CB" blitzkreig is progressing, take a peek at the lineup of popular "CB's" being pushed by giant web retailer "Copper". Don't see any CBs? Oh, um, that's cuz they're calling them "10 meter radios" now.

FORUM

HELLO TO ALL
MY QUESTION IS , IS IT LEGAL TO OWN A EXPORT RADIO ? THE RADIO COVERS 10 AND 11 METER. I BOUGHT IT ON LINE WITH MY CREDIT CARD.
THANKS DOUG

Doug,

Yes. It's perfectly legal to own such a radio.

Which is why I say Farnsowrth can be anything you want it to be, or anything the VEC wants it to be. It can even be exactly the Morse specification. This is because Morse is a single event in the infinite set called Farnsworth.

Dan, I wasnt making fun of ANYONE when I posted "Waiver," but now I'm making
fun of you. You over-reacted to a single word that didn't point to any
individual or whether any particular waiver was valid or not. I'll assume
that if an MD signed it, thats good enough for me.

Your reaction was SO overblown. I would guess that you have a code waiver.

> > >And you know what? Life has a way of paying back people who make fun of

Your over reaction said it all.

That effectively asserts that I said that I
> obtained a waiver. However, that is a lie.

So you haven't -stated- that you have a waiver, or you don't have a waiver?

Which is it?

Why did you go berzerk over the word, "Waiver?"

I never stated as such but one
> would have to go back through everyone of my posts to know that to be
true.

For the record, you have NOT stated that you have a waiver. Yet.

> This is one of the more dishonest tactics that N0iMD uses in his debates
and

You're still PO'd about something stupid you did and got called on it, so
you've been laying in wait for me to do something you can jump on. This
wasn't it. Try again.

> Why don't you go make fun of people with birth defects.

I haven't made fun of anyone yet.

Why don't you send them pornography like you tried to send me?

I'm curious at your over-reaction. If you can't be honest with yourself,
you'll never be honest with me.

> No, making fun of handicapped people, as you are doing. has not come up
before on rrap.

Your false accusation is all that's come up lately!

Where is Mark Morgan when you need him? He'll tell you all about
disabilities.

I suggested that she go straight for the General, rather than the "Tech-with-HF". That would give her access to all bands and all but a few bits of the CW/digital bands.

How is that a bad idea?

>Unless you want her to wait for Novice refarming. Then she might
>actually run in to a CW QSO or two in the General CW portion.

There are plenty of CW QSOs on the HF bands - if one actually listens to them.

>

Huh?

1. I could be getting extra green stamps for working French 6M Ops out of
band.
2. I've already got the code, so no benefit.
3. Arbitrary and unnecessary never benefitted anyone.

> > You've been consistent that you will work any amateur out of band even

So even though I do not practice psychology, I'm not allowed to recognize
angst?

Is this one of those "Do what Ed says and not what Ed does" sort of things?

Will it go away soon enough to not bother with it?

Nope.

>After that gigantic hangover, you never said, "I will never touch another
>drop of booze"?

Nope. 'Cause I knew I would, eventually.

> Every human being has said they weren't going to do
>something and then did it later anyway, Dick.

I don't say "never" because one cannot know all possible future situations.

>If you are human, you have
>done exactly that many times in your lifetime!

Sorry, that's not a requirement of being a member of the human race. Just because you go back on things you've said you'd never do doesn't mean everyone else does the same.

>of CW do that?

Sorry if I wasn't clear. Let me try again.

As it stands right now, there is no requirement that a particular written exam contain "a reasonable number" of questions on any mode. It's quite possible that someone could go from no license to Extra without encountering a single question on, say, SSB. Not likely, but possible.

Requiring that the written contain a certain number of questions on Morse that would only be answerable by copying actual code sets it apart from other modes.

>>I doubt NCVEC or FCC will go for it.
>
>Perhaps not, but that doesn't mean it is not an idea worth considering.

Agreed.

>And the
>FCC might not have to go along with it at all -- they leave the selection of

True, but the idea of the questions only being answerable by copying the code would be a change of test method.

All of these discussions about overlaying and interlacing
the CB and Amateur radio services are no accident or
coincidence. Read the ARRL's exc. VP's report to the BoD
about his view of the future of amateur radio. As a side
note, for some strange reason, following his path to the
future, seems to result in the increased sales of ARRL's
books and periodicals.

You may well have a point but the pronouncements of Aaronia are not really
what you want to use to illustrate it.

She is in the Carrie Nation mold. She is not into overlay and interlace
but marching in straight lines and loving every minute of it. The classic
Femminazi.

It's okay with me if you operate out of band. I don't my opinion
carried much weight with the FCC though.

> No Thanks, that would be a step down for me.

Oh, you're providing the questions and the answers now.

> I'll Strive for Good Amateur Practice instead.

Keep striving, Brian. I'll bet looking up all DX stations
authorizations slows up the transmitting side of things.
How does it go--"The F6 station; confirm you are operating within your
authorized segment. QSL?".

Technically you are correct, of course. But generally, Farnsworth is a tool
to help people get up to about 18 wpm, that is why the character spacings
are usually set at 18wpm for letter spacings of 5 wpm, 13 wpm etc..

FWW, I use Morse code, Farnsworth style sometimes, and have no problem referring to myself as a beeper. I am a BEEPER, plain and simple, and proud of it. I would beep all day if I could. To beep is to communicate, DX, anywhere in the world with anybody else who can beep. I wish everyone beeped. I even enjoy translating words into 'beep' while driving my car and hearing them on the radio...good way to speed up your Morse. Can Len beep? No. Can Brian beep? No. Beeping is having a passport to the world...bet Len and Brian wish they could beep!

Ein eich Beeper!

Ed:

Simple. With the code test sent at the Farnsworth character speed (16 WPM, I think is what they're using), he can't count the dots and dashes and look up the characters on the chart he made on the palm of his hand with a ball-point pen.

Lennie:

Are "PR Extras" Pre-Restructuring or Post-Restructuring?

Just out of context, I'm ass-u-&-me-ing Pre-, but you certainly don't make it clear.

I'm sure that tons of French stations await the opportunity to send a
dollar for your rare Ohio QSL. Nope, that's not one of the two.

> 2. I've already got the code, so no benefit.

So we're now down to the one item below:

> 3. Arbitrary and unnecessary never benefitted anyone.

Incentive licensing rewards those who put in the effort to learn
additional material with additional spectrum. Arbitrary and unnecessary
have yet to be proven.

>
> What is wrong with my experiences as an HL9, /KH2, and /T5?

You tell us. You commented one time about what you considered to be
DXing from your station in the U.S. Let's see if you can be as
consistent in your explanation as you say you've been in other things.
>
> Oh, and try to be accurate.

I dunno, Brian. How many'd you work from each spot? On how many bands were you active? How many CW and RTTY QSOs did you hand out. How prompt were you in handling QSLs? What was your strategy in handling both SSB and CW pileups? Did you ask each op for his name, correct spelling of his QTH and what his weather was like? That'll take care of one side of the fence. I do seem to recall that you told us that you enjoy ragchewing with distant stations. Do you consider that to be DXing?

I think you agree that perating from a rare DX spot is quite different from DXing from the U.S. What differences have you note in goals and technique between rare DX ops and U.S. ops. How many do you have confirmed overall from the U.S. on each mode? Advise us of your strategy for busting the pile on a really rare one from the U.S. How are you doing on specialty DXCCs? Are you chasing them on 6m? 160m? satellite?

> > > You've been consistently a jerk.

That has been made alarmingly clear. It seems that others don't think it makes sense. You've not been very successful in selling your view.

> If you don't know what "Good Amateur Practice" is by
> this point in your amateur career, you'll never get it.

Good amateur practice has naught to do with how the other guy operates his station. It has to do with how you operate YOUR station. I'd say you'll never get it.

> Is this where The Old Man breaks out the "Wrenchy Stitch?" hihi

As in choosing the correct golf club for a given shot, it does matter which instrument is selected for amateur attitude correction. I'd choose the Uggerumph for this one.

>You guys would seem to be real bumblers as a tag team. One who has no
>knowledge whatever of what the State Dept. has used for communications
>and who still doesn't understand the reasoning behind use of CW rather
>than RTTY, calls me a liar and periodically revives the subject.

The periodic review is necessary to show Heil's tactic: Bluff and
hoping that no one will question his "expertise."

In the original "order wire" case, Heil had originally posted a
"good idea" of "using CW [morse code] as an order-wire on a
State Department TTY radio circuit." The implication was that it
was His own idea along with the self-praise of "pretty neat, eh?"

Heil may have thought that no amateur in here would know about
"order-wires." He did not reckon with someone in here having any
experience in large HF communications installations. Few amateurs
in here now or of four years ago are even familiar with the term, that
of being the control circuit for running a number of other circuits.

Heil's initial response was that the "CW was necessary to
establish synchronization of the RTTY." That was poor wording.
Teleprinters are designed and built to be self-synchronizing.

Heil then explained that the "synchronizing" referred to
"schedules" or operating times and other circuit details.

That is illogical. Firstly, if the receiving teleprinter is working at all, it will print out a schedule and detail listing that is identical to the transmitter teleprinter. Further, with a paper tape punch and reader, the identical schedules message can be "read back" to confirm that the received message was correct. Such a transmission and "read-back" confirmation can be done in less time than it takes to send the same schedules message via morse code.

It is illogical to use an on-off keying morse code mode as control on a teleprinter circuit, whether wired or by radio. The teleprinter is much faster, may be configured with on-line encryption, and exhibits much, much less error than manual telegraphy. The print-out at the receiver is essentially identical to that at the transmitter so that both ends of the circuit have the same document for referral. There is no possibility of hand-printing distortion leading to other, later circuit operators misinterpreting the printing. Teleprinter printing is always the same precise form.

At a much later date, Heil tried to rationalize his original error by stating "it was State Department protocol to use that method (CW as order-wire on an RTTY circuit)." That is ridiculous in the 1980s time period since military, government, and commercial communications had already established methods, standards, and practices prior to WW2. Heil was banking his bluff on no one knowing State's communications in detail. That may have been correct...but, he claimed that "I could not know anything at all about State Department communications."

The problem there was that I did know some of that. The RCA designed and built (at EASD, Van Nuys, CA) Random Access Card Extract System or RACES was installed at the State Department in DC to handle archival storage and retreival of all State Department communications into and out of DC. That was done in the late 1960s. State Department had two RACES machines, one an on-line spare to the other. The communications mode stored? Teleprinter. Not morse code. That was in the working specifications for the RACES installation.

What we had in here is a simple exponential growth of an initial bluff into a kludge of a rationalization for the simple failure of acknowledging that someone else might have some experience in communications.

Heil could have avoided all of that by simply ignoring the challenge to his "CW order-wire on a TTY radio circuit is a good idea" or dropping the subject. No, he had to embellish it, build on it, adding bluff to bluff until he had a very unstable house of cards. Those have all fallen but Heil does not realize it.

The original discussion was on "uses of CW (morse code)"
and the "need for the code test retention." It was not about
"State Department" protocol or communications...it was about
PCTA claims to greatness of morse code...an on-going
fantasy fanning the flames of dispute in this newsgroup four
years or so ago.

Heil could not give-in or concede anything. He HAD to be
right. He HAD to be superior. He could never, ever admit
defeat...and so everyone was treated to his card-building
and bluffing.

Now, in fairness, it is possible that somewhere, at some
remote State Department embassy or consulate, there "might"
be some morse code used. There is NO evidence from any
State Department source that it is so. Why should there be?
The State Department can draw on the rest of the US
government for expertise in radio communications. Its radio
networks are NOT as big as the US military's nor have they
been. One can only surmise that Heil's posting to Guinea-
Bisseau at the time of the alleged "CW order-wire for RTTY"
situation might have something to do with it. Apparently,
Heil's amateur radio station in that country was then the ONLY
amateur station there; with a truly rare callsign issued (as a
compliment to an embassy employee?) he would be much in
demand as "DX" for the rest of the world. That probably was
very emotionally rewarding for him. It may have led to some
other emotional problems with logic and thinking he was truly
superior instead of just the rare-call individual.

RTTY by commercial, government, and military users has been
formalized, standardized, and used since prior to WW2. Trying
to state that a "CW order-wire on an RTTY circuit" is either
logical, State protocol, or anything else "good" is nonsense.
It was a bluff counter to the original subject, the bluff was called,
more bluff was layered on the original bluff, and that was called,
and so on and so on.

The continuing iteration of bluff after bluff can only lead to the
conclusion that Heil may attempt the same on other subjects.

>Yep, Doctor Evil and Mini-Me are the self-declared victors despite being
>heckled by the audience and being pelted with verbal tomatoes. I can't
>wait for your encore.

Heil seems fixated on motion pictures and characters therein as
his idols or examples. Those are fictional. Perhaps Heil's own
experiences in the bigger world of non-amateur radio are fictional...

>>
>>Not an answer. Trot out your qualifications...(SNIP)
>
> They've been published here before. That you ignore or forget them as
>your needs require is not my problem.

You have not qualified yourself in US military HF communications.

You have not qualified yourself in any US military communications.

You have not qualified yourself in any civilian experience of
working on US military communications.

You have not qualified yourself in stating anything of validity in
radio communications in any radio service except amateur radio.

You have not qualified your comments with any evidence of
web search or literature search concerning any communications
other than techniques used in amateur radio.

You are not qualified to comment on anything except the
statements of others who have done their research.

You are only qualified to jabber epithets, pejoratives, falsehoods,
and keep spreading myths and legends within ham radio.

>>Show us the statements to the effect that either long-distance or
>>short-distance or medium-distance radio communications in the
>>US military now uses OOK morse codings.
>
> You've been provided the information before.

Everyone has seen UN-qualified statements of individuals stating
that morse code is currently used in military communications.
The US military statements do NOT corroborate that use. The
US military statements show NO morse code modes are used
for any radio communications.

>Additionally, the U S Army
>continues to train some of it's soldiers in the technique.

The US military trains a few military personnel in morse code
cognition for Military Intelligence purposes at Fort Huachuca.

That course is for ALL service branches.

Provide the evidence of the US military showing that morse
code is used for military communications. Provide valid
evidence rather than unverifiable statements of others who are
not qualified to speak of US military radio doctrine.

> You've been asked to please explain why Special Forces operatives, who
>are already tasked with maintaining proficiency in a great number of critical
>warfighting skills, would be required to master skills they are no going to
>use. Especially at 16 WPM.

I haven't been "tasked" in any such thing. I have WORKED WITH
US military communications INCLUDING equipment used by both
Special Forces and Special Operations Units. There is NO
evidence that indicates either Special Forces OR Special Operations
USES morse code in any form for radio communications.

>>Above all, explain how your USMC training involved the use of HF
>>radio and morsemanship skills.
>
> I didn't say anything involved "morsemanship" skills, Lennie. YOU did.

Explain your valid military experience in any kind of USMC radio
communications. Do not use ambiguous generalities, myths,
or outright lies. Do not evade the question by attempting to
misdirect as you have done above.

>>Robeson has never explained
>>his USMC MOS other than making some general, ambiguous
>>statements of "working on a flight line."
>
> And "Anderson" only reads what he wants to read, and if it s not in line
>with HIS opinions, spends the rest of his time trying to denigrate the
>"opponent".

Robeson has never explained his USMC MOS other than making
some general, ambiguous statements of "working on a flight line."

I have explained mine as a US Army Signalman, working as a fixed-
station HF radio supervisor and microwave radio relay supervisor.
Has Robeson acquired anything similar in the USMC? He has not
stated such in here.

Odds are that Robeson had little or NO such radio communications
experience. If he had, he would be constantly crowing about it
to demonstrate his gung-ho superiority.

>>Oh, oh, now the poor baby is a commissioned officer in the "active"
>> USMC?!? After receiving a medical discharge? How odd.
>
> Nope. Never said that.

Stop evading the questions by misdirecting.

Are you a commissioned officer in the USMC?

Have you received a medical discharge from the USMC?

Did you have any military radio communications experience
in the USMC and, if so, what was it?

>>The ARRL is NOT an "agency." It is merely a membership
>>organization and a special-interest lobbying group.
>
> "Merely", Lennie? In YOUR mind, I am sure, but that's only because you
>are again trying to mitigate it's importance to Amateur Radio as a whole.

The ARRL is incorporated as a membership organization.

The ARRL is NOT an "agency" of the government.

> Some people actaully take the time to "teach" the theory, Lennie. I am
>one of them.

Prove that by giving references as to the class, the dates of that
class, and students who were in that class and their licenses.

So far, Robeson has only been blowing smoke.

>Also, I don't just put these folks through a course and say
>"Have A Nice Day". There are finer points of using the radio not taught in
the
>books.

Stop with the smoke blowing. Outline your curriculum, the general
class description.

> This includes the Emergency Services aspects that you are constantly
>maligning. It does actually require some training to do well.

Stop with the smoke blowing. Outline your curriculum, the general
class description. Give verifiable references of your students.

>>Explain how no one can possibly discuss getting into amateur
>> radio without first getting into it...
>
> One can "discuss" it, Lennie. You have spent more time trying to
>undermine it than some people ever spend actaully doingit.

Explain how no one can possibly discuss getting into amateur radio
without first getting into it...you have constantly denigrated those
who are not licensed as "having no practical experience." That is
tantamount to forbidding any discussion of getting into amateur radio
without first becoming licensed.

[learn to spell "actually doing it" instead of making those typos
done in anger...]

>>Purchasing Agents are not considered either "in engineering" or
>> as "professional engineers."

>
> Of course they are not. Who said they were?

Robeson has stated twice that his former purchasing agent job
was "in" engineering because he "worked with engineers."

>>Robeson has not claimed any other "engineering" experience
>> other than being a purchasing agent.
>
> You never asked. And at this point, it's none of your business.

Yes, it IS my "business." Robeson has continually denigrated
and maligned my professional experience as an electronics
design engineer. He has repeatedly stated that I should not
comment on morse code testing because I have "no practical
experience" in amateur radio.

Robeson is a two-faced son of something. He has NO practical
experience in electronics engineering...therefore he cannot
possibly know anything about electronics engineering insofar as
design assignments are concerned. He is UNQUALIFIED to
comment on engineering...yet he tried to malign, denigrate, and
insult myself as being "nothing more than a bench technician."

Further, Robeson has repeatedly denigrated "night school"
classes having college accreditation as being inferior to
daytime classes.

Robeson has to show his qualifications in professionalism.

Robeson has to show his qualifications as an amateur human
being despite having a minimal set of social skills.

> Furthermore, I know a great many people who ARE EE's, and do not feel
>the need to verbally plunder Amateur Radio in order to establish themselves as
>"corporate knowledge" within Amateur Radio...they just go about the business
>of BEING "professional", and the rest of us just stand back and applaud.

Robeson has to list the "great many people who are EEs" that he
"knows."

Robeson is confused. He has not explained how an amateur must
act the "professional" in a hobby activity.

>>US amateur radio is one of the most highly-publicized hobbies
>> in the USA.
>
> Not according to YOU it isn't, Lennie.

Wrong again. I cite the long list of ARRL publications given on
their website and in their publication advertisements. I cite the
other periodicals such as CQ, 73, and Popular Electronics. I
cite the long list of RSGB publications given on their website and
in their publication advertisements. I cite the IARU website and

their references, all the preceding available to the public.

There is nothing "secret" or clandestine in US amateur radio.
Such would be ILLEGAL.

>You have wasted acres of bandwidth
>"telling" us how Amateur Radio has missed the boat on media exposure.

I've pointed out the ARRL in particular has FAILED to gain popular
media exposure for years. The ARRL in particular HAS failed to
gain popular media exposure for years.

The "exposure" about amateur radio is largely concentrated in the
specialized amateur-to-amateur media. Amateur radio has FAILED
to gain exposure of its "vital necessity to the public" or in its
alleged "technical advancements" in the media of the rest of the
radio world.

DENIAL of those obvious conditions does no good. DENIAL does
not achieve popular media exposure. DENIAL does not make the
facts go away.

>>Robeson manufactures an Artificial Construct on the "practical
>> experience" ploy.
>
> There's no "ploy", Lennie. You do not have any practical experience in
>matters of Amateur Radio policy outside of this forum.

Robeson (and Heil) uses that PLOY as an artificiality of argument in
here in an effort to deny open discussion about GETTING INTO
amateur radio except by those already licensed. That is obvious.

What Robeson (and Heil) want to overlook is that US amateur radio
POLICY is ultimately set by FCC regulations where neither the FCC
commissioners nor staff are required to have ANY amateur radio
license. According to the Robeson (and Heil) "logic," the FCC
should NOT be making ANY amateur radio regulations because
"they have no practical experience in amateur radio!"

What a marvelous, illogical IDIOCY both Robeson and Heil
demonstrate in their attempt to quash dissention! :-)

> The numbers tested are in the scores. The numbers taught as many. I
know
>it...they know it. Had you been one of them, YOU'D know it.

Robeson avoids a direct answer. He says NOTHING direct above.

Robeson has yet to answer about his "classes" or "the numbers"
or "the scores." He is bluffing, blowing smoke.

>>Robeson cannot discuss or debate subjects, only become uncivil
>> and emotionally unstable in attacking "opponents."
>

> Answeed before, Your Geezerness...You reap what you sew.

"Answeed?!?"

Answer a direct question about your claims. So far all you have
been doing is bluffing, blowing smoke.

> Do you think your profanities, lies and frequent misdeeds go unnoticed
>by anyone ut me?

Illustrate or quote the "profanities, lies, and frequent misdeeds."

If opposition by FACTUAL information from third-party sources
are "profanities or lies" then Robeson has a perverse ego that
refuses to accept the real world. If opposition to his mythos
and legends are "frequent misdeeds," then he is in worse
mental shape than supposed.

> So, Good Night, Your Putziness.

The above quote line is a common sign-off of Robeson's. It is
a corruption of a Yiddish-ethnic pejorative. Apparently he feels
that anything he does is "civil" while any objection to his
opinion is "uncivil." One cannot reason with him in any
discussion.

Note the often-used "good night" in the tag line. He is so ego
driven that he must think whoever he is writing to is reading
his message as he types it. That is seldom the case. See the
time-stamp of this message posting...the next day and early
evening, hardly a time to retire. Tsk, tsk, tsk.

Brian, what is "Farnse"? Please be specific in your definition.

How do you pronounce it? Would one say "Farn-zay" or "Farnz"? Do New
Yorkers say "Fonz"?

Corrected for inflation, the ham's dollar buys more radio now than ever before. Even if it's spent on older equipment. $1000 for a 40+year-old 75A-4 seems like a lot until you realize it cost $700 new.

Much of the domestic activity is done by truckers. The answer to this
problem for ALL hams to become VERY active in attempting to protect
what we worked for lest we lose it. NOW is the time to strike when
the "iron" is hot, so to speak.

Amateur Radio has received much favorable publicity in the US in the
wake of 9/11, and this is a wonderful stepping stone upon which to
launch a campaign to our Congresspersons. Write your Congressman
explaining what Amateur Radio is (they may already know) its value to
our Nation as a resource, and the problem that is taking place on our
10 AND 12 meter bands. Explain that, due to short funding, FCC has
been much unable to respond to the problem in the measure needed to
curb it.
Suggest ideas that could be used to stop the incursions. Here are a
few:

1) Increase funding to FCC, at least in the short term, to publicize,
mobilize, and
enforce the rules on CB.

2) Increase visits by agents to truck stops and CB shops to locate and
remove such
illegal radios as make these illegal incursions so easy.

3) Get Customs to more closely inspect containers and crates for
illegal
"export" radios
and stop them at the port of entry.

4) Amend the "Local Enforcement" law to allow state and local police
and DOT

officers to inspect, fine, or otherwise punish truckers who have
in
their trucks those
radios and amplifiers already on FCC's list of unapproved
equipment.

5) Suggest that, due to more modern technology (cellphones, Family
Radio,
MURS,
etc) that Citizens Band as currently constituted is outdated and
could
be "sunsetted":
IOW, after, say, 5-7 years, a date be set after which 27 MHZ CB
would
no longer
be legal for use in the USA. Suggest combining that with rigid,
even
if temporary,
enforcement, to make sure that 27 MHZ is vacated. Moreover, if
Congress can
be made to see that CB on 27 MHZ is causing more trouble to
nearby
services than
it is worth, then a better case can be made for sunsetting it.
Explain
that, because of
the short-range characteristics of VHF/UHF FM, much of the
illegal
activity (DX,
amplifiers, and interference) would be abated by that
characteristic
alone. Make it
clear that straying onto nearby bands such as remaining Public
Service,
common
carrier, and the 2 meter hams bands would be met with strict
enforcement.

If enough hams write their Congresspeople, then they can be made AWARE
of this problem we are having, whereas if we just sit here and whine
about it, NOTHING will get done. Of course, everything I have
suggested is not viable, but let's get off our duffs and DO something
about it. Send a copy of your letter to Mr. William Tauzin, Chairman
of the House Sub-Committee on Communications. Make Congress aware
that
Amateur Radio is valuable to our public welfare, defense, and recovery
from disasters. AND that we have a problem with people that are trying
to take that space away from us.

In the meantime, here is something else you CAN do:

1) When you are driving the Interstate, listen to 28.085 AM for the
stupid
beeping and
squeaking. If your car happens to have, either multitudes of
ham
antennas, or a big
unusual looking HF antenna like a screwdriver, sometimes the
trucker
will comment
on "the 4 wheeler" with the big antenna, or even call you hoping
you
will answer.
Do NOT reply, and do not get excited. Calmly slow down
gradually and
allow the
truck to pass you while you get his tag number (you may have to
read
it backwards
in your rearview), the name of the company on the door, and the
trailer number as
well as a description. Keep a small tape recorder in the car
and try
to record the
truck's transmissions. Attenuate (if available) the receiver,
back
down on sensiti-
vity, remove the coax, etc to assure you have the correct truck.
Forward this info
to fccham@fcc.gov . A number of trucking companies have already
received
warnings in this very manner. Try to keep the truck from
becoming
suspicious of
your activities. You may want to send a few "CQs" on 28.85.6 if
you
can (rem-
ember, he is on AM and you have to go up about.6 for him to hear
you.
By sud-
denly coming on so strongly, you may elicit comment from him on
which
to record
further evidence.

If we are SERIOUS about combatting this problem, we cannot sit around
on our hands and "hope" 'somebody' does something. WE are supposed to
police our own bands and be pro-active in protecting our bands.
Sitting around whining about the CBers using our bands won't cut it.
Get out there, listen, report, and eventually those criminals will get
the word AND what they deserve.

>The periodic review is necessary to show Heil's tactic: Bluff and
>hoping that no one will question his "expertise."

Pot / Kettle / Black

You've thrown complete and utter trash out here, Lennie, hoping that when someone picks up after you they won't notice the stench.

Problem (for you) is that you are the only one who thinks you are getting away with anything.

>In the original "order wire" case, ...(SNIP)

Lennie, other than trying to belittle Dave's own professional career with your own form of twisted logic, you've beat this "order wire" thing to death and no one EXCEPT you gives a hoot.

It wasn't worth getting riled up over in the first place, and if this is all you have to "discredit" Dave, then you are wasting everyone's time.

And it's not a "case"...No one is investigating it, and no Grand Jury has suggested any indictments for it.

It's a non-issue, and CERTAINLY not in compliance with YOUR assertions that this is a forum for discussing code TEST elimination, now is it?

>Heil may have thought that no amateur in here would know about
>"order-wires."...(SNIP)

And no one, except you, cares.

>That is illogical.

No, Your Geezerness, what is "illogical" is four years worth of your rants about whatever it was about "order wires" YOU think is important to code TEST issues.

>At a much later date, Heil tried to rationalize his original error
>by stating "it was State Department protocol..."...(SNIP)

And having never been an employee of DoS, from what "informed" position are you making your assertions, Lennie?

You know this for a fact? You were there? Some mysterious Super-Secret EE buddy called you up one day and said "Hey Lennie, in case you are ever in some public forum and want to embarras a Ham Radio operator, tell them this...."...???

>The problem there was that I did know some of that.

And we are so proud for you. That "knowledge" and a fin will get you a cup of overpriced coffee at Starbucks. Tape a c-note to your forehead and you MIGHT get somone to sit with you and listen to this "exciting" tale as you dirnk that cup of coffee, too.

>Heil could have avoided all of that by simply ignoring the
>challenge to his "CW order-wire on a TTY radio circuit is a
>good idea" or dropping the subject.

I haven't seen anyone BUT you raise the subject, Your Rantingness, ergo it seems he DID drop it.

Only you trot it out whenever you think it will serve to "discredit" Dave.

It never does, and you have once again re-run a rant that ranted out a long, long time ago.

How boring.

>No, he had to embellish
>it, build on it, adding bluff to bluff until he had a very unstable
>house of cards. Those have all fallen but Heil does not
>realize it.

This "admonishment" from a CREEP who tried to "embellish" his own military service by pointing out that a lot of guys from his unit were KIA in Korea...Forget for a moment that it was 3 YEARS before Lennie the War Hero arrived in-theater, and AFTER the unit had rotated out of the combat area.

This made Lennie a RAWCHBAS...Rear Area Widget Claiming Hero By Association Status. This would earn him a bloody nose if he tried to pass it off as a "combat record" in any self-respecting VFW or American Legion post.

>The original discussion was on "uses of CW (morse code)"
>and the "need for the code test retention.

OK...that's what the NG is (among other Amateur Radio policy matters) supposed to be for.

>It was not about "State Department" protocol or communications.

Then why are YOU re-hashing it, Lennie...? Well...I SHOULD ask "Why are you re-hashing it OTHER than to try and discredit Dave"..?!?!

>...it was about
>PCTA claims to greatness of morse code...an on-going
>fantasy fanning the flames of dispute in this newsgroup four
>years or so ago.

Oh...four YEARS ago...Well then, I guess that's current events on the Anderson calendar, huh...????

>Heil could not give-in or concede anything.

I reiterate...."Pot / Kettle / Black".

Nor do you. You insist on "civil debate", but quickly turn ANY conversation into a name calling, career insulting, rock throwing free-for-all.

Every time.

>Now, in fairness, it is possible that somewhere, at some
>remote State Department embassy or consulate, there "might"
>be some morse code used. There is NO evidence from any
>State Department source that it is so. Why should there be?

And with this simple statement, you have acknowledged that you do NOT know all the facts, and that what ever you have to "debate" here is nothing more than opinion and conjecture....NO basis in fact.

>The continuing iteration of bluff after bluff can only lead to the
>conclusion that Heil may attempt the same on other subjects.

Like your assertion that the FCC has created radio services for strictly recreational purposes, Lennie? That was a hoot. And that "citizens band" only refers to 11 meters? yeah Lennie, I can see how Dave's "bluffs" have really set a precedent.

>Heil seems fixated on motion pictures and characters therein as
>his idols or examples. Those are fictional.

Like your fixation on a radio service you have no licensure in but claim "professional" level knowledge of?

>Perhaps Heil's own
>experiences in the bigger world of non-amateur radio are fictional..

Perhaps Lennie's experiences in the bigger world of "professional" radio are fictional. Still no evidence that any of his claimed works was original, and no copy of the July 2002 "Ham Radio" magazine at my door.

Can't cover the postage with that "comfortable retirement", Lennie? Send it C.O.D, Lennie....I can afford it.

>of his hand with a ball-point pen.

He doesn't have to, Larry; he has passed all the code tests he ever has to pass.

And with Farnsworth timing, one has more time to do a lookup because of the additional time between characters. I don't think that one could do a 5 wpm lookup.

If I make up a new code, care to demonstrate the lookup process sometime?

>You have not qualified yourself in US military HF communications.

I didn't have to. They qualified me, Lennie. MOS and all. Sorry you
missed it.

>You have not qualified yourself in any civilian experience of
>working on US military communications.

I didn't claim I had any.

>You have not qualified yourself in stating anything of validity in
>radio communications in any radio service except amateur radio.

It's not pertinent to this forum.

>You have not qualified your comments with any evidence of
>web search or literature search concerning any communications
>other than techniques used in amateur radio.

Hmmmmcould it be that this is a forum on AMATEUR RADIO, Lennie?

>> You've been provided the information before.
>
>Everyone has seen UN-qualified statements of individuals stating
>that morse code is currently used in military communications.

The context that has set you off into Rantland again Lennie said NOTHING
about Morse Code.

>The US military statements do NOT corroborate that use.

And we ALL know the Armed Forces ALWAYS discuss in open forums everything
they are doing...

...kinda like all the times they dismissed as "unfounded" the stories of
strange, delta-shaped balck airplanes over the Nevada desert...

>>You've been asked to please explain why Special Forces operatives, who
>>are already tasked with maintaining proficiency in a great number of
>critical
>>warfighting skills, would be required to master skills they are no going to
>>use. Especially at 16 WPM.
>

>I haven't been "tasked" in any such thing.

Perhaps you should re-read what I wrote, Lennie. Go back up the thread if you think I edited the quote here...

YOU were "asked". No one in thier right mind would ever "task" something from someone as unqualified as you.

>There is NO
>evidence that indicates either Special Forces OR Special Operations
>USES morse code in any form for radio communications.

Keep repeating that to yourself while clicking your crystal slippers, Lennie.

>> I didn't say anything involved "morsemanship" skills, Lennie. YOU did.
>
>Explain your valid military experience in any kind of USMC radio
>communications. Do not use ambiguous generalities, myths,
>or outright lies. Do not evade the question by attempting to
>misdirect as you have done above.

Nothing was "evade(d)", Your Scumminess. The original comments were that the Armed Forces still use forms of on-off keying techniques. YOU injected references to Morse Code. Now you want me to "validate" my military "credentials"

Here's a question for YOU to not avoid: WHEN are you going to take the "extra lite" that you asserted you were going to take "out of the box"...???

Two years hasn't been enough time to study?

>Robeson has never explained his USMC MOS other than making
>some general, ambiguous statements of "working on a flight line."

You've tried this two posts in a row. Still not germane.

>He has not stated such in here.

That's because I am not trying to be the King Of The Hill you are Lennie. It doesn't matter to me wether anyone likes it or not. No one here signs my paycheck.

>Odds are that Robeson had little or NO such radio communications
>experience. If he had, he would be constantly crowing about it
>to demonstrate his gung-ho superiority.

Like you?

BBWWAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAH
AHAHAHA ! ! ! ! ! ! !

YOU SELF-RIGHTEOUS PUTZ!

LOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLOLO
LOLOLOLOLOL ! ! ! ! !

>>>Oh, oh, now the poor baby is a commissioned officer in the "active"
>>> USMC?!? After receiving a medical discharge? How odd.
>>
>>Nope. Never said that.
>
>Stop evading the questions by misdirecting.

There's no misdirection. Only your buttblasting buddy in Illinois ever claimed ot have been a commisioned officer of the Federal Armed Forces. Not me.

>Are you a commissioned officer in the USMC?

Have I ever stated I was, Lennie?

Have I ever signed a post [(officer rank), USMC]...???

>Have you received a medical discharge from the USMC?

I did. And that status was changed to medically retired.

>Did you have any military radio communications experience
>in the USMC and, if so, what was it?

Yes I did and none of your business. Choke on it, Lennie!

>>>The ARRL is NOT an "agency." It is merely a membership
>>>organization and a special-interest lobbying group.
>>
>> "Merely", Lennie? In YOUR mind, I am sure, but that's only because you
>>are again trying to mitigate it's importance to Amateur Radio as a whole.
>
>The ARRL is incorporated as a membership organization.
>
>The ARRL is NOT an "agency" of the government.

Now YOU are "misdirecting, Lennie. When did ANYONE say the ARRL was an agency of the government?

>> Some people actaully take the time to "teach" the theory, Lennie. I am
>>one of them.
>
>Prove that by giving references as to the class, the dates of that
>class, and students who were in that class and their licenses.

For what purpose, Lennie? My serices as a VE are a matter of record with the ARRL, and anything else is not germane to the discussion that on-off keying as an RF technique still has valid uses.

YOU have been the one trying to somehow assert that whatever I may have done in the Armed Forces is related to that.

Talk about "misdirection".

>So far, Robeson has only been blowing smoke.

So far, it's better than what YOU have been blowing, Lennie.

>Stop with the smoke blowing. Outline your curriculum, the general
>class description.

The "class descriptions", Your Stupidness, were for exam preparation courses for an Amarteur Radio license. Each of the required areas of knowledge (including Morse Code skills) was included. ARRL texts were used. (The one's you try and discredit, Lennie...)

>Stop with the smoke blowing.

There's no smoke blowing here, Lennie. I keep all my gear properly ventillated.

>[learn to spell "actually doing it" instead of making those typos
>done in anger...]

Again with the assertions of "anger"...Lennie, you don't anger me, you SICKEN me.

>>>Purchasing Agents are not considered either "in engineering" or
>>> as "professional engineers."
>>
>> Of course they are not. Who said they were?
>
>Robeson has stated twice that his former purchasing agent job
>was "in" engineering because he "worked with engineers."

No, Lennie, I did not. I DID assert that I worked with engineers. That part was true. I never made any assertion that I was "in" engineering.

That's a falsehood of your creation.

>>You never asked. And at this point, it's none of your business.
>
>Yes, it IS my "business."

No, it's not.

>Robeson has continually denigrated
>and maligned my professional experience as an electronics
>design engineer.

As YOU have about my years in the Armed Forces and my current profession in nursing.

So what?

>He has repeatedly stated that I should not
>comment on morse code testing because I have "no practical
>experience" in amateur radio.

And you don't. Again, SO WHAT?

>Robeson is a two-faced son of something.

Perhaps, but not here.

>He has NO practical experience in electronics engineering.

An assertion made with no facts to the contrary. Naughty naughty
"engineer".

>He is UNQUALIFIED to
>comment on engineering...yet he tried to malign, denigrate, and
>insult myself as being "nothing more than a bench technician."

Perhaps, but so far you've not provided any evidnce of being anything more
than a loud mouth who can quote off the Internet.

In THIS forum, you have NO practical experience in Amateur Radio POLICY
matters OTHER than this forum. And as we all know, this has no validity in the
"real world".

>Further, Robeson has repeatedly denigrated "night school"
>classes having college accreditation as being inferior to
>daytime classes.

No, I have denigrated your lack of assimilation of what was offered in
those classes. Day or night, it WAS 15 years to compelte a four year degree.

Maybe if you'd spent more time in class and less time in the unemployment
line...?!?!

>Robeson has to show his qualifications in professionalism.

I don't "have" to show anything, Lennie.

>>You have wasted acres of bandwidth
>>"telling" us how Amateur Radio has missed the boat on media exposure.
>
>I've pointed out the ARRL in particular has FAILED to gain popular
>media exposure for years. The ARRL in particular HAS failed to
>gain popular media exposure for years.

Yet YOU state how "popular" and "well known" Amateur Radio is to the
general public.

How odd.......

>The "exposure" about amateur radio is largely concentrated in the
>specialized amateur-to-amateur media. Amateur radio has FAILED
>to gain exposure of its "vital necessity to the public" or in its
>alleged "technical advancements" in the media of the rest of the
>radio world.
>
>DENIAL of those obvious conditions does no good.

There's nothing that requires a denial, Lennie. I see items in the papers
all the time. Local and regional. Sorry you don't agree.

>According to the Robeson (and Heil) "logic," the FCC
>should NOT be making ANY amateur radio regulations because
>"they have no practical experience in amateur radio!"

I agree that no person should be allowed to make comments on matters for
which he or she cannot document practical experience.

I would not care to file comments on nuclear power regualtion nor on
sewage line construction, but I have th right to do so as a citizen.

>What a marvelous, illogical IDIOCY both Robeson and Heil
>demonstrate in their attempt to quash dissention!

Hmmmm....a cute term when used by you, Lennie.

>He is bluffing, blowing smoke.

You are lying. Not telling the truth.

>>>Robeson cannot discuss or debate subjects, only become uncivil
>>> and emotionally unstable in attacking "opponents."
>>
>> Answeed before, Your Geezerness...You reap what you sew.
>
>"Answeed?!?"
>
>Answer a direct question about your claims. So far all you have
>been doing is bluffing, blowing smoke.

Why? So I can "be you"...?!?! Don't need to..Don't want to...

Sorry that irks you.

>> Do you think your profanities, lies and frequent misdeeds go unnoticed
>>by anyone ut me?
>
>Illustrate or quote the "profanities, lies, and frequent misdeeds."

BBBBBWWWHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA ! ! ! ! ! !

Where shall I start, Lennie? From the times you have misquoted Ed
Hare...? The times you've refered to people a "a" holes or that thier posts
were bull "s"..??? Or your assertions of radio services created for strictly
recreational purposes?

Or how about your attempts to "embellish" YOUR military career by
"mentioning" that you served in a unit that had a high KIA rate in the opening
days of the Korean conflict...Which HAPPENED three years before you got there?

The list is long and distinguished...I am sure ANY of your EE buddies (or
your few licensed Ham buddies) would be PROUD to be associated with a
"professional" who has so responsibly and maturely represented the genre.

>> So, Good Night, Your Putziness.
>
>The above quote line is a common sign-off of Robeson's. It is

>a corruption of a Yiddish-ethnic pejorative.

Yes, Lennie...we know.

>Apparently he feels
>that anything he does is "civil" while any objection to his
>opinion is "uncivil."

Nope. Never said that. I am sure youfeel that way, though.

>One cannot reason with him in any discussion.

Only if YOU are "the one", Lennie, and only as long as you continue to misrepresent the true character of Amateur Radio with your lies, mistruths and innuendo.

>Note the often-used "good night" in the tag line. He is so ego
>driven that he must think whoever he is writing to is reading
>his message as he types it

As a matter of fact, Lennie, you responded to this post at 23:50 hours EDT (20:50 in SoCal)

So much for ego, eh?

Ya gotta love the ignorance of a Putz who accuses others of such "ego", and then are themselves so "ego driven" as to forget that AOL kindly time-stamped the message for him.

HAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHAHA
HAHAHAHA ! ! ! ! ! !

> That is seldom the case. See the
>time-stamp of this message posting...the next day and early
>evening, hardly a time to retire. Tsk, tsk, tsk.

And YOU are so ego driven as to assume everyone is on the same schedule YOU are, Your Geezerness.

G'Nite, Lennie!

W1RFI wrote:
> If I make up a new code, care to demonstrate the lookup process sometime?

When we were in Cub Scouts, my cousin and I had two different lookup
tables, one for transmitting and one for receive. The transmitting
table looked like the lists in the ARRL Handbook. As I remember, the
receiving table was broken down like:

. E All dots group
.. I
... S
.... H
..... 5

.- A leading dotdash group
.-. R
.-.. L
.-- W
.--. X
.--- J
.---- 1

etc. The pattern was almost binary, 0, 00, 000, ... 01, 010, 0100, ...

We didn't measure our speed but I would estimate it was pretty close
to 5wpm. I also have to confess that I *rote memorized* the characters
pretty fast.

> State Department TTY radio circuit." The implication was that it
> was His own idea along with the self-praise of "pretty neat, eh?"

Thanks for proving my point, Doctor Evil. There was no implication that
the idea was mine. In fact, I've stated on several occasions that the
idea was not mine. I think a BMW is "pretty neat" too. I didn't design
them.

> Heil may have thought that no amateur in here would know about
> "order-wires." He did not reckon with someone in here having any
> experience in large HF communications installations. Few amateurs
> in here now or of four years ago are even familiar with the term, that

Why would "Heil" think that? Do you think you are a radio amateur "in here"?

> Heil's initial response was that the "CW was necessary to
> establish synchronization of the RTTY." That was poor wording.
> Teleprinters are designed and built to be self-synchronizing.

It probably was poor wording. Teleprinters are self-synchronizing but I wasn't referring to self-synchronization. I referred to crypto sync.

> Heil then explained that the "synchronizing" referred to
> "schedules" or operating times and other circuit details.

"Heil" didn't say that at all though I did make statements about the use of the CW circuit since our station was not in operation 24 hours per day.

> That is illogical. Firstly, if the receiving teleprinter is working at
> all, it will print out a schedule and detail listing that is identical
> to the transmitter teleprinter. Further, with a paper tape punch
> and reader, the identical schedules message can be "read back"
> to confirm that the received message was correct. Such a
> transmission and "read-back" confirmation can be done in less
> time than it takes to send the same schedules message via
> morse code.

We weren't broadcasting, Len, and didn't do a "schedule" more than a couple of days in advance. There are time, due to severe multipath distortion, that even a teleprinter running in the clear, without crypto overhead, and using link enhancement, will print only garbage. During those periods, which occur much of the year in West Africa, CW worked when teleprinters did not work.

> It is illogical to use an on-off keying morse code mode as
> control on a teleprinter circuit, whether wired or by radio.
> The teleprinter is much faster, may be configured with on-line
> encryption, and exhibits much, much less error than manual
> telegraphy. The print-out at the receiver is essentially identical
> to that at the transmitter so that both ends of the circuit have
> the same document for referral. There is no possibility of
> hand-printing distortion leading to other, later circuit operators
> misinterpreting the printing. Teleprinter printing is always the
> same precise form.

Illogical, Spock? Any baudot character distortion caused by multipath can render a teleprinter totally unuseable. If you have no teleprinter order wire, you can't easily arrange to open, close or QSY the circuit. It wasn't as if I was working in a place where I could make a telephone call.

> At a much later date, Heil tried to rationalize his original error
> by stating "it was State Department protocol to use that
> method (CW as order-wire on an RTTY circuit)." That is

> banking his bluff on no one knowing State's communications
> in detail. That may have been correct...but, he claimed that
> "I could not know anything at all about State Department
> communications."

"Heil" never made that statement either. The system was not in use world wide by State. The system was not even Africa-wide. There were places using satellites and leased lines for the primary circuit. It is apparent from your comments that you still don't know anything about State Department comms.

> The problem there was that I did know some of that. The RCA

> RACES machines, one an on-line spare to the other. The
> communications mode stored? Teleprinter. Not morse code.
> That was in the working specifications for the RACES
> installation.

Did you think that the RACES system was in use worldwide? Do you believe it to still be in use? Did you think that mechanical teleprinters were still in use in other than Africa and a few Asian spots in the 1980s? My friend Jack disagrees with you. I don't believe you know Jack.

> What we had in here is a simple exponential growth of an
> initial bluff into a kludge of a rationalization for the simple
> failure of acknowledging that someone else might have some
> experience in communications.

What we have here is someone never involved in State commo dismissing the statements of one who was actively involved in State Department communications over many years. That's about as silly as you telling us what is best for amateur radio.

> Heil could have avoided all of that by simply ignoring the
> challenge to his "CW order-wire on a TTY radio circuit is a
> good idea" or dropping the subject. No, he had to embellish
> it, build on it, adding bluff to bluff until he had a very unstable
> house of cards. Those have all fallen but Heil does not
> realize it.

Sure, I could have avoided all that by letting you blow smoke up the asses of any who would be naive enough to know how you operate. You pontificate, chuff and puff and in general sway others into believing that what you say is true by sheer length and number of posts. No one can know more about something dealing with the world of electronic

communications than you, huh?

> The original discussion was on "uses of CW (morse code)"
> and the "need for the code test retention." It was not about
> "State Department" protocol or communications...it was about
> PCTA claims to greatness of morse code...an on-going
> fantasy fanning the flames of dispute in this newsgroup four
> years or so ago.

My original comments on this topic countered your balderdash that the
U.S. government no longer used morse.

> Heil could not give-in or concede anything. He HAD to be
> right. He HAD to be superior. He could never, ever admit
> defeat...and so everyone was treated to his card-building
> and bluffing.

That's right. "Heil" doesn't concede or give-in when he has made
statements which are true and correct. To admit defeat, he'd first have
to be defeated at something. That hasn't taken place despite your best
efforts to distort and dismiss.

> Now, in fairness, it is possible that somewhere, at some
> remote State Department embassy or consulate, there "might"
> be some morse code used. There is NO evidence from any
> State Department source that it is so.

Go ask State for corroboration if the matter is important to you.

> Why should there be?

> very emotionally rewarding for him. It may have led to some
> other emotional problems with logic and thinking he was truly
> superior instead of just the rare-call individual.

The above is about as surreal as it gets, Len. What did my amateur
station in Guinea-Bissau have to do with my daily tasks in a State
Department communications center? Who ever claimed that State's commo
facilities were as big or bigger than the military's? "One can only
surmise" indeed.

> RTTY by commercial, government, and military users has been
> formalized, standardized, and used since prior to WW2. Trying
> to state that a "CW order-wire on an RTTY circuit" is either

> logical, State protocol, or anything else "good" is nonsense.
> It was a bluff counter to the original subject, the bluff was called,
> more bluff was layered on the original bluff, and that was called,
> and so on and so on.

I think you're honked that someone dared counter you claim that the US government does not use morse and didn't back down no matter how hard you huffed and puffed and attempted to blow the house down.

> The continuing iteration of bluff after bluff can only lead to the
> conclusion that Heil may attempt the same on other subjects.

The only thing which comes to mind is your years-old bluff that you know anything about what is good for amateur radio.

> >Yep, Doctor Evil and Mini-Me are the self-declared victors despite being
> >heckled by the audience and being pelted with verbal tomatoes. I can't
> >wait for your encore.
>
> Heil seems fixated on motion pictures and characters therein as
> his idols or examples. Those are fictional. Perhaps Heil's own
> experiences in the bigger world of non-amateur radio are fictional...

How does referring to the tag team of Anderson and Burke by names from a very funny film indicate fixation? I was aware that the characters are fictional. Your history in amateur radio is also fictional. Your knowledge of State Department commo is fictional. Your claim to civil debate is also fictional.

Even if it was, the murky detail and small size would make it tough to identify what looks to be a "single post" design. I couldn't even make out a yoke on the thing.

news:1%TY8.555353$cQ3.51336@sccrnsc01...
> Only us nitwits would have read this whole thing....
> LMAO.

Oh, James Kopout known as Krapout has quite a number of gems he tries to hide from, like his arrest by Toronto, Canada police for kiddie porn distribution :

Krapout "subRoutine" <s^0.0^7ii.exe@softtargets.com> whined his spanked status in
<kJZc8.48395$JZ.5661270@news20.bellglobal.com>:
"Anyone can also go to the Toronto Reference Library and look up your demographics based on income, number of dependents
etc. etc. among other things. Your name, address & stats has been sold for a penny amillion times over to any marketing company
interested. Can you imagine what would happen if that information was used for malicious purposes?
Hope you cleared your fax machine of all those unwanted telemarketing ads."

In the article: <45ttih$64e@inforamp.net>
James Koput <festerat@inforamp.net> writes his totally unobtainable desires:
"I however give such weaklings an occasional whack across the face when they so deserve, when the moment suits me. I don't argue with children such as he/she, I teach them lessons."

In article: <43vmcp$7eh@inforamp.net>
James Koput <festerat@inforamp.net> writes of how he tied up little boys in his basement:
"That's another utterance some of my past victims have made after I wrapped their heads in duct tape."

In article: <442bmh$ngn@inforamp.net>
James Koput <festerat@inforamp.net> writes how he kidnaps children for his perverted
kiddie porn scheme:
"Hold on a sec....(leaves puter and goes down into the dungeon...
..checks on victim.....comes back to respond to smartass.......)
Okay she's still there...."

Message-ID: <Edina1996Sep4.085505.12308@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes more racism:
"Speaking of twats, since you're and african bitch, I have a question:
Did they mutilate your clit when you where younger? i.e. Have you

been circumcised? I hope so, a whore like you should not be able to
enjoy sex, otherwise you'd be spreading your herpes exponentially
from the street corners of NY."

Message-ID: <Edina1996Sep9.130858.32431@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes about his desires to stickl
fingers up
other people's asses:
"She's only half as lame as you are, sweety.
I'll bet that you'd like to lick her pussy regardless...
So take my advice, I'll straighten you out if you let
me shove my nine inch nail up your hot ass, I'll use
the blood as lubricant...and make you squeal like the
little fuck-pig that you really are."

Message-Id: <Edina1996Jun9.200917.8511@news3.compulink.com>
crash@idirect.com (Filter/SubRoutine/James Koput) wrote about his plans for
trolling for little
underage boys to molest:
"Please call me Roxanne Litman, I'm considering a sex change so as to
attract more 5 year old boys."

Message-Id: <Edina1996Jun2.132257.6432@news3.compulink.com>
crash@idirect.com (James Koput) wrote:
"Are you drinking from the toilet bowl again, Curtis?
This is bad considering that it's a great source for
bacterial infections which HIV people are very
susceptible. Keep the seat down after flushing."

<Edina1996Jul6.000658.22977@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes from the voice of personal
experience:
"The type of man who cruises kinky chat-line like ngs usually has plenty
of HIV in his bloodstream."

<Edina1996Jul8.171007.30166@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes:
"They are simply curious to why you are so open about your apparent
perversions and in the closet about your HIV status."

<Edina1996Jul8.171007.30166@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes:
"When you are unsuccessful in your attempts to spread your germs, you use
whips and chains and rubber dildos with this so called married partner.
I gather the two of you are receiving same sex benefits or on some kind
of goverment sponsered HIV programme. At other times you bring in the dead
bodies from the morgue to molest, which
is not as typical but hey, you're a strange one anyway..."

In <Edina1996Jul8.171007.30166@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) PKB's:
"Do you drink the blood of your victims as well? You seem awfully thirsty.

Don't you have enough when you swallow cum and get spermed up the ass a
few times?"

In <Edina1996Jul8.171007.30166@news3.idirect.com.compulink.com>
crash@idirect.com (James Koput/Filter) writes:
"I understand, you are experiencing difficulty as a second class citizen,
I'll be sympathetic to your plight this time."

In <Edina1996Jul6.000658.22977@news3.idirect.com.compulink.com>

Proves what? I don't have the waiver. There is no waiver button for you to
push.

You're the one acting like an idiot.

What was your conscience telling you when I mentioned the word, "Waiver?"

Do you still have the pornography button? Just don't try sending any my way
again.

In the interest of "accuracy," its important to note that others with
multiple DX calls cannot know much about DX.

Oh, Please!

I get on, I operate, I QSL.

According to you, I'm not supposed to learn other countries authorizations
so I'll know where to look for them. Instead I'm just supposed to tune from
one end of the band to the other hoping to stumble across the ones I need.

> > Oh, and try to be accurate.

> enjoy ragchewing with distant stations. Do you consider that to be
> DXing?

When I've got a pile-up, I run it. QSLing was a huge chore. Expecially the
time I entered a JA contest! I did enjoy ragchewing with the WestPac
regulars. Somalia was different. Most of the stations calling wanted to
know what it was like over there.

> I think you agree that perating from a rare DX spot is quite different
> from DXing from the U.S.

Sure. The DX station runs the pile-up, the US station tries to work it.
Contests are an excellent source of finding DX on either side of the pileup.
The US DXer hunts and pounces the DX during a contest. The DX station can
do likewise if he's not a serious contester. A US station might get a
pileup going during an IOTA contest.

What differences have you note in goals and
> technique between rare DX ops and U.S. ops. How many do you have

10M SSB only when I was active. I'm inactive on HF at present. For the
pileup, try to listen to where he is actually picking them when he says "up
10," then call at QRZ or tailend the current Op. When operating 10M SSB,
what specialty is there other than QRP?

So far it hasn't been a problem. Perhaps when I become a pompous Code-Tape
Extra-Lite I might have problems in that department. In amateur radio I
outrank the hell out of Len, but I don't act pompous with him. He was a
professional, I'm an amateur. No, I don't think I'll have "Good Amateur
Practice" problems should I ever upgrade.

I'd like to see that also. I wouldn't be able to do a lookup. By the time
you identify one letter, the next two have rolled by. "Flying behind the
airplane" as they call it.

My guess is that the lookup method is another urban myth like the
"memorize the letter answer" we see here so often.

>> You never asked. And at this point, it's none of your business.
>
>Yes, it IS my "business."

No, it's not.

Not now. Not yesterday, nor in a 1000 tomorrows will it be your "business". Your "business" is hatred, deception, and antagonism, and although I take a bit of sport in dogging you over your frequent misdeeds, nothing in my life is part of your "business".

Sorry if that irks you.

You have no "right" to anything, Lennie, not specifically granted to you under the Constitution. Who I work for now or what I did in the Armed Forces (save that available under FOIA) is NOT your "business", nor is it germane to anything here.

That you choose to repetitively harrangue us with yours is YOUR decison.

"Debate", civil or otherwise, is not done based on the personal information of any of the participants. You have as much as I am going to give you. If you can find anything else out from public records, have at it, but nothing there will support or discredit an argument over on-off keying (with or without Morse encoding, if you insist on trying to keep that in the formula)

Trying to "debate" over my service in the Armed Forces is foolhearty, Your Putziness. It's a shameful grasp for "something" to make a "point" over without any REAL facts or data on the point in discussion. You have no valid points to make, ergo you will try to discredit me on some personal level.

Sorry. You lose.

So spin, Lennie, spin. The centrifugal force is probably all that's holding you up these days.

" I am laughing at the superior intellect." (*)

Steve

(*) With apologies to Gene Roddenberry (RIP) and company

I was originally licensed in July '81, upgraded to Extra in Feb. 83. I
took all of my tests at the FCC Field Office in Baltimore, MD. The
issue/renewal date of 4/8/97 was when I was issued my Vanity Call
Sign, K3LT.

>Since I got my license some 20 years before him

No, if you don't operate CW, you are on a lower plane of existence as
an amateur radio operator. I am a FCC Field Office-examined, 20 WPM
code test passed, Amateur Extra-class, CW using, CW loving Real Ham.
That's as good as it gets.

It is quite possible to obtain a license to operate without possessing
the necessary skills required to be a DXer, Brian. Ragchewing with a
"G" or an "EA" isn't DXing.

The moment Schoenbohm returns to 14313 the jammers will be all over him, and Hollingsworth can flush five years of enforcement work right down the shitter. Follow that with the moment Schoenbohm attempts to check into the Maritime Mobile Net all hell will let loose, and Hollingsworth can flush the shitter again just to make sure his five years of hard work are gone down the shitter. And of course history will repeat itself, because where Herbie goes, his little band of sycophants are sure to follow.

>
> 6. In 1994, Mr. Schoenbohm filed applications to renew his
> Amateur Radio Service station license for KV4FZ and for his Amateur Radio
> Service operator license. In 1995, the Wireless Telecommunications
Bureau,
> under delegated authority, designed Mr. Schoenbohm's applications for
> hearing. HDO, 17 FCC Rcd at 1370. Following two hearing sessions, the
> Commission, in July 1998, determined that Mr. Schoenbohm had engaged in
> misrepresentation and was not fully candid in describing his conviction.
> The Commission found that Mr. Schoenbohm had testified deceptively about
his
> conviction both in 1995 and again in 1997. Decision, 13 FCC Rcd at
> 15029-31; Tr. 39. In addition, the Commission found that Mr. Schoenbohm
had
> testified deceptively in 1997 about an amateur radio transmission he made
in
> 1995, during which Mr. Schoenbohm solicited others to make ex parte
> presentations to the Commission on his behalf. Decision, 13 FCC Rcd at
> 15032-36. Accordingly, the Commission denied Mr. Schoenbohm's
applications.
> However, in accordance with its usual policy, the Commission authorized
Mr.
> Schoenbohm to continue to operate his amateur station until the 91st day
> following the release date of judicial review of its decision. Decision,
> 13 FCC Rcd at 15037. Subsequent to the Supreme Court's action in October
> 2000, which denied Mr. Schoenbohm's petition for a writ of certiorari, Mr.
> Schoenbohm ceased operating amateur station KV4FZ in late January 2001.
He
> submitted the applications currently under consideration on March 31,
2001.
> Tr. 42. In conjunction with his applications, Mr. Schoenbohm, on April
14,
> 2001, took and passed an examination for an extra class amateur license
> administered by the American Radio Relay League. Schoenbohm Ex. 31.
>
>
>
> B. Character Generally
>
> 7. At the instant hearing, Mr. Schoenbohm testified that,
prior
> to his conviction, he had never been convicted of any felony or serious
> crime. He further testified that, subsequent to his conviction, he has
not
> been convicted of anything. Schoenbohm Ex. 1. Before the Commission

denied
> his renewal applications in 1998, Mr. Schoenbohm had held an amateur
license
> for over 40 years. Schoenbohm Ex. 14. He also holds a general
> radiotelephone operator license. Schoenbohm Ex. 43.
>
>
>
> 8. As for his testimony at the prior proceeding, Mr. Schoenbohm explained
> that he "was in a state of denial, believing that [he] had been wrongfully
> convicted of a crime that [he] did not commit." Schoenbohm Ex. 1.
> Notwithstanding his personal opinion of the events surrounding his
> conviction, Mr. Schoenbohm now realizes that he was found guilty and that
he
> is a felon. Id. Addressing the fact that his written testimony in this
> proceeding omits any reference to the Commission's findings that he
> misrepresented facts and lacked candor in his 1995 and 1997 testimony
> regarding his felony conviction and ex parte communication solicitation,
Mr.
> Schoenbohm explained that he did not think he had to address the
Commission'
> s findings from the prior proceeding. Schoenbohm Ex. 1; Tr. 44, 46-47.
>
>
>
> 9. Mr. Schoenbohm understands that the purpose of the instant hearing is
to
> determine whether he has "been sufficiently rehabilitated such that the
> Commission could be confident that [he] could be relied upon to deal with
> the Commission in an honest and forthright manner." Tr. 43. In support
of
> his claim that he now possesses the requisite character qualifications,
Mr.
> Schoenbohm testified that he has worked hard to rehabilitate himself "and
to
> overcome the effects of [his] conviction" and "to demonstrate that [he is]
> capable of obeying the law and, in particular, the FCC's rules and
> regulations." Schoenbohm Ex. 1. In this regard, Mr. Schoenbohm testified
> that for about the past eight years, he has "held a responsible position
> with the Virgin Islands government, in charge of expenditures and
> supervision of large amount[s] of money and property. During that time,
> nobody has accused me of any dishonesty, connected with my work."
> Schoenbohm Exs. 1. See also Schoenbohm Ex. 45. In this regard, the
record
> reflects that Mr. Schoenbohm has worked in various capacities in the
Virgin
> Islands Department of Property and Procurement. Tr. 47; Schoenbohm Exs.
4,
> 13, 30, 41, 45, 56. Among other positions, Mr. Schoenbohm has been the

> manager for the Recovery Hill repeater site. In that role, he "issued a
> plan of attack to get all the illegal, unlicensed, not properly licensed
or
> wrong location squatters that had moved in over the past ten years and
were
> using the facility." Tr. 48. More recently, Marc Briggs, the Commissioner
> of the Department of Property and Procurement, designated Mr. Schoenbohm a
> department "Essential Employee," effective August 21, 2001. Schoenbohm
Ex.
> 41.
>
>
>
> 10. In his capacity as a member of the Virgin Islands Department of
> Property and Procurement, Mr. Schoenbohm serves on a committee that
> evaluates all government radio purchases. Tr. 47. The chief legal
counsel
> for the department appointed Mr. Schoenbohm as the "radio site inspector"
to
> investigate whether certain other Virgin Islands government agencies were
> procuring improperly licensed radios by skirting the competitive bidding
> process. Tr. 47-48. Mr. Schoenbohm testified that he has sent a letter
to
> Joseph Casey of the Commission's Enforcement Bureau regarding this matter,
> and that Mr. Schoenbohm has communicated "with [Commission] field
personnel
> in Puerto Rico, Rueben Jusino, and ha[s] been cooperating with him in
trying
> to get information, invoices, serial numbers, locations of radios," in
this
> on-going investigation. Tr. 48.
>
>
>
> 11. Mr. Schoenbohm also responded to a complaint letter Riley
> Hollingsworth, an FCC attorney, forwarded to Mr. Schoenbohm. Tr. 79.
> According to Mr. Schoenbohm, Louis Bean, an amateur licensee, complained
to
> the FCC about Mr. Schoenbohm's operating a radio station associated with
Mr.
> Bean's amateur repeater. Tr. 78-80. Mr. Schoenbohm notes that Mr. Bean
> claimed that Mr. Schoenbohm restored Mr. Bean's station to operation "by
> hook or by crook." Tr. 78. Mr. Schoenbohm explained that, years ago, his
> call sign had been the designated call sign for use on the repeater. Tr.
> 80. When Mr. Schoenbohm's call sign was removed from the repeater, Mr.
Bean
> began using his call sign on the repeater. Tr. 80. Mr. Schoenbohm
> testified that he never had the ability to operate the equipment
associated

> with Mr. Bean's call sign. Mr. Schoenbohm testified his only involvement
> with the repeater was to unplug the equipment in response to the letter
from
> Mr. Hollingsworth. Tr. 81.
>
>
>
> 12. With regard to his reputation in the community, Mr. Schoenbohm is an
>
> elected and non-elected official of the Republican Party of the United
> State Virgin Islands. Tr. 52; Schoenbohm Ex. 3. Mr. Schoenbohm also
> continues to do volunteer work, although not to the same extent as he did
> before his license was not renewed due to the passing of time. For
example,
> Mr. Schoenbohm recently worked on a triathlon. Tr. 52.
>
>
>
> 13. The only other witness to testify in person was Mr. Frank Todd of
Port
> Vue, Pennsylvania, who testified as to Mr. Schoenbohm's reputation in the
> amateur radio community. Schoenbohm Ex. 22; Tr. 129-145. Mr. Todd, who
has
> recently recovered from a car accident, traveled 236 miles to appear at
the
> hearing. Tr. 131. Mr. Todd has known Mr. Schoenbohm since approximately
> 1995, when, at the age of 13, Mr. Todd became interested in amateur radio
> and used to monitor Mr. Schoenbohm's transmissions. Tr. 140-141;
Schoenbohm
> Ex. 22. During his years of listening to Mr. Schoenbohm, Mr. Todd found
Mr.
> Shoenbohm's deportment exemplary. Id. Mr. Todd testified that he
considers
> Mr. Schoenbohm "a positive role model in amateur radio and an individual
> that is capable of making a very significant contribution to the Amateur
> Radio Service." Id. In fact, Mr. Schoenbohm was the "prime inspiration
and
> motivation" that led to Mr. Todd's acquisition of amateur license K3EKO.
> Id.
>
>
>
> 14. Mr. Todd did not meet Mr. Schoenbohm in person until 1999. Tr. 141.
> Although Mr. Todd did not have an amateur license at that time, he
traveled
> to the Virgin Islands to meet Mr. Schoenbohm, and he stayed with Mr.
> Schoenbohm and his family for a week. Schoenbohm Ex. 22. Mr. Todd
> testified that he believes Mr. Schoenbohm to be a "decent, honest and
> hard-working person" and hopes the Commission will allow Mr. Schoenbohm

"to
> prove himself and enjoy his later years through a wonderful activity like
> amateur radio." Id.
>
>
>
> 15. Mr. Todd testified that he is familiar with the reasons underlying the
> Commission's 1998 decision not to grant Mr. Schoenbohm's renewal
> applications. Tr. 133. Specifically, Mr. Todd acknowledged that he was
> aware of Mr. Schoenbohm's lack of candor regarding his testimony about his
> toll fraud conviction; however, Mr. Todd also admitted that he didn't
> understand the Commission's findings regarding Mr. Schoenbohm's lack of
> candor regarding his ex parte communications. Tr. 133, 136, 139. Mr.
Todd'
> s awareness of the Commission's finding regarding Mr. Schoenbohm's lack of
> candor did not change Mr. Todd's opinion as to Mr. Schoenbohm's
> qualifications because Mr. Todd believes that Mr. Schoenbohm has been
> truthful to him. Tr. 137, 140. Mr. Todd further testified that
> "[r]egardless of whatever Mr. Schoenbohm may have done, he has certainly
had
> time to make the adjustments in his life necessary to re-qualify himself
as
> a candidate for an Amateur Radio License." Schoenbohm Ex. 22.
>
> C. WSTX/WSTX-FM
>
> 16. After Hurricane Lenny hit the Virgin Islands in 1999 and interrupted
> the power supply for station WSTX(AM), Mr. Schoenbohm restored the
station's
> antenna and tuned the transmitter so that the station could continue
> operating. Tr. 51, 53-54, 60, 62-63. Mr. Schoenbohm testified that after
> Hurricane Lenny passed through St. Croix, the Virgin Islands Emergency
> Management Agency directed him to install an antenna to ensure that
station
> WSTX was able to operate "so the public could be informed by FEMA and by
the
> local government agencies on relief supplies. They considered it vital to
> put that station back on the air," because WSTX(AM) was the primary
station
> that people listened to during emergencies. Tr. 60-61, 64. Mr.
Schoenbohm
> advised the owner of station WSTX that he would need a competent
consulting
> engineer in order to put the station in the proper mode, and that he would
> have to notify the Commission of the station's circumstances and file the
> necessary papers as soon as practicable. Tr. 58, 60, 64-65.
>
>
>

> D. Contest
>
> 17. In October 2001, subsequent to the cancellation of the license for
> amateur station KV4FZ, Mr. Schoenbohm served as a host for a participant
in
> an international radio competition or contest. Schoenbohm Ex. 1; Tr. 81.
> The purpose of the competition was to have contestants make contact with
> other amateur stations around the world. Essentially, the message sent
and
> received involved each station identifying itself and transmitting a
message
> consisting of a signal report and a numeral identifying which of 40
"zones"
> where the station was located. The contestant(s) who had the highest
score
> would win. Tr. 84, 89, 102. Some months earlier, Mr. Schoenbohm had
placed
> a notice on the Internet advising that he would rent out part of his home
to
> amateur radio operators who wished to participate. Tr. 88. Steven S.
> Reichlyn, amateur radio licensee of station AA4V, accepted Mr.
Schoenbohm's
> offer and indicated that he and a friend would like to use Mr.
Schoenbohm's
> facilities, to include use of his home and radio equipment (a transmitter,
> amplifier, and a switch for some antennas). Tr. 89-90. At the last
minute,
> Mr. Reichlyn's friend cancelled. Tr. 89. Nevertheless, Mr. Reichlyn
> arrived at Mr. Schoenbohm's home on or about October 25, 2001, two days
> before the start of the contest, and did not leave Mr.Schoenbohm's
premises
> until after the contest ended on October 28, 2001. Tr. 81.
>
>
>
> 18. The contest began on Saturday, October 27, 2001, at 00:00
> Greenwich Mean Time ("GMT") and lasted 48 hours. Tr. 96, 98, 100-101; EB
> Ex. 3. Mr. Reichlyn operated from inside of Mr. Schoenbohm's house, a
> single-level dwelling that is "basically a very open area that is
separated
> only by" louvered windows. Tr. 90. Mr. Reichlyn stopped transmitting at
> 0627 GMT, 27 October and asked Mr. Schoenbohm if he would like to operate
> the microphone because of Mr. Schoenbohm's expertise at operating on low
> frequencies. Tr. 109. Because Mr. Reichlyn had entered a two-man
contest,
> he could have another person assist him with the contest. Tr. 97. Mr.
> Schoenbohm accepted and began operating the equipment under Mr. Reichlyn's
> call sign from 0627 to 0758 GMT. Tr. 98, 110, 116. Mr. Schoenbohm
> contacted multiple operators during that period, including contacts with

> operators in St. Martin, Scotland, the Canary Islands, New Zealand,

>
>
>
> prohibits certain communications involving a "third party."[3] Mr.
> Schoenbohm asserts that he did not violate section 97.115 of the
Commission'
> s rules when he operated radio equipment under Mr. Reichlyn's call sign.
> Schoenbohm Ex. 1; Tr. 106. As Mr. Schoenbohm understands that rule, he
> would be prohibited, as an unlicensed operator, from "passing messages to
a
> third party." Tr. 106; 108. Mr. Schoenbohm contends that the rules would
> not, however, prohibit him "from being a voice behind the microphone to
> establish the communication" with another operator. Tr. 106; 108. Mr.
> Schoenbohm understood that, so long as a licensed operator supervises the
> transmission, an unlicensed operator, such as Mr. Schoenbohm, could speak
> into the microphone. Tr. 108.
>

>
>
> E. Effect of the Loss of License
>
> 21. Mr. Schoenbohm acknowledged that "misrepresentation . . . is
considered
> to
>
> be a cardinal sin at the Commission," and he viewed the Commission's
denial
> of an application for renewal as "a death penalty." Tr. 175, 176.
Although
> Mr. Schoenbohm disavowed any intent to deliberately deceive the trier of
> fact during his earlier Commission hearings, he specifically acknowledged
> that the mistakes he made in his prior testimony "were egregious mistakes,
> fatal mistakes." Tr. 180. Mr. Schoenbohm believes that being denied use
of
> an amateur station for fifteen months has been an adequate sanction. Tr.
> 176. As he described it:
>
> [i]f you have been off the air for a year in ham radio you have shamed
> yourself, like a
>
> Japanese industrialist would, before the entire amateur community. It is
a
> very serious
>
> punishment when you are . . . a very high-profiled [sic] individual,
> involved a lot in
>
> contests and international operations, regarded as a person who has won
> contests and
>
> achieved world records, all of a sudden he is banished. That is a much
more
> serious
>
> deterrent than a taxicab licensee losing his communication system for one
> year because
>
> it is a personal shame that is attached to it.
>
>
>
> And it is very hard for me to explain that to you because only I know it.
.
> . . I let the
>
> community down and the Virgin Islands down where I cannot perform the

> services they
>
> have relied on in the past because I can't even talk to the National
Weather
> Service when
>
> a hurricane passes over. Tr. 176-177.
>
>
>
>
>
> III. PROPOSED CONCLUSIONS OF LAW
>
>
>
> 22. The HDO requires the Commission to determine whether Herbert L.
> Schoenbohm possesses the requisite character qualifications to be a
> Commission licensee.
>
> In assessing character, the Commission seeks to predict whether a
> prospective licensee will be honest in his dealings with the Commission
and
> will abide by the Commission's rules and the Communications Act. See
Policy
> Regarding Character Qualifications in Broadcast Licensing, 102 FCC 2d
1179,
> 1183, 1189-91 (1986) (subsequent history omitted) ("Character Policy
> Statement").[4] As discussed herein, the Bureau believes that the
evidence,
> although mixed, supports a conclusion that Mr. Schoenbohm has the
requisite
> character qualifications. In this regard, the Bureau notes that its
> reluctance to fully endorse Mr. Schoenbohm stems from his operation of an
> amateur station when he did not have a license to do so.
>
>
>
> 23. As noted in the HDO, the Commission considers various
> factors in determining whether an applicant such as Mr. Schoenbohm has
> rehabilitated himself and demonstrated that he possesses the requisite
> character qualifications to become or remain a licensee. Among other
> things, the Commission will consider: 1) whether the applicant has avoided
> any significant wrongdoing since the prior disqualifying misconduct; 2)
the
> amount of time elapsed since the misconduct; 3) the applicant's reputation
> for good character in the community; and 4)
>
>

>
> meaningful measures taken by the applicant to prevent the future
occurrence
> of misconduct. Moreover, in assessing the character of someone who, like
> Mr. Schoenbohm, had a previous application denied by the Commission, the
> Commission will also consider the deterrent impact of its previous action.
> Policy Regarding Character Qualifications in Broadcast Licensing, 5 FCC
Rcd
> 3252, 3254 (1990) ("Modified Character Policy Statement").
>
>
>
> 24. Behavior subsequent to prior misconduct. The record
> reflects that Mr. Schoenbohm has not engaged in any criminal misconduct
> since his 1992 conviction for toll fraud. However, as discussed below,
the
> record reflects that Mr. Schoenbohm violated the Communications Act
> subsequent to his 1995/1997 misconduct. Specifically, the findings
support,
> and it should be concluded, that Mr. Schoenbohm's operation of Mr.
Reichlyn'
> s station during an amateur contest violated section 301 of the
> Communications Act, 47 U.S.C. 301, because Mr. Schoenbohm's operation
was
> not allowed by sections 97.5 and 97.7 of the Commission's rules.[5] Read
> together, those rules require that, during transmissions, an amateur
station
> be under the physical control of a control operator who is a licensee.
> Clearly, that was not the case during the two hours Mr. Schoenbohm
operated
> Mr. Reichlyn's station. Instead, the evidence reflects that Mr.
Schoenbohm
> had physical control of the station. In this regard, even though Mr.
> Reichlyn was present or nearby and able to supervise Mr. Schoenbohm, it is
> apparent that Mr. Schoenbohm operated the station and made transmissions
> while at the microphone. Thus, Mr. Schoenbohm violated section 301 of the
> Act because he did not have a license to transmit and was not otherwise
> authorized to operate Mr. Reichlyn's station.[6] Finally, Mr.
Schoenbohm's
> work on WSTX(AM)'s antenna in 1999 occurred in the context of restoring
> service following a hurricane. The "fix" was meant to be temporary, and
Mr.
> Schoenbohm advised the licensee that additional work was needed before the
> station's antenna complied with the terms of the station's license. Mr.
> Schoenbohm worked as a contractor and was not responsible for the legality
> or illegality of WSTX's antenna.
>
>
>

> 25. Time since the misconduct. The evidence reflects that
the
> last misrepresentation occurred in 1997, when Mr. Schoenbohm testified
> falsely before a Commission Administrative Law Judge. However, as noted
> above, Mr. Schoenbohm violated the Communications Act during a two-hour
> period in October 2001, when, although unlicensed, he operated Mr.
>
> Reichlyn's station.
>
>
>
> 26. Applicant's reputation for good character in the
community.
> The only direct evidence of reputation proffered by Mr. Schoenbohm was the
> testimony of Frank Todd. However, Mr. Todd testified unequivocally that
Mr.
> Schoenbohm's reputation for good character in the Virgin Islands was
> favorable. The Bureau submits it is also appropriate to infer that Mr.
>
> Schoenbohm's reputation for character in the local community is good in
view
> of his current employment, his employment history, and his position in the
> local Republican Party. Specifically, as to employment, Mr. Schoenbohm
has
> held and continues to hold positions of responsibility and trust in the
> Virgin Islands' Department of Property and Procurement.
>
>
>
> 27. Meaningful measures taken by the applicant to prevent the
> future occurrence of misconduct. The denial of Mr. Schoenbohm's renewal
> application occurred because he committed a felony and because he
testified
> deceitfully before this agency. Consequently, meaningful measures should
> reasonably include a commitment by Mr. Schoenbohm to avoid criminal
behavior
> and to be truthful in all his dealings with this agency. The findings
> reflect that such has occurred. As noted, Mr. Schoenbohm has not been
> convicted of anything since 1992, and there is nothing in the record to
> suggest that Mr. Schoenbohm will commit crimes in the future. As for
> truthfulness, Mr. Schoenbohm recognizes that he made "fatal mistakes" in
his
> prior hearing testimony. While not exactly an unequivocal commitment to
> future truthfulness, the Bureau believes it sufficient, when coupled with
> Mr. Schoenbohm's recognition that misrepresentation is a "cardinal sin at
> the Commission," to constitute a meaningful measure to prevent a future
> recurrence of deceit.
>
>

>
> 28. Deterrent impact of previous denial. Mr. Schoenbohm has
> not been authorized to operate an amateur station since January 2001.
Given
> his governmental positions and his previous use of amateur radio, inter
> alia, in connection with hurricane relief, Mr. Schoenbohm apparently had
> some notoriety in the amateur community. Thus, as he testified, his
> banishment, which has now extended some 17 months,[7] could have caused
him
> great shame. Such shame, and the desire to avoid such shame in the
future,
> should lead to the conclusion that the Commission's previous denial has
had
> the desired deterrent impact. Notwithstanding Mr. Schoenbohm's October
2001
> violation of the Communications Act, it is the Bureau's view that Mr.
> Schoenbohm has learned his lesson and will not, in the future, engage in
> behavior that calls into question his fitness to be a Commission licensee.
>
>
>
> 29. In light of the foregoing, it appears that Mr. Schoenbohm
> has shown by a
>
>
>
> preponderance of the evidence that he possesses the requisite character to
> be a Commission licensee.
>
>
>
> IV. ULTIMATE CONCLUSION
>
> 30. Issue (b) requires the determination of whether, in light of the
> evidence adduced, the captioned applications should be granted. For the
> reasons noted above, the Bureau believes they should.

Ed:

Nope. If the code is worth learning, and is adopted for general use in the ARS, I'll just learn it the way I learned the good 'ole Morse code. When can we expect to see a QST article on the Hare code?

That's already been taken care of. It is common among CW operators to use the letter "T" in place of a "zero." It is definitely shorter, and well understood; people don't normally use "T's" mixed within number groups. If I send my Zip Code as "199T4," most hams will understand that I meant "19904." For that matter the whole thing could be sent "1NNT4," but that could be confusing to less experienced CW operators.

This obviously cannot be done when giving station identification. All five "dahs" of the "0" have to be pounded out.

And the above is Ed's greatest accomplishment in ham radio: becoming a member of the ARRL HQ staff, and then using his position to behave in an arrogant manner toward members.

For a less condescending example of my accomplishments in ham radio, please see the August 2002 issue of QST magazine, p. 92, column 2. At least QST's contest line scores don't have a bad attitude!

Now, you can't have it both ways, Larry. If CW is the most basic form
of amateur radio communications, that would put it on the lowest, most
basic plane.

We're radio amateurs, not the telephone company. From every spot, all
QSLs received--direct with SASE, a dollar, one or more IRCs, bureau,
were answered. At the end of it all, we spent more than we received.
Any money generated went toward the printing of QSL cards, postage for
bureau shipments, printer labels and the like. Do you personally have a
moralistic judgement to make about any of this?

??????????????

> When I've got a pile-up, I run it.

How?

> QSLing was a huge chore.

That's what managers are for. Any time you spend QSLing, you can't use
for operating.

> Expecially the time I entered a JA contest! > I did enjoy ragchewing > with the WestPac regulars.

Ragchewing isn't DXing.

> Somalia was different. Most of the stations calling wanted to
> know what it was like over there.

That's when you use the "diplomatic reception line" technique. Shake their hand with your right while moving them along the line with your left while murmuring, "Pleased to meet you. Welcome".

> > I think you agree that perating from a rare DX spot is quite different
> > from DXing from the U.S.
>
> Sure. The DX station runs the pile-up, the US station tries to work it.
> Contests are an excellent source of finding DX on either side of the pileup.
> The US DXer hunts and pounces the DX during a contest.

Not necessarily. Lots of U.S. stations are able to generate a pileup in a DX contest. I've had JA runs and EU runs last for hours. You can't run up a high score on this side of the pond if all you do is search and pounce.

> The DX station can do likewise if he's not a serious contester. A US > station might get a pileup going during an IOTA contest.

An IOTA contest? Good Lord deliver us.

>
> 10M SSB only when I was active. I'm inactive on HF at present.

Worked/confirmed totals? DXer's aren't inactive unless there is nothing on which they need.

> For the pileup, try to listen to where he is actually picking them > when he says "up 10," then call at QRZ or tailend the current Op.

Or you can use your reverse button to follow the action without calling at all for a while to see if you can pick up a pattern. Some ops listen over a window of frequencies and tune from bottom to top, a little at a time. Others work top to bottom. Some jump around randomly within a window looking for a clear spot with few callers. Some announce "up ten" when they are listening up five. The guys on the distant end don't always operate split. You might need to concentrate on timing, espcecially if you don't have an amp or a gain antenna at height. Sometimes you have to realize that you aren't going to work the station at all because propagation isn't favoring your area.

> When operating 10M SSB, what specialty is there other than QRP?

If you limit yourself to SSB, there aren't many options. If you limit yourself to 10m, there aren't many options. Those limits would certainly get in the way of a DXer.

> > > > > You've been consistently a jerk.

I've certainly seen comments from others. You haven't noticed them? Have you noticed any rose petals scattered in your path? Aside from sniping by Len, have you noticed criticism of my stand? Those should be clues.

> > > If you don't know what "Good Amateur Practice" is by

Do you mean that "not getting it" hasn't been an impediment but that you feel it could become an impediment if you upgrade? I had to ask since your comment reads that way.

> In amateur radio I
> outrank the hell out of Len, but I don't act pompous with him.

Good for you. You've become his ally and, God knows, he needed one.

> He was a
> professional, I'm an amateur.

We're amateurs because we're licensed in the amateur service. I was good as an Air Force op largely because of experience in amateur radio. I was good as a State Department communicator largely due to experience gained in amateur radio. I've known professionals who were bum CW ops, who were slow or used poor technique as voice ops, who didn't know the first thing about propagation. The fact is that this venue deals with matters relating to amateur radio.

> No, I don't think I'll have "Good > Amateur Practice" problems should > I ever upgrade.

I don't think so either. You'll be so busy looking up frequency
allocation tables that you'll seldom have time to be on the air.
All you really need to do is remember where YOU'RE allowed to be.

> > > Is this where The Old Man breaks out the "Wrenchy Stitch?" hihi

When it comes to discussing the technical part of the hobby, al I ever hear is about 'soldering' and 'electronics'.

Operating is also part of the 'technical pursuit' (i.e. studying propagation).

1793. Re: ARS License Numbers

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-17 09:47:03 UTC
From: n2ey@aol.com
Message-ID: <20020717054703.01619.00000165@mb-cc.aol.com>
Source record: 49706

These are the number of unexpired FCC ARS licenses held by individuals
on the dates listed:

As of May 14, 2000:

Novice - 49,329
Tech - 205,394
Tech Plus - 128,860
General - 112,677
Advanced - 99,782
Extra - 78,750
Total - 674,792

As of July 15, 2002:

Novice - 37,424 (decrease of 11,905)
Tech - 242,219 (increase of 36,825)
Tech Plus - 77,447 (decrease of 51,413)
General - 138,453 (increase of 25,776)
Advanced - 85,015 (decrease of 14,767)
Extra - 102,476 (increase of 23,726)
Total - 683,034 (increase of 8,242)

>all over him, and Hollingsworth can flush five years of enforcement
>work right down the shitter.

Or assure himself of another five years of enforcement work with a whole new crop of people who want to find out personally how the system works.

Works for me.

>>If I make up a new code, care to demonstrate the lookup process sometime?

>Nope. If the code is worth learning, and is adopted for general use in
>the ARS, I'll just learn it the way I learned the good 'ole Morse code.

But that is the premise here, Larry. You claim that applicants are using a lookup table instead of learning the code. If it as easy as you claim, surely you could do it.

>When can we expect to see a QST article on the Hare code?

You cannot expect the article. I raised the point only to demonstrate that you were wrong when you accuse new hams of using a lookup table to pass their 5 wpm code tests. I don't need to do that now because you wouldn't accept the challenge. I think that alone made my point.

Herbie used the words, "death sentence." This implies suicide. Had he taken his life in desperation,then his wife sues the FCC for rendering cruel and inhuman punishment and just might win millions. You think the government considers FZ as worth anything let alone millions?

No. Operating anything you buy is a trivial matter,
Hoover, GSM phone, screwdriver, CB set (whether Midland
or Yaesu 706).

Agreed ... but that does not include talking through repeaters.

Why not come to Bristol Poly and try to operate one of our larger computers. I think you might gain an appreciation of the difficulty of operating a complex system. Operating is only trivial if the device has a trivial function. Try operating a 747 (Boeing not Yaesu). Clearly you have never operated a radio as you believe that 'FM will appear as unmodulated carrier' Ha Ha HA HA HA !!!!! and cannot understand the complexity involved in some aspects of operating. As a first step try to operate your brain before posting.

Andy, M3ABC

Not too sure on that Wlat. Some of the operating on repeaters
is lamentably poor, too technical for some I fear. Keeping a net
of 4 or 5 going on a repeater is beyond a lot of them.

;-)

>>Who said that? Not me.
>
>Not in those same words, extreme literalist, but in tone and tenor of
>your words.

You infer something that was not implied.

> You are an amateur extra.

I've held that class of license since 1970. You have never held any class of amateur radio license. What does that have to do with the various approaches to retailing?

>You state pedantic
>conditions straight out of the ARRL statements as your own.

I have no idea what that is supposed to mean. "Pedantic conditions"?

> You
>become upset at negative criticsm of any kind about the ARRL yet
>you do not work for them.

I don't "become upset" at such things. I do post corrections to other's errors and misconceptions, as well as my own opions and relevant facts.

>You are a "believer" in the sanctity and
>honesty of the ARRL.

Naw, just a member who supports the mission of that organization. I don't always support the policies, though.

>Ergo, you espouse the "Word of Extras."

Nonsense.
>

>
>I asked a question, pointing out that which should be obvious.
>You "replied" with an irrelevant, uncivil "question."
>
>You could have answered the posed question civilly with any
>sarcastic overtones.

Why? Your question is full of nastygram sarcastic overtones.

>>>That difference in price is a lesser profit for the ARRL but it
>>>still represents PROFIT on PRODUCT.
>>>
>>Do you know how much it costs to produce the publications?
>
>I have experience in costing-out publishing costs in addition to
>experience in costing-out design, development, and manufacturing
>of electronics goods.

Do you know how much it costs to produce the ARRL publications?
>
>As a generality in US publishing, the "list" retail price on books is
>twice what a retailer must pay to buy those books. To put it another
>way, the general public paying a list price on a general book will
>have approximately half that purchase cost go towards profit for the
>retailer. The publisher still makes a profit on their price to a retailer
>so more than fifty percent of a list price at a retailer goes towards
>profit.

That's a generality. Do you know how much it costs to produce the ARRL publications?
>
>This high "profit margin" on the general book market allows some
>firms such as Crown Books and Amazon to resell at lower-than-list
>prices. While those "discount" retailers make a lesser profit than
>"list" retailers, they can sell more product than "list" retailers due
>to attracting more buyers. The end result is that the "discounters"
>make more total profit than "list" retailers.

In theory, they "make it up on volume". Amazon's financial statements speak otherwise.

Do you know how much it costs to produce the ARRL publications?
>
>>I simply point out errors and mistakes. You make so many it's hard to keep
>>up.
>
>Incorrect again.

What is incorrect? I do point out errors and mistakes. You do make them. I do have a hard time keeping up.

>You state an incorrect absolute as if it is fact, yet it
>isn't true.

What part isn't true?

>That is very uncivil of you.

The truth is always civil.

>>Somehow I suspect that you want the ARRL to simply go away.
>
>You may "suspect" all you want, but your statement is still incorrect,
>biased, and uncivil.

In other words, I'm right on target.
>
>Like any political-action organization, the ARRL should not consider
>itself above reproach.

All you do is reproach it.

>The ARRL could correct a number of perceived wrongs in its
>approach to control-leadership of US radio amateurs. To do so
>would admit it is not perfect nor even approaching a majority view
>in amateur radio. Some members of the ARRL, such as yourself,
>do not allow any negative statements about the ARRL..

"do not allow"? How is that done?

>.and make
>libelous statements about those who challenge the ARRL for
>whatever reason.

Give us an example of these "libelous statements"

>That is the action of an emotional fanatic.

HAW! That's funny!
>
>>I'm not worked up. I'm not the one calling people diminutive names and
>>shouting.
>
>"Diminutives" in naming seems to be a standard practice in here. :-)

Only by you.

>>You're not the moderator of rrap, and you can't control who posts here or
>>what they post. Grow up and learn to live with it.
>
>I'm not trying to "control" who posts or doesn't post. I'm simply pointing
>out certain negative traits of individuals who cannot take any sort of
>negative criticism. You do not seem able to take negative criticsm.

Why should anyone here take "negative criticism" from you? You don't take it.
Is this "do as Lenover21 says, not as Lenover21 does" things?

Your descriptions of my alleged behavior are actually much more accurate
descriptions of yourself.

>>>Amazon is still a profit-making business.
>>
>>HAW! That's a GOOD one!
>
>Is Amazon still in business after many years? If so, it must be making
>a profit. Businesses do not continue in business without profit.

That's simply incorrect.

Amazon has not been in business for many years. It is heavily in debt. On an
annual basis it has not made a profit in 1999, 2000 or 2001.
>
>"Creative accounting" may make it appear that a business is "losing
>money" as well as "making a profit."
>
>If a business remains in business, it is making a profit.

False. By that reasoning, Chrysler would not exist today.
>
>>The facts are there for all to see. Show us where Amazon is "making a

If it's irrelevant, then the ARRL percentage is also irrelevant.

> Misdirection.

No, just simple truth.

> To reiterate:
>
>No Code International is, in its own statements, solely a political
>action organization.

Sure. No publications, no other services. Yet they propose things that would
affect all of ham radio, not just their membership. Same as ARRL.

> It does NOT require all members to be
>licensed in any radio service.

Neither does ARRL.

What's the problem?

>Further, it has said since the
>beginning of its organization that it will dissolve when the morse
>code test requirement for an amateur radio license is eliminated.

So? It's a single-issue organization. Nothing wrong with that. When the job is
done, there will be no reason for NCI to exist. But there IS a reason for ARRL
to exist, code tests or no code tests.
>

In article <20020716075226.06987.00000738@mb-cr.aol.com>, k4yz@aol.com (Steve Robeson K4YZ) writes:

>>You have not qualified yourself in US military HF communications.
>
> I didn't have to. They qualified me, Lennie. MOS and all. Sorry you
>missed it.

Nothing was missed because NOTHING WAS WRITTEN.

Robeson is unable to speak of one single radio nomenclature, formal or informal, allegedly used by himself in the USMC.

Robeson is unfamiliar with the standard, all-branch small-unit radio which is now into 13 years as an operational radio family.

Robeson is BLUFFING. He just doesn't know anything in military radio.

NO radio-interested radio amateur would fail to mention at least one radio type used by him or her in their military service. Robeson has not mentioned any. He hasn't because he can't because he never used any.

Robeson is UNQUALIFIED by ANY STANDARDS to talk about military radio.

>>You have not qualified yourself in any civilian experience of
>>working on US military communications.
>
> I didn't claim I had any.

You wouldn't dare.

>>You have not qualified yourself in stating anything of validity in
>>radio communications in any radio service except amateur radio.
>
> It's not pertinent to this forum.

Sorry, Robeson does not control "this forum." Moderation of this forum has already been claimed by Ed Hare.

There has been sporadic talk by others of military radio. See N2EY for one speaking of his alleged familiarity with a surplus SSB field radio.

>>You have not qualified your comments with any evidence of
>>web search or literature search concerning any communications

>>other than techniques used in amateur radio.
>
> Hmmmmcould it be that this is a forum on AMATEUR RADIO, Lennie?

Amateur radio does NOT work on different physics principles
than any other radio service. Amateur radio uses the same
propagation techniques as every other radio service. If Robeson
believes that they are "different" because of regulations, then he
is more brain-dead than usual.

>>> You've been provided the information before.
>>
>>Everyone has seen UN-qualified statements of individuals stating
>>that morse code is currently used in military communications.
>
> The context that has set you off into Rantland again Lennie said NOTHING
>about Morse Code.

Robeson has NOT "provided" anything other than insults and
denigrations. He cannot talk of his military radio experiences
because he hasn't had any military radio experiences.

>>The US military statements do NOT corroborate that use.
>
> And we ALL know the Armed Forces ALWAYS discuss in open forums everything
>they are doing...

Robeson is pedaling his conspiracy bicycle again. The communications
doctrine of the US military is an open topic for the public. Communications
equipment of the US military is shown and illustrated on both military and
commercial web sites...found in electronics trade publications.

> ...kinda like all the times they dismissed as "unfounded" the stories of
>strange, delta-shaped balck airplanes over the Nevada desert...

There were no "balck" airplanes in any Nevada desert. A black F-106 could
have been found in Culver City, CA, decades ago. A dark F-117 could have
been found implanted near Thousand Oaks, CA, back in 1977. The F-117
has been seen on public television prior to the Gulf War of 11-12 years ago.

Do you want training instructions on operating any of the SINCGARS radios?
There's a nice computer training aid that is publicly available at the Fort
Gordon website. The SINCGARS family has COMMSEC for both voice and
data. The manufacturer (General Dynamics, Fort Lauderdale) features that
family on its publicly-available website. The manufacturer of the critical ICs
essential to COMMSEC also has a public website. The SINCGARS is a
frequency-hopper (rate about 100 mSec) and covers 30 to 88 MHz. None of
that is secret. What is secret is the "hopset" that is entered into the radio
via the front-panel keypad. The hopset is established by the military net for
each and every tactical application...it can't be known beforehand because
it isn't established, doesn't have to be established as a fixed thing.

Robeson doesn't know either Jack or the characteristics of a common small-unit, all-branch military radio that is in its 13th year of operational service. He is BLUFFING on his "military radio experience" and "qualifications." His BLUFF has been called many times, found deficient and unqualified, but he is so ignorant he is unaware that he is wrong.

> YOU were "asked". No one in thier right mind would ever "task"
>something from someone as unqualified as you.

Robeson can't ask coherently because he is ignorant of publicly-available military radio statements, descriptions, and doctrine.

>>Explain your valid military experience in any kind of USMC radio
>>communications. Do not use ambiguous generalities, myths,
>>or outright lies. Do not evade the question by attempting to
>>misdirect as you have done above.
>
> Nothing was "evade(d)", Your Scumminess.

Robeson cannot explain any valid military experience in any kind of USMC radio communications. He doesn't have any. All he can do is evade the question by misdirection of personal insults as he has done above.

> Here's a question for YOU to not avoid: WHEN are you going to take the
>"extra lite" that you asserted you were going to take "out of the box"...???

Some time ago I mentioned that, "if I were to get an amateur radio license, I COULD get an amateur extra." Do you understand qualifiers in a sentence? Or are you as ignorant of ordinary English as you are of military radio statements, descriptions, and doctrine?

I am advocating only the elimination of the morse code test for ANY radio operator license. There's NO "need" to get any operator's license of any kind to discuss that. I have acquired radio operation, maintenance, design, and building experience in radio, including HF radio sufficient to speak of and about the general subject. At NO time in that half-century experience was morse code required.

The constant DEMAND to get a license is an artificiality brought out by those who cannot address the validity of the subject but DEMAND others be "as good as they."

>>Robeson has never explained his USMC MOS other than making
>>some general, ambiguous statements of "working on a flight line."
>
> You've tried this two posts in a row. Still not germane.

Explain your valid military experience in any kind of USMC radio communications. Do not use ambiguous generalities, myths, or outright lies. Do not evade the question by attempting to misdirect as you have done above.

> That's because I am not trying to be the King Of The Hill you are Lennie.
>It doesn't matter to me wether anyone likes it or not. No one here signs my
>paycheck.

Explain your valid military experience in any kind of USMC radio
communications. Do not use ambiguous generalities, myths,
or outright lies. Do not evade the question by attempting to
misdirect as you have done above.

>>Odds are that Robeson had little or NO such radio communications
>>experience. If he had, he would be constantly crowing about it
>>to demonstrate his gung-ho superiority.
>
> Like you?

Explain your valid military experience in any kind of USMC radio
communications. Do not use ambiguous generalities, myths,
or outright lies. Do not evade the question by attempting to
misdirect as you have done above.

>>Did you have any military radio communications experience
>>in the USMC and, if so, what was it?
>
> Yes I did and none of your business. Choke on it, Lennie!

Explain your valid military experience in any kind of USMC radio
communications. Do not use ambiguous generalities, myths,
or outright lies. Do not evade the question by attempting to
misdirect as you have done above.

>>Prove that by giving references as to the class, the dates of that
>>class, and students who were in that class and their licenses.
>
> For what purpose, Lennie? My serices as a VE are a matter of record with
>the ARRL, and anything else is not germane to the discussion that on-off
keying
>as an RF technique still has valid uses.

Robeson is BLUFFING once again. Give references to the CLASS, the
dates of that CLASS, and students who were in that CLASS and their
licenses. Volunteer Examiners are NOT tasked to "teach classes," they
proctor license examinations.

Robeson is again bluffing, huffing, and puffing. It looks like LYING.

>>Stop with the smoke blowing. Outline your curriculum, the general
>>class description.
>
> The "class descriptions", Your Stupidness, were for exam preparation
>courses for an Amarteur Radio license. Each of the required areas of
knowledge
>(including Morse Code skills) was included. ARRL texts were used. (The one's
>you try and discredit, Lennie...)

That sort of CLASS is not a VE function. VEs proctor license examinations.

Robeson's description is very general, has NO reference to "his class" or when that "class" occurred. Robeson is bluffing, huffing, and puffing. It looks like
LYING.

> Again with the assertions of "anger"...Lennie, you don't anger me, you
>SICKEN me.

Robeson is already SICK and obsessive.

> Perhaps, but so far you've not provided any evidnce of being anything
>more than a loud mouth who can quote off the Internet.
>
> In THIS forum, you have NO practical experience in Amateur Radio POLICY
>matters OTHER than this forum. And as we all know, this has no validity in
>the "real world".

By that ill logic, Robeson joins Heil in demanding that the FCC stop regulating US amateur radio...because they are accused of "having no validity."

The FCC is not required to have either commissioners or staff to have amateur radio licenses to MAKE US amateur radio regulations. If they are unlicensed, they have no (Heil-Robeson) "validity" to make any ham radio regulations.

In the "real world" of US democratic principles, all citizens may petition their
government to correct grievances. That's in the First Amendment. Robeson (and Heil) are invited to petition the US government for their "grievance" in that the FCC has "no validity to make regulations because they are unlicensed."

>>I've pointed out the ARRL in particular has FAILED to gain popular
>>media exposure for years. The ARRL in particular HAS failed to
>>gain popular media exposure for years.
>
> Yet YOU state how "popular" and "well known" Amateur Radio is to the
>general public.

No. Robeson proves (again) that he is UNQUALIFIED to read and understand statements in the English language.

Something that is publicly known or knowable does not have to be "popular" or "well known."

Examples: US military radio doctrine, descriptions, specifications are all public knowledge but they are not "popular" enough to permit Robeson to know about them. Robeson prefers the no-strain-on-mentality "conspiracy" theory where everything is "secret" so that he doesn't have to talk about it. In the real world he cannot talk about it because he is just ignorant.

> Where shall I start, Lennie? From the times you have misquoted Ed
>Hare...? The times you've refered to people a "a" holes or that thier posts
>were bull "s"..??? Or your assertions of radio services created for
>strictly recreational purposes?

I once told Hans Brakob to "stay with his ice holes." Brakob is an ice fisherman. I've openly called falsehoods as "bullshit" and been able to show those falsehoods were indeed false. Is that language too strong for a big, brave, proud ex-marine?

Robeson seems to bristle at others using "swear words" at him yet he doesn't mind signing off his postings by calling his "opponents" as "dickheads" or worse.

It must be one of those "do as I tell you, not as I do" things. Is that what is taught in the USMC?

> Or how about your attempts to "embellish" YOUR military career by
>"mentioning" that you served in a unit that had a high KIA rate in the opening
>days of the Korean conflict...Which HAPPENED three years before you got
>there?

I stated that I was assigned to the 8235th Army Unit, US Army. I did not state that it "had a high KIA rate" at any time. I stated that 23 members of that unit were killed. They were the first, the 8235th being a relatively new Army unit at that time. Robeson "embellishes" his READING, not what I wrote. His problem.

Robeson is so shallow and petty that he would spit on the graves of deceased US servicemen if it meant he could act tough in newsgroups and "get" living veterans.

What is Robeson's USMC unit "honor and glory" when he served with it or them? Did he ever have an entire brigade dependent on his radio skills? Another in here has claimed that.

The 8235th Army Unit had responsibility for operating and maintaining Army radio station ADA which served the Far East Command Headquarters. ADA operated trans-Pacific on HF. That began before Robeson was born...that counts as nothing in Robeson's virtual universe of "honor and glory" since that virtual universe is only in Robeson's mind.

Robeson was "qualified in the USMC" with an unspecified MOS to work on unspecified equipment for an unspecified purpose at an unspecified time in an unspecified location. :-)

Robeson is qualified only for the unspecified...which is essentially nothing but amateurism.

In article <3D344749.E171DA81@earthlink.net>, Dave Heil <k8mn@earthlink.net>
writes:

>Thanks for proving my point, Doctor Evil. There was no implication that
>the idea was mine.

Sorry, but you most definitely say it was your "good idea."

When confronted with someone who looked up Guinea-Bisseau
and pointed out its impovrished world trade condition, you
became defensive and blathered about "synchronization."

>In fact, I've stated on several occasions that the
>idea was not mine.

Well over a year later. You then tried to explain it as State
Department radio procedures policy in a round of double-
talk.

>Why would "Heil" think that? Do you think you are a radio amateur "in
>here"?

The term "order wire" is relatively unfamiliar to anyone not working
in rather specialized telecommunications. "Order wire" came from
landline telegraphy (teleprinter) and telephony practice referring to
the command circuit used internally to carry on common carrier
communications on multiple circuits.

>It probably was poor wording. Teleprinters are self-synchronizing but I
>wasn't referring to self-synchronization. I referred to crypto sync.

"Crypto sync?!?" You are bluffing again. You didn't say that
before. Is this another cover-up of previous bad wording? Of
course it is.

Is State's communications so lax that it sends crypto details
IN CLEAR?!? Did you send KEY LISTS in clear too?!?

>"Heil" didn't say that at all though I did make statements about the use
>of the CW circuit since our station was not in operation 24 hours per
>day.

If Heil didn't say it, then who is masquerading as Heil?

Then the above bears out my original criticsm that Guinea-Bisseau
is NOT of strategic importance to the USA nor is that embassy
any hot point of sending espionage information through the, what,
single TTY circuit?

>We weren't broadcasting, Len, and didn't do a "schedule" more than a
>couple of days in advance. There are time, due to severe multipath
>distortion, that even a teleprinter running in the clear, without crypto
>overhead, and using link enhancement, will print only garbage. During
>those periods, which occur much of the year in West Africa, CW worked
>when teleprinters did not work.

Nonsense. More bluffing...or the State Department radio equipment
in Guinea-Bisseau was obtained as WW2 surplus.

>Illogical, Spock? Any baudot character distortion caused by multipath
>can render a teleprinter totally unuseable. If you have no teleprinter
>order wire, you can't easily arrange to open, close or QSY the circuit.
>It wasn't as if I was working in a place where I could make a telephone
>call.

Illogical bluff bullshit. If you can't send command information
"because of severe multipath rendering teleprinting totally
unuseable," you can't send any regular traffic either. RTTY has
been going on for decades before the eighties and other folks in
radio communications know how to handle it as TTY.

>"Heil" never made that statement either. The system was not in use
>world wide by State. The system was not even Africa-wide. There were
>places using satellites and leased lines for the primary circuit.

Then why didn't you uplink to the TDRS? Now you are describing
a VERY hole-in-the-wall operation by State, planned and manned
by folks who don't seem to know how to maintain a radio circuit.

>It is apparent from your comments that you still don't know anything
>about State Department comms.

It is apparent that the alleged State Department radio ace is
trying to pull off a bluffing fast-one on everybody. Duhhh..."nobody
else knows a thing about State Department comms"...duhhhh.

>Did you think that the RACES system was in use worldwide?

No, never did. I said that two RACES machines were IN USE
in DC (referring to Washington, DC) for archival storage on the
State Department network.

>Do you believe it to still be in use?

No. Irrelevant question. RACES was fine at the end of the 60s
but has been superceded by smaller, more efficient, greater-
memory-capacity minimal-mechanical systems.

>Did you think that mechanical
>teleprinters were still in use in other than Africa and a few Asian
>spots in the 1980s?

From what you've described, the Guinea-Bisseau station was
put together from WW2 surplus equipment in its "efficiency."

>What we have here is someone never involved in State commo dismissing
>the statements of one who was actively involved in State Department
>communications over many years.

What we have really is an ex-State person doing his best to
bluff and make his exploits sound like "expertise." Yes, we've
all been treated to your "important assignments" in "key State
Department assignments" such as Guinea-Bisseau (whose
chief balance of trade commodity is exportation of cashew nuts).

If I want entertaining FICTION, I'll go to Clancy, not Heil.

>That's about as silly as you telling us
>what is best for amateur radio.

Poor baby, having to resort to THAT are you? You are certainly
getting deficient on "claims to expertise" in US government.

Heil does not grant US amateur radio licenses.

Heil does not set US amateur radio regulations.

Heil is just an ordinary citizen of the US whose word is no
better, but possibly a bit worse, than any other US citizen.

Heil can only "claim turf" or claim some territorial imperative
through having an amateur radio license for years. All Heil
can prove by such long tenure is that he knows what is best
for Heil, not for the majority of the rest of amateur radio.

>Sure, I could have avoided all that by letting you blow smoke up the
>asses of any who would be naive enough to know how you operate.

Of course you could, because "blowing smoke up others' asses"
IS what you do.

>You
>pontificate, chuff and puff and in general sway others into believing
>that what you say is true by sheer length and number of posts.

So...we should all leave the pontification, chuffing, and puffing to
YOU?!? You, the classic archtypical "ugly American" of manner?

According to Heil, ALL should let him preen, posture, pontificate,
and blow smoke to make Heil look mahhhhhvelous. :-)

>No one
>can know more about something dealing with the world of electronic
>communications than you, huh?

Getting aggravated and infuriated? :-)

I've never laid any such claim on my abilities. You've emphasized
all that bullshit.

If your RTTY circuit is suffering so much "multipath distortion that
you can't use it for control purposes," then it sure as hell is so

very UNSUITABLE for any regular traffic. Either fix it, get good equipment, but quit laying a line of bullshit on everyone else about conditions you and you alone seem to be the only one cognizant of.

By the way, I talked to Jack. You don't know Jack.

>My original comments on this topic countered your balderdash that the
>U.S. government no longer used morse.

It still doesn't use morse codes for communications. There's NO verifiable source to prove your point.

>That's right. "Heil" doesn't concede or give-in when he has made
>statements which are true and correct.

Heil doesn't DARE give in. To give in would mean losing face (in the oriental sense). Unlike cards where you MUST show hidden cards after a call, you've gotten away with a LOT of bluffing, huffing, and puffing in here. Your only "source" is Dave Heil's statements. Has Heil produced any US State Department statements to prove his point? No. Heil cites his years of State service and implications of Good Works therein.

>To admit defeat, he'd first have
>to be defeated at something. That hasn't taken place despite your best
>efforts to distort and dismiss.

What is "distorted" or "dismissive" about US government sources explaining US government or military radio communications?

Are you going to fall into Robeson's conspiracy-theory rationalization about "it's all so 'secret' that I can't reveal it" as he has done about "military communications?!?"

I'm sure you will. You are two of a basic kind.

Now you go right ahead and tell us where we can find US government statements saying the US government or military USES morse codes for radio communications now.

Let's see how good your claim of "distortion" or "dismissiveness" is about that.

>The above is about as surreal as it gets, Len. What did my amateur
>station in Guinea-Bissau have to do with my daily tasks in a State
>Department communications center?

What WERE your "daily tasks" in the Guinea-Bisseau "comm center?"

You've already stated it wasn't a 24/7 circuit. Was it just a single-channel RTTY circuit? Did it come up one or two days a week?

Sounds to me it wasn't a very busy duty at all. Did you have lots of time to sit around and chew all those cashew nuts?

>I think you're honked that someone dared counter you claim that the US
>government does not use morse and didn't back down no matter how hard
>you huffed and puffed and attempted to blow the house down.

I've been "hooked" on the FACT that it doesn't ever since some
"colonel" popped in here claiming that his "son" was "using CW
behind the lines in the Gulf War to send intel to the coalition."
That was TOTAL FABRICATION on the "colonel's" part.

Total bullshit is total bullshit and all the bluffing, huffing, and puffing
and outrage at not being believed doesn't mean squat.

Now you show everybody the source for the US government "still
using morse for radio communicaitons."

No more of this bluffing, huffing, and puffing, smoke-eater.

>The only thing which comes to mind is your years-old bluff that you know
>anything about what is good for amateur radio.

All I'm for is the elimination of the morse code test.

LOTS of citizens think that would be a mighty GOOD thing
for US amateur radio. There's even an international
organization that is working to eliminate that code test.
You may have heard of it?

Even the IARU thinks that the code test should be removed
from amateur radio testing worldwide.

But Dave Heil KNOWS WHAT IS GOOD FOR AMATEUR
RADIO because he says he knows better what is good for
everyone. Anyone who does not agree with Dave Heil is
not good for amateur radio. Yep, that covers what Dave said.

>How does referring to the tag team of Anderson and Burke by names from a
>very funny film indicate fixation?

It's an attempt at humiliation by someone who thinks that those
who don't agree with him are against all of ham radio. It doesn't
work, but it makes Heil feel good and Dave Heil is the only one
that counts in US amateur radio.

>I was aware that the characters are fictional.

Alec Baldwin is not fictional...he's a fairly good actor. "Spock"
is fictional and you are trying to make an enterprise about
anyone not in agreement with Dave Heil to be "bad" for US
amateur radio.

>Your history in amateur radio is also fictional.

No. The history of amateur radio may be exaggerated by the
ARRL but it isn't quite fictional.

Why don't you demand that the FCC does what you tell them?

Since 1934 the FCC hasn't been required to have any amateur radio license for its staff or commissioners to MAKE amateur radio regulations. By Dave Heil's logic that makes the ENTIRE FCC INCOMPETENT to make any sort of amateur regulations!

Ok, so MAKE the FCC get amateur radio licenses for its staff in order to make the amateur radio regulations. They can't possibly know "what is good for amateur radio" or even "tell radio amateurs what to do" if they aren't licensed!

Dave Heil and anyone who agrees with him are the only ones who know what is good for US amateur radio!

No, I'm just pointing out the OBVIOUS, Mr. Extreme Literalist.

>> You are an amateur extra.
>
>I've held that class of license since 1970. You have never held any class of
>amateur radio license. What does that have to do with the various approaches
>to retailing?

For 32 years for you, it's been the Word of Extras! :-)

How many commercial radio operator licenses has James Miccolis
held? Has he held one longer than 46 years? :-)

>I don't "become upset" at such things. I do post corrections to other's errors
>and misconceptions, as well as my own opions and relevant facts.

Now, now...you become upset when your own myths, suppositions,
and opions [sic] are shown to be irrelevant. :-)

>>You have failed to show "obviousness" of your statement. You stated that
>>the ARRL wants people to buy their publications via retail outlets if at all
>>possible. That's not obvious.
>
>Sure it is. You just don't want to see it.

Does the ARRL make a statement saying "buy our products at
retail outlets because we want you to?" I don't think so. I sure
haven't seen that statement. :-)

>>If the ARRL wanted people to go to retail outlets to buy their products, then
>>they would only advertise their wares but would not make them available
>>through mail-order.
>
>Untrue. Doing so would force everyone to buy through retail outlets.

"Force?!?" :-)

>>Hans Brakob has stated in here more than once about the shrinking

>
>Irrelevant.

Is it? I think Hans had a valid complaint. Why are you against Hans?

>>There are approximately 300 million in the USA population. If there are
>>really "200 stores selling ARRL publications" then that would be about
>>one store per 1.5 million in the population.
>
>So? What's your point?

Okay, I understand where you are coming from...an OBVIOUS
condition is ONLY obvious if YOU state it. It cannot possibly be
obvious if someone else states something. :-)

That's obvious to me. :-)

Do you think that one store per 1.5 million in the population is a
good condition to make ARRL products through retail outlets
"readily available?!?"

>Why? Your question is full of nastygram sarcastic overtones.

Now, now...settle down...you are upset again. Just because
someone doesn't agree with your exhalted opinions, that's not
a reason to throw a hissy-fit and grow snarly...

>>I have experience in costing-out publishing costs in addition to
>>experience in costing-out design, development, and manufacturing
>>of electronics goods.
>
>Do you know how much it costs to produce the ARRL publications?

I can estimate it without having to get an internal, private
document from within the ARRL. Some of the publication
production information is already in the open. It's a matter of
contacting the printer, asking prices, doing the numbers.

Do you need an EXACT figure? I'm sure you won't be "satisfied"
with anything other than an exact figure...because your attitude
in here "in the interests of accuracy" demands exactness. Any
inexact is subject to denunciation, denigration, and accusations
of body odor. :-)

>That's a generality. Do you know how much it costs to produce the ARRL
>publications?

Do you? Remember, if you haven't got an EXACT figure, you are
"completely wrong" and irrlevant and should never post anything
again because you would "always be wrong, wrong, wrong!" :-)

>In theory, they "make it up on volume". Amazon's financial statements speak
>otherwise.

Is Amazon still in business? :-)

>Do you know how much it costs to produce the ARRL publications?

Do you? :-)

>What is incorrect? I do point out errors and mistakes. You do make them. I do
>have a hard time keeping up.

Not a problem to me. If you can't keep up with everyone, maybe
this newsgroup is too much for you...

>>You may "suspect" all you want, but your statement is still incorrect,
>>biased, and uncivil.
>
>In other words, I'm right on target.

Heh heh heh...you aren't even firing on the same range, let alone
"being on target."

Try to keep up. I know it's hard, but you must try...

>>Like any political-action organization, the ARRL should not consider
>>itself above reproach.
>
>All you do is reproach it.

Okay, quote everything I've said about the ARRL to prove that
statement. EVERYTHING. Show your work.

Remember, anything you do not quote shall be indicative of YOUR
mistake. Make an error in here and you will be forever inaccurate
and totally wrong! :-)

>>in amateur radio. Some members of the ARRL, such as yourself,
>>do not allow any negative statements about the ARRL..
>
>"do not allow"? How is that done?

It's obvious in your statements. :-)

>>"Diminutives" in naming seems to be a standard practice in here. :-)
>
>Only by you.

Is this another one of those "you cannot do as I do, only do as I
say" kind of things? Must be... :-)

>Why should anyone here take "negative criticism" from you? You don't take it.
>Is this "do as Lenover21 says, not as Lenover21 does" things?

"Lenover21" hasn't said a thing. Your sentence is a perfect example
of the hypocrisy of your standard quoted above. :-)

>>Is Amazon still in business after many years? If so, it must be making
>>a profit. Businesses do not continue in business without profit.
>

>That's simply incorrect.

Why are you so angry at Amazon? Have they failed to deliver your
order? Sent you the wrong product? Amazon has been in business
for years. Have they filed for any sort of bankruptcy?

>>The words of the ARRL are generated by a minority of that minority...which
>>includes the board of directors of the ARRL.
>
>So what?

Not a problem if you are a Faithful Follower of your Chosen Leader.
They can do NO wrong and they KNOW what is best for all. :-)

Do you believe in minority rule? Do you wish to abolish democratic
principles? If so, why?

>>By contrast, CQ and 73 are independents, have no support from any
>>membership organization, depend solely advertising sales to stay in
>>business.
>
>They give away the magazines free?

Some are given away free. QST does the same. You can find that
out in the Publisher's Statement of each one.

"Subscription" costs to subscribers go almost entirely to "fulfillment,"
the word used to describe subscription handling, listing, and services
done by preparers (if contracted) and for mailing. That's standard in
the periodicals business. Didn't you know that?

>>Their sales are through retail sales outlets and through
>>subscribership. They have no buffer or larger group budget
>>advantage to fall back on during lean ad sales times.
>
>They also have no membership organization to operate, no station or lab, etc.

Where is the detailed listing of the ARRL operating budget that
proves your statement? Does QST profit go directly to lab,
station operation and maintenance? Show your work.

>>>Doesn't answer the question. What percentage of all licensed US hams are
>>>members of NCI?
>>
>>Irrelevant again.
>
>If it's irrelevant, then the ARRL percentage is also irrelevant.

No Code International does not state, infer, or imply that it is a
national amateur radio membership organization. The ARRL does.

No Code International is an international organization that seeks
the elimination of the morse code testing for an amateur radio
license anywhere. No Code International does not restrict

membership only to licensed radio amateurs. No Code International
has stated originally and continues to state that it will dissolve when
the morse code tests are eliminated.

The ARRL claims to represent "all" of US amateur radio yet its
membership is less than a quarter of all licensed US radio amateurs.
The ARRL keeps wanting more money. ARRL voting membership
is restrictive. ARRL membership requires money. NCI is free.

>Sounds like I'm onto what you really want.

Only in your little imagination. :-)

>>I am not in the reselling business nor the political-action lobbying
>>business nor am I a membership organization getting members to
>>give non-members the business. :-)
>
>I think you're in the gadfly business.

Now, now...I believe you are trying to "give me the business." :-)

These allegations are false and libellous. As those who know Herb well can attest, he is not and has never been anti-semitic. The poster has no tape because none exists.

During the original hearing, some nut called Herb on the phone and said that he was going to send him a tape of KV4FZ making anti-semitic remarks. A tape did arrive in the mail but, when he listened to it, it was not Herb's voice and there were no "anti-semitic" remarks.

> > > > Schoenbohm to continue to operate his amateur station until the 91st
day
> > > > following the release date of judicial review of its decision.
> > Decision,
> > > > 13 FCC Rcd at 15037. Subsequent to the Supreme Court's action in
> > October
> > > > 2000, which denied Mr. Schoenbohm's petition for a writ of
certiorari,
> > Mr.
> > > > Schoenbohm ceased operating amateur station KV4FZ in late January
2001.
> > > He
> > > > submitted the applications currently under consideration on March
31,
> > > 2001.
> > > > Tr. 42. In conjunction with his applications, Mr. Schoenbohm, on
April
> > > 14,
> > > > 2001, took and passed an examination for an extra class amateur
license
> > > > administered by the American Radio Relay League. Schoenbohm Ex. 31.
> > > >
> > > >
> > > >
> > > > B. Character Generally
> > > >
> > > > 7. At the instant hearing, Mr. Schoenbohm testified
that,
> > > prior
> > > > to his conviction, he had never been convicted of any felony or
serious
> > > > crime. He further testified that, subsequent to his conviction, he
has
> > > not
> > > > been convicted of anything. Schoenbohm Ex. 1. Before the
Commission
> > > denied
> > > > his renewal applications in 1998, Mr. Schoenbohm had held an amateur
> > > license
> > > > for over 40 years. Schoenbohm Ex. 14. He also holds a general
> > > > radiotelephone operator license. Schoenbohm Ex. 43.
> > > >
> > > >
> > > >
> > > > 8. As for his testimony at the prior proceeding, Mr. Schoenbohm
> > explained
> > > > that he "was in a state of denial, believing that [he] had been
> > wrongfully

> > > > convicted of a crime that [he] did not commit." Schoenbohm Ex. 1.
> > > > Notwithstanding his personal opinion of the events surrounding his
> > > > conviction, Mr. Schoenbohm now realizes that he was found guilty and
> > that
> > > he
> > > > is a felon. Id. Addressing the fact that his written testimony in
this
> > > > proceeding omits any reference to the Commission's findings that he
> > > > misrepresented facts and lacked candor in his 1995 and 1997
testimony
> > > > regarding his felony conviction and ex parte communication
solicitation,
> > > Mr.
> > > > Schoenbohm explained that he did not think he had to address the
> > > Commission'
> > > > s findings from the prior proceeding. Schoenbohm Ex. 1; Tr. 44,
46-47.
> > > >
> > > >
> > > >
> > > > 9. Mr. Schoenbohm understands that the purpose of the instant
hearing
> > is
> > > to
> > > > determine whether he has "been sufficiently rehabilitated such that
the
> > > > Commission could be confident that [he] could be relied upon to deal
> > with
> > > > the Commission in an honest and forthright manner." Tr. 43. In
support
> > > of
> > > > his claim that he now possesses the requisite character
qualifications,
> > > Mr.
> > > > Schoenbohm testified that he has worked hard to rehabilitate himself
> > "and
> > > to
> > > > overcome the effects of [his] conviction" and "to demonstrate that
[he
> > is]
> > > > capable of obeying the law and, in particular, the FCC's rules and
> > > > regulations." Schoenbohm Ex. 1. In this regard, Mr. Schoenbohm
> > testified
> > > > that for about the past eight years, he has "held a responsible
position
> > > > with the Virgin Islands government, in charge of expenditures and
> > > > supervision of large amount[s] of money and property. During that
time,
> > > > nobody has accused me of any dishonesty, connected with my work."

> > > > Schoenbohm Exs. 1. See also Schoenbohm Ex. 45. In this regard, the
> > > record
> > > > reflects that Mr. Schoenbohm has worked in various capacities in the
> > > Virgin
> > > > Islands Department of Property and Procurement. Tr. 47; Schoenbohm
Exs.
> > > 4,
> > > > 13, 30, 41, 45, 56. Among other positions, Mr. Schoenbohm has been
the
> > > > manager for the Recovery Hill repeater site. In that role, he
"issued a
> > > > plan of attack to get all the illegal, unlicensed, not properly
licensed
> > > or
> > > > wrong location squatters that had moved in over the past ten years
and
> > > were
> > > > using the facility." Tr. 48. More recently, Marc Briggs, the
> > Commissioner
> > > > of the Department of Property and Procurement, designated Mr.
Schoenbohm
> > a
> > > > department "Essential Employee," effective August 21, 2001.
Schoenbohm
> > > Ex.
> > > > 41.
> > > >
> > > >
> > > >
> > > > 10. In his capacity as a member of the Virgin Islands Department of
> > > > Property and Procurement, Mr. Schoenbohm serves on a committee that
> > > > evaluates all government radio purchases. Tr. 47. The chief legal
> > > counsel
> > > > for the department appointed Mr. Schoenbohm as the "radio site
> > inspector"
> > > to
> > > > investigate whether certain other Virgin Islands government agencies
> > were
> > > > procuring improperly licensed radios by skirting the competitive
bidding
> > > > process. Tr. 47-48. Mr. Schoenbohm testified that he has sent a
letter
> > > to
> > > > Joseph Casey of the Commission's Enforcement Bureau regarding this
> > matter,
> > > > and that Mr. Schoenbohm has communicated "with [Commission] field
> > > personnel
> > > > in Puerto Rico, Rueben Jusino, and ha[s] been cooperating with him
in

> > > trying
> > > > to get information, invoices, serial numbers, locations of radios,"
in
> > > this
> > > > on-going investigation. Tr. 48.
> > > >
> > > >
> > > >
> > > > 11. Mr. Schoenbohm also responded to a complaint letter Riley
> > > > Hollingsworth, an FCC attorney, forwarded to Mr. Schoenbohm. Tr.
79.
> > > > According to Mr. Schoenbohm, Louis Bean, an amateur licensee,
complained
> > > to
> > > > the FCC about Mr. Schoenbohm's operating a radio station associated
with
> > > Mr.
> > > > Bean's amateur repeater. Tr. 78-80. Mr. Schoenbohm notes that Mr.
Bean
> > > > claimed that Mr. Schoenbohm restored Mr. Bean's station to operation
"by
> > > > hook or by crook." Tr. 78. Mr. Schoenbohm explained that, years
ago,
> > his
> > > > call sign had been the designated call sign for use on the repeater.
> > Tr.
> > > > 80. When Mr. Schoenbohm's call sign was removed from the repeater,
Mr.
> > > Bean
> > > > began using his call sign on the repeater. Tr. 80. Mr. Schoenbohm
> > > > testified that he never had the ability to operate the equipment
> > > associated
> > > > with Mr. Bean's call sign. Mr. Schoenbohm testified his only
> > involvement
> > > > with the repeater was to unplug the equipment in response to the
letter
> > > from
> > > > Mr. Hollingsworth. Tr. 81.
> > > >
> > > >
> > > >
> > > > 12. With regard to his reputation in the community, Mr. Schoenbohm
is
> > an
> > > >
> > > > elected and non-elected official of the Republican Party of the
United
> > > > State Virgin Islands. Tr. 52; Schoenbohm Ex. 3. Mr. Schoenbohm
also

> > > > continues to do volunteer work, although not to the same extent as
he
> > did
> > > > before his license was not renewed due to the passing of time. For
> > > example,
> > > > Mr. Schoenbohm recently worked on a triathlon. Tr. 52.
> > > >
> > > >
> > > >
> > > > 13. The only other witness to testify in person was Mr. Frank Todd
of
> > > Port
> > > > Vue, Pennsylvania, who testified as to Mr. Schoenbohm's reputation
in
> > the
> > > > amateur radio community. Schoenbohm Ex. 22; Tr. 129-145. Mr. Todd,
who
> > > has
> > > > recently recovered from a car accident, traveled 236 miles to appear
at
> > > the
> > > > hearing. Tr. 131. Mr. Todd has known Mr. Schoenbohm since
> > approximately
> > > > 1995, when, at the age of 13, Mr. Todd became interested in amateur
> > radio
> > > > and used to monitor Mr. Schoenbohm's transmissions. Tr. 140-141;
> > > Schoenbohm
> > > > Ex. 22. During his years of listening to Mr. Schoenbohm, Mr. Todd
found
> > > Mr.
> > > > Shoenbohm's deportment exemplary. Id. Mr. Todd testified that he
> > > considers
> > > > Mr. Schoenbohm "a positive role model in amateur radio and an
individual
> > > > that is capable of making a very significant contribution to the
Amateur
> > > > Radio Service." Id. In fact, Mr. Schoenbohm was the "prime
inspiration
> > > and
> > > > motivation" that led to Mr. Todd's acquisition of amateur license
K3EKO.
> > > > Id.
> > > >
> > > >
> > > >
> > > > 14. Mr. Todd did not meet Mr. Schoenbohm in person until 1999. Tr.
> > 141.
> > > > Although Mr. Todd did not have an amateur license at that time, he
> > > traveled

> > > > to the Virgin Islands to meet Mr. Schoenbohm, and he stayed with Mr.
> > > > Schoenbohm and his family for a week. Schoenbohm Ex. 22. Mr. Todd
> > > > testified that he believes Mr. Schoenbohm to be a "decent, honest
and
> > > > hard-working person" and hopes the Commission will allow Mr.
Schoenbohm
> > > "to
> > > > prove himself and enjoy his later years through a wonderful activity
> > like
> > > > amateur radio." Id.
> > > >
> > > >
> > > >
> > > > 15. Mr. Todd testified that he is familiar with the reasons
underlying
> > the
> > > > Commission's 1998 decision not to grant Mr. Schoenbohm's renewal
> > > > applications. Tr. 133. Specifically, Mr. Todd acknowledged that he
was
> > > > aware of Mr. Schoenbohm's lack of candor regarding his testimony
about
> > his
> > > > toll fraud conviction; however, Mr. Todd also admitted that he
didn't
> > > > understand the Commission's findings regarding Mr. Schoenbohm's lack
of
> > > > candor regarding his ex parte communications. Tr. 133, 136, 139.
Mr.
> > > Todd'
> > > > s awareness of the Commission's finding regarding Mr. Schoenbohm's
lack
> > of
> > > > candor did not change Mr. Todd's opinion as to Mr. Schoenbohm's
> > > > qualifications because Mr. Todd believes that Mr. Schoenbohm has
been
> > > > truthful to him. Tr. 137, 140. Mr. Todd further testified that
> > > > "[r]egardless of whatever Mr. Schoenbohm may have done, he has
certainly
> > > had
> > > > time to make the adjustments in his life necessary to re-qualify
himself
> > > as
> > > > a candidate for an Amateur Radio License." Schoenbohm Ex. 22.
> > > >
> > > > C. WSTX/WSTX-FM
> > > >
> > > > 16. After Hurricane Lenny hit the Virgin Islands in 1999 and
> > interrupted
> > > > the power supply for station WSTX(AM), Mr. Schoenbohm restored the

> > > station's
> > > > antenna and tuned the transmitter so that the station could continue
> > > > operating. Tr. 51, 53-54, 60, 62-63. Mr. Schoenbohm testified that
> > after
> > > > Hurricane Lenny passed through St. Croix, the Virgin Islands
Emergency
> > > > Management Agency directed him to install an antenna to ensure that
> > > station
> > > > WSTX was able to operate "so the public could be informed by FEMA
and by
> > > the
> > > > local government agencies on relief supplies. They considered it
vital
> > to
> > > > put that station back on the air," because WSTX(AM) was the primary
> > > station
> > > > that people listened to during emergencies. Tr. 60-61, 64. Mr.
> > > Schoenbohm
> > > > advised the owner of station WSTX that he would need a competent
> > > consulting
> > > > engineer in order to put the station in the proper mode, and that he
> > would
> > > > have to notify the Commission of the station's circumstances and
file
> > the
> > > > necessary papers as soon as practicable. Tr. 58, 60, 64-65.
> > > >
> > > >
> > > >
> > > > D. Contest
> > > >
> > > > 17. In October 2001, subsequent to the cancellation of the license
for
> > > > amateur station KV4FZ, Mr. Schoenbohm served as a host for a
participant
> > > in
> > > > an international radio competition or contest. Schoenbohm Ex. 1;
Tr.
> > 81.
> > > > The purpose of the competition was to have contestants make contact
with
> > > > other amateur stations around the world. Essentially, the message
sent
> > > and
> > > > received involved each station identifying itself and transmitting a
> > > message
> > > > consisting of a signal report and a numeral identifying which of 40
> > > "zones"
> > > > where the station was located. The contestant(s) who had the

highest
> > > score
> > > > would win. Tr. 84, 89, 102. Some months earlier, Mr. Schoenbohm
had
> > > placed
> > > > a notice on the Internet advising that he would rent out part of his
> > home
> > > to
> > > > amateur radio operators who wished to participate. Tr. 88. Steven
S.
> > > > Reichlyn, amateur radio licensee of station AA4V, accepted Mr.
> > > Schoenbohm's
> > > > offer and indicated that he and a friend would like to use Mr.
> > > Schoenbohm's
> > > > facilities, to include use of his home and radio equipment (a
> > transmitter,
> > > > amplifier, and a switch for some antennas). Tr. 89-90. At the last
> > > minute,
> > > > Mr. Reichlyn's friend cancelled. Tr. 89. Nevertheless, Mr.
Reichlyn
> > > > arrived at Mr. Schoenbohm's home on or about October 25, 2001, two
days
> > > > before the start of the contest, and did not leave Mr.Schoenbohm's
> > > premises
> > > > until after the contest ended on October 28, 2001. Tr. 81.
> > > >
> > > >
> > > >
> > > > 18. The contest began on Saturday, October 27, 2001, at
> > 00:00
> > > > Greenwich Mean Time ("GMT") and lasted 48 hours. Tr. 96, 98,
100-101;
> > EB
> > > > Ex. 3. Mr. Reichlyn operated from inside of Mr. Schoenbohm's house,
a
> > > > single-level dwelling that is "basically a very open area that is
> > > separated
> > > > only by" louvered windows. Tr. 90. Mr. Reichlyn stopped
transmitting
> > at
> > > > 0627 GMT, 27 October and asked Mr. Schoenbohm if he would like to
> > operate
> > > > the microphone because of Mr. Schoenbohm's expertise at operating on
low
> > > > frequencies. Tr. 109. Because Mr. Reichlyn had entered a two-man
> > > contest,
> > > > he could have another person assist him with the contest. Tr. 97.
Mr.
> > > > Schoenbohm accepted and began operating the equipment under Mr.

> > Reichlyn's
> > > > call sign from 0627 to 0758 GMT. Tr. 98, 110, 116. Mr. Schoenbohm
> > > > contacted multiple operators during that period, including contacts
with
> > > > operators in St. Martin, Scotland, the Canary Islands, New Zealand,
> > > Ireland,
> > > > and Aruba. Tr. 105, 106, 112, 113-114, 116; EB Ex. 3. According to
Mr.
> > > > Schoenbohm, Mr. Reichlyn did not stay in the equipment room with
him,
> > but,
> > > > nevertheless, supervised him during this time period by remaining on
the
> > > > premises and staying within earshot of Mr. Schoenbohm and observing
Mr.
> > > > Schoenbohm's operations. Tr. 111.
> > > >
> > > >
> > > >
> > > > 19. Mr. Reichlyn resumed operating the microphone at 0758 GMT and
did
> > not
> > > > ask Mr. Schoenbohm to take over for him again until the following
day.
> > > Tr.
> > > > 101, 117. Mr. Schoenbohm thereupon operated the equipment from
0834 to
> > > > 0903 GMT, 28 October. Tr. 101, 117; EB Ex. 3. During this second
spell
> > at
> > > > the microphone, Mr. Schoenbohm again contacted multiple operators,
> > > including
> > > > operators located in New Zealand and the Wallis and Futuna Islands
(a
> > > French
> > > > possession in the South Pacific). Tr. 119; EB Ex. 3. Mr.
Schoenbohm
> > > > testified that, during this second time period, Mr. Reichlyn "did
not
> > > leave
> > > > the premises" and that he, Mr. Reichlyn, was "always in a position
to
> > > > exercise the necessary controls to comply with the rules and
> > regulations."
> > > > Tr. 127-28. Mr. Schoenbohm testified that his premises consist of
the
> > > "ham
> > > > shack" and a very small yard, and that Mr. Reichlyn was always
within

> > > > earshot of the facility and that "he was always in a position to
control
> > > the
> > > > time, periods of time that I was operating." Tr. 128.
> > > >
> > > > 20. Mr. Schoenbohm is aware that section 97.115 of the Commission's
> > rules
> > > >
> > > >
> > > >
> > > > prohibits certain communications involving a "third party."[3] Mr.
> > > > Schoenbohm asserts that he did not violate section 97.115 of the
> > > Commission'
> > > > s rules when he operated radio equipment under Mr. Reichlyn's call
sign.
> > > > Schoenbohm Ex. 1; Tr. 106. As Mr. Schoenbohm understands that rule,
he
> > > > would be prohibited, as an unlicensed operator, from "passing
messages
> > to
> > > a
> > > > third party." Tr. 106; 108. Mr. Schoenbohm contends that the rules
> > would
> > > > not, however, prohibit him "from being a voice behind the microphone
to
> > > > establish the communication" with another operator. Tr. 106; 108.
Mr.
> > > > Schoenbohm understood that, so long as a licensed operator
supervises
> > the
> > > > transmission, an unlicensed operator, such as Mr. Schoenbohm, could
> > speak
> > > > into the microphone. Tr. 108.
> > > >
> > > >
> > > >
> > > > E. Effect of the Loss of License
> > > >
> > > > 21. Mr. Schoenbohm acknowledged that "misrepresentation . . . is
> > > considered
> > > > to
> > > >
> > > > be a cardinal sin at the Commission," and he viewed the Commission's
> > > denial
> > > > of an application for renewal as "a death penalty." Tr. 175, 176.
> > > Although
> > > > Mr. Schoenbohm disavowed any intent to deliberately deceive the
trier of
> > > > fact during his earlier Commission hearings, he specifically

> > acknowledged
> > > > that the mistakes he made in his prior testimony "were egregious
> > mistakes,
> > > > fatal mistakes." Tr. 180. Mr. Schoenbohm believes that being
denied
> > use
> > > of
> > > > an amateur station for fifteen months has been an adequate sanction.
> > Tr.
> > > > 176. As he described it:
> > > >
> > > > [i]f you have been off the air for a year in ham radio you have
shamed
> > > > yourself, like a
> > > >
> > > > Japanese industrialist would, before the entire amateur community.
It
> > is
> > > a
> > > > very serious
> > > >
> > > > punishment when you are . . . a very high-profiled [sic]
individual,
> > > > involved a lot in
> > > >
> > > > contests and international operations, regarded as a person who has
won
> > > > contests and
> > > >
> > > > achieved world records, all of a sudden he is banished. That is a
much
> > > more
> > > > serious
> > > >
> > > > deterrent than a taxicab licensee losing his communication system
for
> > one
> > > > year because
> > > >
> > > > it is a personal shame that is attached to it.
> > > >
> > > >
> > > >
> > > > And it is very hard for me to explain that to you because only I
know
> > it.
> > > .
> > > > . . I let the
> > > >

> > > > community down and the Virgin Islands down where I cannot perform
the
> > > > services they
> > > >
> > > > have relied on in the past because I can't even talk to the National
> > > Weather
> > > > Service when
> > > >
> > > > a hurricane passes over. Tr. 176-177.
> > > >
> > > >
> > > >
> > > >
> > > >
> > > > III. PROPOSED CONCLUSIONS OF LAW
> > > >
> > > >
> > > >
> > > > 22. The HDO requires the Commission to determine whether Herbert L.
> > > > Schoenbohm possesses the requisite character qualifications to be a
> > > > Commission licensee.
> > > >
> > > > In assessing character, the Commission seeks to predict whether a
> > > > prospective licensee will be honest in his dealings with the
Commission
> > > and
> > > > will abide by the Commission's rules and the Communications Act.
See
> > > Policy
> > > > Regarding Character Qualifications in Broadcast Licensing, 102 FCC
2d
> > > 1179,
> > > > 1183, 1189-91 (1986) (subsequent history omitted) ("Character Policy
> > > > Statement").[4] As discussed herein, the Bureau believes that the
> > > evidence,
> > > > although mixed, supports a conclusion that Mr. Schoenbohm has the
> > > requisite
> > > > character qualifications. In this regard, the Bureau notes that its
> > > > reluctance to fully endorse Mr. Schoenbohm stems from his operation
of
> > an
> > > > amateur station when he did not have a license to do so.
> > > >
> > > >
> > > >
> > > > 23. As noted in the HDO, the Commission considers
various
> > > > factors in determining whether an applicant such as Mr. Schoenbohm
has

> > > > rehabilitated himself and demonstrated that he possesses the
requisite
> > > > character qualifications to become or remain a licensee. Among
other
> > > > things, the Commission will consider: 1) whether the applicant has
> > avoided
> > > > any significant wrongdoing since the prior disqualifying misconduct;
2)
> > > the
> > > > amount of time elapsed since the misconduct; 3) the applicant's
> > reputation
> > > > for good character in the community; and 4)
> > > >
> > > >
> > > >
> > > > meaningful measures taken by the applicant to prevent the future
> > > occurrence
> > > > of misconduct. Moreover, in assessing the character of someone who,
> > like
> > > > Mr. Schoenbohm, had a previous application denied by the Commission,
the
> > > > Commission will also consider the deterrent impact of its previous
> > action.
> > > > Policy Regarding Character Qualifications in Broadcast Licensing, 5
FCC
> > > Rcd
> > > > 3252, 3254 (1990) ("Modified Character Policy Statement").
> > > >
> > > >
> > > >
> > > > 24. Behavior subsequent to prior misconduct. The
record
> > > > reflects that Mr. Schoenbohm has not engaged in any criminal
misconduct
> > > > since his 1992 conviction for toll fraud. However, as discussed
below,
> > > the
> > > > record reflects that Mr. Schoenbohm violated the Communications Act
> > > > subsequent to his 1995/1997 misconduct. Specifically, the findings
> > > support,
> > > > and it should be concluded, that Mr. Schoenbohm's operation of Mr.
> > > Reichlyn'
> > > > s station during an amateur contest violated section 301 of the
> > > > Communications Act, 47 U.S.C. &#65533; 301, because Mr. Schoenbohm's
operation
> > > was
> > > > not allowed by sections 97.5 and 97.7 of the Commission's rules.[5]
> > Read
> > > > together, those rules require that, during transmissions, an amateur

> > > station
> > > > be under the physical control of a control operator who is a
licensee.
> > > > Clearly, that was not the case during the two hours Mr. Schoenbohm
> > > operated
> > > > Mr. Reichlyn's station. Instead, the evidence reflects that Mr.
> > > Schoenbohm
> > > > had physical control of the station. In this regard, even though
Mr.
> > > > Reichlyn was present or nearby and able to supervise Mr. Schoenbohm,
it
> > is
> > > > apparent that Mr. Schoenbohm operated the station and made
transmissions
> > > > while at the microphone. Thus, Mr. Schoenbohm violated section 301
of
> > the
> > > > Act because he did not have a license to transmit and was not
otherwise
> > > > authorized to operate Mr. Reichlyn's station.[6] Finally, Mr.
> > > Schoenbohm's
> > > > work on WSTX(AM)'s antenna in 1999 occurred in the context of
restoring
> > > > service following a hurricane. The "fix" was meant to be temporary,
and
> > > Mr.
> > > > Schoenbohm advised the licensee that additional work was needed
before
> > the
> > > > station's antenna complied with the terms of the station's license.
Mr.
> > > > Schoenbohm worked as a contractor and was not responsible for the
> > legality
> > > > or illegality of WSTX's antenna.
> > > >
> > > >
> > > >
> > > > 25. Time since the misconduct. The evidence reflects
that
> > > the
> > > > last misrepresentation occurred in 1997, when Mr. Schoenbohm
testified
> > > > falsely before a Commission Administrative Law Judge. However, as
noted
> > > > above, Mr. Schoenbohm violated the Communications Act during a
two-hour
> > > > period in October 2001, when, although unlicensed, he operated Mr.
> > > >
> > > > Reichlyn's station.

> > > >

So have many people. It is not the same thing as saying "I'm older than you,
therefore I'm right", which has been tossed at me a number of times by folks
Cecil and "Lenover21"

> Most
>reasoning folks could equate "long experience" as being due
>to age...but that apparently doesn't apply if opinions differ?

I have no idea what that is supposed to mean.

>:-)
>
>>>Care
>>>to do one of those google searches you are always telling others to do and

>>older than me as a reason that my arguments are supposedly invalid.
>
>N2EY's OPINIONS are challenged as being invalid.

How can an opinion be "invalid"? Suppose Cecil's favorite ice cream is vanilla
bean - are you going to argue that chocolate chip mint is "better", (even

though Cecil has tried chocolate mint chip and hates it) and that Cecil's opinion is "invalid"? Sounds like it!

Your challenging my opinions shows that you find my arguments to be unchallengable.

>Try to learn the difference...please.

I know the difference, thank you.
>
>>Cecil gave
>>up on that game long ago but Lenover21 keeps at it for some reason.
>
>Leonard H. Anderson keeps at it to counter the OPINIONS of

Indeed. Rather than accept my facts, arguments and opinions, people should blindly accept your "I'm older, therefore I'm right" statements? Get real! Please.
>
>>Both are mistaken, of course.
>
>Naturally. NO ONE knows better than N2EY What Is Best in
>Amateur Radio. :-)

You said that, not me.

Jim, N2EY

I don't suppose he will get his old callsign back, unless he
does a vanity application.

As far as felonies go, it was a relatively minor one, as
compared to rape, murder, bank robbery and such.

1832. Let's Welcome back KV4FZ with a ROLL CALL!

How about we welcome our hero Herbie back with a ROLL CALL?

This would be fun! Anyone can check in. Freind or Foe. Let's welcome
Herbie back.

Herbie is back. Let us rejoice.

Lloyd

Robert,

Herb does have an application filed to get KV4FZ back. You are right about the felony. There was a ham in prison who renewed his ticket even though he is a convicted child molester who used to lure kids into his ham shack. We all know who he is.

Well said Frank.

These knotheads like Doc and Woger are upset that Herb is back! I wonder how long it will take for these 2 to revert back to thier nasty selves on the air.

A close friend (non-ham) has been a California judge for 20 years or
so, and has repeatedly told defendants "It's a shame that stupidity
is not a crime in this state...." right in their faces. Cracks up
the courtroom staff every time....

Take it for what it's worth, but to quote Jesse Ventura, "You have the
Constitutional right to be stupid."

FM on a AM RX Will appear as a unmodulated carrier if tuned to the centre
frequency
You won't hear by slope detection, until you slope off frequency

Steve Terry

There is also another Ham who has made his name widely known that already
has one felony (and jail time) for illegally distributing pharmaceuticals,
and he has yet another, more recent felony pending for aggravated
stalking...not to mention a couple more misdemeaner charges that went along
with his latest arrest. Hmmmm.....I wonder if he will keep his license, too?

Larry, I could not have put it better myself.

I really really hope for the future of ham radio
that he does not re-start the old 14.313 wars
again, as this time the mayhem will be TEN TIMES
worse and Hollingsworth will have a TRUE RADIO WAR
on his hands that will make CB look like kids stuff- take it to the bank.

E-gadfly is clearly trolling his way through life, having missed, -nay, outright rejected- his golden opportunity many years ago. He's the epitome of a sad case. Nowdays his highest ambition is to "win" the message count on rrap each month, with mundane trivialities attempting to masquerade as informed opinions, empty positions and endless inaccurate trollin accusations toward his "enemies"(or is that his enemas?) With liberal sprinklings of thinly vieled untruths and outright lies, from another of our "superior character" NCTA persons.
Whatta guy! Whatta goal!

> talk.

This one's not true either. I do recall telling you that you don't have
a clearance or a need to know for further information. You didn't like
it then. I'm going to guess that you aren't going to like it now.

> >Why would "Heil" think that? Do you think you are a radio amateur "in

So far, it'd be you since you are the individual coming up with the phoney quotes.
>
> Then the above bears out my original criticsm that Guinea-Bisseau
> is NOT of strategic importance to the USA nor is that embassy
> any hot point of sending espionage information through the, what,
> single TTY circuit?

Not many embassy comm centers are open for business 24 hours per day, Len. I doubt whether even London or Paris do that these days. The importance of Guinea-Bissau to the United States in terms of the uncivil discussion is irrelevant.

> >We weren't broadcasting, Len, and didn't do a "schedule" more than a

>
> Illogical bluff bullshit. If you can't send command information
> "because of severe multipath rendering teleprinting totally
> unuseable," you can't send any regular traffic either.

Brilliant! You are absolutely correct. Under those conditions, you can't send or receive traffic. You can attempt to QSY lower in frequency to see if it is possible to find a frequency not effected by the multipath distortion. If not, it is quite simple to send a closure via CW and to include a time for opening the following day.

> RTTY has
> been going on for decades before the eighties and other folks in

How is that apparent, Len? What is it that you know about the
circumstances requiring the practices? I've not said that nobody else
knows anything about State Department communications. I've said that
YOU don't know anything about them.

> >Did you think that the RACES system was in use worldwide?
>

So what did these have to do with Guinea-Bissau, Lisbon or Reykjavik?

> >Do you believe it to still be in use?
>
> No. Irrelevant question. RACES was fine at the end of the 60s
> but has been superceded by smaller, more efficient, greater-
> memory-capacity minimal-mechanical systems.

No. Irrelevant insertion of comment about equipment not used in decades
at State and not used at any embassy anywhere in the world. Knowledge
of RACES does not qualify you as even mildly knowledgeable of State
Department communications systems or techniques.

> >Did you think that mechanical
> >teleprinters were still in use in other than Africa and a few Asian

claims to expertise in amateur radio or State Department communications.
You don't have any background in either.

> Heil does not grant US amateur radio licenses.
>
> Heil does not set US amateur radio regulations.

> IS what you do.

No, Len. The smoke and mirrors belong to you. You seem to have snipped
the item on which I was commenting.

> >You
> >pontificate, chuff and puff and in general sway others into believing
> >that what you say is true by sheer length and number of posts.
>
> So...we should all leave the pontification, chuffing, and puffing to
> YOU?!? You, the classic archtypical "ugly American" of manner?

You could add all my posts together and they probably wouldn't make up
more than one or two of yours.

> According to Heil, ALL should let him preen, posture, pontificate,
> and blow smoke to make Heil look mahhhhhvelous. :-)

My posts aren't long enough to permit pontification, Len. What you've
accorded to "Heil", Heil didn't write.

> >No one
> >can know more about something dealing with the world of electronic
> >communications than you, huh?
>
> Getting aggravated and infuriated? :-)
>
> I've never laid any such claim on my abilities. You've emphasized
> all that bullshit.

C'mon, Len. Now you know more about my State Department job than I did.
Your typical bluster isn't likely to frighten me, so knock it off. You
don't know diddly about State commo and you don't know diddly about ham
radio.

> If your RTTY circuit is suffering so much "multipath distortion that
> you can't use it for control purposes," then it sure as hell is so
> very UNSUITABLE for any regular traffic.

That's right again, Doctor Evil!

> Either fix it,

It wasn't broken. The ionosphere was broken.

> get good equipment,

...had plenty of good equipment. Now what to do, what to do....

but quit laying a line of bullshit on everyone else
> about conditions you and you alone seem to be the only one
> cognizant of.

No, no, Len. Conditions which YOU are not cognizant of.

> By the way, I talked to Jack. You don't know Jack.
>
> >My original comments on this topic countered your balderdash that the

> >U.S. government no longer used morse.
>
> It still doesn't use morse codes for communications. There's NO

Why would the government bother to tell you or clear things with you,
Len? Who the hell are you?

> >That's right. "Heil" doesn't concede or give-in when he has made
> >statements which are true and correct.
>
> Heil doesn't DARE give in. To give in would mean losing face (in
> the oriental sense). Unlike cards where you MUST show hidden
> cards after a call, you've gotten away with a LOT of bluffing,
> huffing, and puffing in here. Your only "source" is Dave Heil's
> statements. Has Heil produced any US State Department
> statements to prove his point? No. Heil cites his years of State
> service and implications of Good Works therein.

"Heil" doesn't need to produce government documents to prove anything.
You'd better be able to come up with something to disprove it or you'll
just have to huff and puff.

My citing of years of State Department service would certainly stack up
well compared to your total inexperience with same. Your claim to be
more knowledgeable about that would be as silly as your pretense at
knowing more about amateur radio. You'd have to be a fool to write
anything like that.

> >To admit defeat, he'd first have
> >to be defeated at something. That hasn't taken place despite your best
> >efforts to distort and dismiss.
>
> What is "distorted" or "dismissive" about US government sources
> explaining US government or military radio communications?

I've explained. You have not accepted. You have dismissed despite your
total lack of knowledge of the situation. You have repeatedly distorted
by attributing to me things which I did not say.

> Are you going to fall into Robeson's conspiracy-theory rationalization
> about "it's all so 'secret' that I can't reveal it" as he has done about
> "military communications?!?"
>
> I'm sure you will. You are two of a basic kind.

Then this will chafe the hell out of you. You've been told all I can
tell you.

> Now you go right ahead and tell us where we can find US
> government statements saying the US government or military
> USES morse codes for radio communications now.

I've a better idea. You show me some documents which say that it does
not use morse. That aside, my comment was made about the late 1980s.

> Let's see how good your claim of "distortion" or "dismissiveness"
> is about that.
>
> >The above is about as surreal as it gets, Len. What did my amateur
> >station in Guinea-Bissau have to do with my daily tasks in a State
> >Department communications center?
>
> What WERE your "daily tasks" in the Guinea-Bisseau "comm center?"

Who wants to know?

> You've already stated it wasn't a 24/7 circuit. Was it just a single-
> channel RTTY circuit? Did it come up one or two days a week?

Number of circuits: You have no need to know. Operation: You have no
need to know.

> Sounds to me it wasn't a very busy duty at all. Did you have lots of
> time to sit around and chew all those cashew nuts?

You're the expert on State Department comms. Tell me. Was I busy?

> >I think you're honked that someone dared counter you claim that the US
> >government does not use morse and didn't back down no matter how hard
> >you huffed and puffed and attempted to blow the house down.
>

> "colonel" popped in here claiming that his "son" was "using CW
> behind the lines in the Gulf War to send intel to the coalition."
> That was TOTAL FABRICATION on the "colonel's" part.

And you know this because...
My comments were not made about the military at all, Len. Think "State
Department".

> Total bullshit is total bullshit and all the bluffing, huffing, and puffing
> and outrage at not being believed doesn't mean squat.

I know something you don't know....

> Now you show everybody the source for the US government "still
> using morse for radio communicaitons."

You don't have the need to know.

> No more of this bluffing, huffing, and puffing, smoke-eater.
>
> >The only thing which comes to mind is your years-old bluff that you know
> >anything about what is good for amateur radio.
>
> All I'm for is the elimination of the morse code test.

I certainly believe that you're for elimination. "All" would seem to be
a "typo" on your part. Aren't you for a minimum age for obtaining an
amateur radio license. You know these things are good for amateur radio
because of what--your vast experience?

> LOTS of citizens think that would be a mighty GOOD thing
> for US amateur radio. There's even an international
> organization that is working to eliminate that code test.
> You may have heard of it?

Yeah, it's a real "international" outfit.

> Even the IARU thinks that the code test should be removed
> from amateur radio testing worldwide.

What does the IARU think about a minimum age for entering amateur radio?

> But Dave Heil KNOWS WHAT IS GOOD FOR AMATEUR
> RADIO because he says he knows better what is good for
> everyone. Anyone who does not agree with Dave Heil is
> not good for amateur radio. Yep, that covers what Dave said.

Yeah, except Dave never said that. Wait a minute, Len. Aren't you
telling us that we should believe what Leonard H. Anderson says is good
for amateur radio? Why should anyone listen to you?

> >How does referring to the tag team of Anderson and Burke by names from a
> >very funny film indicate fixation?
>
> It's an attempt at humiliation by someone who thinks that those
> who don't agree with him are against all of ham radio. It doesn't
> work, but it makes Heil feel good and Dave Heil is the only one
> that counts in US amateur radio.

Oh, I see. You, of course, have never, never ever done anything
remotely akin to that in your posts, have you?

> >I was aware that the characters are fictional.
>
> Alec Baldwin is not fictional...he's a fairly good actor. "Spock"
> is fictional and you are trying to make an enterprise about
> anyone not in agreement with Dave Heil to be "bad" for US
> amateur radio.

I never wrote that Alec Baldwin is fictional. I never wrote that Spock
is non-fictional. Try to stay with me, Len. I was writing about Doctor
Evil and Mini-Me.

> >Your history in amateur radio is also fictional.
>
> No. The history of amateur radio may be exaggerated by the
> ARRL but it isn't quite fictional.

You're still not a part of that history. Your amateur radio history is
fictional.

> Why don't you demand that the FCC does what you tell them?

I can think of a couple of reasons. They don't post here. They haven't proposed a minimum age for obtaining an amateur radio license.

> Since 1934 the FCC hasn't been required to have any amateur
> radio license for its staff or commissioners to MAKE amateur
> radio regulations. By Dave Heil's logic that makes the ENTIRE
> FCC INCOMPETENT to make any sort of amateur regulations!

Unh uh. You're confusing yourself with the FCC. You don't work for the Commission. It matters not whether anyone at the FCC holds an amateur license. Regulating communications is their job. It is not your job. No one at the DMV is required to have a drivers license. No one at a butcher shop is required to eat meat.

> Ok, so MAKE the FCC get amateur radio licenses for its staff in
> order to make the amateur radio regulations. They can't possibly
> know "what is good for amateur radio" or even "tell radio amateurs
> what to do" if they aren't licensed!

I don't have a beef with the FCC. I have a beef with you. It's the FCC's job to regulate communications.

> Dave Heil and anyone who agrees with him are the only ones
> who know what is good for US amateur radio!

You don't agree with me. You claim to know what's best for amateur radio.

>> I didn't have to. They qualified me, Lennie. MOS and all. Sorry you
>>missed it.
>
>Nothing was missed because NOTHING WAS WRITTEN.

Two lies for the price of one:

I posted my revious MOS's at one point when first queried about them (at
your behest, as I remember), and again provided to you in one of the very few e
mails you exchanged before launching into the "jackbooted thug" rant.

Sorry you feel compelled to try and misrepresent the truth even further.

>Robeson is unable to speak of one single radio nomenclature,
>formal or informal, allegedly used by himself in the USMC.

There's no need to, Lennie.

>Robeson is unfamiliar with the standard, all-branch small-unit
>radio which is now into 13 years as an operational radio family.

Sorry, Lennie. Rant on if it makes you happy.

>Robeson is BLUFFING. He just doesn't know anything in
>military radio.

I could plagerize stuff from Aviation Week and Space Technology just as
well as you do Lennie, but WHY...???

>Robeson has not mentioned any. He hasn't because he can't
>because he never used any.

Robeson has, and you can lie about it all that you care to do, Herr
Anderscum...still doesn't change facts.

>Robeson is UNQUALIFIED by ANY STANDARDS to talk about
>military radio.

Says you. But then YOU are UNQUALIFIED to make that determination, Your
Geezerness.

>You wouldn't dare.

Sure I would. But why? Just so you can further perpetuate even another thread on how you did it first or sucked hind nipple with the guy who did?

Like we NEED that?

>Sorry, Robeson does not control "this forum."

To the extent that I don't have to feed your hatred anymoe I do. And it just tickles me silly when you can't have your way.

>If Robeson
>believes that they are "different" because of regulations, then he
>is more brain-dead than usual.

Amateur practice and policy is different from other radio services. That is a fact. That the physics of radiocommunication are the same is obvious...Except of course when Lennie has nothing else to rant about and then accuses us of some assertions that otherwise is the case.

>Robeson has NOT "provided" anything other than insults and
>denigrations.

Sorry your think so, Your Lyingness, but then if you weren't such a lying and antagonistic creep, the conversation might turn.

But you're set in yor ways, so we can just loft along like this for a while.

> He cannot talk of his military radio experiences
>because he hasn't had any military radio experiences.

Hmmmmm...A "statement of fact"....

One we will wait for Lennie to provide evidence corroborating...

>Robeson is pedaling his conspiracy bicycle again. The communications
>doctrine of the US military is an open topic for the public. Communications
>equipment of the US military is shown and illustrated on both military and
>commercial web sites...found in electronics trade publications.

We know how the Armed Forces puts EVERYTHING they know, do or are interested in doing in AW&ST, Lennie.

Uh huh...yeah...right....

>Do you want training instructions on operating any of the SINCGARS radios?

No, Lennie, because just one more trip down "SINCGARS" lane by Lennie the Loser is more boring that any of us can handle.

It's not germane to the original topic of the thread. It's just one more sidetrip that you like to take everyone on when you get into you huffy "I know more than you do" rants.

You plagerize the info from websites, TM's and any other source you can to show us how much you "know".

I am not impressed.

>Robeson doesn't know either Jack or the characteristics of a common
>small-unit, all-branch military radio that is in its 13th year of operational
>service.

In as much as I've been off active duty for 10 years now, it's as close as
you have come to any truth.

>He is BLUFFING on his "military radio experience" and
>"qualifications." His BLUFF has been called many times, found
>deficient and unqualified, but he is so ignorant he is unaware that he
>is wrong.

I'm not wrong, Lennie. I'm just not playing yor game by your rules.

Sorry it's got you in a twist, but it sure is funny watching!

>Robeson cannot explain any valid military experience in any
>kind of USMC radio communications. He doesn't have any. All
>he can do is evade the question by misdirection of personal
>insults as he has done above.

The original comments were relative to the likelyhood that on-off keying
techniques would remain a basic and viable method of signalling and
communication in several sectors of communications.

YOU have tried to "discredit" that statement by trying to make my service
in the Armed Forces relavant to the discussion.

So...rant all you care to about "misdirection", but it's clear who's
driving.

>Some time ago I mentioned that, "if I were to get an amateur radio license,
>I COULD get an amateur extra." Do you understand qualifiers in a
>sentence? Or are you as ignorant of ordinary English as you are of
>military radio statements, descriptions, and doctrine?

I understand one more attempt to squirm out of what was said.

You are a "person" of poor character, Lennie, and getting poorer all the
time.

>I am advocating only the elimination of the morse code test for ANY
>radio operator license. There's NO "need" to get any operator's
>license of any kind to discuss that.

The by this statement, we can safely assume that all your previous
statements relative to your "admiration" for Amateur Radio and other comments
made relative to it's fitness were yet another lie.

>I have acquired radio operation,
>maintenance, design, and building experience in radio, including
>HF radio sufficient to speak of and about the general subject.

You are NOT an Amateur Radio licensee, have NO experience in Amateur Radio policy matters, and have NO reason to be here save yor desire to create the torrent of hateful, antagonistic bile that yo succesfully manage to create.

Bully for you. Well done.

>The constant DEMAND to get a license is an artificiality brought
>out by those who cannot address the validity of the subject but
>DEMAND others be "as good as they."

Lennie, there is NO WAY on this God's Earth that you will EVER be so much as 1/100th as good as ANYONE in this forum when it comes to ANYTHING related to Amateur Radio.

>Explain your valid military experience in any kind of USMC radio
>communications.

Pay attention Your Creepiness:

I NEVER SAID MY MILITARY EXPERIENCE WAS GERMANE!

YOU are the ONLY ONE who tries to make any "hay" over it.

>Explain your valid military experience in any kind of USMC radio
>communications. Do not use ambiguous generalities, myths,
>or outright lies. Do not evade the question by attempting to
>misdirect as you have done above.

It's not germane to the discussion, Lennie. It's only a subtrefuge by you to do that "King Of The Hill" thing again.

Sorry. I am not playing.

>Explain your valid military experience in any kind of USMC radio
>communications. Do not use ambiguous generalities, myths,
>or outright lies. Do not evade the question by attempting to
>misdirect as you have done above.

Do you just cut-and-paste this, Lennie, or do you have fun re-typing it over and over?

>Robeson is BLUFFING once again. Give references to the CLASS, the
>dates of that CLASS, and students who were in that CLASS and their
>licenses. Volunteer Examiners are NOT tasked to "teach classes," they
>proctor license examinations.

Oh...I see...Since I happen to be a VE I cannot teach classes too?

Sorry it irks you, Your Geezerness.

>Robeson is again bluffing, huffing, and puffing. It looks like LYING.

No, Lennie, if you want to see "LYING", I suggest you do a "Google" on "Lenover21", "Lenof21", "NoCWTest", "AveryFine", "AveryFineman", or anyone of several screen names used by your buddy in Illinois.

Most are bland, some are classic, all are archived.

>That sort of CLASS is not a VE function. VEs proctor license examinations.

I did not say it was, Your Misguidedness. Nice try.

>Robeson is already SICK and obsessive.

Sick that creeps like you can get away with what you do. Obsessed with
the idea that you will not be allowed to spew such bile and hatred uncontested.

>In the "real world" of US democratic principles, all citizens may petition
>their
>government to correct grievances. That's in the First Amendment. Robeson
>(and Heil) are invited to petition the US government for their "grievance" in
>that the FCC has "no validity to make regulations because they are
>unlicensed."

Neither Dave nor I have made any such assertion, Lennie. It is a cowardly
and boring rhetorical twist that was erroneous the first time you trotted it
out and is just as silly today.

>No. Robeson proves (again) that he is UNQUALIFIED to read and understand
>statements in the English language.
>
>Something that is publicly known or knowable does not have to be "popular"
>or "well known."

Well, Lennie, then you should not use those words when that is not what you
mean.

>I once told Hans Brakob to "stay with his ice holes." Brakob is an ice
>fisherman. I've openly called falsehoods as "bullshit" and been able to
>show those falsehoods were indeed false. Is that language too strong
>for a big, brave, proud ex-marine?

The Marine is big, brave and proud enough to be able to express himself
without the profanity, Lennie.

And your calling of "falsehoods" as "bull!@#$" does not "indeed prove them
false". It only means you used profanity and and tried to out-crow the other
poster.

You've "proved" nothing.

>Robeson seems to bristle at others using "swear words" at him yet he
>doesn't mind signing off his postings by calling his "opponents" as
>"dickheads" or worse.

I've never called you a "dickhead", Lennie. I have called you a "putz".

>I stated that I was assigned to the 8235th Army Unit, US Army. I did not
>state that it "had a high KIA rate" at any time. I stated that 23 members
>of that unit were killed. They were the first, the 8235th being a relatively
>new Army unit at that time. Robeson "embellishes" his READING, not
>what I wrote.

I read it thoroughouly, Your Cowardliness. I am not the only one who caught your little charade.

Sucks to be you.

>Robeson is so shallow and petty that he would spit on the graves of
>deceased US servicemen if it meant he could act tough in newsgroups
>and "get" living veterans.

Thanks, Lennie. Just when I think you couldn't get any MORE callous or any more cowardly, you prove me wrong.

>Robeson is qualified only for the unspecified...which is essentially nothing
>but amateurism.

I am sure you think so. But that's because you don't know any better.

G'Nite, Lennie!

Radio Ham/Gareth/SockPuppet forgot to qualify his original statement
by qualifying it with the word "can" in the appropriate place, thereby
generalising the specific. He will be able to tell you what form of
'argumentum' he used. More scientific analphabeticity from this
source. Cue Gerald in his defence.....

As you tune off frequency the slope detection kicks in and the
signal becomes more intelligible; however you can STILL hear
some audio on centre frequency. Try it for yourself and see.

1854. Club Licensure

Newsgroup: rec.radio.amateur.policy

I am asking here, since I haven't the foggiest idea where to get this answer.... What is the actual requirements for obtaining a "club callsign," and what actual documents are required for obtaining a club call. Is there certain criteria for what exactly a "club" is?

Many thanks for your help in advance.

I heard something on 75 Meters last night
that Herb, KV4FZ has somehow pulled a rabbit
out of his hat and the FCC is going to re-instate
his ham radio licence. Is this true..?
Can someone PLEASE post a URL or a link to
and OFFICIAL FCC PRESS RELEASE to this effect.

Most of this stuff in the newsgroups and on 75 Meters
is pure bullshi+ with extra sauce. I will believe
it ONLY when I read it from an official and a credible source.

Message-ID: <2002718-143444-899862@foorum.com>
Source record: 49670

WSJT221 and WinPSKse are screen dependent programs, i.e they do not work
properly in the 640x480 mode. An intelligent program must be independent
of the display size or at leat must accept the 640x480 mode which is a very
commonly used format.
It's no use to make 3000 more revisions of these softwares before solving that
screen problem.

Yes!!!!! We need Herb back on ham radio, and with his KV4FZ call sign
... Herb was a beacon of light shining through the ham radio garbage,
consisting of AF2Y, crazy disgraced dentist..assorted Child
Molestors... Fat "mama boy " qrmers etc... FCC, give Herb his ticket
back.. he has been treated unfairly.... He will be welcome on the ham
bands with open arms ......Zitchey

Hi Ryan. The FCC has passed such responsibility on to Club Callsign Administrators of which the ARRL and W5YI are each one. I am not sure if there are others.

They each have an application which can be completed and routed back to them for the initial callsign. Vanity calls are hndles as per "regular" callsigns.

The criteria used to be at least four licensees, and you had to be prepared to provide some sort of evidence of the existence of the club. This could be copies of dues receipts, minutes of meetings, or a copy of the club charter or by-laws.

Good luck

97.5(b)(2) gives the requirements.

A club officer must designate the trustee who can be any license class
except Novice. The club must consist of at least 4 persons, have a name, a
document of organization (constitution/bylaws), management (officers), and a
primary purpose related to ham radio (in other words, your garden club or
bridge club is not eligible for a license).

Not Woger. He has a 4 call in Florida. That witch Hoffman would still
visit that excuse for a human being on sundays. This clown was able to
renew his ticket from prison. He must have had one of his intercon buddys
do it for him.

Speaoking of fat, Polly, didn't you have to lose quite a bit to get back down to
your size 44 pants, dumbass?
Maybe it's because you'd die from your diabetes if you didn't lose some weight.
Let's hope you die anyways, that way all the hams can piss on your grave. Too
bad they couldn't piss on your face as you lie in the funeral home.

> FCC, give Herb his ticket
> back.. he has been treated unfairly.... He will be welcome on the ham

Why don't you ever get on the air, Polly? Did Riley tell you to take a permanent vacation, or lose your license the last time he made you inventory all your equipment at both your hovels?

February 7, 2001

CERTIFIED MAIL RETURN RECEIPT REQUESTED

Mr. George A. Ashley
1138 Collierville Arlington Road
Collierville, TN 38017

Subject: Warning Notice: Amateur Radio Station W4FQF

Dear Mr. Ashley:

Information before the Commission indicates that you have engaged in deliberate interference on the 75 Meter Amateur Band (3.901 MHz) at various times since October 2000. Some of the interference included tape recordings. We note that on January 7, 1999 you were warned about such activities on the 20- Meter Amateur Band.

This constitutes a second warning that any further incidents of such operation will result in enforcement action being taken against you, including license revocation, monetary forfeiture, or both.

Section 308(b) of the Communications Act of 1934, as amended, 18 U.S.C. Section 308(b), gives the Commission the authority to obtain information from licensees about the operation of their station. Pursuant to Section 308(b), you are requested to respond to this letter within 20 days of the above date. You are also requested to furnish the following information.

1. Describe the radio transmitting equipment, including antennas, you have at the 1138 Collierville Arlington Road Address. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

2. Describe any radio transmitting equipment, including antennas, you have at any other address in Tennessee. State the manufacturer, model and serial number of each item. If any items were constructed or modified by you, describe the item in detail.

Please be advised that Congress has made punishable a willfully false response to a letter of this type. See 18 U.S.C. Section 1001.

Sincerely,

W. Riley Hollingsworth

Special Counsel
Enforcement Bureau

John Kimball, you are one "interesting" "it". It is the only descrip I can
think of, sorry, for such an ignorant moron as yourself since you have no sex
and no life. With an interest in sociology and what makes some minds tick, I
did a little checking on you: I now have your real name, your address, and am
working on your id number. Your local law enforcement and regulatory societies
will be in touch with you shortly - I have to mail the documents - e-mail is no

good for this sort of thing as it is too easily forged - as you obviously know. From what I have found so far, you are no stranger to your local authorities, though you may not yet realize the extent of their interest in you. Ain't it amazing what a few well placed phone calls can do?

Ask Mike Deignan. At one time he was quite a collector of club callsigns,
until...

Riley Hollingsworth took a dim view of callsign collectors.

Some of these coded people think they own the amateur radio service.

In article <20020717181031.01571.00000001@mb-ct.aol.com>, n2ey@aol.com (N2EY)
writes:

>>Dick has made an enormous number of "claims" in here and
>>he HAS cited his "long experience" in many things.
>
>So have many people. It is not the same thing as saying "I'm older than you,
>therefore I'm right", which has been tossed at me a number of times by folks
>Cecil and "Lenover21"

Some of us have more experience in radio and electronics than
you, Jim. I have and I know Cecil has. With more experience
comes greater exposure to many things.

If the majority of your "experience" comes from reading ARRL
publications and personal radio operating (following the ARRL
rules), then your "experience" has been dictated to you as to
what to do, how to do it, and what is "proper" in amateurism.

My experience comes from a lot of exposure to various kinds
of radio and electronics, many different radio services. I've been
fortunate to start out my radio experience in the Big Leagues of
HF communications some time ago. You will negate that in
that "it isn't amateur radio" and you would be right...it isn't IN
amateur radio. However, radio physics are the same regardless
of man-made rules on what is professional and what is amateur.

Amateur radio is a hobby. It isn't a guild, trade, or union and it
isn't a pseudo-military "service" requiring rigid adherence to
methods, standards, procedures, jargon, or anything else. All
that is required is to follow the regulations made by the only
agency that grants permissions to radiate RF, the FCC.

>> Most
>>reasoning folks could equate "long experience" as being due
>>to age...but that apparently doesn't apply if opinions differ?
>
>I have no idea what that is supposed to mean.

Sure you do...you use it implicitly all the time.

You have a rather rigid adherence to amateur methods,
standard, practices, jargon, etc., all "specified" by the ARRL.
You expect others to adhere to the same or suffer some kind
of chastisement from your "old man 2" sequel of negative
criticsm (a la H.P.Maxim).

So you've been an amateur extra for 32 years. That means
you achieved that class as a teenager. You were not yet an
adult then. Have you spent those three decades as an extra
in exploring and experimenting the state of the art of radio?
Or didn't you follow the "proper" behavior and all the "in" things
as they were proscribed for you in the ARRL publications? :-)

>>N2EY's OPINIONS are challenged as being invalid.
>
>How can an opinion be "invalid"? Suppose Cecil's favorite ice cream is
>vanilla
>bean - are you going to argue that chocolate chip mint is "better", (even
>though Cecil has tried chocolate mint chip and hates it) and that Cecil's
>opinion is "invalid"? Sounds like it!

No...your comment is simply misdirection. This isn't about anyone
else's favorite flavor of ice cream. However, if the ARRL proscribed
the "proper" flavor of ice cream to enjoy, I'm absolutely certain you
would follow their directions. :-)

I find you opinions to be nearly the same as what the ARRL
writes as "good and proper" for all radio amateurs to follow. :-)

I find that your opinions are simply mirroring what has been
proscribed to you with very little originality or evidence that
they really are your own "opinions." For that reason I find them
INVALID as your personal opinion.

>Indeed. Rather than accept my facts, arguments and opinions, people should
>blindly accept your "I'm older, therefore I'm right" statements? Get real!
>Please.

Where am I stating saying "follow my direction, I am right?"

I haven't done that. All I've advocated is the elimination of the
code test for an amateur radio license...and the ability to be
independent of a national membership organization that has all
the earmarks of trying to be a Big Brother ex-officio control group.

You and your PCTA group are all saying (practically in all
capitals) "DO AS I DID, OTHERWISE YOU AREN'T A REAL
HAM!" The clear implication that someone who doesn't do what
you or the PCTAs do is a "lesser" person in the hobby.

>>Naturally. NO ONE knows better than N2EY What Is Best in
>>Amateur Radio. :-)
>
>You said that, not me.

Oh, you've SAID it all right, just not in those exact words. You
will tout "being an extra since 1970" and expect to be regarded
as an "expert" (or at least a guru figure) in amateur radio and
then get all upset if someone else doesn't agree with your
"expertise." You will, as above, get upset if others with more

life experience over a varied radio environment show up and challenge your opinions. You generally get upset with such challenges as evident in your post quoted here. :-)

Are you thinking at all, really and truly thinking about newcomers to amateur radio? I don't think so. For a long while you've been emphasizing amateur extra classes in those many "statistics" postings. You are an extra. You want to show "how good you are." You've said outright that folks should look up your stuff in a non-newsstand old-radio-technology magazine and stated your own projects as being "good" without giving others a chance to do a review. That's all evidence of thinking about YOUR opinions being "good" for amateur radio.

For a dozen years the US amateur radio ranks were swelled by the no-code-test Technician class licensees. You've discounted those, dismissed them, never really regarded their existance as meaningful in any way (except maybe as warm bodies who "will upgrade through code practice"). Technician class licensees now make up a third of all licensees and are also the least class in membership percentage in the ARRL. To most reasoning people that is a sign that newcomers aren't buying the old standards, practices, or "what is good for them" (as proscribed by older hams). You see only ONE way to be "good amateurs:" Do as you did, faithfully follow anything dictated by the ARRL, march in ranks to their drumbeat like good little servicemen.

"Real hams work DX on HF with CW."

"Gigahertz are for giga-squirts."

"No lids, kids, or space cadets."

The FCC probably didn't know about the molester convection. Probably the only reason they knew about Herb is that it was a telecom related crime, and telecom is part of what the FCC regulates. I suppose the FCC could have the FBI check the ham license database for any other felons, but the FCC would need to budget money for that, and the FBI is busy with other stuff right now. And it's not clear that it's anything worth worrying about anyway....

>Exactly - and Xtal controlled rigs will be right
>on centre channel.
>

Time to put your shovel away, the hole is already big enough!

Xtals have a tolerance. No receiver is ever exactly on
centre channel.

AM receivers do not have a sufficiently flat passband for
'nothing' to be demodulated, even when they are tuned
completely centrally on an fm signal. A passband ripple
of less than 1dB will give an easily audible response, due to
slope detection within the passband.

Also, if the bandwidth of the fm signal is wider than the bandwidth
of the AM receiver, there will be no 'accurately centered' tuning
point where 'nothing' would be heard, even if the passband was
exactly flat.

In theory, with a perfect AM receiver, with a bandwidth wider than
the fm signal, it would give no demodulation of an FM signal,
but there are no perfect receivers available to real world radio
amateurs.

I doubt it. Mikey D's famous list of "Hawaiian clubs" is not to be found. Mikey still has KH6HZ obtained with someone else's PO Box address...but now has a Chepachet, RI, mailing address.

The WE1RD Michael P. Deignan Repeater Association is still listed with KD1S as trustee. Weird is right. :-)

Apparently all the "RF Commandos" were RIFed, probably with a Dishonorable. :-)

There's still a whole bunch of multiple clubs on the AH0A site.

Dave Sumner is still on that one with the "Residence Radio Club." Must have a really big house! :-)

>You don't have any background in either.

Got up on the wrong side of the kaserne this morning? :-)

>My qualifications for knowing what is best for amateur radio are 39
>years as an active ham.

Yes, everyone do what you want because that pleases you. :-)

>Your qualifications are what? Oh yeah,
>ordinary citizen non-participant in amateur radio.

Of course. "Civilians" are not allowed to speak. They can only
speak when spoken to and then only with permission. :-)

[see also "clearance" and "need to know"]

>No, Len. The smoke and mirrors belong to you. You seem to have snipped
>the item on which I was commenting.

Were you "commenting?" Geez, I thought you were today's
Dill Instructor chewing out the troops!

>My posts aren't long enough to permit pontification, Len. What you've
>accorded to "Heil", Heil didn't write.

Ok, ok, so your impersonator has been very busy..."you" hardly
wrote a thing except some pithy one-liners.

You got pithed off. Understood.

>C'mon, Len. Now you know more about my State Department job than I did.

I did? How could I know that? No clearance or need to know,
etc. I guess NOBODY knows about your State job, huh?

>It wasn't broken. The ionosphere was broken.

Yes, that happens. The work-around? :-)

>Why would the government bother to tell you or clear things with you,
>Len? Who the hell are you?

Well then, we can all rest safely knowing that the USA Department
of State is in good but secret hands, not to be revealed without
the proper clearance or "need to know." More mum's the word.

>"Heil" doesn't need to produce government documents to prove anything.
>You'd better be able to come up with something to disprove it or you'll
>just have to huff and puff.

I'm not licensed for bluffing, huffing, or puffing. No clearance or
"need to know," remember?

>I've explained. You have not accepted. You have dismissed despite your
>total lack of knowledge of the situation. You have repeatedly distorted
>by attributing to me things which I did not say.

Ah, but SOMEONE named "Dave Heil" wrote what I said.

>Then this will chafe the hell out of you. You've been told all I can
>tell you.

No problem. I'll just go to the CIA Fact Book again for answers
on hotbeds of intrigue in foreign countries.

>I've a better idea. You show me some documents which say that it does
>not use morse.

<insert about 10 minutes of raucous laughter at this one...>

>> What WERE your "daily tasks" in the Guinea-Bisseau "comm center?"
>
>Who wants to know?

Don't worry, big Dave, I won't tell...honest, I won't... :-)

What percentage of daily time was devoted to making out
all those QSLs as a rare (the ONLY) ham call in Guinea-
Bisseau? [just wondering]

>Number of circuits: You have no need to know. Operation: You have no
>need to know.

Oh, heavens, yes! NO clearance, NO "need to know!" :-)

I'll just wait for someone else to write it up as a footnote in a
CIA or NSA book sold by that bankrupt, non-profit book seller
called Amazon. :-)

>You're the expert on State Department comms. Tell me. Was I busy?

According to the documents in front of me, it says nothing at all
about your work. Amazing!

>I know something you don't know....

Of course, of course. :-) :-) :-)

>You don't have the need to know.

Of course, of course. :-) :-) :-)

>> LOTS of citizens think that would be a mighty GOOD thing
>> for US amateur radio. There's even an international
>> organization that is working to eliminate that code test.
>> You may have heard of it?
>
>Yeah, it's a real "international" outfit.

Oh-oh, do we detect an extra snarly undertone there?

>What does the IARU think about a minimum age for entering amateur radio?

Will the IARU grant a clearance with a "need to know?" :-)

> Aren't you
>telling us that we should believe what Leonard H. Anderson says is good
>for amateur radio?

No. I'm just for the elimination of any morse code test for an
amateur radio license...and poking holes in a lot of old, dated
puffed-up dudes who think Their ideas is What Is Best For
Amateur Radio (because that pleases them no end...).

> I was writing about Doctor Evil and Mini-Me.

Why? The movie review newsgroup is on the second floor
to the right. Go there or right next door for the Mike Myers
Fan Club.

>Unh uh. You're confusing yourself with the FCC.

Nope. You seem to be, though.

>You don't work for the Commission.

Right...and neither do you, big Dave.

>It matters not whether anyone at the FCC holds an amateur
>license.

Oh? You just said that anyone without a ham license should
not be listened to, that they are fictional, should be disregarded.
Disregarding the FCC is not a nice thing...

Please try to stay on focus, your picture is very blurry...

>Regulating communications is their job. It is not your job.

Ah, but YOU are trying very hard to regulate newsgroup
communications...and to say that anyone without an amateur
radio license should not be listened to, are fictional, and
should be disregarded!

>No one at the DMV is required to have a drivers license.

In the California DMV the driving test inspectors must have
a valid driver license. They don't have to test for morse code
communications, though. :-)

>No one at a butcher shop is required to eat meat.

They don't have to test for morse code, either... :-)

>I don't have a beef with the FCC. I have a beef with you.

You are a ham with a beef. Sounds fishy to me.

Meaty subject, that... :-)

>It's the FCC's job to regulate communications.

...and no one at the FCC is required to have an amateur radio license to either regulate amateur radio or enforce it. The FCC should be disregarded (according to big Dave) because they are "unlicensed."

>You don't agree with me.

Sorry, I can't tell you I either agree with you or disagree with you...you don't have a clearance or "need to know" to find that out.

>You claim to know what's best for amateur radio.

Nope. I just want to eliminate the morse code test for any amateur radio license.

Hello? To anyone with more than four working neurons, that's about GETTING INTO AMATEUR RADIO.

I'll just let the ARRL and ruff, tuff long-time extras dictate to everyone "what is best for amateur radio" after newcomers get into it. That way the ruffies and tuffies can satisfy their control-freak needs and pioneer HF radio because they have clearances and a "need to know." :-)

Cecil:

I imagine that what you're saying is you took your Extra exams before a VE-team. Since there is a positive connection between VE teams and corruption of the amateur radio license testing process, you, like every other ham tested by a VE team, will always carry with you the possibility that there was something suspicious happening at your testing session. Therefore, it can reasonably be asserted that the best hams are those who took 100% of their tests at an FCC Field Office. Sorry for your luck.

>challenge. I think that alone made my point.

There hasn't been any point made, Ed, since my original comment to
Brian was just my typical tongue-in-cheek humor! If you haven't had the
mandatory funnybonectomy required for employment on the ARRL HQ
Staff, you would have understood that.

Really ? Thanks for telling me, I bet you tell your granny how to suck eggs too
I'd been slope detecting before you were born (probably?)

Let me think, firstly on an R1155 with a RF27 VHF converter modded for 2M,
around 1968 ?

OK you'll get a slight squeak on centre frequency, but nothing intelligible

Then they were not amateur radio transceivers. The question was about "amateur
radio transceivers".

>>A receiver-transmitter is not a transceiver.
>
>The word "transceiver" is a contraction of "transmitter-receiver."

The meaning of the word in amateur radio use includes more than that. Like
using the same variable oscillator system for both transmit and receive
frequency control.

>>Not patentable - it was obvious to anyone skilled in the art. I wrote it up
>but
>>a few months later a similar design appeared in QST. Author was W1DBM - Phil

>
>Some of us have more experience in radio and electronics than
>you, Jim.

Some people do. Like K8MN.

>I have and I know Cecil has.

How do you know? "Radio and electronics" covers a very wide range. Do you know how to program a PLC?

>With more experience
>comes greater exposure to many things.

But not everything. "Radio and electronics" covers a very wide range.

There are undoubtedly areas of "radio and electronics" where you have more experience than I. Same for Cecil. And there are also areas where I have more experience than either of you - or both of you put together.
>
>My experience comes from a lot of exposure to various kinds
>of radio and electronics, many different radio services.

So you claim. But you have very little experience in amateur radio. You have no experience whatsoever as an amateur radio operator.

> I've been
>fortunate to start out my radio experience in the Big Leagues of
>HF communications some time ago.

"Big Leagues"? So you keep telling us.

>You will negate that in
>that "it isn't amateur radio" and you would be right...it isn't IN
>amateur radio.

No, it isn't amateur radio. The resources and goals of different radio services are very different.

>However, radio physics are the same regardless
>of man-made rules on what is professional and what is amateur.

Physics is only one aspect of radio, however. Radio policy is not determined solely by radio physics.

>Amateur radio is a hobby.

Actually, it's more of a sport.

>It isn't a guild, trade, or union and it
>isn't a pseudo-military "service" requiring rigid adherence to
>methods, standards, procedures, jargon, or anything else. All
>that is required is to follow the regulations made by the only

Legally, adherence to FCC rules is all that is required. However, the amateur radio service is enhanced by voluntary adherence to good operating and technical standards. Such as using the standard phonetics. Are you against amateurs having standards?
>
>>> Most
>>>reasoning folks could equate "long experience" as being due
>>>to age...but that apparently doesn't apply if opinions differ?
>>
>>I have no idea what that is supposed to mean.
>
>Sure you do...you use it implicitly all the time.

Do you have the ability to mindread?
>
>You have a rather rigid adherence to amateur methods,
>standard, practices, jargon, etc., all "specified" by the ARRL.

How do you know? Have you ever heard me on the air? Cecil has.

>You expect others to adhere to the same or suffer some kind
>of chastisement from your "old man 2" sequel of negative
>criticsm (a la H.P.Maxim).

What's your point? Do you think all operating practices are the same, and should be accepted equally? I don't.

>So you've been an amateur extra for 32 years.

Is that a problem? Does my experience somehow disqualify me?

>That means
>you achieved that class as a teenager.

16 years old, to be exact. Between sophomore and junior year of high school. Would've done it sooner but for that dern 2-years-as-a-General-or-higher experience requirement. Even back then, it wasn't hard to get an Extra.

>You were not yet an adult then.

Not in years, anyway. However, I DID meet all the requirements for the highest class of US amateur radio license, which is issued by the FCC, the only agency that grants permissions to radiate RF.

>Have you spent those three decades as an extra
>in exploring and experimenting the state of the art of radio?

Sometimes. There is no FCC requirement to do so, however.

>Or didn't you follow the "proper" behavior and all the "in" things
>as they were proscribed for you in the ARRL publications? :-)

I did what interested me. Technical stuff, public service, teaching, operating of many kinds, etc. That's what amateur radio is all about.

>>>N2EY's OPINIONS are challenged as being invalid.
>>
>>How can an opinion be "invalid"? Suppose Cecil's favorite ice cream is
>>vanilla bean - are you going to argue that chocolate chip mint is "better",
(even
>>though Cecil has tried chocolate mint chip and hates it) and that Cecil's
>>opinion is "invalid"? Sounds like it!
>
>No...your comment is simply misdirection.

It's dead-on accurate. You wrote:

"N2EY's OPINIONS are challenged as being invalid."

How can an opinion be "invalid"?

>This isn't about anyone
>else's favorite flavor of ice cream.

It's an analogy. How can an opinion be invalid?

>However, if the ARRL proscribed
>the "proper" flavor of ice cream to enjoy, I'm absolutely certain you
>would follow their directions. :-)

You'd be mistaken, of course.

>I find you opinions to be nearly the same as what the ARRL
>writes as "good and proper" for all radio amateurs to follow. :-)

Ever think that perhaps they are good and considered opinions? Does being from the ARRL automatically discredit something?

>I find that your opinions are simply mirroring what has been
>proscribed to you with very little originality or evidence that
>they really are your own "opinions." For that reason I find them
>INVALID as your personal opinion.

Then you are mistaken.

>>Indeed. Rather than accept my facts, arguments and opinions, people should
>>blindly accept your "I'm older, therefore I'm right" statements? Get real!
>>Please.
>
>Where am I stating saying "follow my direction, I am right?"

You hold up your age as evidence of being right.
>
>I haven't done that.

You've held up your age as evidence of being right. You use your claimed experience in nonamateur radio as somehow qualifying you to pass judgement on the amateur radio rules, methods and practices. When people disagree, you make fun of their names, jobs, and other characteristics. Why not just discuss the issues?

>All I've advocated is the elimination of the
>code test for an amateur radio license

You also advocated an age requirement (14, if I recall correctly) for an amateur radio license of any class. Age seems to be a big issue with you.

You also ridicule the accomplishments of those who disagree with you.

>...and the ability to be
>independent of a national membership organization

No one is required to be a member of ARRL in order to be a radio amateur. Membership does have benefits, however.

> that has all
>the earmarks of trying to be a Big Brother ex-officio control group.

Sounds like what really bothers you is the existence of a strong national amateur radio organization, and the development of standard practices and methods by amateurs.
>
>You and your PCTA group are all saying (practically in all
>capitals) "DO AS I DID, OTHERWISE YOU AREN'T A REAL
>HAM!"

I don't say that. I simply relate my own experiences, opinions, and facts.

>The clear implication that someone who doesn't do what
>you or the PCTAs do is a "lesser" person in the hobby.

Not at all.

You are trying the old "guilt by association" gambit.Also called bigotry. Rather than treat me as an individual, you lump me in with all other procodetest people, as if we are all the same.

>>>Naturally. NO ONE knows better than N2EY What Is Best in
>>>Amateur Radio. :-)
>>
>>You said that, not me.

>
>Oh, you've SAID it all right, just not in those exact words.

Where? Produce some actual posts, not just claims.

ANYONE who has an opinion about amateur radio policy, methods or practices claims to "know what is best for amateur radio". For example, Carl Stevenson, Executive Director of NCI, thinks that total elimination of code testing is best for amateur radio. He KNOWS it is.

>You
>will tout "being an extra since 1970" and expect to be regarded
>as an "expert" (or at least a guru figure) in amateur radio and
>then get all upset if someone else doesn't agree with your
>"expertise." You will, as above, get upset if others with more
>life experience over a varied radio environment show up and
>challenge your opinions. You generally get upset with such
>challenges as evident in your post quoted here. :-)

I don't "get upset" at things posted here. You're the one who does the shouting, the name calling, the diminutives, etc.
>
>Are you thinking at all, really and truly thinking about newcomers
>to amateur radio?

Yep. You are not even a newcomer, however. Despite your post back in January of 2000 that you were going for Extra "right out of the box", your still on the sidelines.

> I don't think so.

Only because I disagree with you.

> For a long while you've been
>emphasizing amateur extra classes in those many "statistics"
>postings.

How? All classes of license are posted, and the total. Is there something wrong with the data?

>You are an extra.

So are about 102,000 other people. More of us every day.

>You want to show "how good you are."

Is that bad? Lots of people do the same thing here. Or is it only bad because I'm procodetest and procode, and you are not?

>You've said outright that folks should look up your stuff in
>a non-newsstand old-radio-technology magazine and stated your
>own projects as being "good" without giving others a chance to
>do a review.

Anyone can "do a review" by looking up the articles. Back issues are available from the publishers.

Do you know what a premixer is?

Perhaps you are jealous of the fact that I have actually designed and built amateur radio stations and operated them on the air successfully for the past 35 years.

>That's all evidence of thinking about YOUR opinions being "good" for amateur radio.

Perhaps you could show us how my opinions are "bad" for amateur radio?

For example, I've got a list of operating skills that I think all hams should strive to acquire.
>
>For a dozen years the US amateur radio ranks were swelled by
>the no-code-test Technician class licensees.

"Were swelled"? Why the past tense?

Amateur radio was growing before the Tech lost its code test, and continued to grow after that change. The actual effects are difficult to gauge due to the effects of other changes such as the doubling of the license term.

>You've discounted
>those, dismissed them, never really regarded their existance
>as meaningful in any way (except maybe as warm bodies who
>"will upgrade through code practice").

That is simply incorrect. Flat out wrong. Some (not me) would even call it a lie.

I challenge you to provide examples of posts where I "discounted those, dismissed them, never really regarded their existance
as meaningful in any way".

Let's see you back up that claim.

>Technician class licensees
>now make up a third of all licensees

Yup. In part, that is because the FCC has been renewing Tech Pluses as Techs for over two years now.

> and are also the least class
>in membership percentage in the ARRL.

Lots of reasons for that.

>To most reasoning
>people that is a sign that newcomers aren't buying the old
>standards, practices, or "what is good for them" (as proscribed
>by older hams).

Nope. Incorrect. That's how it seems to you. Others think differently. For example, many Technicians that I know are mostly interested in local/regional communications, and see little reason to be involved in a national organization. Particularly one that costs $39 a year.

Ask Ryan, KC8PMX.

>You see only ONE way to be "good amateurs:"
>Do as you did, faithfully follow anything dictated by the ARRL,
>march in ranks to their drumbeat like good little servicemen.

You are quite mistaken about that.

>"Real hams work DX on HF with CW."

That's true. Real hams also do lots of other things, like bounce microwave signals off the moon using low power and small dishes. Or build their own equipment from recycled parts.
>
>"Gigahertz are for giga-squirts."

That's not one of mine.
>
>"No lids, kids, or space cadets."
>
Is that what YOU believe? After all, you want an age limit (no kids)...

Care to produce it, Len? If you could do so, it'd let you off the hook
on my claim that you are a fabricator.

> [maybe it was an Al-Queda sleeper practicing for later?!?]

I have no idea what that peculiar comment is supposed to mean.

>
> Oh? Open every day? Well, it must have been busy with all that
> area intrigue in 80s.

I didn't say when we were open. You actually don't know much about what
was going on in Guinea-Bissau in the eighties, do you? Come to think of
it, you don't really know much about what goes on in embassies either.

> >Gosh, if State had only known that men of your calibre were available,
> >so much more could have been accomplished!
>
> Too bad for Uncle Sammy then... :-)

If I operated the way you do, this would be the point where I'd accuse
you of denigrating an entire group of fine people.

> >So what did these have to do with Guinea-Bissau, Lisbon or Reykjavik?
>
> One place has cashews, one has Nokias? :-)

Snip and mindless comment noted.

>
> Ok, ok, so your impersonator has been very busy..."you" hardly
> wrote a thing except some pithy one-liners.
>
> You got pithed off. Understood.

Len, you post like a short story writer being paid by the word.

> >C'mon, Len. Now you know more about my State Department job than I did.
>
> I did? How could I know that? No clearance or need to know,
> etc.

You claim to know what took place in the embassy comm center in
Guinea-Bissau. Apparently the fact that you had some part in some
system used at Main State decades ago provides you with qualification as
an "expert" in State Department methods and equipment.

> I guess NOBODY knows about your State job, huh?

Lots of folks at State know about it. I didn't say "NOBODY" knows.
The fact is, YOU don't know.

> >It wasn't broken. The ionosphere was broken.
>
> Yes, that happens. The work-around? :-)

Snip of your material on fixing broken equipment noted.

> >Why would the government bother to tell you or clear things with you,
> >Len? Who the hell are you?
>

> Well then, we can all rest safely knowing that the USA Department
> of State is in good but secret hands, not to be revealed without
> the proper clearance or "need to know." More mum's the word.

There are many things you can know about the Department of State and its
work. Give 'em a call or e-mail them. Commo details are not part of
the grand tour.

> >"Heil" doesn't need to produce government documents to prove anything.
> >You'd better be able to come up with something to disprove it or you'll
> >just have to huff and puff.
>
> I'm not licensed for bluffing, huffing, or puffing. No clearance or
> "need to know," remember?

You'll likely be pulled over for illegal huffing and puffing then.

> >I've explained. You have not accepted. You have dismissed despite your
> >total lack of knowledge of the situation. You have repeatedly distorted
> >by attributing to me things which I did not say.
>
> Ah, but SOMEONE named "Dave Heil" wrote what I said.

Trot it out.

> >Then this will chafe the hell out of you. You've been told all I can
> >tell you.
>
> No problem. I'll just go to the CIA Fact Book again for answers
> on hotbeds of intrigue in foreign countries.

You poor boob. Do you actually believe that all the answers to your
curiousity are contained in a single, unclassified document?

> >I've a better idea. You show me some documents which say that it does
> >not use morse.
>
> <insert about 10 minutes of raucous laughter at this one...>

> >> What WERE your "daily tasks" in the Guinea-Bisseau "comm center?"
> >
> >Who wants to know?
>
> Don't worry, big Dave, I won't tell...honest, I won't... :-)

I know you won't--especially if I don't provide you with information :)

> What percentage of daily time was devoted to making out
> all those QSLs as a rare (the ONLY) ham call in Guinea-
> Bisseau? [just wondering]

Write to Ken Scheper WA8JOC and ask him. You can e-mail him at
kss@juno.com if you like. He'll probably have a handle on how long it
took to fill in roughly 45,000 QSLs by hand. We computerized the logs

for the next assignment.

> >Number of circuits: You have no need to know. Operation: You have no
> >need to know.
>
> Oh, heavens, yes! NO clearance, NO "need to know!" :-)

That's right.

> I'll just wait for someone else to write it up as a footnote in a
> CIA or NSA book sold by that bankrupt, non-profit book seller
> called Amazon. :-)

You do that. Be sure to let me know if any of that info appears. I may
buy a copy myself.

> >You're the expert on State Department comms. Tell me. Was I busy?
>
> According to the documents in front of me, it says nothing at all
> about your work. Amazing!

Then how are you able to tell me what I did or didn't do in my job in a
remote West African country?

> >I know something you don't know....
>
> Of course, of course. :-) :-) :-)
>
> >You don't have the need to know.
>
> Of course, of course. :-) :-) :-)

Of course.

What does the IARU think about a minimum age for entering amateur radio?

> > Aren't you
> >telling us that we should believe what Leonard H. Anderson says is good
> >for amateur radio?

>
> No. I'm just for the elimination of any morse code test for an
> amateur radio license...and poking holes in a lot of old, dated
> puffed-up dudes who think Their ideas is What Is Best For
> Amateur Radio (because that pleases them no end...).

Looks like most of the dudes are younger than you. They seem to be
doing a pretty good job of avoiding your poking. By the way, I'm for
the retention of morse testing and am against the imposition of any
minimum age for amateur radio licensing.

> > I was writing about Doctor Evil and Mini-Me.
>
> Why? The movie review newsgroup is on the second floor
> to the right. Go there or right next door for the Mike Myers
> Fan Club.

Why? Because I felt like it. I'm not reviewing the movie. I'm
comparing you and mini-Brian with two funny characters.

> >Unh uh. You're confusing yourself with the FCC.
>
> Nope. You seem to be, though.

I've never confused you with the FCC.

> >You don't work for the Commission.
>
> Right...and neither do you, big Dave.

I'm well aware of that.
>
> >It matters not whether anyone at the FCC holds an amateur
> >license.
>
> Oh? You just said that anyone without a ham license should
> not be listened to, that they are fictional, should be disregarded.
> Disregarding the FCC is not a nice thing...

I do not disgregard the FCC. I urge others to disregard you. You
should not be listened to. Your history in amateur radio is fictional.

> Please try to stay on focus, your picture is very blurry...

You have a picture of me?

> >Regulating communications is their job. It is not your job.
>
> Ah, but YOU are trying very hard to regulate newsgroup
> communications...and to say that anyone without an amateur
> radio license should not be listened to, are fictional, and
> should be disregarded!

In what way? Have I removed your internet access? cut your telephone line? You don't seriously believe that you have the right to post anything you want without accepting ridicule and brickbats, do you?

> >No one at the DMV is required to have a drivers license.
>
> In the California DMV the driving test inspectors must have
> a valid driver license. They don't have to test for morse code
> communications, though. :-)

Clerks don't give driving exams.

> >No one at a butcher shop is required to eat meat.
>
> They don't have to test for morse code, either... :-)

Neither does the FCC. It abdicated much of its responsibilities to a number of radio services some time ago.

The only time I have done that is tongue-in-cheek fun poking at someone who is dishing out stuff like that to others. No matter how old or how experienced someone is, odds are there is someone even older and more experienced. You have been guilty of saying something like, I have 35 years experience and I know what I am talking about. I replied that I have 15 more years of experience than you just to show you what it feels like.

>Amateur radio is a hobby. It isn't a guild, trade, or union and it
>isn't a pseudo-military "service" requiring rigid adherence to
>methods, standards, procedures, jargon, or anything else.

Amateur Radio is enjoyed as a hobby by a great many people, but it is a radio SERVICE as codified in 47CFR97.1. It has specific basis and purpose, of which the government has allowed specific language that allows for the service to be utilized for past time applications.

That is NOT all that it is. If you were a participant instead of an antagonist, you'd know.

>So you've been an amateur extra for 32 years. That means
>you achieved that class as a teenager. You were not yet an
>adult then.

Good for him. And you are not yet one, Lennie. So what?

>I find that your opinions are simply mirroring what has been
>proscribed to you with very little originality or evidence that
>they really are your own "opinions." For that reason I find them
>INVALID as your personal opinion.

Whew. Talk about spewing rhetoric for rhetoric's sake. Let's hope the EPA never reads RRAP...they'll haul the Licenseless One away for creatile such a mess...

>>Indeed. Rather than accept my facts, arguments and opinions, people should
>>blindly accept your "I'm older, therefore I'm right" statements? Get real!
>>Please.
>
>Where am I stating saying "follow my direction, I am right?"

WhhhhoooooAAAAAAAA ! ! ! ! ! ! In just about every post you write, Your Creepiness! And you've been told in just about as many words, so don't act like you hav never heard THAT before!

>I haven't done that.

Absolute, positively, unabashedly bold faced lying. No other words for it. An absolute falsehood!

>>>Naturally. NO ONE knows better than N2EY What Is Best in
>>>Amateur Radio. :-)
>>
>>You said that, not me.
>
>Oh, you've SAID it all right, just not in those exact words.

Aha...Jim, do your notice that just two paragraphs above, Lennie tries to pass off HIS rhetoric, but then tries to "claim" that you 'said' something, if not "not in those exact words"...???

And peopel wonder why I keep dogging this creep.

>You generally get upset with such
>challenges as evident in your post quoted here.

Which is different from you....HOW...?!?!

>Are you thinking at all, really and truly thinking about newcomers
>to amateur radio?

Are you, Lennie? I doubt it. You can't evn get yourself past the most basic license.

>For a dozen years the US amateur radio ranks were swelled by
>the no-code-test Technician class licensees. You've discounted
>those, dismissed them, never really regarded their existance
>as meaningful in any way (except maybe as warm bodies who
>"will upgrade through code practice").

He has NEVER said anything of the sort.

Sheesh.

> Technician class licensees
>now make up a third of all licensees and are also the least class
>in membership percentage in the ARRL.

And this is NOT the fault of the ARRL. The do not "decline" membership based on licensure.

My wife is an NCT. She occassioanlly get's the same promotional literature as any other Amateur.

If anyone "discounts" the NCT, it is themselves. Most that I have known that were not League members didn't join the ARRL because all they want to do is work the local repeater. The ARRL represents the interests of as wide a cross section of Amateurs as it can.

And if that "third of all licensees" want ths ARRL to be anything different, they can join, then vote. It's that simple. It's no different than the useless slugs who complain about "government", but when you challenge them on how they voted, they have 101 excuses as to why they didn't go.

The only "good" excuses are hospitalization, death of a CLOSE relative, your own death, or military deployment.

>You see only ONE way to be "good amateurs:"

I do...PARTICIPATE. Anything after that is optional.

>"No lids, kids, or space cadets."

And thankfully, No Lennie Nocalls!

Interesting pieces of gear. The R1155 is too well-known to need
comment, but it isn't generally appreciated that the RF27 units were
the front end of the receiver for the Gee navigation device; the
1000-bomber raid to Cologne was Gee's first big trial.

Later versions had an "electronic ruler" (analogue scale) generated
within the device. There is a very brief shot of one being used in the
classic and very watchable film "School for Secrets"; the film
industry's tribute to the 'radio war' boffins who worked on radar.

>
>"Big Leagues"? So you keep telling us.

Yeah...Big Leagues. Lennie spent three years in a rear-area Army radio station. Whoopie.

Be still my heart.

> Why not just discuss the issues?

...because the insufferable creep knows he would lose his "audience" in 2 minutes as he has nothing to offer.

>>All I've advocated is the elimination of the
>>code test for an amateur radio license
>
>You also advocated an age requirement (14, if I recall correctly) for an
>amateur radio license of any class. Age seems to be a big issue with you.

Speaking of which, there's yet another question Lennie never answered...What experience does he have with children or adolescents that "qualified" him to make such a suggestion?

He obiously never had any of his own or we'd be hearing about it. Just another "because it's MY idea" reason, no doubt.

>You are trying the old "guilt by association" gambit.Also called bigotry.

Lennie knows all about reputation by association, Jim. He tried to embellish his own lacklustre military "career" by trying to belly-up to the memory of Veterans who died in combat...Even though he was still in the States when those Veterans lost thier lives.

And THEN accused me of spitting on other Veterans graves to "get back" at him. What a loser. What a putz.

Yawn... Glad to see he got back on the air though, if thats true. I
used to talk to him on 40m back when he was a nobody. I kind of doubt
he wants to start a radio war if he just talked Riley into letting him
back on. I don't really keep up with the latest radio "gossip", so not
up on the latest episode in the saga of Herb vs Riley.... MK

>
>Do you believe in minority rule?

Nope. Do you?

The majority of those who commented to the FCC on 98-143 not only wanted code
testing, they wanted at least two code tests (5 and 12-13 wpm). The MINORITY
OPINION won out over the MAJORITY in that case.

Do you believe in minority rule? If you agree with the FCC's dropping of the
code tests beyond 5 wpm, the answer is YES.
>

My point exactly. Tell it to "Lenover21".

>You have
>been guilty of saying something like, I have 35 years experience and I know
>what I am talking about.

How can one be "guilty" of telling the truth?

Let's look at the statement:

"I have 35 years experience"

That's true.

"and"

A logical connector

"I know what I am talking about."

Another true statement.

End result: Two true statements with a logical connector. True and true equals
true.

What I have not said is something like: "I have 35 years experience, therefore
I know what I am talking about."

>I replied that I have 15 more years of experience than
>you just to show you what it feels like.

But you weren't serious. You actually pulled the age/experience gambit long ago, Cecil, in an attempt to intimidate me. Didn't work.

And in in fact you do not have 15 more years of experience than me, because you took a "vacation from HF" for many years.

Tongue-in-cheek humor should not appear too obvious.

> "I have 35 years experience"
>
> That's true.

Also true that I've had 50 years experience. Tongue-in-cheek implication: If experience counts, I've had 40+% more experience. You cannot have it both ways, Jim. It is a contradiction to laud your own experience while discounting someone with more experience than you. Experience is not what matters. A person can be right with one year's experience while another person can be wrong with 50 years of experience. In fact, a person can be wrong *because* his knowledge is 50 years out of date.

> But you weren't serious. You actually pulled the age/experience gambit long
> ago, Cecil, in an attempt to intimidate me. Didn't work.

Oh, how you misread my posting, Jim. I made it with a tongue-in-cheek twinkle in my eye. I'm sorry you consider a good-natured yanking of your chains as an attempt at intimidation. That says everything about you and nothing about me. All it was was an attempt to get you to see the mote in your own eye.

> And in in fact you do not have 15 more years of experience than me, because you
> took a "vacation from HF" for many years.

You really need to do something about that chip on your shoulder. Life is for enjoyment, not competing with your fellow hams for King of the Mountain status. You may have 35 years of experience but that may (or may not) be 12,775 days of simply having the same experience over and over. Someone may have learned more in one year than you did in 35 years or that I did in 50 years.

WHY in creation are *any* of you even acknowledging his rantings, much less trying to anwer them point by point? He *long ago* showed clearly that all he even wanted to do is slam ham radio and all ham radio operators, *particularily* those who took it to the top of the licensing structure. He has never had any interest in ham radio beyond that, and all you guys are doing is facilitating his goals. Cut it out!

The history of rrap for the past halfdozen years is that if everyone ignores him long enough he'll go away. Oh, he posts some small trivial nonsense post from time to time, but you guys are giving him the platform he desperately needs to do exactly what he is doing. Without it he might go ahead and dry up like the prune he is. There is no rational discussion with anyone like him.

You're probably right, Dick. Ii just can't stand letting him go
unchallenged as it gives the appearence of passive agreement with his tripe.

Unfortunatley people don't look at what others DON'T say to a scumbag like
Leonard, it's what they do say, even if they don't agree with what's being
said.

Hello. I'm coming back to ham radio after a number of years of inactivity. I was first licensed in 1960 (same call as now except for the "N", for novice). I've had a stroke about 9 months ago, and I think it would be good for me to get active in ham radio again.

I have an Advanced class and I know there have been some changes regarding that class. Is there a good place I can go to get a summary of the changes. I understand the Advanced still exists for those who already have it, but is no longer offered as a new choice. Do all the Advanced class privileges still exist? Any help would be appreciated.

David,

The Advanced Class license still exists, and there have been very
few changes. Basically you have access to all portions of all amateur bands
except for a few small slivers which are reserved for Extra licensees. You
can renew your license in your current class, or you can upgrade to Extra
with only a written test, as the 20WPM Morse test is no longer required.

Give me a call at 763-473-1594 if you have specific questions, or visit the
ARRL web site at www.arrl.org and browse around for current rules, etc.

Not on amateur radio HF CW. In fact, I may have more CW experience and
expertise than you.

>Tongue-in-cheek implication: If
>experience counts, I've had 40+% more experience.

Nope. Your "vacation" doesn't count.

>You cannot have it both ways,
>Jim.

I don't want it both ways. I just want it my way ;-)

>It is a contradiction to laud your own experience while discounting
>someone with more experience than you.

I don't discount people with more experience than me, like K0HB, K2ASP, K8MN,
W3RV, W0EX, W1RFI...

I do discount self-described "experts", though ;-)

> Experience is not what matters.

Tell it to Lenover21.

>A person can be right with one year's experience while another person can be
wrong with 50

>years of experience.

Of course.

The race is not always to the swift, nor the battle to the strong. But that's
the way to bet.

I'm talking about a post from years ago.

>That says everything about you and nothing about me.

Nope. It says your attempt to intimidate failed, so you passed it off as a
joke. Chuckles all around.

>All it was was an attempt to get you to see the mote in your own eye.

What about the beam in yours?
>
>> And in in fact you do not have 15 more years of experience than me, because
>>you took a "vacation from HF" for many years.
>
>You really need to do something about that chip on your shoulder.

No chip. Just the facts. Nothing wrong with being inactive for a while - lots
of hams do that. In fact I wonder how many "new" hams are actually "retreads".

Just don't claim "experience credit" for those inactive years.

>Life is for enjoyment, not competing with your fellow hams for King of the
Mountain
>status.

Healthy competition is a good thing.

>You may have 35 years of experience but that may (or may not) be 12,775 days

Quick summary:

- You can renew and modify your Advanced as long as you wish, but no new
Advanceds are being issued.

- Privileges (subbands) are same as before. You have all amateur operating
privileges on all bands except 80, 40, 20 and 15 meters. On those four bands
you don't have the "Extra only" subbands.

- You can upgrade to Extra by passing new Element 4, which is a 50 question
multiple-choice written test. No other testing is required to upgrade.

http://www.arrl.org

has lots more info, including the current version of Part 97 (FCC rules for
hams)

http://www.fcc.gov

is the FCC website.

Any other specific questions?

> to upgrade?

GLENDALE, WV: The FCC sent a Warning Notice November 9, 1999, to
General licensee Roger L. Wiseman, KC8JBO,
citing evidence that the licensee had been "deliberately and
maliciously interfering with the radio operations of other
licensed
amateurs" on 20 meters. "This interference has occurred at various
times in the last several months and includes broadcasting
music and other unidentified transmissions," said a letter from
FCC Special Counsel for Amateur Radio Enforcement Riley
Hollingsworth. Hollingsworth warned that continued operation of
the type described could result in a fine or license revocation
proceeding, and he requested that the licensee contact him to
discuss the allegations.

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L.
Wiseman, KC8JBO, retake the General examination
elements under the supervision of an ARRL-VEC volunteer examiner
team. Wiseman must appear for retesting by September
11, 2000, or his license will be canceled. Applicants appearing
for re-examination are granted an Amateur Radio license
consistent with the elements passed. The FCC had written Wiseman
on March 29, 2000, advising that it had been made aware
of "an ongoing personal dispute" between Wiseman and another
licensee that included allegations of interference or jamming on
20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley
Hollingsworth invited the two licensees to contact him
to discuss the matter. Additionally, the FCC had sent Wiseman a
Warning Notice last November in response to allegations of
deliberate and malicious interference on 20 meters.

NOW!

Now that the thread has gone on and on and digressed WAY away from the
original topic, think what YOU will do about said original topic. How
about a
letter to your Congressperson? How about dropping a line to Billy Tauzin?
Instead of griping about it, and taking the thread off topic, while each of
us
was busy reading this, we could've done SOME-thing about the truckers and
CBers on 10 and 12 meters! We COULD have written letters while we were
busy arguing with each other on this forum!

Good shot, Steve, but nope. It was Clint Eastwood in 'The Gauntlet'
when he commandered a local (Las Vegas) constable's car. :-)

C'mon now, Lloyd. If Rogie can get on HF from that 700 sq. ft. house his
mommy left him, surely you can find a way, too! Anything Roger can do, you
can do better...and that is what irks him!

Sounds interesting i'll have to keep an eye out for it
I also had a RF25 (or was it 26 unit ?) for 4 meters
(never heard a thing on it) but was OK for Band 2 :-)
that was over 30 years ago

RF24 to 27 units were very popular in the 50s and 60s as VHF converters

Then I progressed on to Pye Vanguards, etc. which made life easier on 2

Jim:

Meaning what? Being able to send CW and copy it by ear are two separate and entirely different things, from a testing standpoint. If all I had to do was pass a sending test, I could have been an Amateur Extra anytime I wanted. That was my problem. As an avid electronics hobbyist, I had built a code practice oscillator, got a Radio Shack brass key, and taught myself how to send Morse code in a couple of hours. However, I couldn't copy at 1 WPM because I didn't know that I needed to teach myself the sound of the characters, as opposed to simply memorizing patterns of dots and dashes (let's see, I wanna send the letter C, and that's dash dot dash dot, so I'll send it now: dash dot dash dot.) I wasn't even hearing the dashes and dots as "dits" and "dahs." My frustration at not being able to copy AT ALL didn't resolve until I finally got the ARRL code tapes, put the practice oscillator/key in the drawer, and sharpened my pencil.

I give Zero points for having taken a sending test. It is genuinely and truly irrelevant. If you can copy, you can usually send; however, it's almost never vice-versa. I know that sending tests are used as an "accommodation" for sob-sisters who claim some sort of phony disability, but in reality, they're not testing a damn thing.

Sounds like you felt intimidated by my humor and that's your problem,
not mine. Intimidation is completely alien to me - humor is not.

> Healthy competition is a good thing.

Maybe in the marketplace, but IMO competition within amateur radio is
one of the things that is wrong with the hobby. Knock yourself out -
I simply refuse to compete.

Well, this fits right in with your theory that ordinary people get
dumbed-down when they obtain a Tech license. Good thing Einstein
didn't ever get a Tech license, eh?

Wow, you built a code practice oscillator. I guess that is another one of the things that you believe makes you a superior ham. Have you ever constructed a complete 80-10 meter SSB transmitter? Not from a kit, but from scratch, even forming the chassis and cabinet from aluminum by hand? I have. Have you ever homebrewed an swr bridge, a watt meter, a phone patch, a beam antenna, a linear amplifier? I have. You have to do those things to be able to call yourself a real ham. Being able to send and receive Morse code is child's play.

Two more: Essay answers.

Clearly, by Larry's standards, there are other hams that he sees as better than he. In his mind, because they took a more difficult test, there is nothing he can ever do in ham radio to be better than they are.

A really limited way to view the world, I think.

I have found that knowing how to receive does NOT necessarily mean the ability to send. You happened to learn how to send first, that's all.

You wrote:

"I am a FCC Field Office-examined, 20 WPM code test passed, Amateur Extra-class, CW using, CW loving Real Ham. That's as good as it gets."

Seems obvious that, by your own value scale, someone who had done all that AND passed sending and receiving tests in front of an FCC official would be just a tad "better".

Why? What's wrong with things like contests and operating awards? The hams who did microwave moonbounce with less than 100W and small dishes were competing to be the first.

Competition is what has driven much of the development of radio technology. You think the development of rigs like the FT-1000 was driven by ragchewers' requests? Get real!

>Knock yourself out - I simply refuse to compete.

Your choice, of course. That's waht makes ham radio a sporting-type activity. There are competitors and there are spectators.

Yup. Note that QST articles include things like the Product Reviews, which are Consumer-Reports type evaluations, not puff pieces. ARRL actually buys the products tested, anonymously, then tests 'em. They are then resold at auction.

>>>No Code International does not state, infer, or imply that it is a

>have you?

Nope.

NCI's "loyalty oath" is there for a very good reason. It's a way of denying membership to anyone who does not agree with their basic purpose of eliminating all code testing. Without that "loyalty oath", pro-code-test people could simply join up in droves and derail the organization. Pro-code-test people are obviously the majority, as evidenced by the comments to 98-143. So the "loyalty" thing makes perfect sense.

ARRL's requirement for a ham license in order to be a full member also makes sense, because it keeps the organization in the hands of hams. Note that ALL hams who join ARRL get the same voting power, regardless of experience or license class. The new Tech has the same number of votes as the grizzled Extra with life membership. What could be fairer?

>>Were there any contested BOD positions in the NCI elections?
>
> Don't the NCI BoD guys communicate with antique Captain Midnight Decoder Rings?

Nope. E-mail does just fine.

That's only one aspect of ham radio. The ~150 amateurs who provided flood relief communications in Texas earlier this month, for example, weren't competing, but you would hardly call them ham-radio "spectators," would you?

>busy arguing with each other on this forum!

Jerry,

Good point!

But we must be careful what we ask for, or we may just get it. Do you remember the trouble columnist Jack Anderson caused in the mid-'70s? I do. How about the flap over Newt Gingrich's overheard cellphone calls?

Consider the following:

There are somewhere around 450,000-500,000 hams in the USA licensed to use 10 meters. There are an unknown number of freebanders and truckers - some estimates say 2 million long-distance truck rigs are in service in the USA.

Now imagine a congresscritter gets a letter about the situation. Suppose this congresscritter examines the situation and discovers:

- the truckers have only the 40 cb channels plus a handful of MURS channels, while hams have many MHz of MF, HF, VHF and UHF.

- hams are poised to get a new band at 60 meters

- many of the ham bands are relatively quiet

- hams are trying to get around CC&Rs for antennas

The truckers and freebanders main argument is that the legal channels are overcrowded, so they go elsewhere. In their minds the 40 channel limitation makes as much sense as the old 55 mph rule.

The FCC isn't going to say that they made a mistake back in the late '50s when they created 27 MHz cb. They also aren't going to say that they had not been enforcing the rules for years, until recently. Instead, they may point out that

they tried to "fix" the problem in the mid-70s by reassigning 220-225 to "Class E" cb - but opposition from hams stopped it.

Considering how The Congress handled Newt's cellphone mess, it would not surprise me at all if their "solution" were something like:

- reallocate 146-148 to MURS and "encourage" truckers to use it
- reallocate 222-225 to a new service for truckers
- allow freebanders to use "60 meters" instead of hams
- various combinations of the above.

Of course, your point is valid. Those hams were not competing against each
other, nor were they spectators.

That alleged "intimidation attempt" was *your* fertile imagination
at work. Most of what I do here is good naturedly point out people's
double standards, including yours.

> >Intimidation is completely alien to me - humor is not.
>
> Now THAT'S funny!

And proves my point.

> >Maybe in the marketplace, but IMO competition within amateur radio is

Some of us have evolved to a plane where we are not driven by testosterone
to beat our hairy chests and engage in silly King of the Mountain pileups.

> Competition is what has driven much of the development of radio technology.

I agree. Like I said, it has its place in the marketplace. However, I
believe that competition within the ARS is a cancer that is attempting
to destroy the hobby.

> There are competitors and there are spectators.

There are junk yard dogs and there are gentlemen.

>> Or is your repeated single-word post "waiver" not intended to provoke?

>How was he provoked?

You answered a different question than the one I asked, Brian. Can I take it that there is a reason you are being evasive?

Why did you keep repeating the single word waiver in response to his posts?

It is my opinion that you were trying to provoke him, and that then you planned to cry "foul" if he said anything unkind. Is that true? If not, any explanation why your repeated single word had any value whatsoever would be most welcome.

Larry, my sense of humor is pretty well known. You have met me in person; did you find me humorless? Perhaps I just find your "joke" (good dodge) less funny than you do.

In what other parts of your life do you find saying insulting things to others in front of groups of people to be amusing?

Roger,

That was a very nasty letter you sent to the
Computer Science Dept. in Mexico City about me. You are
sick, very sick Roger. Get Help! And some advice Roger,
write in English next time. We are all fluent in English in the
Computer Science Dept. Your attempt to communicate in
Spanish gave all of us a big laugh! Take some Spanish
lessons at a college of your choice Roger.

With All Best Wishes,

Eduardo "Beans Boy" Hernandez de Ciudad de Juarez
Computer Science Dept.
El Universidad del Mexico

Dick, what do you call an Advanced who comes on here and asks if CW can be
used in the phone band?

Larry, you'd think that people that like the code would want to send it
"longhand" rather than "shorthand." Just that much more pleasure from it
all.

That is what I wonder what Larry would call someone like that. He
seems to think he is such a high and mighty ham because he
operates CW and anyone, like me, who doesn't is not a real ham.
Using Larry's standards, I should consider myself to be a really
real ham since I have homebrewed my own equipment. His code
ability he so brags about is child's play to homebrewing something
like an SSB transmitter. The post was a dig at Larry in case you
didn't catch it.

>
> ??????????????

Dave, you chase band/countries. I had one band. If DXCC is 100 countries,
why would I work 10,000 QSO's?

Are you saying that my DX QSOs aren't any good because I didn't work 10,000
of them?

> > When I've got a pile-up, I run it.
>
> How?

One at a time.

> > QSLing was a huge chore.

> > The DX station can do likewise if he's not a serious contester. A US >
station might get a pileup going during an IOTA contest.
>
> An IOTA contest? Good Lord deliver us.

For some crazy reason, other hams like to work USA islands. Guam was one of
those islands.

> > What differences have you note in goals and

> when they are listening up five.

Common.

The guys on the distant end don't
> always operate split.

I only went split when it started to turn into a hornets nest. I tuned
around for a station that was easiest to hear. Calling #'d areas also
helped calm it down. Then there were the W5xx/7 that would call in 5's and
7's.

You might need to concentrate on timing,
> espcecially if you don't have an amp or a gain antenna at height.

> Sometimes you have to realize that you aren't going to work the station
> at all because propagation isn't favoring your area.

Yep, there are some that never make it in the log. Bad timing, no amp,
cubical quad on 10M.

> > When operating 10M SSB, what specialty is there other than QRP?
>
> If you limit yourself to SSB, there aren't many options. If you limit

Dave, I agree that is a good first step. But knowing the authorizations of
the ones you need could give you an edge. Also, I still consider it poor
amateur practice to be working bootleggers if you know they don't belong
there. I simply won't do it.

There are many aspects of amateur radio.

Any ham can make as much or as little of their license as they choose.

I did not attack the guy. Heck, I merely said that that I agreed with the old "physician's waiver" and that it was a compassionate thing to do. But for some uncomprehendable reason, Brian P Burke must have disagreed with my position and in his mind, construed it as an "attack", as per his statement above. I do not understand; if I say that I agree with the Advanced license class, will Mr. Burke also perceive that as an attack on his person, just because I may think it is a good license class? I don't know but there is nothing I can do about irrationality either so I just takes it as it comes!

That some people will think they are superior for rather simple things is one of the mysteries of life, JJ.

CW, being one small (but important) part of the Ham radio experience, is hardly the defining quality.

You won't get any argument from me that we should all know cw, and be tested for it, but beyond that... so what?

People like that GIVE cw a bad name.

That's right Dan, the only license class remaining that proves that one learned "higher speed code" also has people with code waivers. So in the big scheme of things, when your cronies are measuring who has the higher speed code and who doesn't, you'll just have to ask if they have a waiver.

Having the idea that any of this actually matters is what is irrational; that and your over-reaction to my bringing it up.

So are you saying that we are to just sit still while they continue to
spread from
10 meters to 33 MHZ, from 12 meters to 20 meters, and so on until they are
knocking on the doors of every legitimate radio service in the land? If our
Con-
gress is not smart enough to recognize that you don't reward wrongdoing by
giving in to those "roaches" and lawless vermin, then we are doomed anyway!!

This is not an accurate statement. It also may include extra class hams who did not change their call signs when they upgraded. Or, it mat include extras who obtained advanced vanity call signs.

So in the
> big scheme of things, when your cronies are measuring who has the higher
> speed code and who doesn't, you'll just have to ask if they have a waiver.

And the additional questions indicated above.
>
> Having the idea that any of this actually matters is what is irrational;

I never asked anybody if they obtained a waiver. You asked me several times, therefore it matters to you, not me. Using your own logic, you would be the one who is acting irrational.

> that and your over-reaction to my bringing it up.

What over-reaction? As you say, you brought it up. I was merely trying to siphon some logic out of your curious behavior. I was unsuccessful at that but that's OK. I just takes it as it comes!

On the other subject, did you have a falling out with a VEC who tested using Farnsworth. Which VEC was that?

Hmmmm, "call" them? Such an odd question--or does Little Dick intend to
imply that he would call newcomers names? Wow--what a magnificent spectacle
for amateur radio. NOT.

I'd call them by their callsign, and ask their name. Oh, and I'd probably
be talking to them on my homebrew quad antenna, but through a much more
efficient radio--built by a company with years of design and manufacture
experience. And, uh, the antenna was built *while* I was taking the ham
class for my Technician+ license.

I'd say more that where a particular ham finishes and what happens along the
way, are truly the cornerstones of what ham radio is really all about.

JJ,

I built one from junk parts when I was 12 or so. Nothing to it, really.

> Have
>you ever constructed a complete 80-10 meter SSB transmitter? Not
>from a kit, but from scratch, even forming the chassis and cabinet
>from aluminum by hand? I have.

Now THAT's COOL!

I've designed and built 100 watt-class multiband HF CW transceivers, including
the metalwork. I know where you're coming from.

>Have you ever homebrewed an swr
>bridge, a watt meter, a phone patch, a beam antenna, a linear
>amplifier? I have.

SWR bridges, transmatches, control circuits, power supplies, receivers,
transmitters, antennas, shack furniture, test gear. Great fun.

>You have to do those things to be able to call
>yourself a real ham.

Been there, done that. Tell us more about your projects, please. All-homebrew
hamshacks are a bit rare these days.

>Being able to send and receive Morse code is
>child's play.

Makes you wonder why people make such a fuss about it, and the test for it,
huh?

Not at all! But we must be careful how we go about stopping them. Tapes to the FCC, that's a good step. Occupy the bands to the extent that they are unattractive to freebanders, that's another.

>If our Congress is not smart enough to recognize that you don't reward

From the ARRL letter:

Addressing Board members, guests and ARRL staff members July 18
prior to the formal Board session, FCC Special Counsel for
Enforcement Riley Hollingsworth said that while enforcement will be
''maintaining the course,'' he's hoping by year's end to mount ''a more
aggressive stance'' against 10-meter incursions by unlicensed
individuals. He said that using 10-meters was among the best
defenses against intruders. Hollingsworth also met with ARRL staff
members July 19 to discuss specific areas of concern and
cooperation.

My part of that was to hammer out a plan of action between ARRL and the FCC about followup on the electric utility companies that do not respond appropriately to the ARRL and FCC letters about reported interference. More to follow as I get a report on this to Rick Lindquist.

Of course that is not a good idea. Riley gave us all an excellent suggestion --
on this band, and all others, the best defense we have to protect our spectrum
against intruders is to make good and proper use of it. At least that is the
part of such protection that WE can personally do.

What about the ham who both homebrews and uses CW?

>> Now watch Larry come back and claim he has done all that and more.

>That some people will think they are superior for rather simple things is
>one of the mysteries of life, JJ.

Well, our society does encourage that sort of thinking. Note how pro athletes
and show business personalities are held in high regard by many simply because
they have some specialized skills.
>
>CW, being one small (but important) part of the Ham radio experience, is

I'd say it's A defining quality, but not THE defining quality....
>
>You won't get any argument from me that we should all know cw, and be
>tested for it, but beyond that... so what?

Actually, what's most important is the USE of CW. What would be the point of
knowing it and testing for it if nobody used it? Fortunately, CW use on the ham
bands is widespread.

From: "Brian P Burke" bpburke@prodigy.net

>I can send code so badly that a No Code Tech with a computer wouldn't stand
>one chance in hell of copying it.

The ham using a computer to copy code can do the same thing I do when I run across poorly sent code that I am decoding manually -- I QSY as quickly as possible. Virtually all of the code I copy on the air is sent sufficiently accurately that I believe a computer could decode it. Why do you see this as as big a problem as you do?

Ed:

Now that you offer, yes, I would. I could not find any of my posts dating earlier than 1 Jan '97. Please help me find the first post I made on this newsgroup. It would have to be in the '91 or '92 range. When I plug in a date range from 1 Jan '91 to present, the earliest it returns are, as I said, in 1997. Maybe they only archive a finite number of postings from each author?

Ed:

Actually, that's something I pretty much reserve for Usenet, since I learned that particular behavior from the NCTA whiners who accused me of "ethnic cleansing," technical incompetence, not being "inclusive," etc. etc. as a result of expressing my opinion that code testing was a valuable licensing requirement. However, in real life, I have been known to tell people exactly which bus to take and where to get off! (Don't look now, but that was more humor, Ed, since I'm a bus driver -- a point that Len Anderson will be glad to drive home if you don't get it!)

OH lookee -- I made another funny -- "drive home" -- get it! I'm on a Roll tonight!

Among other things -- LOTS of other things!

>I guess that is another
>one of the things that you believe makes you a superior ham.

AM I a superior ham? Superior to whom? How would you know that?

>Have
>you ever constructed a complete 80-10 meter SSB transmitter? Not
>from a kit, but from scratch, even forming the chassis and cabinet
>from aluminum by hand?

Nope, built two each HW-8's and HW-101's from Heathkits, plus a lot
of non-kitted projects out of books and magazines, but nothing involving
the metal shop work.

>I have.

Good. I'm impressed. Not got CW? Bzzzzzt! You're inferior to me
as a ham! You lose!

>Have you ever homebrewed an swr bridge, a watt meter,

Yes, yes.

>a phone patch,

No.

>a beam antenna, a linear amplifier?

Yes, yes.

>I have.

Good for you, I'm genuinely impressed.

>You have to do those things to be able to call
>yourself a real ham.

No, I don't. I'll call myself a Real Ham based on my own assessment of what makes a Real Ham -- which includes, as a prerequisite, a minimum of 13 WPM code proficiency and the ability to operate CW comfortably and competently on-the-air -- sending by hand and receiving by ear and copying in writing.

>Being able to send and receive Morse code is child's play.

I agree. Lots of 5 - 10 year olds have passed the 20 WPM code test. What's your excuse?

Jim:

I'll always be the first to admit that there are hams that are worlds above me, especially in technical knowledge and skills. I am making comparisons mainly between myself and the code-free whiners who think that knowing how to solder a PL-259 onto a section of RG-8U, and being able to coordinate the action of their voices and a PTT switch, makes them a Real Ham. If they make their living as electronics engineers or technicians, then I'll certainly stipulate to their far superior technical skills -- but that doesn't mean that they surpass me (or you!) as a ham!

>73 de Jim, N2EY

Right, Jim, they are. The difference between me and the code-free whiners is that I'll admit it when some ham is better than I am, and they'll just whine about it. I have nothing to lose by admitting that there are better hams than I out there, and nothing to gain by denying it.

JJ:

I have "homebrewed" a lot of equipment -- both in my 20 years as a
ham and the preceding 15 years as a general-purpose electronics
hobbyist. I have also learned the Morse code and can operate CW at
a useful proficiency level.

BTW -- is this SSB transmitter your own design? If so, tell us more
about it.

I have never homebrewed a SSB transmitter (of my own design, that is).
I have built a couple from construction articles, and several Heathkits --
do these count as "homebrewing?"

> That some people will think they are superior for rather simple things
is
>one of the mysteries of life, JJ.
>
> CW, being one small (but important) part of the Ham radio experience,
is
>hardly the defining quality.

Mike:

I'm glad to see that you consider CW important, but what would you
call the "defining quality" of the Ham Radio experience? It may surprise
you to know that I don't think this defining quality is mode-specific
at all. It's more the aggregate on-the-air experience using all modes,
combined with acquiring practical technical skills that permit the
individual ham to be as self-sufficient as possible in station setup
and operation. This means doing a lot of self-study, reading everything
one can get their hands on, really embracing the learning experience -
as opposed to depending on having all the information spoon-fed to
you by so-called "Elmers."

> You won't get any argument from me that we should all know cw, and be
>tested for it, but beyond that... so what?

Test at what level? 5 WPM? That doesn't test anything but basic
character recognition, at the very most. It is not a proficiency level
which lends one to being able to effectively handle traffic. The "so what,"

then, is that you are either not being exactly candid when you say you value CW, or you haven't learned to value the mode through gaining useful proficiency and having on-the-air operating experience using that mode.

> People like that GIVE cw a bad name.

That's the typical whine of people who have no personal operating experience upon which to base a true appreciation for the Morse/CW mode -- and it's value, or "defining quality" to the overall amateur radio "experience."

Kim:

In that case, I hope nobody is using you as an example. I'm sure you
started out as a ham pretty much the same way anyone else would,
but you ended up taking the ARS "...one step closer to extinction." I
sure hope nobody *really* thinks that's what ham radio is all about."

Amateur Radio Newsline™ Report 1301 - July 19, 2002

Amateur Radio Newsline report number 1301 with a release date of Friday, July 19th 2002 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The United States takes the gold at W-R-T-C 2002 but ham radio growth in the U-S appears to be standing still. These stories are first on Amateur Radio Newsline report number 1301 coming your way right now.

RADIOSPORTS: N5TJ AND K1TO MAKE IT A THREE-PEAT

The Lakers did it in Los Angeles in basketball. Now the Radiosport team of Jeff Steinman, N5TJ, and Dan Street, K1TO have made it three in a row as they win the World Radiosports Team Championship games in Finland. Dave Bell, W6AQ, attended the games. He is just back and we asked him to describe the event:

--
Dave Bell W6AQ: “I got to go out with the camera and watch them in action. And I saw some of thje worlds best contesters and I realized how they win contests: Thst is, they stay focused totally on what it is that they are doing for 24 hours. And other than swap chairs with a co-pilot so that the co-pilot becomes the pilot, those guys are focusted totally on this contest. For me, it is a lesson on how to concentrate and, if you are really into it – how to win.”
--

N5TJ and K1TO operating as OJ3A fended off a very close challenge from Igor Booklan, RA3AUU, and Andrei Karpov, RV1AW, who claimed the silver. The Americans had a score of 1,626,900 to the Russians 1,620,760. A difference of only 6140 points. W6AQ says that regardless of the numbers, these operators are dedicated to the sport of radio:

--

Dave Bell W6AQ: “The two winners this year, Jeff Steinman, N5TJ, and Dan Street, K1TO, also won last year and they won the one before that. And it was not surprising to me, ehen I came to their shack and watched them operate.”

“When I showed up there, Dan Street was the second operator and he noticed me come in and he nodded. I brought the camera up and came right around in front of Jeff Steinman. I was basically between him and his co-pilot. In fact I was actually looking at his face and I am not sure to this day that he even knew I was there – so concentrated was on listening and talking.”

--

The German team made up of Frank Grossman, DL2CC, and Bernd Och, DL6FBL, finished third to claim the bronze with a score of 1,614,591. All of the scores are on the web at www.wrtc2002.org. No announcement yet as to the venue for the 2004 WRTC games. (ARNewsline ™)

**

HAM RADIO STATS: NO GROWTH

The numbers are in and the word is -- stagnant. That about sums up the growth in ham radio since the introduction of a restructured United States Amateur service April of 2000. Amateur Radio Newsline's Henry Feinberg, K2SSQ, takes a close look at the numbers and what they mean:

--
The numbers come from the interpreter of the numbers. And W5YI Report Editor Fred Maia in Dallas Texas says that growth in ham radio is at a standstill.

Maia has been right on the money in his predictions over the years, and he looks back at the past two years in his newsletter. And in it, Fred says that there are just about the same number of Amateur Radio operators under FCC license now as there were in the spring of 2000. That's when the service was restructured.

In April of 2000 there were 678,539 holders of Amateur licensees in the United States and its possessions. In June of 2002 the number was 680,342. Taking into account attrition from people not renewing for any number of reasons, that's a net gain of only 1803 new hams over the past two years. Not allot, but there is a good reason. Keep listening.

Maia breaks the numbers down by license class. In April of 2000 there were 50,077 holders of Novice tickets. In June 2002 there were only 39,930. A loss to the license class of 10,147 but not necessarily gone from ham radio. Why? The numbers for General and Extra kind of tell the story. General is up by 27,037 and Extra by 20,282 since restructuring. Chances are that most of the new holders of General class are probably the results of upgrades by Novices and Technician's wanting a wider range of high frequency operating privileges. This is born out by looking at the numbers for the Tech license which is also down by about the amount General and Extra are up.

So its really been two years of ham radio musical chairs and that was not unexpected. It takes time for as massive a change as the restructuring of 2000 to settle in. It will be the next set of numbers a year from now in 2003 that will really tell the story.

Are we up or are we down? In 12 months we should have the answer.

For the Amateur Radio Newsline, I'm Henry Feinberg, K2SSQ.

--

The complete set of statistics can be found on pages 7 and 8 of the July 1st W5YI Report. (W5YI Report)

**

SPECTRUM: FCC PROPOSES ALLOCATION AND SERVICE RULES
FOR THE 71-76, 81-86, AND 92-95 GHZ BANDS

New rules may soon be on their way for a set of super high frequencies. David Black, KB4KCH has the details:

--

The FCC has proposed a Notice of Proposed Rule Making designed to promote commercial development and growth of the millimeter wave. This, in the spectrum in the 71-76, 81-86 and 92-95 GHz bands.

This millimeter wave band is also known as the Extremely High Frequency or E-H-F band. It refers to radio signals between 30 and 300 Gigahertz, where the wavelengths range between 1 and 10 millimeters. Research sponsored by the U.S. government has led to the verge of being able to use millimeter waves economically.

One advantage of using this frequency band is that the beams can be tightly collimated, easing channel sharing. Another important consideration is increased path loss due to oxygen and atmospheric absorption which can perhaps be viewed as a positive in terms of frequency reuse for wide dispersal applications such as high speed data transfer.

For the Amateur Radio Newsline, I’m David Black, KB4KCH.

--

If enacted, the new rules will be under Parts 15 and 101 of the Commission's Rules. (FCC, CGC Communicator)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N7KSO repeater System serving all of Northwest Arizona.

(5 sec pause here)

**

HIGHER AMATEUR VANITY CALL SIGN FEE EFFECTIVE SEPTEMBER 9

The FCC has officially set $14.50 as the cost to apply for, renew or reinstate an Amateur Radio vanity call sign. According to the ARRL Letter, a Report and Order adopted July 3rd says that the new fee schedule will become effective for applications received on or after September 9th.

The current vanity fee is $12 for the 10-year license term. The FCC had proposed the new, higher fee in a Notice of Proposed Rulemaking released March 27th aimed at setting all Fiscal Year 2002 fees. Again, the new higher fee ineffective on September 9th. (ARRL, FCC)

**

ENFORCEMENT: FCC ACTS ON CALIFORNIA REPEATER INTERFERENCE ISSUE

A California ham appears to have decided to quit ham radio rather than fight allegations that he was the source of interference to a repeater. FCC Special Counsel for Amateur Radio Enforcement, Riley Hollingsworth, explains:

--
Riley Hollingsworth: Hollingsworth: “We opened an investigation of interference allegations against Steven Holt, KE6WSJ, of West Hills California. That matter involves interference to the WB6VBV repeater in Palmdale California. We have been contacted by Mr. Holt. He informed us that on the advice of his attorney, he was submitting his license for cancellation.” (RAIN, FCC)

--

ENFORCEMENT: FCC ACTS ON ANOTHER CALIFORNIA REPEATER INTERFERENCE ISSUE

But Holt is not the only individual involved in a California repeater related issue that the FCC is looking at. Another is Leobardo C. Coronado, KC6PXL, of Sun Valley California. Again, the FCC’s Riley Hollingsworth:

--
Hollingsworth: “Coronado is coordinated for operation on 145.120 Mhz but links to 224.160 Mhz on which there is a coordinated repeater receiving interference.”
--

Hollingsworth’s letter to Coronado said that the FCC had evidence that the repeater operator had taken no action to alleviate the problem even though he had been advised of the interference numerous times. The FCC gave Coronado 20 days from receipt of its letter to write back and advise the regulatory agency about the coordination status of his repeaters and what has been done regarding any complaints. (RAIN, FCC)

**

ENFORCEMENT: FCC QUESTIONS CALIFORNIA CLUB CALL SIGNS

And in yet another California matter, the FCC has requested that Long Beach resident Richard Crow, KB6IAT, justify a pair of club call signs for which he is listed as trustee. The calls are WB6FCC for an organization identified as the Richard Burton Amateur Radio Club and WB6JAM for a club called Jammers for Jesus.

The FCC gave Crow thirty days from the date of its June letter to provide justification as to the need for each of these call signs. He was also directed to furnish the Commission with a list of the names, addresses and telephone numbers of the members of the two clubs. Also, the meeting times and dates within the past year, proposed meeting times and locations within the coming year, and copies of minutes, if any, taken at meetings within the past three months for each club. Crow was told that the FCC would cancel the two call signs if he did not file a satisfactory response. (FCC)

**

EMERGING TECHNOLOGY: WORLDCOM AND UU-NET

Even if WorldComm files for bankruptcy it will have little effect on the way the Intrernet operates. This even though the troubled financially strapped telecommunications giant controls a big chunk of it. Jim Damron, N8TMW and Jeff Clark, K8JAC, have more:

--
WorldComm officials say that even if the company goes under, the Internet will keep running. This, after market analysts predict WorldComm will file for bankruptcy following a major accounting scandal.

The telecom giant handles half of the Internet's U-S traffic through a subsidiary known as U-U- Net. Newly elected WorldCom C-E-O John Sidgmore says that U-U-Net -- will keep going no matter what happens to the WorldCom parent corporation.

According to Sidgmore, U-U-Net handles more than 50 percent of U-S Internet traffic. This includes about 70 percent of all e-mails sent within the United States and half of e-mails sent in the world. Thousands of companies and agencies in more than 100 countries rely on WorldCom for Internet access, including the United States Department of Defense and the U-S Department of State.

--

The bottom line. The Internet and your e-mail are safe even if WorldComm goes away. (Published news reports)

**

SWAP MEETS: HAM LICENSE A MUST FOR SELLERS AT TRW SWAPMEET

The TRW Radio Club passes along a reminder notice that every seller at its famed monthly Swapmeet must show a copy of his or her valid Amateur Radio license in order to receive a seller's permit. This restriction is for sellers only. Those coming to browse or make purchases are not subject to this rule. The T-R-W swap-meet takes place monthly in the Los Angeles California area but draws buyers and sellers nationwide. (TRW-ARC Via e-Mail)

**

UPCOMING EVENTS: HAM RADIO AT THE SOAP BOX DERBY

Ham radio will be a part of the 65th running of the All-American Soap Box Derby. This, in Akron Ohio on Saturday July 27th. To commemorate the event, members of the Cayahoga Falls Amateur Radio Club will activate special events station W8D from 2000 to 2400 hours U-T-C from
July 22nd to the 26th. On the day of the race W8D will be on the air from 1200 to 2000 U-T-C. Look for this one on 7.275, 14.250, 21.275 and 28.340 MHz and Q-S-L to Post Office Box 14, Cayahoga Falls Ohio 44222. (Press release)

**

UPCOMING EVENTS: FORT TUTHILL HAMFEST

And finally one not in Ohio. How about Flagstaff Arizona the weekend of July 26th, 27th and 28th. That’s when the Fort Tuthill Hamfest and Arizona State ARRL convention takes place at Flagstaff Airport oat exit 337 on Arizona State Highway 17. Aside from the usual hamfest fare, the Fort Tuthill gathering has something very special to offer. The clean air of the Arizona mountains and a truly breathtaking majestic nighttime sky. And less we forget, there is the famed Fort Tuthill Saturday evening Barbecue that makes people want to come back for more.

And less we forget, there will also be a wedding taking place at this years Fort Tuthill Hamfest. The groom is James Pastorfield, KB7TBT. The bride is Laura Lindstrom, KD7KYO. They met during an emergency in which the local ham community was involved. Not a ham at the time, Laura was assigned to ride in Jame's vehicle. The wedding is scheduled for 5 PM, Saturday, July 27th. They hope to honeymoon at the Grand Canyon. You can see lots more at www.acra-az.org on the world wide web. (ACRA, ARNewsline™)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org.

**

POST-IT NOTES CAUSE PROBLEMS

Warning: The effect of Post-It Notes on archived material is devastating. According to the Scripps Institution of Oceanography Library in La Jolla California the glue on Post-It notes eventually hardens and leaves a film that becomes acidic. This results in eventual discoloration and brittleness of the paper. In fact, Post-Its left for more than a month or two on already brittle paper such as old books can cause the paper to tear when the notes are removed. (CGC Communicator)

**

HAM RADIO IN SPACE: LANCE BASS IN TRAINING FOR ISS VISIT

Will a teen heart-throb be the next tourist in space? Possibly as Russian space officials soften their previously tough line on the much-hyped plans for a commercial flight to the international space station this October by pop singer Lance Bass.

Bass has already undergone at least two medical examinations and is now doing a round of intensive training at Russian space facilities. Two weeks ago, the 23 year old member of the group N SYNC began training in Russia at the Star City Cosmonaut Center near Moscow. A few days later, Music Television News reported that as part of his training, Bass would be dropped into the Black Sea for an emergency-splashdown test. He was also to be left in a Russian forest without food and supplies. He must also become fluent in the Russian language,

spacecraft flight control systems and standard operations of the International Space Station as a pre-requisite to fly.

The decision by the Russian agency to explore the possibility of Bass' flight was based on the idea that the $20 million ride would have one or more corporate sponsors. So far there is no word as to whether or not Bass would be willing to get his ham license and operate the ham station on board the I-S-S. (Published reports)

**

INTERNATIONAL - CANADA: VE1QJ APPOINTED ASSISTANT DIRECTOR

Maurice Le Blanc, VE1QJ, has been appointed as an Assistant Director for Radio Amateurs of Canada’s Atlantic Region. Le Blanc lives in St. Basile, New Brunswick province and is retired from the Université de Moncton where he taught English as a second language. He is also fluent in French, English, Spanish and German and has been licensed as an amateur since 1950. (RAC)

**

INTERNATIONAL: UK CONTEST WINNERS ANNOUNCED

The UK results of the special Marconi Centenary Contest that took place in December last year have now been released. This was a 'one-off' event to commemorate the centenary of Marconi's first trans-Atlantic contact between Canada and Great Britain.

The overall U-K winner was Dave Cree, G3TBK, with a total of exactly 400 VE QSOs. The UK winner of the 100-watt section was GI0KVQ with 149 Canadian contacts, while G4ELZ made an excellent 110 VE QSO’s and took the QRP prize. (GB2RS)

**

HAM HELP NEEDED: QSL’S LOST AS LIGHTNING STRIKES

Back here in the U-S-A, Don Moss, NL7CO reports over the VHF Reflector that Scot Sharp, KD5OMJ, was away on vacation when his house was hit by lightening. Moss says that it appears as though it entered the house through the ham shack modem line.

As a result of the ensuing fire, KD5OMJ has lost all of his logs and QSL cards and he is asking hams who had a QSO with him, to please send him a new QSL. This, because without logs he is not able to determine who he has talked with. Both Sharp and Moss are residents of Lawton Oklahoma. (VHF Reflector)

**

DX

In D-X, word from Ron Moorefield, W8ILC, that he along with K8FL, K8LEE, N9NS, W8GEX and WA8NJR will be operating between 40 and 6 metres as C6AJR from Eleuthera, Bahamas, between the 24th and the 31st of July. Modes will be on SSB, CW and PSK31. The team will also be in the IOTA Contest operating as C6DX.

QSL is via N8QET. (W8ILC)

Also word that DL4FCH, will be active, as DL4FCH/P from Pellworm Island from the 20th of July to the 2nd of August. Operation will be mostly on CW, and will include the IOTA Contest. (RSGB)

And word that W2SGX has become a VUCC awards checker in the central New York area. Carl says over the VHF Reflector that he will be available to check cards for VUCC awards at the Fingerlakes Hamfest on Saturday August 3rd. The venue is the Tompkins County Airport in Ithaca, New York from 10:00 AM until 2:00 PM Eastern Daylight Time. (VHF Reflector)

SUPPORT FUND REPORT WITH ANDY JAREMA, N6TCQ

And finally this week, its time for another Support Fund report from Administrator Andy Jarema. This time N6TCQ is not asking for funds. Just some advice:

--

Hi. I'm Andy Jarema, N6TCQ, your Amateur Radio Newsline Support Fund Administrator.

For the past several months, a number of you have written to us -- asking why we are not using on-line payments for Amateur Radio Newsline donations? Well, we have given it a lot of thought. And each time, we end up asking ourselves the same question: does the price tag to establish and maintain this service justify the additional cost?

No matter whose services we use, there are set-up and monthly usage fees for the secure e-commerce web server. And our bank will charge us 3 to 5 percent for every credit card transaction they process.

The answer is simple. Supporters would have to donate enough using this method to break even. Only after that could your generosity be put to work.

So for the next several weeks we'll be asking for your input. Would you use your credit card on-line to support ARNewsline?

Send your answer to newsline@arnewsline.org. If you are reading the Internet version, just click on the link shown. mailto: newsline@arnewsline.org.

Type "YES" in the subject line if you would use this service. If not, type "NO." Feel free to make any comments in the body of the e-mail. We'll tally the results and report to you in a future Amateur Radio Newsline report.

Remember, Amateur Radio Newsline is a 501(c)(3) corporation. Your donations are tax-deductable and your support is always appreciated.

That's it for this week. I'm Andy Jarema, N6TCQ.

--

In case you missed those instructions you can find them in the print edition of this weeks Amateur Radio Newsline report. (ARNewsline™ Support Fund)

No matter what else he has ever done within ham radio? Just shows
that you consider Morse Code more important than everything else
in ham radio combined. Would a nocode Tech saving ten human lives
be more important than Morse code skill, Larry?

Looks like the FCC agrees, as they dropped the sending test.
What they should test for is the ability to send using a bus horn.

:-)

How about ARRL following up with another initiative on the heels of the
likely
successful (the way it sounds) bill to exempt hams from CC&Rs with some, or
one, of the following:

1: Asking Congress to restore funding to FCC to permit more stringent
enforce-
ment of out of band operators?

2. Amend the Local Enforcement Bill to have state DOT and cops inspect
truckers' radios at weight stations, or other stops and cite for illegal
radios.

3. Have FCC amend their rules to that these "imitation" 10 meter radios
that
we all know are targeted to CBers so that such radios having BOTH frequency
readouts AND channel markers, or "band" switches such that Customs can
and will interdict shipments of such radios and turn them back to the
shippers.

If SOME-thing isn't done, we will be hearing chicken banders on the 6 MHZ
HF aviation band eventually. These "militant" operators will tell you in a
heart-
beat that they are GOING to operate anyway, anyhow, and anyWHERE they

choose and FCC can't do a ****** thing about it. It is almost as if we are AFRAID to do anything. The truckers, at least the illegal radio users, will tell
you that THEY are the most important people in the world, everything you have
comes by truck and if anybody f**** with them, they would strike and shut everything down. Hey, let 'em strike. If I have to work for the privilege of using
ham frequencies, then those SOBs should NOT get away with just taking what they want.

How about when Jim kept asking about my recent Novice subband experiences? I didn't see you having a problem with that, now did I? And I didn't answer the question, did I? That must be one of those double standard kind of things.

Some of us are not so weak. We say what is right, regardless of how "unpopular" it is with the Extra types. We don't knuckle under to some irrelevant questioning just because it is asked.

FWIW, Dan could have lied. But since the matter of a waiver isn't really important to me, I could care less.

Abbreviations, Ed, abbreviations.

I just don't know why the codesters want to abbreviate everything so much if it is so much fun. I mean when I go to the park and ride the roller coaster, I don't ask for a shorter ride.

We've been asking for this for more than 15 years. It finds a deaf
war at the Commission level, and naturally The Congress isn't interested
if the agency isn't.
>
>2. Amend the Local Enforcement Bill to have state DOT and cops inspect

Local law enforcment people have neither the training nor the expertise
to be able to identify such.

Radio transmitters/transceivers that are not FCC-certified are
already illegal to import, and The Customs Service has both the
authority and the training to seize them whenever they are found.
If there is any question, the shipment is held for FCC inspection.

Those that make it into the country are smuggled goods, no matter
how numerous or popular. Most of them get in by being mis-declated.

Brian, you just hit on one of the biggest deterrents to my learning the code on air, from real hams. I would copy the code, but none of it made much sense to me. There were so many abbreviations that I had no idea if I was correct or not! beyond the callsigns, which of course I could make a mistake on and not know it, the body of the message was pretty indecipherable, especially with the multiple abbreviations for a single word.

Later I got some of the abbreviations from the practice tapes, but there were still plenty more that I didn't know.

>>>including transistors in the "Radiotron"?
>>
>>Which "RCA" are you talking about? RCA-Montreal? RCA-Camden?
>
>RCA the company.

Was that a little tiny company? :-)

RCA Corporation was incorporated in the USA. They maintained controlling interest and had foreign patent sharing with non-USA RCA corporations. Montreal is in Canada. F. Langford Smith was a long-time employee of RCA in Australia.

>>>It's clear you're avoiding the simple truth that, in fact, the transmitters

>But not the overall leaders.

Heh heh heh...the "overall leader" was the President of the United States at the time. Was he supposed to "lead" radio operations?

I think you've taken Extreme Literalism to new heights! Congratulaions!

>> Since all teams worked all
>>shifts, shift supervisors were leaders 2/3 of the time.
>
> When on duty.

Which were ANY TIME our warm bodies were wanted on the job, to a maximum of 48 hours with only a mandatory 4-hour sleep period (unified medical requirement, all services at that time). :-)

>>At ADA we also installed some of the transmitters.
>
>But you did not build them, design them, or pay for them.

That's true since most of them were built during or before WW2. Neither did we "build, design, or pay" for the VHF and UHF radio relay equipment (later supplanted by GE commercial microwave radio relay equipment). Neither did we "build,design, or pay" for the transmitter buildings, the antennas covering a small ex-airfield, the receiver site shared with the USAF with more antennas there than most small communities had total, nor the teleprinter equipment (over 200 p-tape T-Ds), nor the emergency power generators, nor the trucks and busses used to get to and from, nor the uniforms nor the meals nor the personal weaponry issued to us.

>>Considering that
>>there were 43 HF transmitters there at the beginning of 1956, we
>>couldn't have all "built them," could we?
>
>Perhaps you could have. All depends on the available resources.

Those filled the (approximate) 160-foot length of the Kashiwa site transmitter building, on both sides. [how's YOUR experience in "designing, building, or paying for" 40 KW linear amplifiers? :-)]

Primary power load demand was around 480 KW. I don't think you could afford the three-phase copper bus bars in the primary conduit on each wall...or the 600 KW motor-generators that powered all of the Kashiwa site.

How about the 4 six-rack, 360+ tube, 1.8 GHz microwave radio
relay equipment at Kashiwa? Or the 9 microwave radio relay sets
also by GE at Chuo Kogyo or the 3 at receivers or the 3 at
Pershing Heights? No problem for you, right? Just a matter of
"applying the same principles." :-)

>>Could you or have you
>>built a 1 KW transmitter?
>> A 5 KW transmitter?
>
>I'm sure I could build those.

Oh, YES, you could...and have it be RELIABLE in 24/7 operation!

But, you HAVEN'T done so, have you? :-)

>>A 15 KW
>>transmitter? A 50 KW transmitter that was used as a 40 KW
>>output linear amplifier for SSB?
>
>Probably. All depends on the requirements and resources available. The
>principles are the same.

It also depends on far off the deep end you go in being foolish
on what you "could do" using the "same principles." :-)

>I'm neither poor nor a baby.

Poor baby.

>Standards and practices that work need not be changed unless something better
>comes along. If it's not broke...

Some don't realize that SOMETHING BETTER HAS COME ALONG.

Some don't realize that 70-year-old standards and practices
are getting old, careworn, obsolete.

>>How do you wish to be addressed?
>
>Call sign or first name. Like practically everyone else in this ng.

Are you sure you don't want "Sir" or "Your Excellency" or
something noble like that? Maybe "Your Worship?"

How about your street number? The USPS thinks that is a good
address...

>>The word "transceiver" is a contraction of "transmitter-receiver."
>
>The meaning of the word in amateur radio use includes more than that. Like
>using the same variable oscillator system for both transmit and receive
>frequency control.

Wow! High-tech...for around the time you were born...became rather
standard after a few years.

>>>Not patentable - it was obvious to anyone skilled in the art. I wrote it up
but
>>>a few months later a similar design appeared in QST. Author was W1DBM - Phil
>>>Rand. Great minds think alike..
>>
>>I'm sure "great minds" think highly of themselves... :-)
>
>Why not? In some ways my desin was better than Phil's.

Well, then, by your own admission you are a better desiner than Phil.
:-)

>>Transmitter frequency generation by "methods other than multiplication"
>>has been done for years in commercial or military radios.
>
>Did you invent it? I think not.

The word I wrote was plural..."methods." You should have written
"them" instead of "it" in your nastygram. :-)

Oh, must I have a patent or many patents to be acknowledged
some kind of "technical" person? K0HB has already judged and
juried my single patent as "unsuitable for amateur radio." :-)

>>One of the
>>first commercial uses was in the civil aircraft radio band 108 to 137 MHz
>>beginning with mixing two selectable-crystal oscillators to achieve a
>>"channel" tuning.
>
>So? Amateur radio HF equipment is not channelized.

No? :-)

You don't tweak the knobs or push the buttons on the above-30-
MHz ham stuff then. :-)

You aren't familiar with the incremental tuning of modern ham
transceivers, either. :-)

Most of those are in 10 Hz increments, rather small "channels"
but incremental fixed frequencies all of them. :-)

>>The term "heterodyne transmitter" seems to be
>>common only to VERY old ham radio literature... :-)
>
>You ever design and build an amateur radio heterodyne transmitter?

No. I've never wanted to interfere with amateur radio communications.
:-)

>>Wrong year. I mention 1953, specifically late February of that year, to
>>illustrate a point about HF radio communications in the US military.
>
>What point?

Your head is the point at this point. :-)

>>In 1948 the US military decided to eliminate morse codings in long-
>>haul HF communications, all branches. They did.
>
>They decided in 1948?
>
>Do you have some proof of this decision?

Yes. Do you have a clearance and a "need to know?" :-)

YOU are the "historian" (claimed) in here. YOU go research the
subject. I know because I've seen the military reports and TMs
back around when the doc was writing up your birth certificate.

>When did they finally eliminate HF Morse in all long haul HF military radio
>communications?

In fixed-point to fixed-point about 1950. In ship to ship or ship to
shore it was some time in the 1960s.

>And what does that have to do with amateur radio?

If amateur radio is "really" a SERVICE, then it ought to emulate
the other services such as the military service. :-)

>Do you know what a premixer is?

Yes, if you want to talk about audio recording or concrete
manufacture. :-)

That isn't a subject for this newsgroup, is it?

2070. Re: Freebanders all over 10m like roaches

writes:

>How do you know? "Radio and electronics" covers a very wide range. Do you
>know how to program a PLC?

The most used acronym "PLC" is part of a corporate signature denoting
its "liability." I don't think you meant that since you don't have a legal
or business degree. :-)

If you mean Programmable Logic Controller for "PLC," then no. I'm not
into control of big electrical motors or other industrial process machinery.

I've learned and become accomplished on several programmable
calculators and computers and know enough, but have not actually,
programmed a PLA (Programmable Logic Array...had someone else
do that). Why do you ask (as if readers didn't know...)?

>But not everything. "Radio and electronics" covers a very wide range.
>
>There are undoubtedly areas of "radio and electronics" where you have more
>experience than I. Same for Cecil. And there are also areas where I have more
>experience than either of you - or both of you put together.

How can readers "know" this? Your only "expertise" is limited to your
own claims and a write-up in the "Electric Radio" specialty mail-only
periodical.

>So you claim. But you have very little experience in amateur radio. You have
>no experience whatsoever as an amateur radio operator.

So, you do not accept "third-party" "operators" communicating over
amateur radio under control of a licensed amateur? :-)

Are amateur radio transmissions encrypted or otherwise made to
deceive or change meanings of communications? I think you'd find
THAT a lot more illegal...but I've not been illegal in radio operation in
any radio service, ever.

Define "experience in amateur radio." Does that mean crawling inside
the head of each amateur and observing "operation" through their ears
and eyes, experiencing their unique reactions to communications?
That would be clinically interesting to a psychiatrist, I'm sure, if not a
bit revolting. Never happen. Amateur radio experience is as unique as
the individual licensees.

Has Jimmie done moonbounce? [correct ham jargon is "EME"] I have
not done that. I've only communicated with a station ON the moon.

Has Jimmie ever had communication with a station on the moon?

Has Jimmie ever been on ham bands in the microwave region or communicated above the 70 cm ham band? I have both communicated and transmitted RF legally on non-ham-occupied radio frequencies from VLF on up to about 24 GHz.

There are many activities in amateur radio which Jimmie was NOT engaged yet has been written up in the amateur periodicals. Why hasn't Jimmie done all those things to become "experienced?"

I've been emitting RF legally since 1953, obtained a FIRST class radiotelephone operator's license in 1956 (one test sitting). Why do you wish that to be "not applicable?" Are you so brainwashed or into the fantasy of the "lodge-hall fairyland" that you think there is some vast gulf between operating (legally) an HF SSB transceiver on a private boat is "different" than an HF SSB transceiver on ham bands?

>> I've been
>>fortunate to start out my radio experience in the Big Leagues of
>>HF communications some time ago.
>
>"Big Leagues"? So you keep telling us.

I have a long-licensed radio amateur as a reference...we were in the same "big league" HF station at the same time in Army service. That station had 36 (in 1953) growing to 43 transmitters (by 1956) with power outputs of 1 KW to 40 KW. The monthly message transmission was over 200K. In 1955 the transmitter antenna field occupied the entirety of a small airfield. It took a Battalion to staff everything. I'd say it was the "big leagues." :-)

>No, it isn't amateur radio. The resources and goals of different radio
>services are very different.

My, but aren't you observant! :-)

When I began in those "big leagues" there was also a requirement to be able to "close with and destroy the enemy." The 1952 to 1956 period was not a "safe" time since the USSR had The Bomb, the French had lost their colony called "Indochina" and the Cold War was very hot, indeed.

Nowadays there is a "cold war" where the PCTAs are desperate to find some outlet for their aggressions and looking to "destroy anyone who seems threatening" to their "service" by any means possible. The PCTAs are now down to guerilla tactics...but those resemble gorilla tactics more and more.

>>However, radio physics are the same regardless
>>of man-made rules on what is professional and what is amateur.
>

>Physics is only one aspect of radio, however. Radio policy is not determined
>solely by radio physics.

Tell that to the FCC. :-)

>>Amateur radio is a hobby.
>
>Actually, it's more of a sport.

Of course you sit around in a track suit or equivalent, sweating out
point scores from the "judges," bravely lifting the weights off you
paddles. Yes, a "sport" like chess or checkers or bridge is a
"sport." :-)

According to your esteemed and steamed buddy, Sgt Putz,
amateur radio is supposed to be a SERVICE all done up in
capital letters, a vast almost-paramilitary group of "minutemen"
ready to "fight wars" (of their own imagining), right "wrongs"
(damnable humans who think they can get on HF without a
"proper" license), and "save the world from evil" by holding
dearly to the standards and practices of When They Were
Young. :-)

>Legally, adherence to FCC rules is all that is required.

Why isn't that enough? Oh...you will justify "more" as follows-

>However, the amateur
>radio service is enhanced by voluntary adherence to good operating and
>technical standards.

How do you mean? See Part 97 for "good operating and technical
standards." Or do you refer to the "Amateur's Code" for all those
Maxims?

>Such as using the standard phonetics.

I was using "standard phonetics" in 1955...when the US military
converted to the NATO Phonetic Alphabet, which was quickly
adopted by the ICAO the same year. Not a problem. Minor
memorizing and being careful not to use the old set. :-)

>Are you against amateurs having standards?

No. Why are you so insistent on the standards and practices
of 70 years ago in amateur radio?

>>>I have no idea what that is supposed to mean.
>>
>>Sure you do...you use it implicitly all the time.
>
>Do you have the ability to mindread?

Absolutely not...but then my human interaction does not involve
totally on a monotonic on-off representation of an alphabet and

numbers.

For someone that CAN mindread, see Ed Hare's postings in
chiding Brian Burke on his alleged "bullying" of poor distraught
Dan Finn. Ed KNEW what "Dan meant" and what Brian "was
'really' doing." [you won't need to consult Google for archives on
that...:-)]

I recall a Jimmie Miccolis who KNEW what the "FCC meant" on
the code test issue and KNEW exactly what the "FCC was trying
to do" on some past NPRMs and R&Os. [one does need Google
for those archives but they weren't before 1997...:-)]

>>You have a rather rigid adherence to amateur methods,
>>standard, practices, jargon, etc., all "specified" by the ARRL.
>
>How do you know? Have you ever heard me on the air? Cecil has.

All the readers have "heard your air" in here, countless PCTA
boosting words of olde tyme hammism and morse code uber
alles. Not a problem. We don't need telepathy to understand
what you mean.

>>Or didn't you follow the "proper" behavior and all the "in" things
>>as they were proscribed for you in the ARRL publications? :-)
>
>I did what interested me.

Judging from your voluminous output in here you are very insistent
on OTHERS doing "what interests" YOU. :-)

>"N2EY's OPINIONS are challenged as being invalid."
>
>How can an opinion be "invalid"?

Because you claim you "know what is best for ham radio" in the
insistence of everyone else doing as you did... :-)

>You'd be mistaken, of course.

Tsk, tsk, hypocrisy raises its ugly head in reinforces the double
standard. Your opinion cannot be "invalid" yet another's different
opinion is "mistaken." :-)

>>I find you opinions to be nearly the same as what the ARRL
>>writes as "good and proper" for all radio amateurs to follow. :-)
>
>Ever think that perhaps they are good and considered opinions? Does being from
>the ARRL automatically discredit something?

Ever think that your opinions are old, outdated, and belong to a
minority segment? Does being agreeable with the ARRL
automatically indicate "you know what is best?" :-)

>>I find that your opinions are simply mirroring what has been
>>proscribed to you with very little originality or evidence that
>>they really are your own "opinions." For that reason I find them
>>INVALID as your personal opinion.
>
>Then you are mistaken.

Of course. :-) You don't get praise so you try to damn all those
who have differing opinions. Evident.

>>Where am I stating saying "follow my direction, I am right?"
>
>You hold up your age as evidence of being right.

No. EXPERIENCE. Experience in a lot of radio services as both
military member and civilian. Experience in seeing how large-scale
decisions were reached and their justifications, all for a variety of
communications that seems to be foreign for your thinking of ham
radio.

>You've held up your age as evidence of being right. You use your claimed
>experience in nonamateur radio as somehow qualifying you to pass judgement on
>the amateur radio rules, methods and practices.

I don't use JUST my age, but decades of observation of INDIVIDUALS
within amateur radio and whether or not they used a mask of altruism
over their personal desires versus those who actually looked towards
the good of the whole.

>When people disagree, you make
>fun of their names, jobs, and other characteristics. Why not just discuss the
>issues?

I would LOVE to get back to issues and subjects. However, there are
so many hams who are only interested in showing their "qualifications"
in "knowing what is best," demeaning anyone who disagrees with them,
and generally making fun of anyone who does not parrot the party line
of the long-timers.

>You also ridicule the accomplishments of those who disagree with you.

Poor baby, suffering from "double standard syndrome" still?

You have discounted, demeaned, tried to discredit my experience in
radio that goes farther, extends for a longer time than your own total
life experience. Sorry, but you cannot hold yourself up as anything
"more superior" in radio other than your morsemanship...but you
insist on being the "superior" and get all upset when someone
doesn't bow down to you or similar persons who claim to "know
what is best" for just about anything.

>No one is required to be a member of ARRL in order to be a radio amateur.

True, over three-fourths of all US radio amateurs are NOT members.

I don't know your "point" here and, evidently, you cannot under-
stand why that majority of radio amateurs are NOT members. :-)

>I don't say that. I simply relate my own experiences, opinions, and facts.

If you want such things accepted about yourself, you have to
accept others' experiences, opinions, and facts. You don't
seem to want that, preferring to have it YOUR way or everyone
to the highway.

>Rather than treat me as an individual, you lump me in with all other
>procodetest people, as if we are all the same.

You PCTAs are individual but seem to be the SAME on the
"reasons" for keeping the code test. That's "lumpy" and you
are stuck with being lumped. Learn to like your lumps.

>ANYONE who has an opinion about amateur radio policy, methods or practices
>claims to "know what is best for amateur radio". For example, Carl Stevenson,
>Executive Director of NCI, thinks that total elimination of code testing is
>best for amateur radio. He KNOWS it is.

Incorrect. Carl is of that opinion as are all the members of NCI,
licensed or not, US nationals or citizens of non-USA countries.

What you fail to understand (or don't WANT to understand) is that
many members of NCI are already "vetted" in morsemanship (have
taken tests proving their ability) but are against the code test as a
REQUIREMENT FOR LICENSING. They aren't against USE of
morse in amateur radio activities, just against the code TEST.

The PCTAs seem united in their major opinion for keeping the
test and that is all tied up in "they had to do it so everyone else
has to do it too." Secondarily, their reasons are traditional in
that the code test has never been absent in licensing, therefore
"it should always remain." :-)

>Is that bad? Lots of people do the same thing here. Or is it only bad because
>I'm procodetest and procode, and you are not?

Removal of the code test for a license will remove the single
thing that you and other PCTAs use as an "award billboard" to
"prove your superiority," morsemanship. :-)

When that is gone all you will have is your insistence to being
"superior" is a long time spent using morse code. In other words,
you will turn into another Larry Roll (don't let the wheelchair hit
you in the tire on your way out). :-)

>Do you know what a premixer is?

Yes, whether the term is used in audio recording, chemical
preparation (such as making Portland cement), or amateur radio
where it is a not-often used term.

Audio pre-mixing refers to most of the equipment used in
sound pickup before being applied to the master mixing console
controls in a recording studio. That's a widespread term of about
two decades. Chemical preparation pre-mixing can cover many
dry material products. I heard of it first back in 1960 when Ramo
Wooldridge Corporation sold their first minicomputer to a cement
plant...RW had it in their promotional literature on computers.

I'm not absolutely positive about ham radio "pre-mixers" although
I think it refers to the L.O. subsystem where the variable tuning
oscillator is mixed with two or more fixed-frequency oscillators to
make a single set of frequencies which are then applied to a
mixer. That single mixer may be in a receiver where it reduces
the need for more "conversions" or it may be in a transmitter
where the mixer forms the final radio frequency for power
amplification. The terms seems just another name for the
frequency conversion subsystem in a radio.

>Perhaps you are jealous of the fact that I have actually designed and built
>amateur radio stations and operated them on the air successfully for the past
>35 years.

Good grief, no! :-)

I could care less about your self-touted "abilities." I doubt if that
was the original subject off-shoot, but rather another bit of bragging
about yourself. :-)

>For example, I've got a list of operating skills that I think all hams should
>strive to acquire.

You've already made such lists here (more than once). Other
than trying to make others do as you do (or say), what are
you proving with those? :-)

>Amateur radio was growing before the Tech lost its code test, and continued to
>grow after that change. The actual effects are difficult to gauge due to the
>effects of other changes such as the doubling of the license term.

Technician class licensees now account for about one-third
of all licensed US radio amateurs. Before you hop on another
rationalization bandwagon, go to "Amateur Radio Newsline"
and read that total US ham radio numbers have been relatively
stagnant for two years. :-)

>I challenge you to provide examples of posts where I "discounted those,
>dismissed them, never really regarded their existance
>as meaningful in any way".
>
>Let's see you back up that claim.

Are you "challenging" me to prove the obvious? :-)

>>Technician class licensees
>>now make up a third of all licensees

>
>Yup. In part, that is because the FCC has been renewing Tech Pluses as Techs
>for over two years now.

I just knew you would attempt a rationalization somehow. :-)

That doesn't hold water in the rainy season but you couldn't be
convinced otherwise back before restructuring and you won't
be convinced now. :-)

>> and are also the least class
>>in membership percentage in the ARRL.
>
>Lots of reasons for that.

Name about 300,000 of them. :-)

>>"Gigahertz are for giga-squirts."
>
>That's not one of mine.

It is, or was, a favorite of James Kehler, KH2D, formerly the
guru of Guam.

>>"No lids, kids, or space cadets."
>>
>Is that what YOU believe? After all, you want an age limit (no kids)...

No PRE-SCHOOL CHILDREN who don't have a grasp or under-
standing of written questions. See the (now) "old" ARRL news
page for two six-year-olds "passing ham tests" and shown with
a nice, grandfatherly VE (who was very, very "honest" in "passing"
them). :-)

Under the FCC regulations of now and then, there is no, repeat
NO requirement, that SMALL CHILDREN must be overseen by
adults while "legally" using their amateur radio license privileges.

You won't even consider the implications of what can happen if
small children operate by themselves. None in here have done
so in the past. Why not? Isn't the "why not" answered by your
simply wanting to discount what I bring up? I think so. I also
think that lends a great deal of hypocrisy to your own "fairness"
and "honesty" in posting.

All you want to do is discredit any age barrier...because that
comes close to the age YOU (or a lot of others) got into amateur
radio. You are applying your own personal standards as that
which should apply to all others. You are god and judge. No
one else can speak against you... :-)

>Quoting from an ad for various ARRL publications on page 144 in the June
>issue of QST "Available from ARRL Publication Dealers EVERYWHERE!"

Oh, my, a "booger flick" is issued! :-)

According to me and my quote (above), I wrote "retail outlets." You
are quoting "ARRL Publication Dealers EVERYWHERE!"

Maybe the HQ in Newington failed to consider Southern California
as "EVERYWHERE." I can't find any "ARRL Publication Dealers"
listed in any of our phone books nor can I find them in the latest
search at the American Publishers Association. The local Barnes&
Noble, Borders, or Crown outlets stock a few QSTs monthly but the
local HRO is only three miles away. HRO is an amateur radio
retailer...not specifically an "ARRL Publication Dealer"...and they
also sell radios and radio equipment to non-amateurs.

That wasn't a good booger, Hans. You can do better. Go get some
male radio hormone treatments and come on back. Let's see what
you got... :-)

>making a profit now, nor has it for the past 3 years or so. Simple fact.

Yes, well, I'll take it up with Allan Greenspan or maybe Louis Rukeyser... :-)

>The majority of those who commented to the FCC on 98-143 not only wanted code
>testing, they wanted at least two code tests (5 and 12-13 wpm). The MINORITY
>OPINION won out over the MAJORITY in that case.

<insert about 45 minutes of "BWAHAHAHA" guffawing here>

>Do you believe in minority rule? If you agree with the FCC's dropping of the
>code tests beyond 5 wpm, the answer is YES.

Wow, Jimmie, you're so FIXATED on the "need for code testing" and ARRL propaganda brainwashing that you can't see what it's all about.

The FCC establishes the licensing criteria, NOT the licensees who
have already been licensed nor the demands of the ARRL (which
has formerly dominated lobbying as a MINORITY organization).

There was no "official poll" of all the 2600+ documents on public
view for the 98-143 NPRM. The FCC did list all the names of the
commenters but there were fewer actual individuals due to so many
making more than one comment.

Did you read ALL 2600+ DOCUMENTS?!?!? I don't think so. If you
did you would find that the majority of the PCTAs commenting were
doing so on the basis of each one of them having to go through all
the steps in upgrading and testing at higher and higher code rates.
Nearly all of them cited their "tenure" in amateur radio as one of
the prime basis for "knowing what was best for the future."

Somehow, nearly everyone of those long-tenured knowledgeable-at-
what-is-best-for-the-future-based-on-their-personal-past had failed
to note the FCC's own statement in the 1990 NPRM establishing
the no-code-test Technician class.

>>No Code International is an international organization that seeks
>>the elimination of the morse code testing for an amateur radio
>>license anywhere.
>
>They claim to represent all radio amateurs everywhere, then.

No, they represent ALL interested parties in the code test issue.
No one need be an amateur licensee.

You seem to dread the future based on a political action
organization that might affect ARRL decisions. Why?

>> No Code International does not restrict
>>membership only to licensed radio amateurs.
>
>Neither does ARRL.

VOTING membership. I can get a subscription to QST and have
all the "voting" of a public library on ham issues...:-)

That is just "membership" in a changed-definition sense.

>>The ARRL claims to represent "all" of US amateur radio yet its
>>membership is less than a quarter of all licensed US radio amateurs.
>
>NCI claims to represent what's best for all amateurs everywhere.

NCI and its membership are only interested in ending the International
Morse Code testing requirement for any amateur radio license exam.

They are a political-action membership organization with only one
purpose...and that purpose is shared internationally. Didn't you read
what they have written on their website?

The IARU has now taken the position of ending the ITU-R code test recommendation. Do you want to label the IARU a "minority" group or that "they do NOT know what is best for amateur radio?!?"

Or do you insist that ONLY the ARRL "knows what is best for amateur radio?" Must be...

>>The ARRL keeps wanting more money.
>
>Costs money to do what they do.

H O W M U C H ?

Give the exact dollar amounts, say from the 2001 tax returns.

Is the ARRL BoD paid a salary? Don't they do their thing and travel to various meetings (supposedly paying their way, etc.) out of the "goodness of their hearts?"

Now show your dollars figures...EXACTLY. Remember that under your own ROE in here you MUST be terribly EXACT and any deviation from EXACTNESS constitutes an ERROR and FAILURE which negates any future claims, statements, or opinions!!!! :-)

>NCI membership requires a loyalty oath. ARRL does not.

<insert about 30 minutes of "BWAHAHAHA" guffawing here>

Of course, each and every 4300+ members of NCI had to be in front of a judge, raised their right hands, and swore to defend the constitution of NCI or something. The secret is out. That was a blood oath under muerta or something. Yes, and we all wear black suits with black shades, carry alien firearms, make movies under surnames of "Smith" and "Jones." Of course.

>Were there any contested BOD positions in the NCI elections?

There was but you aren't cleared for such information and have NO "need to know."

Poor baby doesn't realize that some of us have done, are doing
work (for hire if smart) outside of radio or even amateur radio. :-)

>Yup. Note that QST articles include things like the Product Reviews, which are
>Consumer-Reports type evaluations, not puff pieces. ARRL actually buys the
>products tested, anonymously, then tests 'em. They are then resold at
>auction.

Oh, gosh yes...everything is so absolutely squeaky-clean honest
that nobody would EVER think to fudge a bit on reports! :-)

The ARRL could NEVER do anything wrong, could it? :-)

>NCI's "loyalty oath" is there for a very good reason. It's a way of denying
>membership to anyone who does not agree with their basic purpose of
eliminating
>all code testing. Without that "loyalty oath", pro-code-test people could
>simply join up in droves and derail the organization.

<insert 15 minutes of "BWAHAHAHA" guffawing in here>

There was a "loyalty oath" administered to all members? I never took
one of those...yet I've got my "certificate" of membership somewhere
on a CD. Didn't have to raise my hand or recite anything...:-)

Oh, Jimmie must mean the "oath" taken when everyone installs
software...to promise (faithfully) to abide by the terms of the
license agreement...and never, ever violate it! :-)

>Pro-code-test people are
>obviously the majority, as evidenced by the comments to 98-143.

<insert 6 minutes of "BWAHAHAHA" guffawing in here>

Gosh and golly, Jimmie, you ought to start up a class-action civil
suit against the FCC for "violating" their charter at not "listening" to
your "big majority."

>So the "loyalty" thing makes perfect sense.

In what regard? NCI isn't an "all things to all amateurs" kind of
organization. They never were. Once we all achieve the desired
goals, aims, and objectives, the organization disbands, dissolves.

Maybe not quite as dramatically as Eric June or Jim Kehler (of
"No SSB International" satirism).

>ARRL's requirement for a ham license in order to be a full member also makes
>sense, because it keeps the organization in the hands of hams.

...or rather its Section Managers and, most importantly, its Board
of Directors. :-)

>Note that ALL
>hams who join ARRL get the same voting power, regardless of experience or
>license class.

<insert 3 minutes of "BWAHAHAHA" guffawing in here>

Of course, of course... :-)

>The new Tech has the same number of votes as the grizzled Extra
>with life membership. What could be fairer?

That's just so wonderful! So, Mr. Democratic Principles At Work,
why aren't there more Technician Class licensees joining up to be
part of all the "fairness?" Technicians are now the highest licensee
class (at about one-third of all US amateur licensees) and also the
lowest licensee class in ARRL membership.

What is your excuse for that?

>>>Were there any contested BOD positions in the NCI elections?
>>
>> Don't the NCI BoD guys communicate with antique Captain Midnight
>Decoder Rings?
>
>Nope. E-mail does just fine.

It's nice that you KNOW that for a fact. Are you one of the "secret"
members of NCI? Or are you really blessed with telepathic powers
(a side benefit of a pre-restructuring extra) so that you can divine
everything? Marvelous talent. :-)

I think that's a gross oversimplification. Within some subsets of amateur radio (contesting, DXing to some degree) there is "competition". But there are lots of other aspects of the hobby which are completely devoid of competition, but the participants are in no way "spectators". Public service, traffic handling, tinkering, and Skywarn are a few which come to mind in which "competition" in it's commonly held connotation of "beating a competitor" is starkly absent.

I trust your posting was as non-serious as mine was and
therefore no feelings happened other than a grin. Do you
really pat yourself on the back for passing your Morse
code exams at the FCC? Does that really matter or is your
present Morse code skill what really matters?

If you passed the exams, you were rewarded with additional frequencies.
It can't be both ways, Brian.
>

>
> Dave, you chase band/countries. I had one band. If DXCC is 100 countries,
> why would I work 10,000 QSO's?

Do you mean that you believe that one gets to 100 countries worked and
confirmed and then stops chasing new ones? Do you have any idea how
many entities are on the DXCC list? As far as having only one band and
and one mode, those limitations were things you could have done
something about.

> Are you saying that my DX QSOs aren't any good because I didn't work 10,000
> of them?

No. I'm saying that you don't even understand the concept of DXing.

> > > When I've got a pile-up, I run it.

>
> One at a time.

How?

> > > QSLing was a huge chore.
> > >
> > That's what managers are for. Any time you spend QSLing, you can't use
> > for operating.
>
> But I consider it my job.

I had a job and a "second job" handling the pileups. Why waste time in
a rare spot making out QSL cards?

> > > Expecially the time I entered a JA contest! > I did enjoy ragchewing
> with the WestPac regulars.
> >
> > Ragchewing isn't DXing.
>

> > left while murmuring, "Pleased to meet you. Welcome".
>
> I see that hamming means a lot to you.

Hamming means a gread deal to me. Efficient handling of a pileup does
not have to be rude, just efficient. Listening to Alistair spell his
name phonetically and waiting while he describes his station and
antennas then asks if I'll listen to an "A/B" test of his microphone
does not promote pileup efficiency. It's much easier for me to provide
my name and location along with QSLing information every ten or fifteen
QSOs. Even so, there'll be fellows who'll bray, "What's your QSL info?"
two QSOs after I've announced it. It was diplomatic receptions which
did not mean a lot to me.

> 7's.

There are and will always be those types. There are also those who
attempt to work you on the same band night after night, week after week.
One can develop selective hearing to deal with them.

> > You might need to concentrate on timing,
> > espcecially if you don't have an amp or a gain antenna at height.

Could be good timing and no propagation or good timing but you're
covered by those WITH an amp. There'll be other days.

> > > When operating 10M SSB, what specialty is there other than QRP?

Bob:

Be that as it may, Kim and her silly callsign are certified by on less
an authority as Riley Hollingsworth as taking the ARS "...one step
closer to extinction." It doesn't get much worse than that!

Cecil:

Maybe, if anything like that had ever happened, which it hasn't.
The reality is that Ham Hero nocode Techs are probably more likely
to cause "emergencies" with loss of life than they are to save lives.
The cop, fireman, SAR wannabes all gravitate toward the nocode
Tech ticket, because those HT's look sooo cool on their utility
belts!

Hmmm...let's see...Roll claimed high marks in a college course for "human resources" (a buzzphrase for 'personnel' work)...and then bragged about how he could "get his choice of jobs after graduation." That was in here. A Google search will turn up.

Does Roll have a "human resources" job now? No, he says he is driving a bus. Nothing wrong with that except for the inflationary nomenclature of "paratransit specialist." :-)

Good luck on finding that job in "human resources," Larrie...

As I plainly stated before, I don't work cw, don't even own a key,
so call me a liar if you want but I don't have to prove a thing to
you.
I say you are probably a liar about most of your homebrew claims.
You will never be superior to me as a ham so get over it.

You sure are hung up on intimidation, Jim. Sounds like a personal problem
to me. It is impossible to intimidate anyone on a netnews group unless
that someone cooperates in his/her own intimidation. Sticks and stones ...

Mine are all in jest, Jim. It matters not one iota where or how long ago
one took one's exams.

Uhhhhhhhhhhhhhhhhhhhhhh, Cecil, there *is no* Novice license available to newcomers these days. All may as well go ahead and glom an Extra, and many do.

Uhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhhh, Dick, I wasn't talking about a Novice
license. I got my Conditional (General) in 1952 which included *ALL* frequency
and power privileges. I had *ALL* frequency and power privileges, just like
the Extras do now, and didn't "know enough to build a dipole". I had to rely on
my Elmer for instructions on how to build a dipole. As I recall, how to build a
dipole was not even covered on the 1952 General License exam.

You are beginning to understand, grasshopper.

>It matters not one iota where or how long ago one took one's exams.

Sure it does. It matters exactly one iota. It's one tiny piece of information,
no more, no less.

What really matters is:

- did the person pass?
- what did they do with the resulting license and its privileges?

2133. More on the Illegal 10 and 12 meter operations

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-22 18:41:40 UTC
From: Jerry Oxendine <joxendi@bellsouth.net>
Message-ID: <7IY_8.131445$JU3.60356207@e3500-atl1.usenetserver.com>
Source record: 49997

I have included information many hams may have already received from other sources. This illustrates that Amateur Radio IS considered a part of our National Home Security and communications policy. Therefore, it is why I believe the time is NOW for an organized, as well as individual, effort to rid
our bands of illegal bandits and truckers who are usurping our bands for them-
selves. Perhaps, as Phil Kane has suggested, in the past there was no real incen-
tive for FCC to become aggressively involved in CB and Ham enforcement. However, IF Amateur Radio is to be an effective supplement to our Nation's Home Security Effort, can it not be argued that it deserves protection from illegal
and unnecessary incursions from "casual" operators who can interfere with such
Effort? If that be true, then now is the time for Amateurs to write letters--even to
Tom Ridge himself explaining the problems that illegal interference can cause. If
our own citizens (truckers and CBers) refuse to obey our laws, how can we be any effective force while being interfered with by illegal operators? We cannot
rid ourselves of these "roaches" if we sit on our hands, whine in here, and expect
someone else to DO something! We must rise up and do it ourselves. We do not have the legal power to punish these operators, and until the Feds make this interference unattractive thru fines and other actions, these people will only become bolder. Like exploring an old house, they will continue to peek into rooms and, finding said rooms attractive, they will go in and make themselves
comfortable while we whine and complain, and argue with each other expecting someone "else" to do something about it. This is "mob" rule, their activities, and
we cannot allow it to continue. We MUST take the initiative and let the Congress
know that we need help to get rid of the roaches that now infest our bands! At
another time, it may have been more difficult to make Congress see the need for
protection, or even realize the harm that such illegal operators do. But now, while
our presence is known, our achievements are well received, bills are even now circulating in Congress (relief from CC&Rs), it is a good time to make our case

against the unlicensed operators! At this time, I feel we have an
ADVANTAGE,
we have the momentum, and we have the favorable image to get something done!
Shouldn't we take advantage of our advantage and strike while the iron is
hot?
Please! Write your Representatives, write Mr. Tauzin, write Mr Ridge and
make
the need for spectrum protection from domestic interference known!

1.
I have already written my Rep. about what I think about the
Patriot Act and Homeland Defense. I just noticed where Joe
Byden announced that it was OK for US Army active soldiers
to arrest american citizens at home.

2.
I am afraid anything I sent to Tauzin or Dingell would have
to be prefaced by a request for those fellows to return the
PAC money to WorldCom so they could get out of Chapter 11.

3.
As for Ridge, be careful of what you ask. One might reach
the conclusion that *more* unwashed 10 and 12 meter
operators are needed for the "Tipping" tasks, not less.

73,
Clay N4AOX

If it's an HR position in an engineering or technology company,
they do little more than fill out paperwork for tax withholding,
benefits signups "Where's my damn ID card", paperwork for
layoff victims, and such. Engineering managers pick out who
to hire and can anyway. Driving a bus may actually be more
interesting....

Here's the description from the opening page of the R.A.I.N. Report website. You can then select the 'PRESENT R.A.I.N. REPORT' in either WindowsMedia or Real Player format.

"All Inclusive, Not Exclusive" The live town hall meeting sponsored by the Amateur Radio Newsline at this spring's Dayton HamVention generated some thought provoking talks we'll be bringing you over the next few weeks. None generated as much controversy as the keynote speech, delivered by Harold Ort, N2RLL, Editor of Popular Communications magazine. While his message may ruffle a few feathers, his call for merging ham radio's resources with those of other personal radio services in emergency preparedness is laudable. EVERY ham in America should listen to what he has to say. (16 minutes)

Mr. Ort did a superb job of explaining why thequoted text just isn't making it with all the challenges that lay ahead.

www.rainreport.com

Enjoy. :-)

Bert, like so many good ideas the trick is getting from here to there.
How to take latent capability, a man and a radio, and get something
accomplished with it; the difference between an Army and a bunch of guys
with guns.

Assuming you can get the infrastructure established without too much
penis-measurement (and that is pretty well the current state of affairs)
it ultimately comes down not to the Majors, Colonels, and Generals but to
the Sergeants and Corporals. And these guys are very likely to be the ad
hoc people who are dumb enough to volunteer. Anyone who has ever been net

control on one of these things very quickly develops a lot of sympathy for Attilla the Hun or at least his top-kick because it takes a cast-iron SOB to keep things flowing in something resembling a straight line.
Discipline among those caught in the fog of action is either developed on the parade ground in advance or by someone looked to for leadership for whatever reason on the spot who forgets having to live with the troops afterward and kicks some butts while teaching very quickly. The first rule of mule-training applies: one must know more than the mule.

The problem in its simplest form is that a man with a radio feels called upon to talk now and then. Unless some order is imposed, you get the tendency of green troops to fire at everything in sight and you have the radio equivalent of Kent State. So the first requirement is to enforce Tom Lehrer's axiom: People who cannot communicate should have the good grace to shut up.

One good source of a bit of history of people faced with this kind of problem and from which some lessons might be drawn is -- of all places -- the history behind the Boy Scouts, the 'seige' of Mafeking - made famous by Shirley Pimple -- during the Boer War. The younger male residents were put to work under their own elected leadership at a lot of things not requiring carrying a gun and performed very well. Kind of early-day terrorism by a bunch of Dutch farmers riding plow horses in Kommandos which might well be a lesson of its own. The Brits of the period were bumbling incompetants (much like our people??) but blind pigs find acorns. Look up Kipling's 'Stellenbosch'.

Merging is too strong a term but working together is possible and probably necessary. But I strongly suspect that a successful operation will be characterized by a decentralized approach where groups are led by their own. This makes laison a major but necessary headache.

Think it thru Bert. Advocacy of arm-in-arm into the sunset is far easier than actually getting it done. And when the smoke clears, there is all that Health & Welfare traffic to handle.
Sells magazines but that is about all.

>>How do you know? "Radio and electronics" covers a very wide range. Do you >>know how to program a PLC?
>
>If you mean Programmable Logic Controller for "PLC," then no.

Well, there you have it.

>I'm not
>into control of big electrical motors or other industrial process machinery.

PLCs are a big part of "radio and electronics". Most industrial processes use them. Their sophistication has grown from simple relay-logic replacers to distributed control systems. Many use radio and/or fiberoptics for communications.

>I've learned and become accomplished on several programmable
>calculators and computers and know enough, but have not actually,
>programmed a PLA (Programmable Logic Array...had someone else
>do that). Why do you ask (as if readers didn't know...)?

The point is that "radio and electronics" is a very wide and diverse field.

>>But not everything. "Radio and electronics" covers a very wide range.
>>
>>There are undoubtedly areas of "radio and electronics" where you have more >>experience than I. Same for Cecil. And there are also areas where I have >more
>>experience than either of you - or both of you put together.
>
>How can readers "know" this?

The same way they "know" anyhting else - including your claims.

>Your only "expertise" is limited to your
>own claims and a write-up in the "Electric Radio" specialty mail-only
>periodical.

Incorrect. I've had other articles published in amateur radio journals - QST, to be exact.

Your only "expertise" is limited to your own claims and a few articles written decades ago for a now-defunct magazine.
>
>>So you claim. But you have very little experience in amateur radio. You have
>>no experience whatsoever as an amateur radio operator.
>
>So, you do not accept "third-party" "operators" communicating over
>amateur radio under control of a licensed amateur? :-)

Nope. The FCC makes the rules, and to them, "operating an amateur radio station" has a very precise definition. Your activites do not meet that definition. The simple fact is that you have no experience whatsoever as an amateur radio operator.
>
>Are amateur radio transmissions encrypted or otherwise made to
>deceive or change meanings of communications? I think you'd find
>THAT a lot more illegal...but I've not been illegal in radio operation in

>>the ARRL automatically discredit something?
>
>Ever think that your opinions are old, outdated, and belong to a
>minority segment?

Nope.

>Does being agreeable with the ARRL
>automatically indicate "you know what is best?" :-)

Nope. Neither does your knee-jerk rejection of such things make you "right".
You don't get praise so you try to damn all those who have differing opinions.
>
>>>Where am I stating saying "follow my direction, I am right?"
>>
>>You hold up your age as evidence of being right.
>
>No. EXPERIENCE.

No. AGE. You make a big deal about how old you are vs. how old I am.

>Experience in a lot of radio services as both
>military member and civilian.

But none as a radio amateur.

>Experience in seeing how large-scale
>decisions were reached and their justifications,

But none as a radio amateur, making small-scale decisions with limited
resources.

>all for a variety of communications that seems to be foreign for your thinking
of ham radio.

So? You provide us with lots of criticism of ham radio, but no positive vision.
No new ideas.
>
>>You've held up your age as evidence of being right. You use your claimed
>>experience in nonamateur radio as somehow qualifying you to pass judgement
>>on the amateur radio rules, methods and practices.
>
>I don't use JUST my age, but decades of observation of INDIVIDUALS
>within amateur radio and whether or not they used a mask of altruism
>over their personal desires versus those who actually looked towards
>the good of the whole.

Sounds like you want us to grant you the title of "expert by association". No deal ;-)
>
>>When people disagree, you make
>>fun of their names, jobs, and other characteristics. Why not just discuss
>>the issues?
>
>I would LOVE to get back to issues and subjects.

Then why all the name calling and abuse? Why make fun of your opponents the way you do?

>However, there are
>so many hams who are only interested in showing their "qualifications"
>in "knowing what is best," demeaning anyone who disagrees with them,
>and generally making fun of anyone who does not parrot the party line
>of the long-timers.

What does that have to do with YOUR behavior?
>
>>You also ridicule the accomplishments of those who disagree with you.
>
>Poor baby, suffering from "double standard syndrome" still?

>You have discounted, demeaned, tried to discredit my experience in
>radio that goes farther, extends for a longer time than your own total
>life experience.

When? Give us an example.

>Sorry, but you cannot hold yourself up as anything
>"more superior" in radio other than your morsemanship..

Why not? You don't know how to program a PLC - I do. That's part of "radio and electronics. QED.

>.but you
>insist on being the "superior" and get all upset when someone
>doesn't bow down to you or similar persons who claim to "know
>what is best" for just about anything.

Describing yourself, again.

>>No one is required to be a member of ARRL in order to be a radio amateur.
>
>True, over three-fourths of all US radio amateurs are NOT members.

Over 99% of all US radio amateurs are NOT members of No Code International, either.

Which group is more representative US of amateur radio?

>I don't know your "point" here and, evidently, you cannot under-
>stand why that majority of radio amateurs are NOT members. :-)

My point is simply that since ARRL membership is not a requirement, many will not join.

What is your explanation of "why that majority of radio amateurs are NOT members"?

>>I don't say that. I simply relate my own experiences, opinions, and facts.
>
>If you want such things accepted about yourself, you have to
>accept others' experiences, opinions, and facts.

Why? You don't accept my experiences, opinions, and facts - why should I accept yours?

>>Rather than treat me as an individual, you lump me in with all other
>>procodetest people, as if we are all the same.
>
>You PCTAs are individual but seem to be the SAME on the
>"reasons" for keeping the code test.

There you go. Bigotry, and ad hominem attack.

>>ANYONE who has an opinion about amateur radio policy, methods or practices
>>claims to "know what is best for amateur radio". For example, Carl
>>Stevenson,
>>Executive Director of NCI, thinks that total elimination of code testing is
>>best for amateur radio. He KNOWS it is.
>
>Incorrect.

No, absolutely correct. As much as I disagree with Carl, I do not think he would push for something he knew was not in the best interest of amateur radio. Carl may be mistaken but he's not intentionally trying to damage amateur radio.

You, on the other hand, are focused on somthing else...

>Carl is of that opinion as are all the members of NCI,
>licensed or not, US nationals or citizens of non-USA countries.

And they KNOW it's what's best.
>
>What you fail to understand (or don't WANT to understand) is that
>many members of NCI are already "vetted" in morsemanship (have
>taken tests proving their ability) but are against the code test as a
>REQUIREMENT FOR LICENSING.

I understand that perfectly well. Those folks are simply mistaken.

>They aren't against USE of
>morse in amateur radio activities, just against the code TEST.

Can you guarantee that 100% of those against the TEST are not against the USE? I think not.
>
>The PCTAs seem united in their major opinion for keeping the

>test and that is all tied up in "they had to do it so everyone else
>has to do it too."

Nope. Incorrect. Oversimplfication.

> Secondarily, their reasons are traditional in
>that the code test has never been absent in licensing, therefore
>"it should always remain." :-)

Incorrect again.
>
>>Is that bad? Lots of people do the same thing here. Or is it only bad
>because
>>I'm procodetest and procode, and you are not?
>
>Removal of the code test for a license will remove the single
>thing that you and other PCTAs use as an "award billboard" to
>"prove your superiority," morsemanship. :-)

Incorrect, yet again.
>
>When that is gone all you will have is your insistence to being
>"superior" is a long time spent using morse code.

Batting 000

>>Do you know what a premixer is?

>I'm not absolutely positive about ham radio "pre-mixers" although

>frequency conversion subsystem in a radio.

Almost correct.

In amateur radio use, it refers to a method of generating the local oscillator
signal for a receiver, transmitter or transceiver by mixing the signal from one
tunable and one fixed oscillator to produce a resultant tunable signal of the
desired frequency range. This is usually done so that a single-range tunable
oscillator can be used on several bands by mixing its output with that of a
crystal oscillator. The R. L. Drake R4/T4X family are a good example of
equipment using this method.
>
>>Perhaps you are jealous of the fact that I have actually designed and built
>>amateur radio stations and operated them on the air successfully for the

>
>Good grief, no! :-)

You sure spend a lot of time and effort demeaning them, if you are not.
>
>I could care less about your self-touted "abilities." I doubt if that
>was the original subject off-shoot, but rather another bit of bragging
>about yourself. :-)

I see. Only you have the right to talk about your accomplishments. All others
must be silent. ;-)

>>Amateur radio was growing before the Tech lost its code test, and continued
>>to
>>grow after that change. The actual effects are difficult to gauge due to the
>>effects of other changes such as the doubling of the license term.
>
>Technician class licensees now account for about one-third
>of all licensed US radio amateurs.

So? What's your point? How many hams were Technicians in 1991?

>Before you hop on another
>rationalization bandwagon, go to "Amateur Radio Newsline"
>and read that total US ham radio numbers have been relatively
>stagnant for two years. :-)

Their numbers are inaccurate.
>
>>I challenge you to provide examples of posts where I "discounted those,
>>dismissed them, never really regarded their existance
>>as meaningful in any way".
>>
>>Let's see you back up that claim.
>
>Are you "challenging" me to prove the obvious? :-)

I'm challenging you to actually post something other than empty claims ;-) ;-)

If you can ;-) ;-) ;-)
>
>>>Technician class licensees
>>>now make up a third of all licensees
>>
>>Yup. In part, that is because the FCC has been renewing Tech Pluses as Techs
>>for over two years now.
>
>I just knew you would attempt a rationalization somehow. :-)

Is it not a fact? Yes or no?

>>> and are also the least class

>>>"Gigahertz are for giga-squirts."
>>
>>That's not one of mine.
>

>It is, or was, a favorite of James Kehler, KH2D, formerly the
>guru of Guam.

I'm not him.
>
>>>"No lids, kids, or space cadets."
>>>
>>Is that what YOU believe? After all, you want an age limit (no kids)...
>
>No PRE-SCHOOL CHILDREN who don't have a grasp or under-
>standing of written questions.

Why? Have they caused any problems on the amateur bands? Broken any rules?
Gotten any NALs?

How do you KNOW they don't have a grasp or understanding of written questions?
Do you know the children involved?

Most of all, your recommendation was for an age limit of FOURTEEN. That's about
8th grade, not preschool.

>See the (now) "old" ARRL news
>page for two six-year-olds "passing ham tests" and shown with
>a nice, grandfatherly VE (who was very, very "honest" in "passing"
>them). :-)

Do you have ANY evidence that they did not pass the tests in accordance with
the rules?

Or are you just jealous because they did what you have not? Sure sounds like
it.
>
>Under the FCC regulations of now and then, there is no, repeat
>NO requirement, that SMALL CHILDREN must be overseen by
>adults while "legally" using their amateur radio license privileges.

Is this a problem? Can you name a single incident where a licensed radio
amateur under 14 years old violated the rules or caused a problem on-air
because of his/her age?

The truth is that many of the worst offenders in amateur radio, and outside it,
are about YOUR age. Like that guy Flippo.

>You won't even consider the implications of what can happen if
>small children operate by themselves.

Sure I will. Tell us about it. Then tell us how many times it has happened.

If anybody needs watching when on the air, it's folks of YOUR age bracket. ;-)

>None in here have done
>so in the past. Why not?

Because YOU have not shown it to be a valid concern.

>Isn't the "why not" answered by your
>simply wanting to discount what I bring up? I think so.

Incorrect.

>I also
>think that lends a great deal of hypocrisy to your own "fairness"
>and "honesty" in posting.

How? I have asked for examples of violations or problems caused by young radio amateurs before. You did not provide any. Yet you want an age limit of FOURTEEN (!) for a problem that does not exist.
>
>All you want to do is discredit any age barrier...because that
>comes close to the age YOU (or a lot of others) got into amateur
>radio.

Nope. Incorrect. Personal experience has nothing to do with it.

No age barrier is needed unless someone can show there is a real problem. There isn't one.

One of the most-repeated arguments against the code test is that all license requirements must show that they are necessary - that is, it must be shown that without those requirements, serious problems would result.

Apply that same logic to age requirements. What problems exist today that would be solved by age requirements? The answer: NONE.

If you want anyone to consider the age requirement idea, produce some evidence that the licensing of people younger than 14 causes problems in the ARS.

>You are applying your own personal standards as that
>which should apply to all others.

I am applying the standard of freedom and licensing by qualification. You have not shown any reason why there should be an age requirement for a ham license. None whatsoever. Why should anyone take you seriously?

You are applying your own anti-youth prejudice as a "standard" that would restrict others - but not you. And doing so with NO solid information to back up your anti-youth agenda.

It's clearly your jealousy at work.

Jim, N2EY

I agree 100% - unless we consider the "competition" to be Mother Nature.

>> Why are you so insistent on the standards and practices
>>of 70 years ago in amateur radio?
>
>How do you mean? What "standards and practices" of 1932 are you referring to?

Lennie the Creep will repeat that line over and over in the hopes that
SOMEone will believe him.

The only one "fooled" by Lennie's deceitful rhetoric is Lennie.

Sucks to be him!

>>No. EXPERIENCE.
>
>No. AGE. You make a big deal about how old you are vs. how old I am.

Right on, Jim. One moe time Lennie tries to tell us of his "experience",
only to be measured and weighed and found wanting.

>So? You provide us with lots of criticism of ham radio, but no positive
>vision.
>No new ideas.

Sure he does, Jim. By enacting his idea of a 14 year-old minimum age, we
can forget about using Amateur Radio in schools, thereby letting them get their
"electronics knowledge" from cellphones and "Game Boys".

>>I don't use JUST my age, but decades of observation of INDIVIDUALS
>>within amateur radio and whether or not they used a mask of altruism
>>over their personal desires versus those who actually looked towards
>>the good of the whole.
>
>Sounds like you want us to grant you the title of "expert by association". No
>deal

If Lennie's view is the "good of the whole", I suggest we spring Jack
Kevorkian and let him loose.

>>You have discounted, demeaned, tried to discredit my experience in
>>radio that goes farther, extends for a longer time than your own total
>>life experience.
>
>When? Give us an example.

Don't hold your breath waiting on that answer, Jim. Lennie get's his rants confused...forget's who he's talking to...

>>Under the FCC regulations of now and then, there is no, repeat
>>NO requirement, that SMALL CHILDREN must be overseen by
>>adults while "legally" using their amateur radio license privileges.
>
>Is this a problem? Can you name a single incident where a licensed radio
>amateur under 14 years old violated the rules or caused a problem on-air
>because of his/her age?

Lennie's been asked on several occassions to provide us with some sample of his own experience with children or adolescents in this regard.

Again...nothing.

>>You won't even consider the implications of what can happen if
>>small children operate by themselves.
>
>Sure I will. Tell us about it. Then tell us how many times it has happened.

If it was a "small child" who slipped into daddy's radio room and keyed up the rig while daddy wasn't there, then "small children" would be a problem.

BUT...(1) Pre-teen and teenage licensees have had some training or education on thier responsibilities, hence thier successful passing of the test (2) "Children" and adolescents have consistently proven that when given responsibility with trust and proper training, they hold thier own.

>>All you want to do is discredit any age barrier...because that
>>comes close to the age YOU (or a lot of others) got into amateur
>>radio.
>
>Nope. Incorrect. Personal experience has nothing to do with it.

I disagree, Jim. People who were given responsibility as youngsters tend to do the same with thier offspring, perhaps even moreso.

My (now 17) stepdaughter is an example. On more than one occassion she successfully cleared her disabled sister's aiway while feeding her.

I may not agree with her clothes styles or music choices, but I also know that she's demonstrated great maturity and clear thinking under stress.

Likewise my 10 year old. While I was doing CPR on Tater, Sam was at my feet helping to count cadence and checking pulse. For 15 agonizing minutes she was an adult. She'll be one for real some day, and I trust her already to "do the right thing".

>I am applying the standard of freedom and licensing by qualification. You
>have
>not shown any reason why there should be an age requirement for a ham
>license.
>None whatsoever. Why should anyone take you seriously?

Why indeed. No experience=no trust.

No doubt you "believe" Consumer Reports is on the up-and-up, always honest
100% of the time. Considering that the CR magazine doesn't carry ads, who
exactly PAYS for all their "testing?"

You didn't answer the remark about QST product reviews. Do you believe each
and every one of them is absolutely "honest" and technically without error?
If so, can you prove that?

>>The ARRL could NEVER do anything wrong, could it? :-)
>
>Sure they could. They've backed down on support of code testing. ;-)

INCORRECT. The ARRL took a NULL stand on code testing, neither support
nor "backing down." In a null opinion there is NO "up" or "down," just
NOTHING.

>>>Pro-code-test people are
>>>obviously the majority, as evidenced by the comments to 98-143.
>>
>> <insert 6 minutes of "BWAHAHAHA" guffawing in here>
>
>Ignorance of data posted by NCI people noted ;-)

Not "ignorance," just not emotionally-biased in favor of code testing
and the "I bin a ham fo fotty yars an evybody gotta do like me" sort
of tenure-inspired turf comments.

>>Gosh and golly, Jimmie, you ought to start up a class-action civil
>>suit against the FCC for "violating" their charter at not "listening" to
>>your "big majority."
>
>Gee whiz, "Lenover21", you ought to actually try to understand the process as
>explained by those who know more about it than you :-)

Those who have claimed telepathy "know more than me?"

What is little Jimmie's history with the FCC that he "knows" how they
decide things? He hasn't explained that yet after nearly two years.

>Keep out those not of the No Code True Faith, Who Know What Is Best For The
>Future Of Amateur Radio ;-)

Hmmm...let's see...the code test has never been absent from a license
test (for under 30 MHz privileges) and now the numbers of total US
ham licensees have been essentially stagnant for two years. From that
the PCTAs can "prove" that "code tests are 'good' for the future of US
amateur radio?"

Your favorite icon (code testing) keeps getting knocked off the wall, smudged
and dirtied-up, producing NO heavenly visions of prosperity for the US ARS
and you still demand adherence to it? Why? Because YOU say so?

>>NCI isn't an "all things to all amateurs" kind of
>>organization. They never were. Once we all achieve the desired
>>goals, aims, and objectives, the organization disbands, dissolves.
>
>I'll believe that when it happens. Will you stop posting here when code
>testing goes away?

Why? You won't stop boosting code testing in your demands for
everyone to Believe in YOUR Words as What Is Best.

>>>ARRL's requirement for a ham license in order to be a full member also makes
>>>sense, because it keeps the organization in the hands of hams.
>>
>>...or rather its Section Managers and, most importantly, its Board
>>of Directors. :-)
>
>BoD members are elected by popular vote of the membership masses.

Have you read the number of votes tallies in each election? That's
hardly "popular," is it?

Voting can ONLY be done by the ARRL voting membership. Those are
less than a quarter of all licensed US radio amateurs.

>How would you know any different?

I'm a reasoning human being, not a pseudo-religious fanatic who must cling to a belief system.

>>So, Mr. Democratic Principles At Work,
>>why aren't there more Technician Class licensees joining up to be
>>part of all the "fairness?"
>
>They don't see a reason to spend $39.

The REASON should be apparent enough, little Jimmie. The ARRL won't represent them as they do other classes...that is their clear perception. It's not a matter of "$39" it is a matter of just throwing away money to get nothing in return except a magazine.

You cannot envision that. To you, amateur radio is "working DX on HF with CW" and little more.

You belong in the 1930s. Have fun back there.

2150. Question Regarding Non-Licensee Transmission and 47CFR97.3

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-23 05:30:18 UTC
From: xtx99@aol.com
Message-ID: <20020723013018.00473.00000116@mb-da.aol.com>
Source record: 50014

Question Regarding Non-Licensee Transmission and 47CFR97.3
I would like to get my child interested in getting her license; I got my tech license recently. The question I have is: Can my non-licensed daughter hold and press the microphone by herself and talk assuming I'm right there as the "control operator" and that she (or I) identifies that I am in fact the "control operator" and my call sign is identified? I believe she would get more interested in the hobby if she tried it herself several times. I *think* the issue comes down to whether or not her pressing the mic is tantamount to her "operating" the radio.
A "control operator" is defined by 47CFR97.3 as "An amateur operator designated by the licensee of a station to be responsible for the transmissions from that station to assure compliance with the FCC Rules." Under this definition, I'm still the "control operator" because I'm the one there (at the "control point") responsible for the transmission and "manipulating the operating adjustments in the station to achieve compliance with the FCC Rules."
Any thoughts on this issue are appreciated.

Seems to me that someone with a top-class or second-from-the-top license class should have known better, or how did they make it that far eh? It may be a "perfectly reasonable" question for a brand new tech or older novice but.... Advanced license class licensee's have had some time holding their licenses by know and should know better.

In all that I have learned, I have done it 99.1% on my own through text books, experimentation and research. Shit, I wish I had the help of others like an Elmer. Too bad people around here (for the most part) seem to care less about the "Elmering" spirit.

Maybe if there was better "elmering" around here, with older hams teaching new and prospective hams the techniques, principles, and ham radio morals (the morse code mantra etc...) like THEY believe in, then *maybe* we would not have been in the position we are in now, with them bitching about everything. Also important would be getting involved in the structure(s) responsible for the changes that have occured in the past 5-25 years that seem to piss them off so bad....

and didn't "know enough to build a dipole". I had to rely on
> my Elmer for instructions on how to build a dipole.

I did learn that through texts but real knowledge of dipoles came from actual building them and experimenting with them. One of my "areas of interest OR knowledge" is the field of antenna theory. Maybe some day I will have an antenna of my own on the market. Who knows, crazier things have happened.

Hmmm, I resemble part of that statement, but it is not entirely true. Most ham emergency services employees do not carry their ham stuff while on duty, as their duties supercedes playing on the radio (regardless of licensure or mode of operation)

Also, the no-code tech license is the ENTRY point now to ham radio. Novices are no longer being issued, only re-issued to existing hams. I am quite sure that some do not upgrade, and I am quite sure that some do upgrade. I am also quite sure that some also are very capable of just taking the highest license class and passing the test regardless of when the test is issued (this year or the test of 30+ years ago or anywhere in between)

I am quite sure that these licensed individuals within the emergency services field have or will have a much greater chance of saving a life that some anal rententive, introverted old fart.

BTW.... they usually are called duty belts, not utility belts. I believe those are worn by construction workers/building trades/repair people.

>
> Two more: Draw schematics.

No argument there.... and the level of the schematics (not just block diagrams) should reflect the level of the license class. The tech should meet a certain level, and general even more advanced, and the extra should be able to draw out a schematic for at least full transmitter or reciever, or even more challenging, a transciever (sarc.).

>
> Two more: Essay answers.

Although I like this idea, there is too much possibility for the VEC's to interpret the answers "as they see fit" as opposed to some way of having some type of "talking point" list of points that must be listed within the essay answer. Fill in the blank may be also a good tool, as they would need to have the proper 1,2,3+ word answer to fulfill the question.

> Any thoughts on this issue are appreciated.

Yes, a non-ham can participate in the operation of an amateur station as long as a control operator is present. This is a form of "third-party" communications. There are some restrictions on international third-party communication; a third party cannot communicate with hams in nations with which we don't have a third-party agreement.

You don't have to annonce that you are the control operator, but it may stop a few of the inevitable questions from people who may be concerned that a non-ham is bootlegging on the ham bands.

Riley had a nice talk with the ARRL Board of Directors at its recent meeting. He told ARRL that the FCC expects to step up its activity on the 10-meter intrusion problem. He reiterated that to me in the "RFI" meeting John Phillips and I had with him the next day.

So far, the FCC has pretty much done everything that Riley has indicated they will.

I don't believe he said anything that was intended to get Larry more involved with amateur radio in any form, Brian. I don't think that Riley knows Larry, and even if he did, I don't think he would direct comments to the ARRL Board that he intended to influence Larry.

Dick, I read you 100% and quite agree to a certain point. But why not
give it a whirl. When you really think about it, only those who are
actually desireable will likely apply. (More'n likely the

"hobbyists.") No effort will certainly net us nothing. As for the rest...the heck with them.

> Jerry

Jerry Jerry Jerry,

You can do better than this. Mighty wide brush your wielding mister. Almost like saying that all Tar Heels are dumb country bumpkins, we all know that's not true...don't we? Hey Jerry, what's my malfunction? I'm a CBer and I don't speak like the prose above. I was a CBer long before I became an ARO so it's not like I learned my mannerisms OTA on 10 and brought 'em to 11, so what's the explanation? I like the code and don't go "QRT and on the side." (Nor have I ever been "destinated," for that matter. <ggg>)

Now I'll drop a dime (Ok, quarter.) on ANYONE causing interference or interloping on 10, 12, or ANY AR band...but I know that all CBer's dont speak like your example and I also know that there are plenty of fine decent folks that have, are, and will continue to come into AR via the CB. Some will leave the CB behind and some will continue to enjoy an occassional QSO on the CB. Do you really believe that they'll all say "tahn far!?" I'm not trying to bust chops and I'll give you the benefit of the doubt that you're not trying to bust mine...just give it a little thought please. Take care now.

That's pretty much what they do, besides going to meetings and
seminars about how to shift their paradigms and achieve Total
Quality Nirvana. Truthfully, I had my fill of that in the Air Force, and
am quite glad to be driving my bus, especially since it pays a lot
better than any entry-to-mid-level HR job, and the benefits are the
same. There's also a lot more job security since I'm a Union member.

>Engineering managers pick out who to hire and can anyway.

Typically they will do the interviewing, and recommend candidates for
employment, but final say would be in the hands of the HR department.
Of course, 99% of the time, the functional manager's choices would be
rubber stamped by HR, barring any problems the candidate may have
such as a poor employment record, a criminal record, etc.

>Driving a bus may actually be more interesting....

Definitely, to me, anyway. I've experienced life in the cubicles and
conference
rooms. I'm very happy to be in my bus, especially since every day is
different, and I get to interact with a lot of very nice people as opposed to
knowing them as data records on a computer screen or stacks of files.
I fill in as a dispatcher occasionally, since I learned the job through
my own initiative in helping the dispatchers whenever I'd come in early from
my run or have a long break. However, as long as I'm physically able to
do so, I'll stay in my nice quiet bus where I'm Captain of my own ship and
don't have some boy wonder boss who can't spell three-letter words breathing
down my neck.

Lennie:

Why don't you just go ahead and do that, then!

>Does Roll have a "human resources" job now?

Nope. I interviewed for one with my company, was offered the job, but it doesn't pay as well as being an operator, and the "office" people usually work 45 - 50 hr. weeks for 37.5 hrs of pay with no overtime. I had my fill of that bad deal in the Air Force.

>No, he says he
>is driving a bus. Nothing wrong with that except for the inflationary
>nomenclature of "paratransit specialist." :-)

That's what the company calls it -- however now they call us Paratransit Operators. Go have your fun with that one.

>Good luck on finding that job in "human resources," Larrie...

Thanks. Maybe some other time.

Cecil:

I wouldn't know about that. I've never seen an HT hanging from the spacesuit (made in Frederica, DE by ILC) of a NASA PhD physicist spaceperson. They usually keep their HT's stowed in an equipment case aboard the Space Shuttle or the ISS. Moreover, they use them for talking to school children -- not to report brush fires they just started with a gallon of unleaded regular and a Zippo.

The answer is Yes. She can hold the mic, operate the PTT button,
give YOUR call sign at the proper intervals (at least every 10 min.) and
she doesn't even have to mention the fact that you are standing beside
her, nor do you. You just have to make sure you ARE there to physically
take over should she start doing something that isn't right. This is
called Third Party operation, and it is done all the time.

>
>
> Jerry
>

Don't get too excited. Think about it. Roper Electronics is one
of a thousand selling this type of radio. I was at a truck stop on I-75
and went into the store a few months ago. There were all sorts of
modified radios, marine radios, ham gear, even imported amplifiers,
and the stuff was sitting right out in the open for sale. I got up enough
nerve and asked the clerk if I needed a license to operate a couple
radios and an amplifier I pointed at, and the guy said to me, "Who
knows who cares, it ain't nothing to worry about." Hams tend to think
radio consists of their ham bands. Tune outside the ham bands some
time and listen, especially in the 4,5,6,7,8, 10, 11,12,14, & 16 mHz bands.
Anytime of the day or night I can find CB and trucker style conversations
going on and never a call sign given. And no, I am not confusing this
type of comms with something legal, especially when you hear liberal
profanity and explicit sexual talk.

Maybe he should know better but he doesn't. Does that mean that Advanced
license class licensees should get to where they never ask any more
questions and therefore remain ignorant?

>You didn't answer the remark about QST product reviews. Do you believe each
>and every one of them is absolutely "honest" and technically without error?

QST product reviews are done (generally) by one person. That makes it
subject to the variances of opinion. Anyone who accepts a "product review"
authoried by one person as blunt fact is only fooling themself.

>If so, can you prove that?

No...but can you prove otherwise?

>INCORRECT. The ARRL took a NULL stand on code testing, neither support
>nor "backing down." In a null opinion there is NO "up" or "down," just
>NOTHING.

Non-sequitor, Lennie-ya-putz. The result was the same.

>What is little Jimmie's history with the FCC that he "knows" how they
>decide things? He hasn't explained that yet after nearly two years.

Still with the diminutives for people who have not done the same to you.

Putz-o-meter is at 8.0.

>Have you read the number of votes tallies in each election? That's
>hardly "popular," is it?

If it's 51 to 49, THAT is a "popular" vote. It may not be a landslide, but
it IS "popular vote" under current political terminology.

>Voting can ONLY be done by the ARRL voting membership. Those are
>less than a quarter of all licensed US radio amateurs.

Most elections in the United States are conducted by less than a majority
of the electorate, Your Creepiness. So what?

>I'm a reasoning human being, not a pseudo-religious fanatic who must
>cling to a belief system.

Wrong.

You a re a disgusting, dying, defeatest old man who is clinging to his OWN
"belief system", and intent to harrass and antagonize until God finally has
enough of your shenanigans and punches yor card for you.

Hopefully he has the clicker in his hand.

>The REASON should be apparent enough, little Jimmie.

More diminutives. Not a single one in here from Jim relative to you.

And you think no one notices YOUR behaviour, Lennie?

>The REASON should be apparent enough, little Jimmie. The ARRL
>won't represent them as they do other classes.

That is a lie. Pure and simple.

>..that is their clear perception.

I don't doubt that is the "perception" of a few. However it is NOT the perception of the majority.

Unlike you, Lennie, I am active in not one but three different radio clubs to one degree or another. In two of the clubs I have made the point of polling the NCT's about League membership and why they don't belong.

Of 38 responses I have received, only ONE was relative to "league policies". The other 37 were all "I am only active in local activities and do not care to join a national organization.

The choices, by the way, were:

(1) I am active only in local activities and do not care to join a national organization.

(2) I do no agree with ARRL policies and do not care to support them.

(3) I cannot answer as I do not know what the ARRL is or what it represents.

>It's not a matter of "$39" it is a matter of just throwing
>away money to get nothing in return except a magazine.

Of course you have this on good authority because you are.active in local Amateur Radio clubs or programs...?!?!?

>You cannot envision that.

Sound like YOU have the vision problem, Liar Lennie.

>To you, amateur radio is "working DX on
>HF with CW" and little more.

Please quote where Jim hs EVER said that.

>You belong in the 1930s.

Perhaps...then he can find your mother and introduce her to contraceptives.

>Have fun back there.

Guess he can borrow your "Back in 1953..." writings after that, eh? Just change the dates?

Steve

Absolutely! This is promoted at more than one "official" Amateur Radio
function. The WB2JKJ School Project in New York and almost any Field Day event
are two prime examples.

>I *think* the issue comes down to whether or not her pressing the mic is
>tantamount to her "operating" the radio.
> A "control operator" is defined by 47CFR97.3 as "An amateur
>operator
>designated by the licensee of a station to be responsible for the

>"control point") responsible for the transmission and "manipulating the
>operating adjustments in the station to achieve compliance with the FCC
>Rules."
> Any thoughts on this issue are appreciated.

It's not about who's "manipulating the controls", Jake. it's about who's
responsible. She can spin the dials all day long, but if she goofs up, it's
your responsibility! Show her how and let her have fun!

Maybe he thought the rules changed or such. Also there's the practical
issue of the odds of finding someone also using CW in a phone subband.
Common sense would say that he would have a better chance of having
a CW QSO in the data subbands than in phone subbands. Also there
is "good amateur practice".

Some of the hams don't worry too much about what happens outside the amateur bands - that's for someone else to complain about. I'm just waiting for an accident to happen on one of the lakes and the marine emergency comms get jammed. Sue Uncle Sam for a total lack of enforcement? I have to laugh. Yep, they eliminated the stiff licensing requirements for AM, FM, and television stations. Yesterday, one of the FM stations was broadcasting totally different music (it was supposed to be oldies, but was all foreign music). I tried calling the station (WBBF AM). Hmmmm ... the white pages said to call Heritage Media Corporation. Same thing for WBBF FM and WBEE. OK, so I looked for Heritage Media Corporation. No listing. Called 411 - yep, for a fee, they had it (should have hit the internet, especially since I'm always connected). Phone rang. And rang. And rang. Hmm... you could hear the ring change as the call was forwarded. A telephone recording from someone who will be out of the office until next Monday. Yep, fire everyone and keep a 'chief engineer' responsible for all of the local stations and one person to answer the phone for all of the radio stations - except, of course, when she is on vacation. Apparently the things run themselves. The computer must be running Windows the way it screws up occasionally (like over half an hour of dead carrier - that would have been serious 20 or 30 years ago; now, no one cares). Thankfully, I subscribe to an internet high speed radio service and I guess I'll have to go and hook the sound card into the stereo.

This not caring goes far deeper (and higher to boot) than many suspect. I sincerely hope you don't believe that when a manufacturer receives a million defective subassemblies made offshore that they either don't know about it or don't ship it. Yeah, right. I personally know better than that. Don't expect much from the government either. Mr. Bush has a few questionable past business transactions; Hillary Clinton was off the hook as far as Whitewater gate; but how does the average individual turn $3,000 into $100,000 almost overnight? Her husband was likely innocent; he was too busy playing fun and games in the oval office and I suspect he has before and likely continues now.

Myself, I sit on the fence. At times I wish they would finally get a budget and start listening and busting these folks - both the manufacturers and the users. Then again, I wish they'd make a nice 'export' radio running 500 watts FM on channels running from 54 to 60 MHz. That might raise a few eyebrows. Um, better make that class C am and ssb. At least the big businesses owning channel 2 television stations would have the deep pockets to go after the renegades.

> Quality Nirvana.

I've seen times where upper management gets HR to dictate stuff
that "passes the buck" of responsibility onto the employees. Like
"You must fill out your timecard accurately, and ignore your
bosses' orders to falsify it". Yeah, right, I want to piss off my
boss, who decides my raises and if I survive layoffs or not, over
something like that. It was just a ploy by upper management to
shift blame to the employees if the defense dept catches the falsehoods.
Other times HR has to pitch a new benefits package that turns out
to be worse than the old one.

Justin's post could be a troll, but I doubt it. It too clearly represents the state of CB today. There sure ARE a lot of "new radios" on the market. That's because "10 meters" has become synonymous with "high-end CB" in consumers minds. For this you can thank manufacturers like Ranger, Galaxy, and Connex, and dealers like Copper, EEI, and the scores of truck stops and CB shops across the USA. Go to "Roper Electronics" web site and check out the descriptions of the 10 meter radios: "full coverage!", "320 channels!" they advise. (Guess whose band many of those channels are in?) Since "freebanders" traditionally take over spectrum that they claim is not being used, I can speculate that, as the sunspots go down and there is less ham activity on 10 meters, the operation of these "10 meter CB" radios on ham bands by truckers and casual users will only increase.

Well, many police and fire depts have programs for citizens who
want to help/ be hero. So they can be guided into being trained
and used where they can actually provide assistance and not screw
thing up and cause problems. And not try to be the hero by himself
but assist in making the entire operation get the situation under
control. "I took care of mundane H&W so the pros could spend
their efforts saving the lives".

In contrast to Mr. Hare's view, there are some operators who would say NO to what you describe. They would demand that YOU have to be the one who keys and unkeys the transmitter and that YOU come on and identify, saying "<call> with third-party." In other words, the fact that the unlicensed third party has her hand on the key isn't consistent with you keeping control.

[Those people need their butt-plugs removed or something!]

I do agree that the SPIRIT of the regulation is that the licensee is responsible and that as long as he/she can cut off the communication should something go wrong, that is sufficient.

My point is: Watch out - there are anal-retentives out there that may say otherwise.

I assure you I am fully aware of those problems. However, getting something
done about it has to start somewhere. Now, about the truck stop you were
visiting. Did you send this info to Mr. Hollingsworth? Did you get one of
those
"cashier" tickets that you're supposed to take to the counter and send it in
to
him to prove that these radios are on sale? I don't know about you, but I
will
do it in a skinny minute. In order for something to be done about this,
somebody
has to get off their duff(s) and DO something instead of throwing up our
hands and saying it's up to "somebody" else.

I am told that Mr. Hollingsworth just recently met with ARRL's RFI Committee and assured them that these kinds of enforcement actions are going to increase.
Indeed, they HAVE been increasing, and I literally rejoice everytime I hear about
one. Yes, there are thousands of illegal vendors, and, again, it has to start some-
where. If nothing else, listen to the lower end of 10 meters when traveling. Record, photograph, and write down truckers' info that you can positively identify
as operating on our bands. Drop a dime when you get home. If we as the rightful
users of these bands want to protect our bands from encroachment, then we must
get involved and not sit around whining about it and saying we can't do anything
about it. One, we can USE those bands, keep 'em busy, send CW right over the
top of the SOBs and send CQs. Then we can report ANY illegal activity to the
proper authorities. Perhaps, letters to our REPs in Congress wouldn't hurt in light
of the good press ham radio has gotten since 9/11? But don't just sit there; DO it!

Are there 2 way radios on the busses? Up in Syracuse in the late 70's
their busses had them. As dispatcher I suppose some of the drivers
might try to talk before someone else finishes, and other operational
radio errors. Any you have to teach them the realities of half duplex.
My boss, during teleconference calls, would sometimes try to talk and
not realize that the other end couldn't hear him as he didn't trigger the
VOX. I told him "They can't hear you if you can hear them at the
same time". I don't think he ever quite got that.

2197. Re: More on 10 and 12 meter operations, emerg coms

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-23 21:06:24 UTC
From: Jerry Oxendine <joxendi@bellsouth.net>
Message-ID: <qxj%8.438$ND5.155707@e3500-atl2.usenetserver.com>
Source record: 49911

Perhaps, I am being a mite strong, but the truth is, I have never seen CB Radio do
anything but keep up with Smokey and provide a diversion to kids out on the town (tho that't sort of died down). Prior to 1973, I can remember CB Radio as
a good, reliable local means of comms, and I spent many a night sitting on the edge of my bed with a cigarette in one hand, mike in the other. Afterwards, it
went to hell in a handbasket, and I reckon the increase in lawlessness plus the in-
cursions onto the ham bands has me pretty damned mad at the whole thing. I am going to go ahead and say it (probably to my regret): if it were up to me, I would
sunset CB Radio on 27 MHZ so fast it'd make your head swim! But it isn't up to
me, so..... Actually, I didn't come to ham radio via CB Radio. I began as
a cadet in Civil Air Patrol back in 1964, and my introduction to radio was basically thru military-type protocol--read that as no-nonsense, direct, and to the
point. After having that drilled into me, it was something of a fingernails-scraping-
on-the-blackboard kind of reaction to anything-goes, "cutsey", phrases, and pseudo-important introductions ("You got the OOOOOONNNNEE Sloop Dog
on this h'yar end") along with the endless, empty talking that doesn't say anything.
For example, I began to hear "Shore thang thar, mercy me thar, gre't day, mercy me, I know whutcha mean, shore do thar-----all that nonsense just to say the word "yes". To me, it made no sense, and to this day, I cannot just go on and on
and on about something.

Of COURSE, I know everybody on CB isn't that way, and I have listened to some of that "freeband" activity where many of the CB operators try to copy the hams and aren't so redundant with their lingo, but I even resent THAT be-
cause 1) they are illegal, and 2) they are "pretend" hams. Can't win, eh?

I know that many operators DO get their first exposure to radio via CB, and that
they aren't intellectually challenged in any way. Again, I guess I let my resentment
towards *some* facets of it to show thru even when I try not to.

Source record: 49913

There have been a few 'problem children' within the amateur ranks; however, the percentage of 'problem children' is FAR FAR less than with the unlicensed population. I'm starting to get tired of hearing how 220 MHz should be turned over to MURS and how 10 should be turned over to CB. There exists a simple access to the amateur bands - pass a test and obtain an amateur license. The marine band is for exactly that, not hobby use. The amateur bands are exactly that - many HF amateur bands are exclusively amateur allocations. Others are shared with other users. None are for unlicensed operation. Of course, this may prove to difficult for some; you can always go to rec.radio.cb and argue why class C amps are fine for am and ssb or how long coax should be.

Perhaps, but there won't be anything in the way of F layer reflection. With only occasional sporadic e, this will make the job of locating the offender MUCH easier. You will see a lot of the stuff disappear with the sunspots. What good will 320 channels do if you can't hear anything beyond 20 miles (ok, 70 miles for the 100 watt units - but they have to hear something respond ...). When a signal is 10 dB over S-9, you will likely be hearing someone within 5 miles or so ...

I will admit that I'm questioning Ranger's rigs. I don't know of many amateurs (none, actually) who have a 10 meter or 10/12 meter radio. Now, they advertise in QST with a 150 watt pep radio. I don't think they have a world-class receiver in the thing, but that probably isn't important. Fact is, for something like 50% more, you could have a rig that runs 1.8 MHz to 440 MHz. This could prove interesting.

I ran out of gas on the interstate one night when my gas gage stuck
and I tried and tried to raise a ham on VHF and HF. It was freezing
cold and I switched over to CB and got a good Samaritan to help me
within five minutes.

From: k4yz@aol.com (Steve Robeson K4YZ)

>QST product reviews are done (generally) by one person.

Actually, not really. The review starts with testing in the ARRL Lab. Mike Tracy, KC1SX does the testing, but as the Lab Dad and a former test engineer, I wander in quite a bit and he and I discuss the findings. It then goes to a reviewer, but more often than not, especially for a high-end rig, others are also given a chance to use the radio and communicate their impressions to the reviewer. In some cases, notably the comparative reviews, a team of reviewers each get the rigs in turn. The actual reviewer writes the initial article.

The text then goes to the Product Review Editor, Brennan Price, who often follows up on various things that are said about the radio, and, in the course of editing it, imprints his own style and opinion into the review text. You have also been seeing more sidebars by the Lab staff about some of the technical issues. Mike Tracy and Zack Lau in the Lab also get to see the final copy.

About a week before it goes to press, a copy of the review is also sent to the involved manufacturer, primarily to give them an opportunity to correct factual errors. An example might be found if we said that a radio lacked a certain feature, but the feature existed, but was not documented in the users manual (that happened). The manufacturer often tries to get us to make some changes to the text, of course. Sometimes we agree and make the changes; often we don't. A good example of such a change was found a few years ago. A Japanese manufacturer had left off a common feature on an HT. The text originally said, "A pox on Yaecomwood for leaving off this feature." The manufacturer explained that this would be translated into Japanese to say "We hope the manufacturer develops sores on their bodies for leaving off this feature." The text was changed. :-)

The QST supervisor, Managing Editor and the Chief Operating Officer also see the text and often make changes.

Nonetheless, I have seen technical and non-technical errors in the reviews. Most are omission, and none are intentional, IMHO.

>I agree, and it is appreciated--both FCC's AND ARRL's efforts in this arena.
>They just hit an outfit in Wisconsin, I see by the RainReport! GO Riley!!!

That was probably a hit by the nearest FCC field office. I have been surprised to see how busy those guys are. See:

http://www.fcc.gov/eb/rfo/ActAct.html

I see a number of actions that appear to have been taken against freeband operators or sellers of illegal equipment.

I hope to take advantage of this level of FCC field-office activity and get a few actions against the electric utility companies that have not been effectively addressing line noise. Riley has been writing the initial FCC letters (to those companies that don't respond to ARRL's letters), and he will help pass the baton to the field for investigation.

Whew, that's not what I would have expected. I grew up in a (two-)company town where lots of guys thought exactly the way you do, but they were also the guys who kept electing socialist party candidates who were slightly left of Chairman Mao to the embarrassment of even the other socialists in the province let alone rational people. The behaviours became so closely associated in my mind that I spent half a lifetime avoiding those types of jobs along with those types of politicians.

I have traveled in convoy with several other antique car owners and
we have used CB quite well in maintaining car to car communications.
We would use any channel but 9 or 19 and if we got into an area
where some local yocal was annoying we'd just wait a few minutes and
we'd be out of the local's reach.

Cheers,
Bill K2UNK

All depends on the resources.

You talk as if the ADA installation was "yours", but in fact it was designed,
built and paid for by others, and you simply played a role in its operation for

a time.
>
>>>Could you or have you
>>>built a 1 KW transmitter?
>>> A 5 KW transmitter?
>>
>>I'm sure I could build those.
>
>Oh, YES, you could...and have it be RELIABLE in 24/7 operation!

Sure - with adequate resources.
>
>But, you HAVEN'T done so, have you? :-)

So what? Must one have done something in order to talk about it? You have never held any class of amateur radio license, but you expound on the subject at great length, and claim you could get one. In fact, you said on January 19, 2000, that you were going for an Extra "right out of the box". But, you HAVEN'T done so, have you? :-)

>>>A 15 KW
>>>transmitter? A 50 KW transmitter that was used as a 40 KW
>>>output linear amplifier for SSB?
>>
>>Probably. All depends on the requirements and resources available. The
>>principles are the same.
>
>It also depends on far off the deep end you go in being foolish
>on what you "could do" using the "same principles." :-)

Nonsense. Is there a fundamental difference in principles between a 50 kW transmitter and a 50 W transmitter? Or are they both governed by the same "radio physics"?

>>Standards and practices that work need not be changed unless something
>better
>>comes along. If it's not broke...
>
>Some don't realize that SOMETHING BETTER HAS COME ALONG.

Like what?

You seem to be claiming to KNOW WHAT IS BETTER for amateur radio.
>
>Some don't realize that 70-year-old standards and practices
>are getting old, careworn, obsolete.

Which standards and practices? Be specific.

Hams have been using SSB since the early 1930s, for example.

>>>How do you wish to be addressed?
>>

>>Call sign or first name. Like practically everyone else in this ng.
>
>Are you sure you don't want "Sir" or "Your Excellency" or
>something noble like that? Maybe "Your Worship?"

No. Sounds like you want that sort of address. You're not going to get it.

>>>The word "transceiver" is a contraction of "transmitter-receiver."
>>
>>The meaning of the word in amateur radio use includes more than that. Like
>>using the same variable oscillator system for both transmit and receive
>>frequency control.
>
>Wow! High-tech...for around the time you were born...became rather
>standard after a few years.

Have you ever designed and built a multiband amateur radio HF transceiver from
scratch, using only your own resources? I've desined and built several.

>>>Transmitter frequency generation by "methods other than multiplication"
>>>has been done for years in commercial or military radios.
>>
>>Did you invent it? I think not.

Like a lot of other institutions, government and unions attempt to freeze time and enshrine the past to their ultimate detriment. So what else is new?

Living as I do in the most Republican state in the Union, even exceeding Utah, but the only US state to remove the protective coloration and hiding places for pols by eliminating one house of its legislature -- in other words, like Canada -- I have it driven home regularly that structure does not prevent stupidity it just makes it easier to see.

So we have such jewels as 'right to work' which simply causes more labor strife and a term-limited, session-limited group of Neanderthals that can spend more money to less effect than virtually anyone but California and managed to hand virtual control of the Unicameral to a black Senator from Omaha who fortunately is the smartest guy in the room, temporarily.

Spare me the ideologue of any stripe.

Dick NBK

Jerry, at times I have thought you were a bit strong in your wording; however, in looking at the FCC site, I am beginning to see the light. The following is a snip from the FCC website:

Ironically, these rescue operations occurred during a weeklong exercise known as Operation Mayday in which Commission agents participated along with the Coast Guard and numerous Los Angeles-Long Beach region marine search and rescue personnel. Operation Mayday was instituted to locate and identify hoax distress callers operating over marine band VHF-FM radio. It has been estimated that that such hoax distress calls in the Los Angeles-Long Beach area cost taxpayers over one million dollars annually in Coast Guard deployment of personnel and equipment not including the additional expenses incurred by back-up local or state search and rescue teams.

I had to double-check that one. Over ONE MILLION dollars annually just in the Los Angeles-Long Beach area! Good grief, I had no idea that many people were that stupid. False distress signals convey a maximum of six years. Anyone pulling that stunt should get that six year sentence. They will likely never repay the costs (which they are supposed to). What some idiots consider fun is quite unbelievable.

Exactly. Obviously, some drastic measures need to be taken to teach these
knot-
heads a lesson. Their antics are NOT funny!

>Are there 2 way radios on the busses?

Yes, actually two of them. We use the Orbit CAD/AVL system, which
gives us two-way voice and data messaging capability along with
GPS vehicle location.

>Up in Syracuse in the late 70's
>their busses had them. As dispatcher I suppose some of the drivers
>might try to talk before someone else finishes, and other operational
>radio errors. Any you have to teach them the realities of half duplex.

A lot of our dispatchers have a problem with that. They can't get used
to the fact that it takes the radio system a few milliseconds to come
on before they start talking; therefore they usually clip off the first part
of their transmission. And a lot of times it's simply because they
can't coordinate their mouths with the mouse button.

>My boss, during teleconference calls, would sometimes try to talk and
>not realize that the other end couldn't hear him as he didn't trigger the
>VOX. I told him "They can't hear you if you can hear them at the
>same time". I don't think he ever quite got that.

I've always thought VOX was a cheap substitute for full duplex operation.
It is almost never properly implemented or utilized, at least in ham radio.

>Too bad the astronauts are all so inferior to you, eh?

Cecil:

Like I said, as astronauts, they're still PhD's. As hams, unless
they are Pre-Restructuring, code tested, and CW-using Extras,
they aren't in my league. I have a habit of comparing apples to
apples. You always choose to do the Mensa thing, which is to
compare apples to aluminum siding -- all the while claming to be
a master of applied logic.

Being an astronaut requires years of post-graduate study and the
requisite doctorate, plus additional years of rigorous, mission-
orientated training usually received as part of military service.
Being a ham radio operator, especially in the Post-Restructuring
Era, involved a few hour's worth of effort in studying for some
very easy multiple-choice tests and a maximum 5 WPM code
test which doesn't result in the development of an ability to use
the code at a useful proficiency level. The two are not the same.
All astronauts can be hams, but not all hams can be astronauts.
Astronaut hams use their ham radio privileges mainly to talk to
school children from space, thus inspiring them to seek out
technically-oriented careers as a result. This is all well and good,
but the communications capability they employ *as* hams is
primitive compared to what they have at their disposal on the ISS
or the Space Shuttle.

>Egads Larry, are you a Democrat now?

Cecil/Dennis:

No, I've hardly turned into a Democrat. I work in a closed shop, so Union membership is not a choice, but a necessity. And, fortunately for me, this type of work is one of the few where I believe unions still have a valid and necessary influence. The work we do does not lend itself to automation, and will always require the services of dedicated, hard-working employees. And, since the Union mechanism is already in place, I may as well take advantage of it.

From a purely political point of view, the ATU seems not to be particularly "Communist" to me. In fact, our local seems to be particularly management-friendly -- we still have some fairly draconian work rules such as involuntary overtime, stingy vacation/personal days, etc. But without the union, we would probably not be getting anywhere near the pay and benefits we enjoy, so it's basically a wash.

And such nonsense was virtually unheard of before CB went off the deep end,
and then regulators turned their back on it. It's more than clear that such crap
is self-engendering and self-perpetuating. The idea that communications and
communicators need qualification, direction and regulation didn't come from
nowhere for no reason.
It IS encouraging to see FCC once again with the big stick in hand.

Dick

Both Collins Radio and RCA Corporation did that in military SSB transceivers
before the Drake company had such a product.

If you want to make a BIG deal over the word "premixer" in radio, fine. Few
others in radio do. They are content with simply thinking of the "frequency
control" section and knowing it almost subconsciously. The audio recording
industry uses "premixer" much more than hams. :-)

>>>Perhaps you are jealous of the fact that I have actually designed and built
>>>amateur radio stations and operated them on the air successfully for the
>>>past 35 years.
>>
>>Good grief, no! :-)
>

>You sure spend a lot of time and effort demeaning them, if you are not.

Jay-suss...you really are putting yourself on a great big granite column
for all to see and admire.

Okay, at about age 13 (14?) you "designed and built amateur radio stations."

No problem, you were a child prodigy.

Now you know all about programming PLCs for process control and think
that is an "important" attribute for radio amateurs. What ever happened to
the prodigy?

>>Technician class licensees now account for about one-third
>>of all licensed US radio amateurs.
>
>So? What's your point? How many hams were Technicians in 1991?

I can safely say that the number of NO-CODE Technicians in 1990
was ZERO. :-)

Why do you hate Technician class licensees so much?

>>Before you hop on another
>>rationalization bandwagon, go to "Amateur Radio Newsline"
>>and read that total US ham radio numbers have been relatively
>>stagnant for two years. :-)
>
>Their numbers are inaccurate.

Of course. :-) They seem to disagree with your opinions. :-)

>I'm challenging you to actually post something other than empty claims ;-)

They aren't "empty." You are too lazy to verify them since you don't like
them. Tough.

>Most of all, your recommendation was for an age limit of FOURTEEN. That's
>about 8th grade, not preschool.

Isn't that about the age YOU were at when "designing and building ham
stations?"

>>See the (now) "old" ARRL news
>>page for two six-year-olds "passing ham tests" and shown with
>>a nice, grandfatherly VE (who was very, very "honest" in "passing"
>>them). :-)

>Do you have ANY evidence that they did not pass the tests in accordance with
>the rules?

Only on the basis of remarks of four teachers with experience in K-6
classes when shown a written copy of the Q&A pool. Dubiousness
at the "honesty." A LOT of dubiousness.

Why do you want to make a big deal of this? You want to bicker over something that happened years ago? Of course you do. You love living in the past.

>>Under the FCC regulations of now and then, there is no, repeat
>>NO requirement, that SMALL CHILDREN must be overseen by
>>adults while "legally" using their amateur radio license privileges.
>
>Is this a problem? Can you name a single incident where a licensed radio
>amateur under 14 years old violated the rules or caused a problem on-air
>because of his/her age?

Sigh...not without reading every damn report in the FCC Reading Room.

On the other hand the ARRL news carries reports of a lot of children
OVER 14 who violated the rules, causing problems on the air.

>The truth is that many of the worst offenders in amateur radio, and outside
>it, are about YOUR age. Like that guy Flippo.

I was born in 1932, flip-out. Do the math: 69.

Oh, what the hell, flip-out, I'm a US military veteran too...you like to spit on
them like they aren't worthy of your consideration.

>If anybody needs watching when on the air, it's folks of YOUR age bracket.

Do you have proof of this, flip-out?

Okay, you show everybody where they can see the FCC violation that I made
at any time, in any radio service. Go ahead, kid, make everybody's day.

Ah, so now "differing opinions" equate to "knee-jerk rejection?!?"

I'm NOT looking for "praise," old-timer...YOU are. You know it.
Nearly every other reader knows it. You get pissed off every time
someone doesn't approve of CW or the thousand and one jingo
phrases of the ARRL in print.

>No. AGE. You make a big deal about how old you are vs. how old I am.

I'm not trying to pose like an eightysomething old-timer guru with a 1x2
"from the old days."

>But none as a radio amateur, making small-scale decisions with limited
>resources.

Small-scale is as small-scale does. You are definitely in the small-scale
category.

Oh, and the HRO catalog prices rather belay the "limited resources,"
doesn't it?

>So? You provide us with lots of criticism of ham radio, but no positive
>vision. No new ideas.

I provide you and other pompous types with tons of negative criticsm
about you and your cronies putting down larger-scale folks. You don't
like it. Tough. It isn't going to stop now.

Where was it written on Mose's tablets that I "must provide positive
vision?!?" If you want good vision, go to Lens Crafters...most stores
have opticians for checking the Mark I eyeballs.

>>I don't use JUST my age, but decades of observation of INDIVIDUALS
>>within amateur radio and whether or not they used a mask of altruism
>>over their personal desires versus those who actually looked towards
>>the good of the whole.
>
>Sounds like you want us to grant you the title of "expert by association". No
>deal ;-)

You can't hear very well.

Look again, you'll find that YOU are the one demanding the "expert" title, all
for having small-scale thoughts about other people.

>>I would LOVE to get back to issues and subjects.
>
>Then why all the name calling and abuse? Why make fun of your opponents the
>way you do?

Damn...I forgot again...You are god. You can make fun of folks whose scale
is larger than your own and demand that they worship your small-scaleness.

>What does that have to do with YOUR behavior?

My fault, god, mea culpa. I pray small-scale forgiveness for small-scale
sins against small-scale icons and catechisms.

>Why not? You don't know how to program a PLC - I do. That's part of "radio
>and electronics. QED.

Quod erat dumthinking, old-timer.

You show us where process control machinery is essential for amateur radio
operations and should be a glorious, wondrous topic for amateur policy.

Goodie, now we have a Topic with a capital D where we will be lectured by
a guru with 32-year extraness about the Importance of Programmable
Logic Controllers. Who knows, maybe he "programs" them with
International Morse Code?

>>>No one is required to be a member of ARRL in order to be a radio amateur.
>>
>>True, over three-fourths of all US radio amateurs are NOT members.
>
>Over 99% of all US radio amateurs are NOT members of No Code International,
>either.

>
>Which group is more representative US of amateur radio?

Who knows? Less than a quarter of US hams are ARRL members and
the ARRL didn't get what it wanted in Restructuring, did it?

NCI is solely a political-action membership organization built around one
goal, the elimination of morse code testing for any amateur radio license.

The ARRL stance on morse code testing is NULL, nothing, they don't
commit one way or the other. The IARU is on record as eliminating the
ITU-R recommendation.

If the ARRL is "the most representative organization" then it isn't
"representing" anyone but the 170K or so membership, is it? Even then
there are ARRL members who side with NCI's aims and goals. Old-timers
in the ARRL (31.4% are age 51-60) seem to be very much for the code
test...but the ARRL has NO OPINION. Is that "representation?"

>My point is simply that since ARRL membership is not a requirement, many will
>not join.

Oh, do you now want legislation to FORCE US amateurs to be ARRL members?!?

>What is your explanation of "why that majority of radio amateurs are NOT
>members"?

You can't read well, can you? I ALREADY wrote why. The majority can't see
having to join an old-timer club that doesn't listen to them, agree with them,
just lectures to them about the "old days" of "old ways," the "proper way" to
"have fun" with the old ways like the old-timers did in the old days.

>Why? You don't accept my experiences, opinions, and facts - why should I
>accept yours?

I don't accept knowledge of process control machinery or PLCs to control
big electric motors as being anything worthwhile in amateur radio. If you
think that is in any way a "qualifier" for your "expertise," go grab a P&ID
and have a ball...somewhere else.

I don't accept being lectured about the "importance and necessity" of
morse code testing in amateur radio when morse code testing isn't a
mandatory mode of operation or used in most other radio services.
I don't accept the "importance and necessity" when it can't be proven
with any validity except that it was once very important.

I don't accept being told that vacuum tube circuitry is the ultimate high
technology in radio when the solid-state era began four decades ago.
I say to those who worship vacuum, go join NASA and be an astronaut
where the REAL vacuum exists.

I don't accept lectures on the "old ways being important" from fortysomethings
trying to sound like pompous eightysomethings. No one should.

I don't accept even more lectures from poor injured prides and egos who
can't take an opposing opinion. Nobody should. But they wail and whine
and puff their chests and make billboards of their mighty deeds and
challenge others to dumb down to their level.

>>You PCTAs are individual but seem to be the SAME on the
>>"reasons" for keeping the code test.
>
>There you go. Bigotry, and ad hominem attack.

Oh, MY, aren't you the terribly sensitive person!!!

Note the qualifier word "seem" in my quote above. Did you see any
specific reason given? No.

Ah, but you are once again in "god" mode...ANYTHING said that
doesn't agree with you is "bigotry and ad hominem attack!!!"

Jimmie, clearly, the newsgroup environment is NOT for you. Go.
You will feel better for going.

>No, absolutely correct. As much as I disagree with Carl, I do not think he
>would push for something he knew was not in the best interest of amateur
>radio.
>Carl may be mistaken but he's not intentionally trying to damage amateur
>radio.
>
>You, on the other hand, are focused on somthing else...

I am focussed on eliminating the morse code test for an amateur radio
license. It's not a coincidence that NCI is focussed on the same.

You still haven't explained why eliminating the code test is "not in the
best interest of amateur radio." Explain it.

Tell us why you wish to exclude so many US citizens from an enjoyable
hobby. Rationalize why you wish to keep the below-30-MHz spectrum
an exclusive playground only for those who can test for morse code.
[you haven't explained it with any validity yet so I use the word
"rationalize" because that is what you will write]

>>What you fail to understand (or don't WANT to understand) is that
>>many members of NCI are already "vetted" in morsemanship (have
>>taken tests proving their ability) but are against the code test as a
>>REQUIREMENT FOR LICENSING.
>
>I understand that perfectly well. Those folks are simply mistaken.

Ah, yes, "simply mistaken."

The "god" syndrome again. YOU know what is "correct" and what is
a "mistake."

>>They aren't against USE of
>>morse in amateur radio activities, just against the code TEST.

>
>Can you guarantee that 100% of those against the TEST are not against the
>USE?
>I think not.

You are misdirecting again. Can you guarantee that 100% of the PCTAs
"know what is best" for anything but themselves?!? Same misdirection.

If you need to answer (you seem to NEED to answer everything), then
say simply that you don't agree with them.

>>The PCTAs seem united in their major opinion for keeping the
>>test and that is all tied up in "they had to do it so everyone else
>>has to do it too."
>
>Nope. Incorrect. Oversimplfication.

With no other valid reasons for retention of the code test, the personal
desires come to be the baseline.

>> Secondarily, their reasons are traditional in
>>that the code test has never been absent in licensing, therefore
>>"it should always remain." :-)
>
>Incorrect again.

No, you are incorrect. Some adamant morsodists have stated that
the code test was always in ham radio and (usually "by God") it
should always remain. In here.

>>Removal of the code test for a license will remove the single
>>thing that you and other PCTAs use as an "award billboard" to
>>"prove your superiority," morsemanship. :-)
>
>Incorrect, yet again.

False "correction." See Larrie Roll's postings, an avowed PCTA.
You may see others of the same opinion. Try KH2D for a good
sampling in older days of the newsgroup.

Jimmie is making too many mistakes in here. Tsk, tsk. This is
NOT good. If he keeps on making mistakes then no one will ever
take him "seriously." Boo hoo.

2227. The Amateur EXPERIENCE According To Uncle Jimmie

Newsgroup: rec.radio.amateur.policy

writes:

>Incorrect. I've had other articles published in amateur radio journals - QST,
to be exact.
>
>Your only "expertise" is limited to your own claims and a few articles
>written decades ago for a now-defunct magazine.

Magazines. Plural. Microcomputing bit the dust, I think. BYTE
is still in Peterborough and selling ads like there's no tomorrow.
I don't know what happened to Call-A.P.P.L.E. other than that
Washington organization dissolved. McGraw-Hill's biweekly
Electronics morphed into three separate trade magazine, isn't a
subscription trade type anymore. EDN is hanging in there, though.
Been there, done those, have the bylines. :-)

Well, you can count RCA Corporation as "defunct" I suppose. :-)
They got sold to General Electric and GE sold out parts of it to
other companies. There went a bunch of technical reports and six
programs of mine in the Central Engineering Software Library.

Of course, with the RCA sale (they came out of GE, went back to
GE in an ironic Worm Ouroboros kind of way) the 1.6 GHz final
SECANT transponder version with those eight SAW filters which were
literally matched to the final mixer output with 1/8" coax lines. DoT
got the hardware, we engineers got a souvenir Final Report. Too
bad, was state-of-the-art in 1974. :-)

I doubt you will accept publication in the SAS in-flight magazine
under a pseudonym. Those are non-radio humor pieces and you
don't seem to understand much humor in here. :-)

>>>So you claim. But you have very little experience in amateur radio. You have
>>>no experience whatsoever as an amateur radio operator.

Yes, Mr. Einstein, no unlicensed-in-amateur-radio person will have
much experience legally operating a radio in the amateur radio
service! [how brilliant your deduction...should I call you Holmes?]

I can truthfully say that I have NEVER operated on the amateur radio bands without a fully-licensed, vetted, a-number-one, ichi-ban amateur radio licensee! With a few slight exceptions while working on DoD contracts where the US government was Prime for those frequencies.

It should also be pointed out while you are busy pointing fingers that EVERYONE before they were licensed in the amateur radio service did not have any amateur radio operating experience. Not legally, not in the terms you've outlined. EVERYONE unlicensed would have ZERO "experience as an amateur radio operator." :-)

The unfortunate (for you) situation is that I HAVE had a fair amount of radio experience in operating as well as maintaining, tuning, measuring, designing, testing them since 1953. Note...that includes frequencies in VLF, LF, MF, HF, VHF, UHF regions as well as the L, S, C, X, K, and 4mm microwave bands. I'm not including the non-allocated frequencies above 300 GHz. :-)

>Nope. The FCC makes the rules, and to them, "operating an amateur radio
>station" has a very precise definition. Your activites do not meet that
>definition. The simple fact is that you have no experience whatsoever as an
>amateur radio operator.

De jure, not de facto, Sherlock. Nearly all of my radio experience has been as a PROFESSIONAL. Heh heh, that seems to piss off a lot of newsgroupies in here.

I wasn't talking about operating as an amateur, Sherlock.

I've been trying to talk about GETTING INTO amateur radio via the TEST REGULATIONS. The morse code test. The TEST.

ITU-R S25.5...eliminate or re-write to delete the international recommendation of morse code testing for an AMATEUR radio license.

>>Are amateur radio transmissions encrypted or otherwise made to
>>deceive or change meanings of communications? I think you'd find
>>THAT a lot more illegal...but I've not been illegal in radio operation in
>>any radio service, ever.
>
>How can readers "know" this?

They can read Part 97, Title 47 CFR, to find explicit regulations prohibiting encryption or methods to obscure transmission information.

They can read the Federal Register, read every law book in any law library, every single newspaper column covering police arrests, and whatever anything to find out "I've not been illegal in radio operation in any radio service, ever."

I can't PROVE something that doesn't exist. It just doesn't exist. :-)

>>occupied the entirety of a small airfield. It took a Battalion to staff
>>everything. I'd say it was the "big leagues." :-)
>
>Of course you would. You did it, therefore it must be Important ;-)

"I" didn't say it was "important," the Chief of Staff of the United States Army said the work of the 8235th was important enough to give the unit TWO Presidential Unit Citations...for the work we did after the formalized truce in Korea in July 1953.

From what experience can YOU judge the US military, Jimmie? Old 1960s anti-war Vietnam propaganda? Why do you want to spit on US military veterans?

>>When I began in those "big leagues" there was also a requirement
>>to be able to "close with and destroy the enemy."
>
>How did you do that from Tokyo? ;-)

From ANYPLACE the President wanted us. Of course, with NO military experience whatsoever, you "know" all about warfare, the Cold War, and so forth. You "know" all about the military because you memorized the last-of-the-war-surplus brochures. Pin a medal on you and call you hero...

>>I was using "standard phonetics" in 1955...when the US military
>>converted to the NATO Phonetic Alphabet, which was quickly
>>adopted by the ICAO the same year. Not a problem. Minor
>>memorizing and being careful not to use the old set. :-)
>>
>>>Are you against amateurs having standards?

I'm against some amateurs spitting on US veterans. What was "wrong" with the NATO Phonetic Alphabet? Do you even know what NATO is? Do you know what ICAO stands for?

What are you hooked on? Rugs? Anti-military feelings? Trying to relive the 1930s?

>How do you mean? What "standards and practices" of 1932 are you referring to?

Of the ENTIRE 1930s. Such as "CW gets through when nothing else will." A phrase fine for the 30s. Dumshit jingoism in this new millennium. The NTS is another, like it is a "needed by the nation" sort of "emergency communication system?" Pfui.

>>>>>I have no idea what that is supposed to mean.

It is time you started understanding. You don't boss the US ARS because you have 32 yarns as an extra or a swelled head (or whatever is swelled) because you want to be a real old one-by-two "expert." Get with the program.

It's a new world with new people with new ideas and willing to try something new. I could care less if you are a fortysomething trying

vainly to be an eightysomething revered amateur guru. Pose as an eighty-something in print all you want, but you didn't pioneer radio when you started or when you operated as an amateur or when you got your first computer and started being a pompous morsodist modemite.

2228. BIG Motors in Ham Radio! (was:Freebanders...)

>
>Well, there you have it.

Okay, Mr. Wizard, explain how them (Toshiba?) PLCs are really neat and in
demand for ham shacks anywhere.

>>I'm not
>>into control of big electrical motors or other industrial process machinery.
>
>PLCs are a big part of "radio and electronics". Most industrial processes use
>them. Their sophistication has grown from simple relay-logic replacers to
>distributed control systems. Many use radio and/or fiberoptics for
>communications.

Aha! Everyone can get the drift of this conversation...:-)

You probably work with PLCs and/or process control equipment, right?
To you they are a BIG THING. Especially if it pays your salary.

Oh, wow, the days of Piping and Instrumentation Diagrams on Solar
One, the 50 MWe experimental generating station in the CA Middle
Desert. No thanks, had all the P&IDs and 4-20 mA sensors I care to
have. MacDac was prime, Rocketdyne did the boilers and energy
storage.

You want MOTORS in radio? Okay, no problem. Been there, done
many.

Let's start with lil bitty motors in R/C servo assemblies. Those are
"programmable" through the CMOS microprocessor in the transmitter
(see the neat Futaba sets). Not a problem...did the actuator
"programming" of the separate elevons of a V-tail glider to be controlled
like a conventional rudder-elevator. A no-brainer, really. :-)

I had a neat little "bridge" circuit for DC motor control in 1962, was going to be part of a big R/C project...except the sparking noise of the motors themselves made the receiver sensitivity go to pieces. Circuit worked just fine. Didn't have Hall-effect sensors or other techniques for non-contact motor energization that exist today.

OK, how about the famous mechanical Autotune monstrosity in the Collins R-392 receiver? FUN to see the mechanism move while changing channels, almost a visual treat. 24 VDC motor, simple servo system. No real "programming" there. :-)

How about a BIG Collins Autotune transmitter? The one with the HUGE electric motor in the bottom of rack #2? Had one of those at ADA back in '53 but it was exchanged for a Wilcox about four months after I got there. The "programmer" was the resident civilian engineer. QSY via a telephone dial controller circuit. I did it just twice. Very automated. :-)

Nothing beat the Western Electric LD-T2, a 4 KW PEP SSB (12 KHz BW commercial mode) wonder that had Class A stages up to the final which ran AB2, individual stage compartments, and a dozen-plus small AC motors to do bandswitching and variable tuning. Ten frequencies preset by a bank of 120 potentiometers, 12 pots per frequency controlling the servo motor positions. A joy to QSY and could be done in less than a minute, the delay due to the motor speed. Stable, reliable, looked and felt like it could work forever. ADA eventually got 6 of them.

Want REALLY BIG motors in radio? Heh, I've seen 30 HP air-movers used to exhaust air in hot electronics rooms of the old vacuum tube variety...and the conventional 1/4-horse blowers by the dozens. They were programmable by a single SPST switch. :-)

How about military radio motors, like the old vehicular HF-VHF sets with automatic antenna tuners? You know, the first radios to use the "Bruene" amplitude-phase detector in 1955? Those didn't have little microprocessors to "program" them automatically, they just did their thing all by themselves with enough RF.

>>I've learned and become accomplished on several programmable
>>calculators and computers and know enough, but have not actually,
>>programmed a PLA (Programmable Logic Array...had someone else
>>do that). Why do you ask (as if readers didn't know...)?
>
>The point is that "radio and electronics" is a very wide and diverse field.

Your "point" is simply one-upmanship, Mr. Wizard. You want to make a Big Thing out of PLCs. Okay, you did. Now what?

Have you ever programmed a Microchip PIC? I'm just beginning to learn now that I have a PC program development program. A case of memorizing the Instruction Set...which none of the micro makers have ever really standardized. This is for some radio applications, Jimmie, not

factory process control.

Have you had any microprocessor or microcontroller programming
practice? Note: Most PICs are microcontrollers since they have a
variety of "peripheral" circuits built-in such as D-to-A converters. My
experience is limited to the 6800 series, the 6500 series, the
ubiquitous Intel 8051 of a decade ago, the first of the RCA COSMACs,
and some limited experience in small routines for the Intel '86 line in
PCs. Oh, and a LOT of FORTRAN. I did do one small Assembler
routine for the IBM 360 which also worked on the Spectra 70...too
expensive to play with in 1973 on a time-share system...but it worked.
At the time (the late 70s and early 80s) it was politically incorrect for
an engineer to do "hard" (Assembler) programming, about the same
for typing one's own written drafts (would have put the secretaries
out of work or something, heh heh heh).

Can you do a good flow chart for computer instructions? Those apply
equally to microcontrollers. Think of it as the "schematic" for a
program. I'm SURE Cecil can after all those years at Intel in digital
work (and a few patents).

>>>But not everything. "Radio and electronics" covers a very wide range.
>>>
>>>There are undoubtedly areas of "radio and electronics" where you have more
>>>experience than I. Same for Cecil. And there are also areas where I have
more
>>>experience than either of you - or both of you put together.

Of course you do...you've just claimed that.

Now, how does PLC application apply to ham radio?

Tell us where a 4-20 mA current loop fits into some ham shack and
where is it featured? Can QST draw P&IDs? :-)

>>How can readers "know" this?
>
>The same way they "know" anyhting else - including your claims.

Any reader can find out by simply ASKING QUESTIONS...via e-mail
if they don't want to be public about their question.

I've had some shared correspondence on programming microprocessors
that way over BBSs and then the Internet since 1984. If one shares
Assembler or high-level program routines, exchanges lines of code,
folks will KNOW whether the parties know how things are done.

If one does the "challenge" bit first and doesn't back it up, then all that
has been done is a lot of big-mouth hollering. :-)

Back around 1985 I was doing some simple 6502 Assembler routines
and gave the listing in a public message, asking for help on resolving
a problem from a claimed "expert" on Lynzie's Motherboard BBS.
The guy suddenly "had to leave town on a trip" and "couldn't answer

right away." :-) Another who didn't claim expertise got into the exchange and asked about the Status Register settings (which I should have checked and didn't, my fault). I added a couple SR instructions and the routine worked fine. I thanked him in public for a good tip. The "expert" wasn't heard of again in public on that BBS. :-)

With some bonus money from work I was looking into wide-coverage HF receivers in the early 80s. Went to the L.A. HRO (then in Van Nuys) for a hands-on feel of them. So...all the major critters have 10 Hz resolution in tuning but the PLL reference is 1 KHz...how does that work was the question posed to at least three "expert" hams at that HRO. Now, I'd only done a couple PLLs in my experience up to that point and I was curious as to how it was done. If the price tag is above $500 for a little box I damn well want to know what I'm buying. Nobody seemed to know anything except the advertising phrases. :-)

One of the "experts" did show me the instruction manual for an Icom IC-R70. It DID have a general explanation, enough to satisfy me to figure it out for myself. Could I get a xerocopy of a couple pages? No. But I could do some quick sketching (on my own paper) for details. Wow, helpful! :-) The manual went back into whatever box it was from and I went home to do an analysis of it. The fine resolution comes mainly from digital division within a three-loop complex PLL system (not just one PLL) and a tie-in to the internal microprocessor which links the front-panel control to the PLLs. There was an essentially similar system in the Kenwood and Yaesu receivers...but no detailed info. I bought the R70 and it still works fine. It fit under the dash of the '82 Berlinetta Camaro just dandy...but the Camaro is gone...not enough interesting HF anymore to justify putting a mount in the '92 Cavalier wagon.

Yes, I know that DDS (Direct Digital Synthesis) is now the "preferred" way to go. I KNOW about DDS in general and recommend Bar-Giora Goldberg's "Digital Frequency Synthesis Demystified" (LLH Technology Publishing, Eagle Rock, VA, includes a CD with all text plus programs) for anyone else to see how PLLs and DDSs can be done.

There's a REASON that so many manufactured ham rigs use DDS frequency control as opposed to "old" PLL method, but it isn't tied up in those radios being "ham" types...other radio applications also have the DDS while others use PLLs. The reason is cost to build and being able to make more profit.

Now all of the above gets far away from motors, doesn't it? :-)

Of course. The simple reason is that MOTORS only apply to things like moving large masses today (rotatable antennas)...and maybe the electric wheelchairs of the ancient long-timers who've sat so long in front of their radios engaging in "radio sport." :-)

Go to the Jackson Brothers new site (www.mainlinegroup.co.uk/jacksonbrothers/index.htm) and find out about obsolesence in certain

areas of technology. Nice history pages for old-timers' nostalgia lust.
Good products brought back, but not all of them. The uses of
mechanically-variable "condensers" aren't as big as they once were.
Those great Jackson dial drives won't be back. Tuning for frequency
control is now digital...all the way from the tuning knob's encoder to
the PLL or DDS loop whose final frequency control is through an
electrically-variable semiconductor capacitance junction. Better
control, more accurate control, greater stability than the old mechanical
methods. That requires understanding New Technology. Well, NEWER
at least. Some don't seem to have progressed much beyond the level
of 1970. :-)

If you want to brag about PROGRAMMING anything, fine. A lot of folks
are into programming Microchip PICs for a lot of purposes in radio
applications. The program development software is FREE, works on
PCs or Macs. PIC microcontrollers are available in dozens of different
types at quite low prices. Fun projects await for those who don't mind
thinking and planning before hauling out those "Greenlee punches." :-)

Okay, now YOU show us how PLC programming "expertise" applies
to radio applications...and how inexpensive those Toshiba PLC
modules are... :-)

>
>>Your only "expertise" is limited to your

"Check out our new VHF AMPS!!! We saw your response on our survey and we responded. Thank you for your opinions!"

Look at H&Y Electronics, a site filled with the usual CB stuff, i.e. CB amps, "export radios", instructions for mods that'll get you 'extra channels", X rated tapes (I kid you not) and now....VHF AMPS. Can't figure out why a CB dealer is selling amps that cover all kinds of weird frequencies...42-47 mHz...150-160 mHz...160-170 mHz....420-440 mHz...etc. There's not a single piece of ham or commercial gear on the site except for CB's. But according to them, customers want these amps. What would truck drivers be using VHF/UHF amps for? Any guesses?

In the Andersonian Rules-of-Engagement, one must wonder what Lennie's hassling Larry over jobs has to do with the Morse Code test issue.

Damned if I can tell, but hey...It's Lennie's rules.

Lennie, if it ain't about radio, what's it about if not an attempt to discredit those with whom you obviously disagree on a personal level?

More Anderscum "Do As I Say, Not Do As I Do" rhetoric.

Putz.

>If you want to make a BIG deal over the word "premixer" in radio, fine.

Lennie-to-English translation:

"I don't need to let my testicles get dragged around the pavement like
that again..."

>Few
>others in radio do. They are content with simply thinking of the "frequency
>control" section and knowing it almost subconsciously. The audio recording
>industry uses "premixer" much more than hams.

Nice attempt to get away from the stinging Lennie. Ineffective from
avoiding it, but nice try.

>Jay-suss...you really are putting yourself on a great big granite column
>for all to see and admire.

And this would be different from the marble one you try to put yourself up
on, Lennie?

>>So? What's your point? How many hams were Technicians in 1991?
>
>I can safely say that the number of NO-CODE Technicians in 1990
>was ZERO.

That's ALL you can say "safely", and does not answer Jim's question.

>Why do you hate Technician class licensees so much?

Why did you hate having sex with your mother, Lennie?

>They aren't "empty."

Yes..they are.

>Why do you want to make a big deal of this? You want to bicker over
>something
>that happened years ago? Of course you do. You love living in the past.

WHOOOOOHOOOOOO! ! ! ! ! ! !

Lennie, you insufferable creep, I DARE YOU to NEVER mention your 1950's era
HF experiences EVER AGAIN.

To do so is to simply make yourself more piriful and more hipocritical
than you already are.

What a PUTZ!

2235. A Dare For Lennie

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-24 07:36:25 UTC
From: k4yz@aol.com
Message-ID: <20020724033625.17857.00000357@mb-mn.aol.com>
Source record: 49949

Actually, it's three dares. The first is to get the Amateur Extra he said he was going to get.

The second is to deliver the copy of the July 2002 "Ham Radio" magazine that he insists is being published delivered to me.

The third, after reading this LennieQuote:

Subject: Unca Jimmie Shows Us How
From: lenover21@aol.com (Len Over 21)
Date: 07/24/02 01:44 Eastern Daylight Time
Message-id: <20020724014434.25170.00000188@mb-fr.aol.com>

In article <20020722231402.07768.00000226@mb-mw.aol.com>, n2ey@aol.com (N2EY) writes:

>Do you have ANY evidence that they did not pass the tests in accordance with >the rules?

Only on the basis of remarks of four teachers with experience in K-6 classes when shown a written copy of the Q&A pool. Dubiousness at the "honesty." A LOT of dubiousness.

Why do you want to make a big deal of this? You want to bicker over something that happened years ago? Of course you do. You love living in the past.

"You love living in the past"...Whooya! What a QUOTE Lennie!

Here's the dare....STOP reciting to us your 1950's era HF experience while serving as a radio clerk in rear-area Japan. Do it..try...DON'T "live in the past", Lennie...Your words now, remember?

Now...not ONE MORE WORD on it, lest you violate your OWN caveats, Yor Putziness!

Let's see how long Lennie can go without one mention of "ADA" or his war record in rear-area Japan. We'll see how long he can go without "living in the past".

I give it 3 days. Four at the outside.

73

Steve, K4YZ

2236. Lennie's Agenda

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-24 08:09:09 UTC

Subject: Book of Miccolis; an Epistle to the Morsodists
From: lenover21@aol.com (Len Over 21)
Date: 07/24/02 01:44 Eastern Daylight Time
Message-id: <20020724014437.25170.00000189@mb-fr.aol.com>

>I'm NOT looking for "praise," old-timer...YOU are. You know it.
>Nearly every other reader knows it. You get pissed off every time
>someone doesn't approve of CW or the thousand and one jingo
>phrases of the ARRL in print.

No, not "every other reader knows it".

Nice try at trying to create a "silent majority", Lennie. Maybe "MegHz"
and Brian will chime in though. Might even dig up the Illinois Buttblaster.
Now there's company I know I'd enjoy being in...

>>No. AGE. You make a big deal about how old you are vs. how old I am.

>I'm not trying to pose like an eightysomething old-timer guru with a 1x2
>"from the old days."

Neither's Jim, but I know you wish people thought he did.

>I provide you and other pompous types with tons of negative criticsm
>about you and your cronies putting down larger-scale folks. You don't
l>ike it. Tough. It isn't going to stop now.

So here we have it...the sole substance of Lennie's being here. His own
perceived "bruised ego" on a revenge rampage.

Jim does nothing of the sort save for YOU, Herr Anderscum, and that is a
direct result of YOUR demeaning, denigrating, belittling and antagonistic bile.

Jim Miccolis has NEVER made a single accusation, sleight or innuendo that
even remotely looks like anything Lennie alleges.

Just more lying...just more threats...just more antagonizing bile.

>Where was it written on Mose's tablets that I "must provide positive
>vision?!?" If you want good vision, go to Lens Crafters...most stores
>have opticians for checking the Mark I eyeballs.

Whew..there's some "real engineer" talk for you.

>Look again, you'll find that YOU are the one demanding the "expert" title, all
>for having small-scale thoughts about other people.

I would LOVE to see the quote wherein Jim "demands" any title, Lennie.

The rest of the NG is watching, too...Now, you made the assertion...

BACK IT UP.

>>Then why all the name calling and abuse? Why make fun of your opponents the
>>way you do?

>Damn...I forgot again...You are god. You can make fun of folks whose scale
>is larger than your own and demand that they worship your small-scaleness.

Here we have typcial Andersonian rhetoric. Of course the rhetoric is in asserting that he (Lennie) is "bigger" than anyone else here. A clear case of "I consider myself better than you" from the fella who accuses almost everyone with an Amateur license of doing the same thing.

Lennie, on what SCALE are you "bigger"...??? In one of those "house of mirrors" at the arcade? Telling all the ladies you have "ten big ones", when you were actually measuring in centimeters?

>You can't read well, can you? I ALREADY wrote why. The majority can't see
>having to join an old-timer club that doesn't listen to them, agree with them,
j>ust lectures to them about the "old days" of "old ways," the "proper way" to
">have fun" with the old ways like the old-timers did in the old days.

What "majority", Lennie?

You are not a member of a single Amateur Radio club or organization, yet YOU are asserting what the "majority" of them believe in? You got this from who? Brian? Loyd Davies? Your astrologer or Tarot reader? A Wayne Green editorial?

From what reasonably reputable source did this information about what the "majority" of NCT's believes in come to you, Lennie? NCI?

We'll be looking for you to back that one up too.

Lennie, you keep belittling Amateur Radio in general and anyone who dares to question your "wisdom" in particular, yet it's nothing more than a mean-spirited, antagonistic attempt to cover your own "bruised ego".

It's shameful.

If you represent "professional radio engineering" the same way you assert any one of those of us YOU claim "represents Amateur Radio" when you are being disparaging, then WHO would want to go into it?

You're just a hateful putz.

2237. Where's The Beef, Lennie?

>Okay, Mr. Wizard, explain how them (Toshiba?) PLCs are really neat and in
>demand for ham shacks anywhere.

Hmmm...nothing here about the Morse Code test issue.

>You probably work with PLCs and/or process control equipment, right?
>To you they are a BIG THING. Especially if it pays your salary.

Nor here....

>Oh, wow, the days of Piping and Instrumentation Diagrams...(SNIP)

Not here either...

>You want MOTORS in radio? Okay, no problem. Been there, done
>many.

Nawwww, Lennie, we want PEOPLE in radio. Thankfully that leaves YOU out.

>Let's start with lil bitty motors in R/C servo assemblies.

That must be from that radio service created "strictly for recreation".
Still not addressing the "Morse Code test issue.

>I had a neat little "bridge" circuit for DC motor control in 1962...(SNIP)

There's more of that "living in the past" thing Lennie accuses others of
being stuck in, but can't seem to get away from himself.

>OK, how about the famous mechanical Autotune monstrosity in the
>Collins R-392 receiver?

More old stuff. Seems Lennie is waaaaaay back in the past.

>Nothing beat the Western Electric LD-T2, a 4 KW PEP SSB
>(12 KHz BW commercial mode) wonder that had Class A stages
>up to the final which ran AB2, individual stage compartments, and
>a dozen-plus small AC motors to do bandswitching and variable
>tuning.

Could this be OUR Lennie, reminiscing about OLD radios?

Naaaaaaah.....he wouldn't belittle others for that and then do it
himself....WOULD he..?!?!

>Your "point" is simply one-upmanship, Mr. Wizard.

A diminutive reference in a sentence highlighting a post wherein everything was nothing more than Lennie exerting his "Did It First, Did It Better" rhetoric.

Whew...

>Have you ever programmed a Microchip PIC?

Do we care? Does it answer any of the questions of the Morse Code test issue. Lennie?

>Now, how does PLC application apply to ham radio?

Now how does any of your "been there done that" rant address any Amateur Radio POLICY issues, Your Selfimpressedness???

>Okay, now YOU show us how PLC programming "expertise" applies
>to radio applications...and how inexpensive those Toshiba PLC
>modules are.

And YOU show US where any of that had anything AT ALL to do with Amateur Radio policy or practice, Lennie.....

"Check out our new VHF AMPS!!! We saw your response on our survey and
we responded. Thank you for your opinions!"

Look at H&Y Electronics, a site filled with the usual CB stuff, i.e.
CB amps, "export radios", instructions for mods that'll get you 'extra
channels", X rated tapes (I kid you not) and now....VHF AMPS. Can't
figure out why a CB dealer is selling amps that cover all kinds of
weird frequencies...42-47 mHz...150-160 mHz...160-170 mHz....420-440
mHz...etc. There's not a single piece of ham or commercial gear on the
site except for CB's. But according to them, customers want these
amps. What would truck drivers be using VHF/UHF amps for? Any guesses?

[expletive deleted]

>..you really are putting yourself on a great big granite column
>for all to see and admire.

How? All I'm doing is relating a few experiences and accomplsihments.

You keep telling us about your early-1950s HF military radio experiences in
Japan. Looks like another "do as Lenover21 says, not as Lenover21 does" double
standard things.
>
>Okay, at about age 13 (14?) you "designed and built amateur radio stations."

Simple ones, yes. Built receivers even earlier.
>
>No problem, you were a child prodigy.
>
Nope. Just a kid with an interest in amateur radio.

>Now you know all about programming PLCs for process control and think
>that is an "important" attribute for radio amateurs.

Nope. You've got it all wrong.

PLCs are part of "radio and electronics". The subject of PLCs was brought up to demonstrate that "radio and electronics" is a very wide field.

There is as much need for hams to know about PLCs as there is for hams to know how to design and build 50 kW transmitters.

>What ever happened to the prodigy?

I wasn't a prodigy. But I did manage to get a couple of EE degrees and an interesting career in electrical engineering. Ham radio was instrumental in leading me to that career.
>
>>>Technician class licensees now account for about one-third
>>>of all licensed US radio amateurs.
>>

Their numbers disagree with those provided by the FCC.
>
>>I'm challenging you to actually post something other than empty claims ;-)
>
>They aren't "empty."

Yes, they are.

>You are too lazy to verify them since you don't like
>them. Tough.

You are the one making the claim, so it's your job to back it up.
>
>>Most of all, your recommendation was for an age limit of FOURTEEN. That's
>>about 8th grade, not preschool.
>
>Isn't that about the age YOU were at when "designing and building ham
>stations?"

About that age is when I started. Is that a problem? Why do you hate children so much?
>
>>>See the (now) "old" ARRL news
>>>page for two six-year-olds "passing ham tests" and shown with
>>>a nice, grandfatherly VE (who was very, very "honest" in "passing"
>>>them). :-)
>>
>>Do you have ANY evidence that they did not pass the tests in accordance with
>>the rules?
>
>Only on the basis of remarks of four teachers with experience in K-6
>classes when shown a written copy of the Q&A pool. Dubiousness
>at the "honesty." A LOT of dubiousness.

In other words, NO. You don't have ANY evidence that they did not pass the tests in accordance with the rules other than some third parties' OPINIONS.

Kids can do some amazing things.
>
>Why do you want to make a big deal of this?

Why do you? You're the one who posted "no kids, no lids, no space cadets". You're the one who recommended an age limit of 14 to the FCC in reply comments on 98-143. You're the one who claimed that all you want is an end to code testing, when in fact you want the new and unnecessary restriction of age limits.

>You want to bicker over something that happened years ago?

You claim to want to "discuss issues". Age limits for a ham license are an issue that you brought up.

>>>Under the FCC regulations of now and then, there is no, repeat
>>>NO requirement, that SMALL CHILDREN must be overseen by
>>>adults while "legally" using their amateur radio license privileges.
>>
>>Is this a problem? Can you name a single incident where a licensed radio
>>amateur under 14 years old violated the rules or caused a problem on-air
>>because of his/her age?
>
>Sigh...not without reading every damn report in the FCC Reading Room.

In other words, NO. You can't cite a single problem, but you want to prevent all kids under 14 from getting a ham license. That's an unnecessary restriction.
>
>On the other hand the ARRL news carries reports of a lot of children
>OVER 14 who violated the rules, causing problems on the air.

Most of them are closer to your age than to 14. So your age limit idea would not solve any problems but would create a new and unnecessary restriction.

>>The truth is that many of the worst offenders in amateur radio, and outside
>>it, are about YOUR age. Like that guy Flippo.
>
>I was born in 1932, flip-out. Do the math: 69.

Flippo is in his 60s. Much closer to your age than mine. Much, much closer to your age than to 14 - or 6.

Flippo is also unlicensed.

Now I must ask, how can you generalize a whole group of people based upon one other person's opinion of you? There is a close parallel to this, it is called racism. If one person of another race did something wrong to you, do you consider the whole race bad?

>
> >I am referring to this question in the environs of the field of amateur
> >radio only.
>
> So am I.
>

Thats cool, just wanted to make sure. There may be legitamite reasons why someone else may actually be superior to you, totally unrelated to amateur radio. Hell, there is a ton of people that are superior to me in amateur radio, (which I will not argue) as well as in my field of employment; firefighters and medically trained personell. They are called officers and paramedics. I am working on achieving those levels as well as future upgrades in my amateur radio life.

(BTW... looked ya up on QRZ.com..... I thought you were a hell of alot older that you appear in the picture..... :)

Bootlegging on 49 Mhz?
MURS/Marine?
FRS?

Heck there are a bunch of "empty" frequencies in the old publice service bands, as those legitimate folks get relocated to 900 Mhz trunked systems or digital. The old equipment usually is either scapped or sold dirt cheap. Many hams buy this stuff to convert to neighboring ham bands. Some of the best ham repeaters around, are running 20 yr. old Motorola and GE commercial radios. Since the radios are so cheap, many "other" people buy them too to create their own "private" business band. Illegal of course, but if they keep a low profile, nobody even notices, much less cares.

>>>of 70 years ago in amateur radio?
>>
>>How do you mean? What "standards and practices" of 1932 are you referring
>to?
>
> Lennie the Creep will repeat that line over and over in the hopes that
>SOMEone will believe him.

Steve,

There's nothing to be gained by referring to "Lenover21" as "Lennie the Creep" or other such names. All that does is lower your behavior to his level.

Why not simply discuss the issues? Note that such diversions as name calling distract from the question: "What "standards and practices" of 1932 are you referring to?"

>No. EXPERIENCE.
>>
>>No. AGE. You make a big deal about how old you are vs. how old I am.
>
> Right on, Jim. One moe time

(Lenover21)

>tries to tell us of his "experience",
>only to be measured and weighed and found wanting.
>
>>So? You provide us with lots of criticism of ham radio, but no positive
>>vision.
>>No new ideas.
>
> Sure he does, Jim. By enacting his idea of a 14 year-old minimum age,

>we can forget about using Amateur Radio in schools, thereby letting them get
>their electronics knowledge" from cellphones and "Game Boys".

Then focus on that issue. I'm open to the idea of age limits IF it can be shown
that the lack of them causes problems for the ARS. So far that has not been
shown.

>>>You have discounted, demeaned, tried to discredit my experience in
>>>radio that goes farther, extends for a longer time than your own total
>>>life experience.
>>
>>When? Give us an example.
>
> Don't hold your breath waiting on that answer, Jim.

(Lenover21)

> get's his
>rants confused...forget's who he's talking to...

That is the reason for my question. Everyone makes mistakes. If such
discounting and demeaning exists, it should be simple to provide examples of it
here.
>
>>>Under the FCC regulations of now and then, there is no, repeat
>>>NO requirement, that SMALL CHILDREN must be overseen by
>>>adults while "legally" using their amateur radio license privileges.

>of his own experience with children or adolescents in this regard.

> Again...nothing.

That's the key point. The most basic justification for any restriction is
avoidance of bad things that would happen without the rule. What problems exist
today in the ARS because of the lack of an age restriction? None have been
presented.
>
>>>You won't even consider the implications of what can happen if
>>>small children operate by themselves.
>>
>>Sure I will. Tell us about it. Then tell us how many times it has happened.

So far, NOTHING.
>
> If it was a "small child" who slipped into daddy's radio room and keyed
>up the rig while daddy wasn't there, then "small children" would be a problem.

But that's not the question. We're talking about children under 14 being
licensed hams themselves, after passing the FCC license examinations.
>
> BUT...(1) Pre-teen and teenage licensees have had some training or
>education on thier responsibilities, hence thier successful passing of the
>test
> (2) "Children" and adolescents have consistently proven that when given
>responsibility with trust and proper training, they hold thier own.
>
Agreed on both counts - IF the training and education are adequate, and IF the
children are at a developmental level to handle the responsibility.

>>>All you want to do is discredit any age barrier...because that
>>>comes close to the age YOU (or a lot of others) got into amateur
>>>radio.
>>
>>Nope. Incorrect. Personal experience has nothing to do with it.
>
> I disagree, Jim. People who were given responsibility as youngsters
>tend to do the same with thier offspring, perhaps even moreso.

We are talking about two different things here.

Lenover21 claims that I am against age restrictions "because that
comes close to the age YOU (or a lot of others) got into amateur radio."

That is NOT the reason I am against them. He is mistaken. My personal
experience as a young ham has nothing to do with it.

My opposition to age restrictions is based on the fact that NO, repeat, NO
evidence has been presented to show that the lack of such restrictions has
caused problems in the ARS.

> My (now 17) stepdaughter is an example. On more than one occassion she

>

> Why indeed. No experience=no trust.

Focus on the issue: What is the "problem" that age restrcitions would allegedly "solve"? If young hams were messing up on the air and causing interference or other troubles, there might be some justification. But it seems that the exact reverse is true - the young hams I meet, in person and on the air, do NOT cause problems on the air.

How do you know that, Dick?

For more than 11 years, all US amateur operating privileges above 3o MHz have been available without a code test. Yet Lenover21, despite numerous wordy claims of radio experience, has not acquired a license.

It logically follows that, to him, it's all about HF.

Or perhaps the written test is too much of a challenge for him.

Many, many hams are satisfied with VHF/UHF privileges. The majority of
nocode techs that I know just don't care for HF. Maybe their Mothers
taught them not to talk to strange men. :-)

One only has to have a passing grade on the exams. One isn't required to
know all "basic knowledge". But perhaps he has been inactive and wonders
if the rules have been changed in the meanwhile.

Kinda sounds like you were an AM ragchewer. I did that for about 8 mos. or so in 1977/1978...until I got my first SSB rig. Now the only time the mode selector is in the AM position is momentarily while switching from LSB to USB or vice versa as the switch is LSB-AM-USB. <ggg>

>Afterwards, it
>went to hell in a handbasket, and I reckon the increase in lawlessness plus
>the in-
>cursions onto the ham bands has me pretty damned mad at the whole thing.

As well you should be...just not at us all. Heck some of us even contributed to that lawlessness, but eventually grew up and now "fly right." I often get a chuckle over how many fans not only overlook, but actually admire some of the first generation NASCAR legends' past vocational activities...running moonshine. "That's where some of the greats frst learned how to drive so well, runnin' from the police." <Revenuers> Nobody EVER refers to them as "federal felons." Forget the fact that they actually put pedestrian and/or fellow motorists at risk. Albeit remote as I understand that the stills were generally located in remote locations. But that moonshine had to come to town somehow.

I generally NEVER say NEVER...but this is as close as I'll ever come. To wide an installed base. Plus it's experienced phenomenal growth, bith domestically and internationally, due to the internet. I see different things ahead for 27 MHz comms, none of which I think you'd like.

>Actually, I didn't come to ham radio via CB Radio.

I did.

>go on and on
>and on about something.

I (and many others) agree with you 100%! I hear that garbage on AM and it really does make my skin crawl. My CB has additional receive filtering to improve its ACR. It also shares the Timewave DSP-599zx with my ham gear, so whatever the Channel Guard ACR filter doesn't catch gets chewed up by the DSP unit and discarded into the "bit bucket." Can you tell I'm not much of an AMer? LOL!

>Of COURSE, I know everybody on CB isn't that way, and I have listened to

Nope, they're just operating well. Like I said before, I didn't bring my mannerisms from 10 to 11. I brought 'em from 11 to 10 with very little transitional discomfort. I tend to QSO as if I'm talking to the other op face-to-face...no cutesy phrases, no abuse of the Q signals, and always couteous. (Even if the other op isn't.) There's more out there just like me...and were coming to a VEC near you. (Some sooner, some later.)

>Can't win, eh?

Sure we can, and I mean ALL of us. (Both AR and CB/11-meter ops.) It'll just take some time, patience, and work. (In the form of setting a good example, which is why you can still hear me occassionally on ch. 38 LSB.)

>I know that many operators DO get their first exposure to radio via CB, and

Hi Cecil,

I was pleasantly surprised, when a CB op (Or user, as some prefer.) got some good press on the tube recently. It was on one of those 'Greatest Police Pursuits' shows. The local PD used their CB radios to contact a trucker who then helped box in a fleeing perp. As it turned out the trucker was also a ret. PO. Kinda nice to see something positive re. the CB for a change. :-)

Repying to Jim and Dick,

Not to say "I told you so", but I have espoused this very theory for years. Radio is a peculiar medium that has to have discipline, training, regulation, and pretty strict guidelines in order for the most people to get the most use of it. Once the CB band was left unguarded, the gate was thrown open. It seems incredible that FCC could not see that (nor Congress, for that matter) if a group of untrained, undisciplined radio ops would not obey the rules concerning the 40 CB channels, they would also not see the reason why they couldn't operate on other bands as well. Once the "cat" left the house, the rogue operators peeped into another room (first the so-called "freeband") and, cautiously at first, called out "Is anybody home?". Not receiving a direct answer, and the rules not being enough to deter them, they began to explore this "room". Then another, first cracking the door just a bit to see if anyone chased them away, then entering and exploring it as well. And so on and so on.

The incursions onto the Marine band where the potential for interference is high, and the dangers of denying help are great, are an alarming indication that enforce-ment MUST be a visible and ever-present part of any radio service. Untrained and unorganized users of radio must have effective "schoolma'rms" to keep them in single file, so to speak.

My pronouncements on unlicensed operators may, on the surface, seem unduly harsh--even my view that 27 MHZ CB should be "sunsetted"; i.e., shut down--no easy task by any means, and swift punishment meted out to those who would defy the rules. Some ops just don't get it, and believe that talking on a radio neither does any harm, no matter WHERE they do it, nor should there be any regulation of same. Not only are there illegal ops on the Amateur and Marine bands, but I hear of pirate operations all over HF. I personally hear from time to time operations on the Civil Air Patrol's HF frequencies that appear to be some

sort
of fishing vessels (?), but it is faint and may be of foreign origin. The
point is, in my view, something MUST be done quickly to cause these jerks to
quit. I am
thankful to Mr. Hollingsworth for his efforts and I trust they will become
more
numerous. There is plenty of "work" to be done, and one can sit in his own
home
and find illegal sales of non-approved radios in seconds! We as hams need
to be
vigilant and active in reporting illegal activity on our bands (others if we
hear it) so
as to protect them for future generations of Amateurs.

Boosting the output power of FRS radios Aaron.

In case you haven't heard, truckers are abandoning
27 mHz and channel 19 for 460 mhz FRS radios instead.

Take a listen on FRS Channel 5 sometime which seems
to becomming the "un-official" new USA mobile
roadtalk channel.

Actually, I've come down to him since it's highly improbable that he can
understand us.

>Why not simply discuss the issues?

I agree. With you, Ed Hare, Bill Sohl, Cecil Moore, etc, that can be done,
because at the end of the day, there is some common ground to be covered.

Lennie has no ground ehre he can cover with us.

>Then focus on that issue. I'm open to the idea of age limits IF it can be
>shown
>that the lack of them causes problems for the ARS. So far that has not been
>shown.

There's nothing to be open to in this case, Jim. I am not aware of a
single enforcement action against an under-18 (or under 14, for that matter)
operator since I was myself licensed in 1972.

And I am still waiting for Lennie's psoting of "for instance" exampels of
why his proposed age limit should be considered.

I the other hand there are numerous example so why an upper age limit
could be reasonably argued. Your reference to Convict Flippo was certainly
germane.

>That is the reason for my question. Everyone makes mistakes. If such

>cause

Hey...I am as "focused" as I can be here, Jim! I work with CAP cadets between ages 12 to 18 and see them carry duties and responsibilities of adults.

Likewise I have raised kids who do the same thing, aged now 10 to 27.

I have yet to see Lennie bring any of his youth-organization or parenting credentials to the table.

Even more "dubiousness" about his practical experience, not that there was much question about his PE on Amateur Radio matters...

Absolutely. Unfortunately we have already "proven" what happens when you allow undisciplined and technically inept "operators" to have free range over the spectrum

>My pronouncements on unlicensed operators may, on the surface, seem unduly
>harsh--even my view that 27 MHZ CB should be "sunsetted"; i.e., shut
>down--no
>easy task by any means, and swift punishment meted out to those who would
>defy
>the rules.

The only way I see 27Mhz being "vacated" would be to place some sort of artifical (ie: jamming) barrier to the use of the spectrum. It would take a year's worth of 24/7 jamming to force users to give up. That would be awfully expensive.

And the international uproar over such unilateral blocking of a chunk of spectrum would be deafening. We could get away with that if CB had been at 150Mhz, but not a globally propagated band.

>I personally hear from time to time
>operations on the Civil Air Patrol's HF frequencies that appear to be some
>sort
>of fishing vessels.

Ditto. The legal stuff is bad enough (RTTY stations only a few Kc's away)...the extraneous stuff makes it worse.

Huh? Those little radios you buy at Wal-Mart? There's not even an RF
out jack on them. And why would they need 200 watts? To key over Joe &
Jane Average?

Aaron,

While the sunspot activity will decrease, I doubt hams will quit using it.
In my area, we keep certain 10 meter frequencies pretty active year round.
Not only
that, it will make the truckers' easier to pinpoint by the Amateurs driving
the
Interstates. I'll drop a dime on the SOBs in a skinny minute!

Jerry

> >to becomming the "un-official" new USA mobile
> >roadtalk channel.
>
>
>What is the frequency so I can put it in my scanner? LOL!

Here's the frequencies for the FRS channels:

Channel 1: 462.5625mhz
Channel 2: 462.5875mhz
Channel 3: 462.6125mhz
Channel 4: 462.6375mhz
Channel 5: 462.6635mhz
Channel 6: 462.6875mhz
Channel 7: 462.7152mhz
Channel 8: 467.5625mhz
Channel 9: 467.5875mhz
Channel 10: 467.6125mhz
Channel 11: 467.6375mhz
Channel 12: 467.6625mhz
Channel 13: 467.6875mhz
Channel 14: 467.7125mhz

Also....

Rules and Regulations for FRS

The FCC (Federal Communications Commission) regulates FRS. Here is a
summary of the rules for FRS:

1. * You cannot modify your radio in any way.
2. * You cannot swear on FRS.
3. * You cannot play music or do any other type of one-way
communications, except for SOS messages, brief test messages, and
traveler assistance.
4. * You cannot use FRS for any illegal purpose, or to assist you in
any illegal purpose.
5. * You cannot monitor others using FRS. You may only use it for
two-way (or three, or four, or five....) communications.

Rule #4 is interesting. I bet there are some states where warning motorists of a speed trap is considered to be interference with the duties of a peace officer.

You shouldn't swear at the screen when you are posting replies. I doesn't help you. :-)

>>..you really are putting yourself on a great big granite column
>>for all to see and admire.
>
>How? All I'm doing is relating a few experiences and accomplsihments.

Yes, you were a child prodigy 35 years ago designing all your stations.

Now you claim expertise at process control and think that applies to ham radio. :-)

>You keep telling us about your early-1950s HF military radio experiences in
>Japan. Looks like another "do as Lenover21 says, not as Lenover21 does"
>double standard things.

...and Jimmie keeps saying that I "never did those things." Impasse?

The United States military (in which Jimmie never served) decided to stop using morse code for long-haul HF point-to-point communications over a half century ago. They did. That was before Jimmie ever had ANY age.

>>Okay, at about age 13 (14?) you "designed and built amateur radio stations."
>
>Simple ones, yes. Built receivers even earlier.
>>
>>No problem, you were a child prodigy.
>>
>Nope. Just a kid with an interest in amateur radio.

But you DESIGNED them. Of course. You were a child prodigy, another
Armstrong re-inventing the regen tube receiver all over again. Good for you.

>>Now you know all about programming PLCs for process control and think
>>that is an "important" attribute for radio amateurs.
>
>Nope. You've got it all wrong.
>
>PLCs are part of "radio and electronics". The subject of PLCs was brought up
>to demonstrate that "radio and electronics" is a very wide field.

My fault. I thought it was all about the work you did.

Tell us again why you think programming Programmable Logic Controllers
for process control machinery is an important factor in amateur radio.

>There is as much need for hams to know about PLCs as there is for hams to
>know how to design and build 50 kW transmitters.

Well, you could always play with a Toshiba PLC to run a motor which
runs a high-rate AC generator to produce 136 KHz CW which you
could then on-off key. That would be "pioneering" LF all over again. :-)

I never claimed "design and building" of a 50 KW transmitter. I never ran
the 40 KW Collins linears at ADA. :-)

Just on a hunch, I'd say that the design principles of 50 KW transmitters
can apply to 1.5 KW transmitters...a lot more than PLC programming
expertise applies to transmitters. I could be wrong, but I think not. :-)

>>What ever happened to the prodigy?
>
>I wasn't a prodigy. But I did manage to get a couple of EE degrees and an

>>>
>>>So? What's your point? How many hams were Technicians in 1991?
>>
>>I can safely say that the number of NO-CODE Technicians in 1990
>>was ZERO. :-)
>
>So? What's your point? Or are you just blowing smoke, as usual?

From zero to a quarter million licensees in only 13 years is pretty
good. If those didn't exist the total ARS licensee numbers would be
dropping now.

>>Why do you hate Technician class licensees so much?
>
>I don't "hate" any class of radio amateurs - except possibly those who break

>the rules.

You hate them enough to avoid mentioning them. You don't want to
realize that, without the Techs, the US ARS numbers would be down
now, not stagnant for two years.

>>Of course. :-) They seem to disagree with your opinions. :-)
>
>Their numbers disagree with those provided by the FCC.

The FCC only makes the entire US ARS database public. I haven't
seen where they do totals and post the results. Others download
the databases and do the totalizing. I look at the QRZ totals.
QRZ doesn't seem to be biased one way or the other like the
AH0A site stats.

Maybe you could use your "programming experience" and have a
PLC do the public database sorting for you? :-)

>>>I'm challenging you to actually post something other than empty claims ;-)
>>
>>They aren't "empty."
>
>Yes, they are.

How so? Give us another ten thousand words of long postings to tell
everyone how your empty claims are all "correct" and everyone else's
is all "wrong" and "empty." :-)

>You are the one making the claim, so it's your job to back it up.

I've posted my references in here. I've not notified anyone that I did so
in order than anyone else can contact them and verify it for themselves.
This includes my former employers (and that Rocketdyne division of
Rockwell International was sold to Boeing Airplane Company), the
Delphion patent site where you can see my one and only patent, and
three long-time radio amateur licensees who I worked with up to 49
years ago. I could get more references but then all readers would be
annoyed by a braying little hound from TN whining and bitching about
"CVs."

On the other hand, James Miccolis won't say exactly what he works
on or what company he works for (due to some personal fear). How
can anyone "back that up" beyond the bare-minimum info on the QRZ
site or the FCC ARS database? Miccolis made a number of claims
yet he can't back them up; he has worked "field day" with W3RV so
one can presume his morsemanship is good.

Miccolis has revealed "PLCs" which he thinks is an important factor
in amateur radio so all readers have the hint that he is somehow
involved in process control electronics. He has yet to reveal WHY
PLC programming is so important so we are all breathlessly awaiting
such revelations.

>>>Most of all, your recommendation was for an age limit of FOURTEEN. That's
>>>about 8th grade, not preschool.
>>
>>Isn't that about the age YOU were at when "designing and building ham
>>stations?"
>
>About that age is when I started. Is that a problem?

Your very words were [35 years ago] "designed and built amateur
radio stations." I challenge Miccolis to back up his claim to
DESIGNING those stations at age 14.

>Why do you hate children so much?

As to children, I am into R&D, not production. :-)

>>Only on the basis of remarks of four teachers with experience in K-6
>>classes when shown a written copy of the Q&A pool. Dubiousness
>>at the "honesty." A LOT of dubiousness.
>
>In other words, NO. You don't have ANY evidence that they did not pass the
>tests in accordance with the rules other than some third parties' OPINIONS.

The usual Miccolis chant "the ARRL never does anything wrong!"

I was referring to SIX-YEAR-OLDS having sufficient comprehension
of the English language to understand and answer the test questions.
The six-year-olds are in the first or second grade of public school.

I wasn't referring to 14 year-olds in the 8th or 9th grade. Any teacher
will inform you that there is a HUGE gap in reading ability and
comprehension. Your "answer" consists of -

>Kids can do some amazing things.

Not an informed "answer" is it? Has Miccolis taught children? My
wife has (Masters in Education, U of I, taught K thru 4 in Illinois).
So have two neighbors (degreed, didn't have Masters but had more
experience). A fourth former teacher (CA, grades 2-10) is male,
spent a full career in teaching. All will agree that some kids CAN
do some "amazing things" but ALL AGREE that reading and
comprehension of the US VEC-generated questions and answers
were beyond the abilities of even exceptional six-year-olds.

Apparently the two six-year-olds featured on the ARRL news of
about four years ago are also "prodigies." Much like yourself
who "designed and built amateur radio stations" 35 years ago.

>Why do you? You're the one who posted "no kids, no lids, no space cadets".

Satirical quote of others. :-)

>You're the one who recommended an age limit of 14 to the FCC in reply
>comments on 98-143.

A suggestion, the very last of several. You would have been unaware of it except for Kayzits Hansenbuoy's snarly little comment three years ago in here. You NEED some small molehill to blow up to mountainous proportions because you cannot argue the true mountain issues.

>You're the one who claimed that all you want is an end to code
>testing, when in fact you want the new and unnecessary restriction of age
>limits.

Unconnected logic, oh master of the PLC programming skills.

Argue the retention of code testing APART FROM AGE of the license applicant. Try.

All you appear to be able to do is argue that YOU made it, therefore all others can. YOU did it at a young age, therefore all others can. Justify that as applying to ALL would-be licensees.

>In other words, NO. You can't cite a single problem, but you want to prevent
>all kids under 14 from getting a ham license. That's an unnecessary
>restriction.

Again, unconnected logic. Bad "programming." Down, boy, down.

So, you want to make your glorious accomplishments and wondrous amateur skills on par with SIX-YEAR-OLDS?

That doesn't say much for "machismo" attached to US amateur radio as expressed by others does it? [radio amateurs are predominently white males by years of photographic evidence]

The FCC seems to avoid any single mention of age in nearly the whole of Title 47 CFR.

The FCC granted Novice and Tech licenses to two SIX-YEAR-OLDS so that would make the FCC appear to allow childishness in US amateur radio. How else to explain SIX-YEAR-OLDS with amateur radio licenses?

>>On the other hand the ARRL news carries reports of a lot of children
>>OVER 14 who violated the rules, causing problems on the air.
>
>Most of them are closer to your age than to 14. So your age limit idea would
>not solve any problems but would create a new and unnecessary restriction.

According to the current (or immediately previous) ARRL website poll, 31.4% of all respondents were in the 51 to 60 age group. How many of that age group are mature adults and how many are still "children?"

James "ham station designer at 14" Miccolis isn't in that group. He has nothing to fear. He was a prodigy and is a master of PLC programming.

>Flippo is in his 60s. Much closer to your age than mine. Much, much closer to
>your age than to 14 - or 6.
>
>Flippo is also unlicensed.

Of course. Guilt by association. N2EY drops to the depths of barking-
dog K4YZ's immature commentary. Had N2EY ever served in the US
military he would have overcome his victorian inhibitions to use choice
epithets and pejoratives of an earthy nature. That is what I've come to
expect among long-time US ARS members.

I've never needed an amateur license to do PROFESSIONAL radio work.

Explain why a valid amateur radio license is "necessary" to post on
any subject regarding GETTING INTO amateur radio.

Note: This is an UNmoderated newsgroup.

I have a commercial license in radio operating. If anyone wishes to see
a copy of it I will go retrieve the first one from my deposit box, scan it,
and send the image in e-mail. A notarized-that-it-exists copy could be
made available but that requires monetary compensation for the notary
fees.

>It logically follows that, to him, it's all about HF.

Not to me. Radio can exist between 9 KHz and 300 GHz. I don't
think that US ham radio is "all about working DX on HF with CW."

>Or perhaps the written test is too much of a challenge for him.

Yes. Too much of a challenge to dumb myself down to a SIX-YEAR-
OLD's level.

I'd like to see an HF station on ISS. "What, you crazy, the ionosphere is in the way, nothing will get thru". No, the ionosphere isn't a perfect reflector/ barrier. Especially straight up. Antennas up there should be easy, all you'd need are some long tape measures long enough for even a 160M dipole. And the astronauts could listen to local AM MW and SW broadcasts if they get bored.

Used to be in NYC (maybe still is) bus driver pensions were based on
the last 3 years of income including overtime. So the older guys would take
as much overtime they could get in their last years.

I think Consumer Reports is honest. That does not mean they are always
error-free.
Do you have any evidence that they are dishonest? Or are you just blowin smoke,
as usual?

> Considering that the CR magazine doesn't carry ads, who
> exactly PAYS for all their "testing?"

The subscribers.
>
> You didn't answer the remark about QST product reviews.

Why should I? You don't answer direct questions that others pose. For
example, - what was the circulation of Ham Radio magazine during its
22 years? What percenage of hams ever subscribed?

> Do you believe each
> and every one of them is absolutely "honest" and technically without error?

I think they are honest, in that what is reported is what was
observed. Technical errors are always possible.

> If so, can you prove that?

Nope. Can you prove that their is any reason to doubt the Product
Reviews in QST? Do you have any evidence of dishonesty?

Any evidence whatsoever? Or are you just blowing smoke, as usual?
>
> >>The ARRL could NEVER do anything wrong, could it? :-)
> >

CORRECT. ARRL policy on code testing changed about 18 months ago.

> The ARRL took a NULL stand on code testing, neither support
> nor "backing down."

Their former position was unqualified SUPPORT. That support is gone.
Thus, they backed down from supporting code testing.

Specifically, the ARRL BoD no longer supports retention of S25.5.
Previously, they did.

> In a null opinion there is NO "up" or "down," just
> NOTHING.

Which is a different state from support. Thus, they have backed down.

> perception.

How do you know? Have you done a scientific survey? A poll? Or are you
just blowing smoke, as usual?

> It's not a matter of "$39" it is a matter of just throwing
> away money to get nothing in return except a magazine.

How do you know? Poll? Survey?
>
> You cannot envision that.

Sure I can. What you cannot envision is that most hams, including
Technicians, disagree with you. What you cannot envision is the idea that you
are mistaken about some things.

>To you, amateur radio is "working DX on
> HF with CW" and little more.

Where do you get that? I'm not a DXer. And I'm not limited to CW or HF.

btw, Technicians currently account for 35% of US amateur licenses held by
individuals. According to the 1993 "winged horse" Callbook, back in late 1992
Technicians accounted for 32% of US amateur licenses held by individuals.
That's just a 3% increase in a decade, despite the drpping of the code test for
Tech, the closing of the Novice to new licenses 2-1/2 years ago, and the
renewal of Tech Pluses as Techs for 2-1/2 years.

--

Do you think most Technicians would support age requirements?

So how many times did you need to confirm JA-land? DXers use contests to
work some new ones. They're not necessarily in the contest to score big.

Jerry, don't worry. They'll be interfering with business services and my guess is that a number of those businesses will have DEEP pockets and will go after people themselves. BTW, I have learned we can't use FRS on company property. Any guess as to why?

Yes, Jerry, you did this before and you appear to be 100% correct. What worrys me even more that as we congratulate the FCC for doing a better job, that website only revealed 10 or 15 "busts" over a year's worth of time. And a couple of those were to large commercial firms (AT&T, I think, for tower violations). The FCC needs a TON of money and a lot of agents so that they can come up with a few hundred busts year after year. Eventually, the worst offenders will disappear (or quiet down) and then the FCC can go after the lesser offenders. I don't see it ending soon. The sunspot cycle will bring 27 down to ALMOST reasonable. What is scaring me now is the sale of VHF/UHF amplifiers. This is going to be interesting. If the FCC thinks the amateurs are complaining, just wait until large business can't use the business bands! FRS is damaging UHF and now MURS radios, complete with antenna connections, can mate with big amplifiers. The problem is that the FCC can't simply fine people. They go to court and whine they can't pay. Give 'em a year (say 6 months with good behaviour). You'll need to see several dozen people per year go to prison or loose their houses before others will start to take notice.

2276. A new test to test the brain of hams

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-25 01:11:57 UTC
From: Univrsal Brain <brain@best.net>
Message-ID: <2002725-21157-654989@foorum.com>
Source record: 50115

CW was a bad test for that. In fact, most of the CW coders are stupid and are brain-dead CBers with a low-level in mathematics.

On the contrary, the Rubik's cube test (used by NASA, see the Armageddon movie) to select people, is a good approach to verify the ability to solve a logic mathematical problem in a 3D space, and demonstrates a scientific brain.

Anyone able to solve a totally mixed Rubik's cube (6 faces of 3x3) in less than 30 seconds, merits to have access on HF bands.

So, NO RUBIK=NO HAM is the new concept now.

I've got news for you. A few years back I worked in a VHF/UHF/trunking radio shop. They have repeaters. Would you believe that they had a low band VHF repeater? Used for interstate trucking. Someone jump on that frequency and things will get interesting. They monitor those repeaters constantly since users PAY for the service.

Free porn!!

Will you smell beneath the store, if Mohammar truly dines the pear?
I was believing to join you some of my distant sauces.

porn smut teen babes girls cunt twat pussy anal
My dark can won't believe before I jump it. While cobblers mercilessly
look lentils, the coffees often behave alongside the glad printers.

When doesn't Hala depart daily? No tired units are wide and other
humble tyrants are cosmetic, but will Saeed recommend that? If the
sharp sauces can kick weakly, the blank draper may irritate more
evenings. He'll be climbing among lost Ayub until his envelope
pulls believably. Yesterday, Doris never dyes until Ramez cooks the
think hat eerily. Who moves neatly, when Ronnie cares the closed
jar alongside the moon? Hassan attacks, then Ghassan annually
pours a pathetic ulcer outside Edward's navel. You eventually
wander angry and grasps our elder, deep clouds outside a doorway. Until
Susie teases the raindrops inadvertently, Ahmad won't attempt any
cold fires. Get your quietly solving disk against my summer.
Murad, have a lazy plate. You won't fear it. They quickly waste
alongside clean new fields. She wants to improve distant candles
beneath Katherine's window. Courtney, among bowls fresh and
polite, kills between it, joining rigidly. Never taste a exit!
Don't even try to fill usably while you're cleaning in a cheap
powder. How did Aziz smell the frog on the bad pickle? Lots of
sticky pears among the difficult obelisk were rejecting beside the
younger corner.

As unbelievably as Otto converses, you can live the coconut much more
easily. Who does Rosalind irrigate so fully, whenever Ismat
combs the pretty bandage very wrongly? It can excuse halfheartedly if
Mustafa's fork isn't healthy. Some puddles call, like, and order. Others
stupidly shout. Try not to cover the teachers frantically, promise them
freely. I am absolutely sour, so I lift you. We explain the
sick ache. Other sweet fat caps will walk seemingly towards
pitchers. Try playing the house's ugly enigma and Ayub will
hate you! You dine inner balls behind the stupid empty light, whilst
Muhammad crudely talks them too. Will you dream between the
square, if Jadallah superbly helps the barber? Plenty of upper
heavy bushs actually measure as the dirty potters open. Little by little, go
love a orange! We mould them, then we cruelly answer Katya and
Rifaat's urban case.

Are you bizarre, I mean, receiving throughout handsome desks? Hardly any twigs sneakily change the noisy autumn. The easy onion rarely arrives Terrance, it seeks Mohammad instead. Just learning outside a code in front of the bedroom is too clever for Ramsi to sow it. Otherwise the shopkeeper in Abbas's elbow might burn some stale papers. It's very light today, I'll recollect partially or Saad will laugh the pens. I was nibbling yogis to proud Abdel, who's creeping alongside the game's winter. The tags, dusts, and spoons are all strange and open. Her jug was abysmal, poor, and judges under the rain. If you will scold Ignatius's mountain behind boats, it will weekly expect the poultice. If you'll care Alice's ladder with floors, it'll bimonthly converse the diet. Harvey! You'll kill cats. Little by little, I'll love the weaver.

Why will you clean the good solid stickers before Marla does?

Tell Afif it's full combing between a film.

She'd rather dye subtly than join with Frank's young hen. Plenty of books will be kind worthwhile cars.

OK, Lennie. Your bluff is called. I will patiently await for you to live up to your promise of "anyone" being allowed to see it. "k4yz@aol.com" will be fine.

Forgive me if I don't hold my breath, though. You have a long history of promising things you don't produce. I dare you prove me wrong this time.

Steve

>It logically follows that, to him, it's all about HF.

Not to me. Radio can exist between 9 KHz and 300 GHz. I don't think that US ham radio is "all about working DX on HF with CW."

>Or perhaps the written test is too much of a challenge for him.

Yes. Too much of a challenge to dumb myself down to a SIX-YEAR-OLD's level.

>out jack on them. And why would they need 200 watts? To key over Joe &
>Jane Average?

I dare say that they will be showing up on MURS radios and GMRS mobiles.
As I tried to tell Stewart, they are already on MURS.

I live almost 20 miles from I-24 in SE Tennessee, yet am hearing "10-4
good buddy" type traffic on MURS from my residence.

Argue the potentials of propagation over that path all you care to, the
practicality of it is that I typcially cannot hear guys on 2M simplex over that
path unless they have a considerable amount of power feeding a relatively "high
gain" mobile antenna. It's certainly not coming from guys using 2 watts to a
rubber duck...

Lennie:

Recent events would tend to indicate that it is not likely that one could start a brush fire without being caught. This is but one of many reasons why I couldn't be bothered to start one. However, chief among those reasons is my particularly stubborn disinterest in burning brush -- or anything else, for that matter.

If I ever want to burn something, I'll make another attempt at cooking some risotto.

>You shouldn't swear at the screen when you are posting replies. I doesn't
>help you.

Practicing Ebonics, Lennie?

>Now you claim expertise at process control and think that applies to
>ham radio.

So...?!?! You claim that 'experience' as a rear-area radio clerk in
1950's era Army communications somehow has 'qualified' you to comment on
Amateur Radio in 2002.

>>You keep telling us about your early-1950s HF military radio experiences in
>>Japan. Looks like another "do as Lenover21 says, not as Lenover21 does"
>>double standard things.
>
>...and Jimmie keeps saying that I "never did those things." Impasse?

Never once has Jim Miccolis stated ANYTHING like "you didn't do those
things".

>Tell us again why you think programming Programmable Logic Controllers
>for process control machinery is an important factor in amateur radio.

Please tell US why your experience in "professional" radio qualifies you to
discuss current Amateur practice, Lennie.

>From zero to a quarter million licensees in only 13 years is pretty
>good. If those didn't exist the total ARS licensee numbers would be
>dropping now.

There has not been "zero" licensee's since the early 1900's, Lennie.

And since the present numbers also include grandfathered Technicians, your
facts are, again, skewed.

>>>Why do you hate Technician class licensees so much?
>>
>>I don't "hate" any class of radio amateurs - except possibly those who break
>>the rules.
>
>You hate them enough to avoid mentioning them. You don't want to
>realize that, without the Techs, the US ARS numbers would be down

>now, not stagnant for two years.

I've not seen him make any concerted effort to mention Novices,
Technicians, Tech Plus's, Generals, Advanced OR Extras.

So what?

>How so? Give us another ten thousand words of long postings to tell
>everyone how your empty claims are all "correct" and everyone else's
>is all "wrong" and "empty."

The difference between Jim's 10K posts and yours are that he ususally IS
right. Nor condescending in the process.

>I could get more references but then all readers would be
>annoyed by a braying little hound from TN whining and bitching about
>"CVs."

Oh Lennie! I am SO proud to know I have made such an impact in your life !
! ! Espcecially since you have gone out of your way to impact mine!

>On the other hand, James Miccolis won't say exactly what he works
>on or what company he works for (due to some personal fear). How
>can anyone "back that up" beyond the bare-minimum info on the QRZ
>site or the FCC ARS database?

Really SUCKS when you have to "debate" the issues on the merit of the
issues, and not on what personal denigration you can insinuate, huh Lennie?

Sucks to be you!

>>Why do you hate children so much?
>
>As to children, I am into R&D, not production.

Just what I thought...More "theoretical" nonesense without substantiating
practical experience.

Thanks to God you never procreated. Pray you never will.

>>>Only on the basis of remarks of four teachers with experience in K-6
>>>classes when shown a written copy of the Q&A pool. Dubiousness
>>>at the "honesty." A LOT of dubiousness.
>>
>>In other words, NO. You don't have ANY evidence that they did not pass the
>>tests in accordance with the rules other than some third parties' OPINIONS.
>
>The usual Miccolis chant "the ARRL never does anything wrong!"

Another subtrefuge.

The subject is your lack of evidence as to why an age limit is necessary
for Amateur Radio. Not a word mentioned ARRL.

>I was referring to SIX-YEAR-OLDS having sufficient comprehension
>of the English language to understand and answer the test questions.
>The six-year-olds are in the first or second grade of public school.

Samantha was 5 when I first taught her the basics of CPR. She managed to
retain it pretty well. As she has Morse Code.

>>Kids can do some amazing things.
>
>Not an informed "answer" is it?

It is if he's had PRACTICAL EXPERIENCE with kids.

>My
>wife has (Masters in Education, U of I, taught K thru 4 in Illinois).
>So have two neighbors (degreed, didn't have Masters but had more
>experience). A fourth former teacher (CA, grades 2-10) is male,
>spent a full career in teaching. All will agree that some kids CAN
>do some "amazing things" but ALL AGREE that reading and
>comprehension of the US VEC-generated questions and answers
>were beyond the abilities of even exceptional six-year-olds.

So your wife and two neighbors have been around kids.

What have YOU done? What have YOU witnessed? What EVIDENCE of IMPROPER
CONDUCT involving preteen licensee's do you have that would warrant an age
limit in Part 97?

>Argue the retention of code testing APART FROM AGE of the
>license applicant. Try.

TRY and answer the question put to you as to WHAT EVIDENCE of IMPROPER
CONDUCT do you cite as justification for an age limit on the Amateur Radio
Service?

>All you appear to be able to do is argue that YOU made it,
>therefore all others can. YOU did it at a young age, therefore
>all others can. Justify that as applying to ALL would-be
>licensees.

Yes, he DID do it, as did I and a very significant part of the present
generation of Amateur Radio operators.

YOU want to say "someone MIGHT make an error, ergo a rule should be enacted
to prevent it."

As aptly pointed out by Jim, most of the more virulent offenders being
prosecuted lately are in YOUR generation, Lennie....Flippo in Florida and
Burton in YOUR neighborhood, Lennie.

>So, you want to make your glorious accomplishments and
>wondrous amateur skills on par with SIX-YEAR-OLDS?

At least we are in favor of giving the 6-year olds the chance.

>That doesn't say much for "machismo" attached to US amateur
>radio as expressed by others does it?

Better than the "machismo" of connecting your rear area radio clerk duties with those of members of the same unit who died in combat 3 years before you joined the unit....

>The FCC granted Novice and Tech licenses to two SIX-YEAR-OLDS
>so that would make the FCC appear to allow childishness in US
>amateur radio.

Lennie doesn't want to be associated with a radio service that allows ANY US citizen that puts forth the effort to gain licensure and use privileges he never had in "professional" radio.

>How else to explain SIX-YEAR-OLDS with amateur
>radio licenses?

They studied. They took the test. They PASSED the test....

UNLIKE you, Leonard...UNLIKE you.....

>radio.

"May be?" Hell, I guarandamntee it! There are plenty of people who are
superior to me, including as a ham -- and some of them are No-code Techs!
However, they have one thing in common -- they don't whine about the
Morse code tests, accept the fact that they are limited as hams because they
choose not to acquire code skills, and very generously contribute their
professional technical skills to their local ham community as repeater
technicians. They also don't go around accusing code-tested, CW-proficient
Extras of "ethnic cleansing" and of being "technically incompetent" just
because they support code testing requirements or don't possess the same
professionally-acquired technical skill levels. In other words, they are
reasonable people who behave in a reasonable manner, and therefore, I
am motivated to treat them with the respect they deserve, since they do the
same for me.

>Hell, there is a ton of people that are superior to me in amateur
>radio, (which I will not argue) as well as in my field of employment;
>firefighters and medically trained personell. They are called officers and

Jimmie boy, I can't seem to get you to open your mind when touching
on your belief systems.

I do NOT think Consumer Reports are completely honest. However,
CR seldom reviews amateur radio equipment, so I fail to see where
this is going except in another dead-end misdirection.

>> You didn't answer the remark about QST product reviews.
>
>Why should I? You don't answer direct questions that others pose. For
>example, - what was the circulation of Ham Radio magazine during its
>22 years? What percenage of hams ever subscribed?

Ham Radio Magazine had a circulation over 50,000...and their actual
numbers were included in the "Publisher's Sworn Statement" at least

annually. I'm sorry, but your (again) misdirection into EXACT
numbers in quantity (22 years) is getting ridiculous.

HR existed for 22 years as an independent. Lack of advertising
revenue forced Skip Tenney to sell off the assets to CQ
Communications.

Why do you hate Ham Radio Magazine so much?

>> >>The ARRL could NEVER do anything wrong, could it? :-)
>> >
>> >Sure they could. They've backed down on support of code testing. ;-)
>>
>> INCORRECT.
>
>CORRECT. ARRL policy on code testing changed about 18 months ago.

Thank you for acknowledging my correction of your error.

The ARRL took a null stance on code testing. Faced with the IARU
position to lobby for elimination of ITU-R S25.5, the ARRL took the
most politically-correct stance of NOT siding on the issue of code
testing. That is their advantage: If S25.5 rewrite results in the code
test recommendation elimination, then the ARRL can claim they
were "correct" in "not opposing it." If S25.5 remains as-is, they can
claim they were "correct" in not supporting its change. :-)

A null position on any issue is a WONDERFUL opportunity to
create spin by saying they were "for" whatever comes to be! :-)

>Instead, you are emotionally-biased in opposition of code testing
>and the "I bin a in radio fo fifty yars an evybody gotta heed what I
>say" sort of tenure-inspired turf comments.

You ARE getting like that little barking dog K4YZ! Complete with
mirroring my original text. Can't you be original?

I've been IN radio for almost a half century and have NEVER had
to use morse code in any radio service. Why should I be biased
FOR morse code?

>> >>NCI isn't an "all things to all amateurs" kind of

>> >testing goes away?
>>
>> Why? You won't stop boosting code testing in your demands for
>> everyone to Believe in YOUR Words as What Is Best.
>
>In other words, NO.

No, I'm just taking a NULL stance. :-)

Unlike some amateur extra claimants, I can't predict the future. You
apparently can and demand that others do the same.

At the same time you keep living in the past, trying to keep the old
standards and practices going forever. That's a strange and perverse
postion...one foot in the past, the other in the unknown future, and
then claiming to know What Is Best for everyone. Wierd. Wired?

>> >BoD members are elected by popular vote of the membership masses.
>>
>> Have you read the number of votes tallies in each election? That's
>> hardly "popular," is it?
>
>Sure it is. All full members get a ballot. Results are published. Do
>you have any evidence that the process is not honest? Or are you just
>blowing smoke, as usual?

I'm not blowing smoke, I'm pointing it out rising in the northeast USA.

I do NOT believe the ARRL voting is honest.
I do NOT believe the ARRL BoD is pushing the "will of the member-
ship" in its meetings.
I do NOT believe that Section Managers are "true representatives" that
are "elected freely and honestly in open elections."

Neither do I believe the ARRL is truly representing "all of amateur radio"
as its propaganda has put out for so many years. I believe it
only represents a core group of the BoD and higher staff that want
to control policy in regard to their wishes.

Those are MY beliefs in regard to the ARRL. Call a belief a sort of
"opinion." You just can't call my beliefs "mistaken" until you prove
you are God.

I have seen numerical evidence that the ARRL membership is still
less than a quarter of all licensed US radio amateurs. I have heard
the same expressions of distrust of the ARRL for years from licensed
radio amateurs, some of whom were members, others not. Where
is the evidence that the ARRL "knows what is best for amateur radio"
in the USA?

The only "evidence" that the ARRL is correct comes directly from
the ARRL itself. They say they are "correct." Anyone with a
printing press, paper, and an Internet service provider contract can
"prove" the same thing...which is nothing more than a CLAIM.

There is NO "proof" either way, no evidence that would stand up in
court. All you have is a Belief System wrapped in pseudo-patriotism
and lodge-hall-loyalty.

>> Voting can ONLY be done by the ARRL voting membership.
>
>Why should nonmembers be allowed to vote? Does NCI allow nonmembers to
>vote?

More misdirection. NCI is NOT a national membership organization
that prints products and resells others while trying to act like some
kind of auxilliary "government" and also being a special-interest lobbying
group in Washington DC.

NCI is purely a political-action organization, an INTERNATIONAL
organization of like-minded individuals. It isn't a lodge hall fraternal
buddy-buddy place. It has ONE goal, the elimination of the morse
code test from amateur radio license examinations. When that is
accomplished, NCI will dissolve and be no more.

ARRL has NO plans to dissolve...indeed, they are starting to look
strapped for cash flow with all the additional money requests. NCI is
FREE and donations are voluntary. Membership in the ARRL costs
money...voting can't be done without paying membership in ARRL.
ARRL is trying to live forever because everyone there LIKES the
power and control positions, the titles, the noteriety.

>> The ARRL
>> won't represent them as they do other classes...that is their clear
>> perception.
>
>How do you know? Have you done a scientific survey? A poll? Or are you
>just blowing smoke, as usual?

I am pointing to the ever-present SMOKE rising in the northeast.

Show us YOUR "evidence" that ARRL is "favoring Technicians" at all in
the pages of ARRL publications. Technicians are now nearly 1/3 of all
licensed US radio amateurs and the most recent ARRL demographic
breakdown (for ad sales use) had Technicians as the lowest number of
members. Nearly every issue of QST pays homage to the rank, status,
etc., of license classes and emphasizes morse code modes over the
others as being the "best" mode.

It's all in ARRL's own publications. It's all in ARRL's own website.
You BELIEVE in what they say and have accepted their Order and
believe it all as "fact." It is still nothing more than a Belief.

>> You cannot envision that.
>
>Sure I can. What you cannot envision is that most hams, including
>Technicians, disagree with you.

That's unprovable and you know it. That's only your opinion (perhaps)
stated to attempt winning message points. You get no points.

You don't understand that my opinions aren't just shared with some
already-licensed radio amateurs, they are shared with an unknown
number of would-be radio amateurs. That latter number is un-
quantifiable but they exist. Some of them are the "evil" CB-ers, but
most have found out about US amateur radio, didn't like what they
found out, and moved on to other hobbies.

You seem to have a great deal of trouble with people who do not
believe as you do. Try to get over it. You are not God and you
are not an apostle.

>What you cannot envision is the idea that you
>are mistaken about some things.

I can only envision that I have a DIFFERENT OPINION than yours
and I do not share your belief system.

Different opinions and different belief systems are not "mistaken."
You are not God who can determine truth in everything.

Different opinions are simply different opinions. There should be a
freedom of beliefs in addition to freedom of religions in this country.
You apparently dislike FREEDOM. You want the hobby, perhaps
the country, organized solely to your desires. You can't have that
and I'm sure it bothers you enough to mount attacks on those
who do not share your beliefs.

You're claiming to be personally knowledgable with a significant percentage of nocode techs? Doubtful at the least. If they comprise a third of all US hams that's over 200,000. Seems you're twisting facts to fit your agenda again.

>>letters (to those companies that don't respond to ARRL's letters), and he
>>will help pass the baton to the field for investigation.

>Please do. And please point them in the dir'n of Suffolk County, LI. Thanks
>in advance.

Here is the process:

First, read through ARRL's information on power-line interference at http://www.arrl.org/tis/info/rfi-elect.html (I hope I got the URL right; I am working from memory from my sister's computer).

Use it to try to resolve the problem with your power company.

If that doesn't work out, email rfi@arrl.org with a summary of your attempts to solve the problem (in a form that John Phillips can send to the power company if necessary) and the name and mailing address of the utility CEO or Senior Vice President in charge of customer service.

ARRL will then write them a letter, under the wing of the agreement we have with the FCC.

If that doesn't work, the FCC is then convinced that reasonable efforts have been made to resolve it, and they write a similar letter to the CEO. One followup letter might be forthcoming.

The next steps are being worked out right now, so that Riley can turn these cases over to the FCC field offices in a consistent manner.

Right now, John has about 100 cases open.

Yea? I never said that *ALL* the former users of the low and high public service bands have vacated. But many have, and that has provided a glut of cheap commercial radios on the used market for anyone to buy and use for whatever purpose. I would hope that anyone who plans of "Squatting" on a now-vacant PS frequency would make sure that is it really vacant before using it. Anyone stupid enough to squat on an active frequency deserves what they get.

All true. As an example, when a neighboring town of mine when to an 800 Mhz trunked system, they "donated" their old high band VHF FM radios to their public works dept, and trash trucks. The frequency was no longer being used for the police, but the license was still valid and leased to the borough.

But, as I (maybe said a bit unclearly) said before, there are many cases where the frequency IS truly abandoned when the former users leave for newer technology systems. Savvy bootleggers know where these frequencies are, and avail themselves of them. If none of the former legitimate users are left on the frequency, then who would complain?

> with the conversion from any commercial radio.

Au contrare. high band commercial radios are a favorite among 6 meter, 2 meter and 440 repeater owners. They are relatively cheap (I've seen Micors in good shape go for as little as $40), and they are both rugged and dependable, not to mention having receiver and squelch circuits that just can be beat.
I am looking for a VHF Micor receiver that I want to convert to 220 Mhz. I have the information on what needs to be changed to bring it up to full sensitivity on this band. This would be the E-ticket for my 220 repeater. One of these days.....

There are a couple volunteer Townwatch operations around here which
share a vhf simplex freq with a heating oil distributor & HVAC
maintenance company. The company uses it during the day, the
townwatchers use it at nite. They even share the same tower. Goes back
to the 1970s when the townwatchers got tired of the crap on CB and
popped for some inexpensive cigarette lighter powered Motorola radios
& mag mount antennas. There are also some taxicabs on the freq.
Everybody has been getting along just fine for close to 30 years

> roadtalk channel.

I find that interesting. I had not heard anything of the sorts. Mostly, in my area, FRS has been taken over by kids plying "cops and robbers", or "spaceman". FRS has a nominal range of 2 miles. On clear, flat land you may get 5 miles or a bit more. Hills will drop it down considerably. Most FRS radios are hand-held, which is a bit awkward for a driver to use. Radio Shack makes (made?) a clever mobile radio, where the radio RF section and the antenna, were located in the antenna and mag-mount base (per FCC rules), and the cable connected the audio and control signals to the "radio" unit mounted in the car. This would be a better choice for a serious mobile user, but would still not afford the range that CB would, when the noise levels were low.

FRS radios are very hard to modify (by FCC mandate). You cannot add an external antenna, without tearing the radio apart and adding the connector yourself, which can be difficult as the radio is compact and there is not much room for things like connectors. A lot of trouble for the average user.

MURS would be a much better choice as an alternate to CB. You have a 2 watt limit, and you are allowed external (Gain!) antennas. Range should be in the 5-10 mile nominal range.

>
>You hate them enough to avoid mentioning them.

Incorrect. I mention them when appropriate.

>You don't want to
>realize that, without the Techs, the US ARS numbers would be down
>now, not stagnant for two years.

That statement is based on the assumption that the number of new hams would be
far less without the Tech license. That's not a valid assumption. Ham radio
grew all through the 1970s and 1980s, when all licenses required a code test.
>>
>>Their numbers disagree with those provided by the FCC.
>
>The FCC only makes the entire US ARS database public. I haven't

>So have two neighbors (degreed, didn't have Masters but had more
>experience). A fourth former teacher (CA, grades 2-10) is male,
>spent a full career in teaching.

So what? That does not mean that the 6 yearolds in question obtained their licenses dishonestly.

>All will agree that some kids CAN
>do some "amazing things" but ALL AGREE that reading and
>comprehension of the US VEC-generated questions and answers
>were beyond the abilities of even exceptional six-year-olds.

Do they know the 6 year olds involved? Where they at the test sessions? I think not.

Most important of all, comprehension of the Q&A is not required. All that IS required is to correctly answer at least the required number of questions on the test - nothing more. Those are the FCC's requirements.

FCC went to multiple-choice-only written tests for all classes of license about 142 years ago and to a published Q&A pool almost 20 years ago. Comprehension is NOT required to pass the tests.
>
>>Why do you? You're the one who posted "no kids, no lids, no space cadets".
>
>Satirical quote of others. :-)

Were your comments to the FCC a joke, too? Or were you serious about wanting an age limit of 14 years?
>
>>You're the one who recommended an age limit of 14 to the FCC in reply

Because your company has a GMRS station and expects FRS units would
interfere?

That's my guess. Or is your company just a bunch of stick in the muds?

As I'm sure you know, this is a fallacy. There are still many active
freqs police nets on VHF. Some cities use it as their primary LE comm.
And it's still reserved for nets like L.E.R.N., which isn't used often
but must be kept clear for interstate and emergency comm.

> The old equipment usually is either scapped or sold

6 meters being the most common. 2 meter radios are too cheap to bother
with the conversion from any commercial radio.

Oh yes, they do care. Commercial licensees are very anal when it comes
to someone interfering on their freq. They may use it often, or they
may use it once a month, but if someone is bootlegging on their freq
they -will- complain, and the FCC -will- respond. Money talks, and the
freeloaders pay the price.

Which demonstrates the inability of truckers to comprehend the fact
that higher freqs (UHF) are much easier to DF than HF. So I say let
them abuse FRS as much as they want, and when the FCC finally hires
someone that can do their job those truckers will get popped.

In the meantime, don't hold your breath.

When an opinion is held without supporting evidence it is merely a
prejudice.

> You just can't call my beliefs "mistaken" until you prove you are God.

He can, but there's not much to be gained by it. By the above you've made
it clear that your anti-ARRL viewpoint is a matter of faith rather than
intellect, and arguing about religion is notoriously fruitless.

N2EY sed:
>>Sure I can. What you cannot envision is that most hams, including
>>Technicians, disagree with you.
>
> That's unprovable and you know it.

It's only unprovable in the sense that you will refuse to accept any proof that runs counter to your prejudice against ARRL. That's understandable since an opinion that is based purely on faith rather than reason is not susceptible to proof or disproof.

They would have had to change their freqs -- the Safety Pool freqs are
assigned at the federal level and are not used for garbage trucks.

>But, as I (maybe said a bit unclearly) said before, there are many cases

>legitimate users are left on the frequency, then who would complain?

Many fire departments and law-enforcement agencies use what others
consider to be 'abandoned' frequencies for undercover work and/or
training operations (and probably other purposes). These freqs may
still be licensed, and although they might not be currently being
used, can still be used for emergency purposes or as backup comm
systems. Bootlegging on PSP freqs is still a very bad idea. I'm sure
that if any PSP licensee knew that their freq, used or not, was being
bootlegged they would monitor and prosecute the violator as quickly as
possible.

You missed the point: the 2 meter equivalents are just as cheap. It's
not worth the time and expense to modify a 2 meter rig for commercial
freqs when you can pick up commercial rigs for $40 or less. Once I
found a base and two mobiles at a flea market for $5. Scary.

People that monitor their police scanners.

If the bootleggers are allowed a foothold in the Safety Pool then you
might as well write off all the other emergency bands as well.

What a load of rubbish. 'In a perfect world' right Ed?

Let me tell you how it REALLY works. After you reach the point that the Power Company LIES to the ARRL about what they are doing (nothing). And you sit here on your hands for months and months and drop e-mails to the ARRL and try to get things moving.....THEN the ARRL IGNORES YOU TOTALLY.

I'm a LIFE member and this is just ANOTHER reason I wish I wasn't.

Bottom line. I'm STILL sitting here with noise that has been here for 3 years. Its like a big revolving shell game, an nobody can find the right shell.

Zero-bias doesn't work well in certain amplifiers. You should know that.

>> I do NOT believe the ARRL voting is honest.
>
>But without evidence.

There is NO evidence that the ARRL is honest...except in ARRL
statements that they are honest.

That would be good for sworn testimony in court but it is NOT
prima facie evidence that the ARRL is honest.

Will the ARRL admit to being dishonest? I don't think so. That would
not be good for their membership growth or money requests.

>> I do NOT believe the ARRL BoD is pushing the "will of the member- ship"

>> Those are MY beliefs in regard to the ARRL. Call a belief a sort of
>> "opinion."
>
>When an opinion is held without supporting evidence it is merely a
>prejudice.

I disagree. I'd call it suspicion.

Where is the un-biased evidence that the ARRL is always truthful?

The ARRL is a private organization. Their "elections" are not the same
as a government's elections. The ARRL has complete and total
control over what it says it does. How is that "evidence" that it is
truly honest?

Is Jon Bloom unbiased in his opinion? Can anyone suspect that Jon
Boom, a fairly-high-paid employee of the ARRL, might be biased?
Of course anyone can.

Does suspicion of Jon Bloom's bias make a person "prejudiced?"

>> You just can't call my beliefs "mistaken" until you prove you are God.
>
>He can, but there's not much to be gained by it. By the above you've made
>it clear that your anti-ARRL viewpoint is a matter of faith rather than
>intellect, and arguing about religion is notoriously fruitless.

The argument was over opinion, not religion. Miccolis wished to paint
opinions opposite to his as "mistakes." Opinions are only opinions.

Suspicion is prompted by intellect...by comparison of actions over the
years and the resulting impact on a group, how the group now reacts as
opposed to a time before. It is obvious that many within a group have
expressed great faith and belief in the organization in what it has said
and will not countenance any disbelief. THAT is prejudice and THAT is
pseudo-religious attitudes personified without any intellect.

There is no intellect operative in regards to belief systems.

There CAN be intellect at work in observation. That does not require bias. Rather, it requires zero bias, an open mind, a suspension of belief. In observation of the ARRL, the only evidence as to their honesty in their claims is their own statements swearing that they are honest in those claims.

There is NO presented evidence that the ARRL is honest just as there is NO presented evidence that the ARRL is dishonest. Neither is this venue a court of law where the penalty for false statements is perjury and possible criminal trial as a result of perjury.

What is at work here is suspicion that leads to certain opinions that the ARRL is not honest.

Is Jon Bloom free of prejudice? Is he "zero biased" in opinions? Or can the readers suspect that a paid employee of the ARRL might just be biased for his employer?

Readers are treated to accusations of "prejudice" and some impropriety at challenging opinions and statements of ARRL employees. Such near-outrage is itself prejudiced and seemingly grounded in some fundamental pseudo-religious belief system in the "honesty" of an organization that exercises total and complete control over what it says it does.

>It's only unprovable in the sense that you will refuse to accept any proof
>that runs counter to your prejudice against ARRL.

Contrary to your accusation, I have no prejudice against the ARRL. I simply do not believe in all their claims.

Present your bona fide claims of ARRL honesty from disinterested third-party source references and they will be considered fairly.

Note: Continuing statements of the ARRL, its employees, or ARRL members are NOT disinterested third-party sources. Those are, rightly, to be considered as prejudicial.

>That's understandable
>since an opinion that is based purely on faith rather than reason is not
>susceptible to proof or disproof.

Opinions can be based on suspicion alone. That does not require any "faith." That does not require "prejudice."

Where is your proof from disinterested third-party source references that the ARRL is honest in all its claims?

I'm not sure that is appropriate - one question, but, then again, so is CW - although you also have to pass the theory exams (which, in my opinion, are exceedingly easy). A friend of mine sent me a URL for an IQ test the other day. Like an idiot, I tried it after 12 hours of work and being quite tired, I turned in the worst score on that that I've had for several years. 138. Oh well ...

Here is one for ya - answer this and I'll see if I can convince someone you deserve HF access without code. You start with a magic rope 1 kilometer long. It is fastened to an immovable object and an inchworm is at the immovable object. (I'll try and make this easy) ... the inchworm crawls 1 centimeter for 1 second. At the end of the second, the inchworm stops and the rope stretches 1 kilometer. The inchworm starts again and the sequence repeats. Each second, the inchworm crawls 1 cm, at the end of the second, the rope stretches 1 Km.

Question #1: Does the inchworm ever reach the far end of the rope.

Question #2: (now, pay attention: this question SHOULD answer question #1) If the inchworm CAN reach the end of the rope, how long will it take and how long will the rope be?

73 from Rochester, NY
Jim
ps - don't try this on a computer. You will not have enough time nor processing power. You will also come to understand what 'overflow' and 'underflow' mean. One college professor learned that the hard way.

Then where is YOUR evidence?
>
>There is NO "proof" either way, no evidence that would stand up in
>court. All you have is a Belief System wrapped in pseudo-patriotism
>and lodge-hall-loyalty.

Nope. I have my own experience as a League member and former holder of an
operating appointment (ORS).
>
>>> Voting can ONLY be done by the ARRL voting membership.

>>
>>Why should nonmembers be allowed to vote? Does NCI allow nonmembers to
>>vote?
>
>More misdirection.

Just answer the question. Does NCI allow nonmembers to vote?

>NCI is NOT a national membership organization
>that prints products and resells others while trying to act like some
>kind of auxilliary "government" and also being a special-interest lobbying
>group in Washington DC.

So what? Why should any organization allow nonmembers to vote, particularly
when membership is open to all who meet a few basic requirements?
>
>NCI is purely a political-action organization, an INTERNATIONAL
>organization of like-minded individuals.

How many individuals?

>It isn't a lodge hall fraternal
>buddy-buddy place. It has ONE goal, the elimination of the morse
>code test from amateur radio license examinations. When that is
>accomplished, NCI will dissolve and be no more.

How do you know? Can you predict the future?
>
>ARRL has NO plans to dissolve...indeed, they are starting to look
>strapped for cash flow with all the additional money requests. NCI is
>FREE and donations are voluntary. Membership in the ARRL costs
>money...voting can't be done without paying membership in ARRL.
>ARRL is trying to live forever because everyone there LIKES the
>power and control positions, the titles, the noteriety.

Why should ARRL dissolve?

Seems to me that you want the ARRL to go away because you hate the idea of a
strong national organization for amateur radio.
>
>>> The ARRL
>>> won't represent them as they do other classes...that is their clear
>>> perception.
>>
>>How do you know? Have you done a scientific survey? A poll? Or are you
>>just blowing smoke, as usual?
>
>I am pointing to the ever-present SMOKE rising in the northeast.

Sounds like a geographical bias.

You sure seem to see dishonesty everywhere, yet you provide NO evidence to back
up your claims. Could it be that you have a guilty conscience?

>
>Show us YOUR "evidence" that ARRL is "favoring Technicians" at all in
>the pages of ARRL publications.

No class of license is favored or disfavored. QST is full of articles on
VHF/UHF projects, contests and public service.

>Technicians are now nearly 1/3 of all
>licensed US radio amateurs and the most recent ARRL demographic
>breakdown (for ad sales use) had Technicians as the lowest number of
>members. Nearly every issue of QST pays homage to the rank, status,
>etc., of license classes and emphasizes morse code modes over the
>others as being the "best" mode.

Where? Give us some examples.

>>> You cannot envision that.
>>
>>Sure I can. What you cannot envision is that most hams, including
>>Technicians, disagree with you.
>
>That's unprovable and you know it.

The point is that you cannot even envision it.

>You don't understand that my opinions aren't just shared with some
>already-licensed radio amateurs, they are shared with an unknown
>number of would-be radio amateurs.

Key phrase there is "an unknown number".

>>What you cannot envision is the idea that you
>>are mistaken about some things.
>
>I can only envision that I have a DIFFERENT OPINION than yours
>and I do not share your belief system.

Show us some evidence for your belief system.
>
>Different opinions and different belief systems are not "mistaken."

Some of them are. Many people believed that the sun revolved around the earth.
Those beliefs were mistaken.
>
>Different opinions are simply different opinions. There should be a
>freedom of beliefs in addition to freedom of religions in this country.

You can believe what you want - including mistakes. But don't expect others to
believe as you do without solid evidence, particularly when your "beliefs"
include things like unproven claims that others are dishonest.

>You apparently dislike FREEDOM.

Not me. I love freedom. But with each freedom comes responsibility.

You are the one who would deny amateur radio licenses to those under 14, for no reason at all except your own prejudice aainst young people.

>You want the hobby, perhaps
>the country, organized solely to your desires.

Where do you get such wild ideas? Must be your tendency to believe in thins without any evidence.

Jim, N2EY

This KLV company is making amps for every frequency band
under the Sun. Also, there is absolutely ZERO PROOF that the
particular amp in question is being "marketed" specifically for
MURS... fact is there are HUNDREDS and HUNDREDS of frequencies
between 150-160Mhz, including Maritime; and on many of those
frequencies(depending on the particular license, etc.) the amp would
be PERFECTLY LEGAL - so why in the hell would you focus on the five
MURS frequencies where it is totally illegal?

What pisses me off is that you go around mentioning crap like this,
and some stupid fool who doesn't know any better would actually
waste his money on one - not knowing that it won't do a damn thing
to improve his communication range(the attenuation will actually
hurt it!), and that he will just be jamming a whole bunch of
stations he can't hear.

You are going to have to come up with something better than this. How
about an actual case of someone USING an external amp on MURS.

- Stewart

How about personal experience... US Navy 66-70 (almost 40
years ago). As a Navy electronic tech, the ships at sea used no
radio morse code at all for any communications at all. The only time I
saw morse used at all was an occasional "drill" excersize.
From my experience, by 66, all long haul comms were
via HF RTTY (encrypted).

Voice radio comms were usually all local UHV/VHF.only.

Cheers,
Bill K2UNK

Could YOU solve one that fast?

When the Rubik's Cube came out, I got one and learned to solve it. Once I got my skills up, I could solve it in 60 seconds or less. With a little practice, I could get back to that level of skill.

However, I used engineering methods to work out the solution.

>understand us.

All that does is make you less distinguishable from him. I don't think that's what you want. When dealing with an unruly child, do you behave like the child? Of course not - you display more maturity than the child. Same principle applies to Lenover21 and his tantrums here.

>>Why not simply discuss the issues?

Sure there is. When someone presents information about a problem in the ARS, we should look at the info and consider it.

> I am not aware of a
>single enforcement action against an under-18 (or under 14, for that matter)
>operator since I was myself licensed in 1972.

Same here. So keep the discussion focused on that point - there is no reason for age limits because there is no indication of any problems caused by their lack.

Oddly enough, when cb had licenses, there was an age requirement (18?) to get one. Didn't keep cb from turning into mess, did it?
>
> And I am still waiting for

(Lenover21's)

>Official Observer notice.
>
I got my Novice at age 13, Tech and Advanced at 14, and Extra at 16. Would have had the Extra much sooner but back then you needed two years as a General or Advanced to even take the Extra.

However, consider the following example, from Bala Cynwyd, PA.....

Way back in 1948, a 9 year old earned a ham license, with the help of her father, an active amateur and a schoolteacher by profession. This child had been copying code since 6 years of age.

Back in 1948 there was no Novice or Technician license - the old ABC system was in effect. This young ham got a Class B license, which meant:

- a trip to the Philadelphia FCC office, to pass all the required tests in front of an FCC examiner
- code receiving and sending tests at 13 wpm
- a written exam that included multiple choice and essay questions as well as drawing schematics.

There were no Bash books or published question pools for ham exams back then. Quite an accomplishment. Yet Lenover21 would have made that young ham wait 5 years before even being allowed to try the tests.

The most important "credential" is some actual data that showed a problem. So far, none has been provided.

> Even more "dubiousness" about his practical experience, not that there
>was much question about his PE on Amateur Radio matters...

PE? That usually means Professional Engineer, which is a license granted by the state. I don;t think Lenover21 is a PE.

Jeesh..... that would be a tough one to answer, but there are many reasons I could think of:

A. Enjoying that level of licensure for a while.
B. Ham radio is a part of thier life, not their WHOLE LIFE.
C. Employment issues.
D. Currently studying for higher licensure.
E. Not able to utilize higher frequency priviledges for any number of reasons.
F. Just wanting local (within state or local immediate area) usage.
G. Maybe what they thought they might get out of ham radio is not actually there.
H. Personal choice.
I. Many others that I have not gotten the abilitly to speak to these 35% of all licensees but I am sure that at least half of them have a viable reason.

These are some of the reasons I have heard. If upgrading is a REQUIREMENT, I guess some of these people want to take it at their own pace. I am in no hurry because they only way I can operate is mobile or a "extremely quick to set up" installation at my place of employment, as I cannot operate from my residence. Also I am saving up for a HF mobile rig, of which I should hopefully own within 2 to 3 years. Also within my new career that I have embarked upon a little over 2 years ago, does take up a considerable amount of time, that I would rather use to enjoy hobbies etc. Almost ALL of my hobbies such as amateur radio, photography, scuba, audio remixing and editing, still and video digital editing have taken a back seat to this career, as I beleive the long-term payoff is more worthwhile. I still utilize all of my hobbies, jsut not like I would like, but later on in my career when there is more time I am sure I will.

Have a great day! :)

Larry, actually that degree may help you in the future if you choose to get
into upper management within the bus company whether it is a municipal
entity or a "for profit" company either way.

Guess you missed the sarcasm (not necessary directed at you at all) about the original response there Cecil..... Main point was that if techs are supposed to be held to the same level as old or new extras, then by all means an advanced class licensee should definitely know better, and be so devoted to keep up with the ham radio field along the way. :)

Then again, you don't have any experience as an ARRL member or as a ham so you really don't have much knowledge of the ARRL at all. You're starting to remind me again of former neighbor Mr. Rober. There he sat, typing away all day--every day--writing letters to express his outrage. He didn't really know what he was angry about or who he was angry with but he knew he was damned mad. He was a queer duck in our neighborhood. You are a queer duck in this neighborhood.

Ever wonder what they're hiding in that hangar in Roswell, Len?

Some of us techies do act like that, as well as some Novices, Generals,
Advanced and Extra class licensees. Regardless of date of licensure. I
have the belief, and I state that by my LOCAL experiences with traveling
around Michigan, that the overwhelming majority of the operators up to
general class licensure are very professional, knowledgeable, and courteous.
There a few bad apples here and there, but that is bound to happen in any
environment. It is how we deal with these few bad apples that really
counts. It is also how we deal with the rest, as a brotherhood/sisterhood
to help better the hobby which is also important. If uncoded hams are such
a "bad thing" then logic would dictate that proficient hams would be better
served expending their energy trying to sell code in a positive light and
also possibly trying to help teach it too, instead of the energy expended
bitching and whining about uncoded hams. Until we learn to change this, we
will destroy ourselves from within.

Great.... I guess it is a matter of at least wanting to achieve more, even if it does take some time that is important, rather than that small group that has no aspiration to advance further.... (some prime examples in some of the trailer parks in my county!!!!! :)

Don't look at my picture then.... it is about 4 years old also. A little less hair on the "dome" and about 20 extra pounds makes me look a little different. I am 32 but I am telling everyone I am 28.... next year I will tell them I am 27, and so on. Figured 30 is my mid-life crisis! LOL :)

Happy Hamming!

Still not sold on the idea of digital cams yet.... Mostly because of the media storage issues. If Sony would make that damned Mavica series with a Iomega Zip disk drive instead of floppies... I would buy one ASAP.

Stewart, he won't improve his communications range anymore than a 27 MHz cb station will improve his range - with a low power station. With two stations running perhaps 200 watts, you will find a pretty consistant range of perhaps 70 miles. This is not fancy, this will be found fact. No one has accused you of subverting MURS. Rather, I believe you are going to find out something you don't really want to believe. You talk about totally illegal. Check around 27 MHz. There are killowatt stations and more. They run out of band. They run from perhaps 3 MHz to 40 MHz. That too, is illegal. Do you think they will avoid MURS because it is illegal? You have my e-mail address. I've nothing to hide. Come tell me that I am wrong 3 years from now. Seriously, I hope you can do that and I can admit that I was wrong. I seriously doubt it. If the government is spending $1,000,000 per year on false distress calls in the Los Angeles area alone, what would make you feel the MURS is going to be a happy camping ground for you? What is it that you don't understand? $1,000,000.00 per year on false distress signals? Check the FCC website. What makes you believe that MURS will be immune? Get a grip! Those amps are not being specifically marketed for MURS, they are being marketed for anyone who wants them. That will, unfortunately, include MURS. As I said, I hope that 3 to 5 years from now you will be able to quote me and tell me that I was wrong. Heck, there have only been a couple of cases of people caught and convicted of using an amp on CB! Can I ask a personal question? Is your IQ well below 100? (that may improperly be taken as a flame, but you have to look at the evidence - please don't put your blinders on)

That should be apparent, even to you. If you didn't pass, you aren't
rewarded with additional spectrum or privileges. If you did pass, you
do receive additional spectrum or privileges.

tries to caontact me?

I don't recall writing that. I'd think you'd look up allocations in
order to find DX you wanted to contact, not for finding those you don't
wish to contact.

problem with that.

I don't have a problem with that, Brian but you really didn't do that
"instead", you did it at the time. You don't travel now to DX spots to
operate. Have you stopped being a DXer now that you're in the U.S.?

> Part 97 doesn't say I cant' be DX or work DX
> until I'm an Extra, does it?

Part 97 only deals with licensing in the U.S. and its territories and
possessions. Last time I checked, Somalia wasn't a U.S. possession.

Yes, QSLing is a waste of operating time. Why do you think rare
stations usually have a QSL manager? Some DXer!

ones. They're not necessarily in the contest to > score big.

Pretty one-sided, Brian. How many JA's need to work Tanzania in or out
of a contest? Many DXers are also contesters.

> > > > > The DX station can do likewise if he's not a serious contester. A

I'd guess because they already own a place which has some zoning
limitations but not necessarily CC&Rs. Maybe they want to put up three
really tall towers but own a home where they can get a permit for only
one modest tower. I don't know many DXers who have "big stations away
from their QTH".

>>> I do NOT think Consumer Reports are completely honest.
>>
>>But without evidence.
>
>Where is the evidence that CR *IS* honest...other than they telling everyone
>how honest they are?

In as much as they are wide open to public scrutiny and there is NO
evidence of any misdeeds or wrongdoing, one can safely state they are telling
the truth.

I agree with others that technical erros can occur, but a technical error
is NOT a lie or falsehood. Poor practice, perhaps, but not lying.

>There is NO evidence that the ARRL is honest...except in ARRL
>statements that they are honest.

In the absence of evidence of dishonesty, they must be honest.

>Will the ARRL admit to being dishonest? I don't think so. That would
>not be good for their membership growth or money requests.

You are invited to submit your evidence of wrongdoing, Lennie.

>The only evidence presented is what the ARRL submits to the public.

Which is required to be without falsehood lest they be made subject to
federal offense for misuse of the mail.

>Where is the un-biased evidence that the ARRL is always truthful?

Where is the evidnce they are not? Eighty+ years is certainly enough time
for SOMEone to ahve written a Truman Capote-style expose on thier life of crime
and misconduct in the ARRL.

>Is Jon Bloom unbiased in his opinion? Can anyone suspect that Jon
>Boom, a fairly-high-paid employee of the ARRL, might be biased?
>Of course anyone can.

I've never met Jon, but I'd take a good bet on HIS honesty and impartiality
before I would yours...ANY day.

>Opinions are only opinions.

Unless they are fanatically touted as "fact" to the point of being almost cult-like in thier efforts...Kinda like your several years long antagonizing of RRAP.

>There is NO presented evidence that the ARRL is honest just as there
>is NO presented evidence that the ARRL is dishonest.

A lack of evidence of dishonesty, in the United States, IS evidence of honesty. The Constitution says so.

>Present your bona fide claims of ARRL honesty from disinterested
>third-party source references and they will be considered fairly.

The lack of indictment of dishonesty or fraud is, in the United States, evidence of honesty.

>Where is your proof from disinterested third-party source references
>that the ARRL is honest in all its claims?

Where is YOURS that it is dishonest?

>MURS frequencies where it is totally illegal?

Stewart..Are you REALLY this stupid, or is it a summer thing?

A "CB" radio shop, selling NO bonafide Amateur Radio transceivers or
Marine band gear but DOES sell "CB" and "Export" radios is now selling linear
amplifiers for...WHO?

>What pisses me off is that you go around mentioning crap like this,
>and some stupid fool who doesn't know any better would actually
>waste his money on one - not knowing that it won't do a damn thing
>to improve his communication range(the attenuation will actually
>hurt it!), and that he will just be jamming a whole bunch of
>stations he can't hear.

And what ticks ME off is that you insist that it's not happening.

And what FURTHER ticks me off is that you are still unable to comprehend
even elementary principles of VHF practice.

>You are going to have to come up with something better than this. How
>about an actual case of someone USING an external amp on MURS.

How about I can hear them from my house.

Stick your head in your self-proclaimed noble sand, Stew, but the FACTS
are aftermarket linear amplifiers for VHF (read that MURS) radios are being
sold to truckers for use on MURS (and other) frequencies where they do NOT ahv
licensure to use these devices.

The proof is right there in the original post Aaron Voobner made.

Ignore it if you choose, but I serious doubt that someone created that
webpage just to get you twisted, Stew.

Wake up, MURSman...Your cloak of nobility just turned out to be made by the same tailor who made the King's new clothes!

Steve

Do you read Consumer Reports? If you do and have any experience with any of the products they review, you can easily verify claims they've made about those products. Those verifications should convince you that there is honest reporting in CR. Does that "prove" that it's ALL honest? No, but to have a REASONABLE suspicion of dishonesty you need to counterbalance the verifiable truths they print with at least one case where they can be shown to have knowingly printed an untruth. Since you don't know of any such case, your suspicion of CU is unreasonable. The same goes for QST and ARRL.

>>> However,
>>> CR seldom reviews amateur radio equipment, so I fail to see where this
>>> is going except in another dead-end misdirection.
>>
>>Yes, I suspected it was an attempt at misdirection when you brought it
>>up.
>
> But without evidence.

No, the evidence is legion. You have a rich posting history of trying to change the subject when you're losing the debate. Sometimes, like now, you just try to change the subject, but often you diverge from the issue into personal attacks designed to distract your debating opponent from the real issues. (Example: Calling Jim, N2EY, "Jimmie boy.")

>>> I've been IN radio for almost a half century and have NEVER had to use
>>> morse code in any radio service. Why should I be biased FOR morse
>>> code?
>>

Just ducking uncomfortable questions seems to be another one of your
principal debating techniques.

>>> I do NOT believe the ARRL voting is honest.
>>
>>But without evidence.
>
> There is NO evidence that the ARRL is honest...except in ARRL statements
> that they are honest.

Sure there is. There are plenty of ways you can verify ARRL's honesty.
ARRL promises services to members and delivers on those promises. That's
honesty. (Which is not to say we achieve perfection in our operations, but
that's a totally different topic from honesty.) ARRL sells products to
members and nonmembers alike. There, too, promises are kept. Honesty. ARRL
says it's working on Amateur Radio matters in Washington, Geneva and
elswehere. There's plenty of public record available with which to verify
that ARRL is in fact doing that, as it says.

The problem, of course, is that you dislike some of ARRL's policies but
are unable to mount effective arguments against them. So, you mutter vague
intimations of dishonesty while lacking any evidence to support those
claims.

> That would be good for sworn testimony in court but it is NOT prima

What other evidence could there be? This is one of those "have you stopped
beating your wife yet" deals.

>>> Neither do I believe the ARRL is truly representing "all of amateur
>>> radio" as its propaganda has put out for so many years. I believe it
>>> only represents a core group of the BoD and higher staff that want to
>>> control policy in regard to their wishes.
>>
>>But without evidence.
>
> The only evidence presented is what the ARRL submits to the public.

Nope. Go to a large hamfest and attend the ARRL forum, or just hang around the ARRL table. You'll hear plenty of exchanges between the ARRL leadership and the ham-in-the-street. If the ARRL's actions were counter to the interests of those people, the exchanges would be largely negative in tone. But they aren't. The evidence is there, and people who actually participate in ham radio are well aware of it. What you fail to understand is that the interests of the BoD and staff aren't different from those of the members or of hams in general.

>>> Those are MY beliefs in regard to the ARRL. Call a belief a sort of
>>> "opinion."
>>
>>When an opinion is held without supporting evidence it is merely a

> I disagree. I'd call it suspicion.

When suspicion is based on no evidence it's paranoid..

> Where is the un-biased evidence that the ARRL is always truthful?

Answered above. Once a baseline of truthfulness is established, you have to have EVIDENCE of untruthfulness to make a substantive claim of dishonesty.

> The ARRL is a private organization. Their "elections" are not the same

>

> The argument was over opinion, not religion.

In your case there's not much difference since you form your opinions
without evidence.

> Miccolis wished to paint
> opinions opposite to his as "mistakes." Opinions are only opinions.

But not all opinions are equal. Opinions which are based on a reasonably
objective evaluation of the available facts, aided by public discussion of
those facts and evaluations, are substantive. Opinions, such as yours,
which are based on unreasoned emotion are quasi-religious and add nothing
useful to the public debate.

> Suspicion is prompted by intellect...by comparison of actions over the
> years and the resulting impact on a group, how the group now reacts as
> opposed to a time before. It is obvious that many within a group have
> expressed great faith and belief in the organization in what it has said
> and will not countenance any disbelief. THAT is prejudice and THAT is
> pseudo-religious attitudes personified without any intellect.

Nonsense. As I've pointed out, there are plenty of ways in which ARRL's
bona fides can be and are verified daily and for the past 80+ years. That
evidence of ARRL's delivery of value to hams and ham radio is what keeps
those many hams affiliated with the League, not some mystical "belief
system."

> There is no intellect operative in regards to belief systems.

My point exactly. Since you can supply no concrete evidence upon which to
base your suspicions, there's no intellectual component to your beliefs.

> There CAN be intellect at work in observation. That does not require
> bias. Rather, it requires zero bias, an open mind, a suspension of
> belief. In observation of the ARRL, the only evidence as to their
> honesty in their claims is their own statements swearing that they are
> honest in those claims.

Asked and answered. The evidence is readily available. Pick up a copy of
QST. See if you can find statements made therein that are demonstrably
true. You can. See if you can find statements that are demonstrably and
knowingly false. You can't. QED.

> There is NO presented evidence that the ARRL is honest

Untrue.

> just as there is
> NO presented evidence that the ARRL is dishonest.

True.

> Neither is this venue
> a court of law where the penalty for false statements is perjury and
> possible criminal trial as a result of perjury.

>
> What is at work here is suspicion that leads to certain opinions that
> the ARRL is not honest.

A suspicion for which there are no grounds.

> Is Jon Bloom free of prejudice? Is he "zero biased" in opinions? Or
> can the readers suspect that a paid employee of the ARRL might just be
> biased for his employer?

I'm biased. I'm biased by the overwhelming weight of evidence of ARRL's honesty. I encountered that evidence long before I was an employee of ARRL; I still encounter it. Because of that weight of evidence, I harbor no suspicion of any dishonesty at ARRL. That doesn't mean I'm incapable of acknowledging it if any evidence of dishonesty appears. But there isn't any.

> Readers are treated to accusations of "prejudice" and some impropriety
> at challenging opinions and statements of ARRL employees.

You can "challenge" ARRL's policy decisions all you want, but when you impugn a person's or organization's honesty, you are ethically obligated to back it up with evidence.

> Such
> near-outrage is itself prejudiced and seemingly grounded in some
> fundamental pseudo-religious belief system in the "honesty" of an

> it does.

I would certainly hope it does. Are you suggesting, Len, that you do not have total control over what YOU say and do? That would explain much. :-)

>>It's only unprovable in the sense that you will refuse to accept any
>>proof that runs counter to your prejudice against ARRL.
>
> Contrary to your accusation, I have no prejudice against the ARRL. I
> simply do not believe in all their claims.

Calling someone dishonest without evidence IS prejudice.

> Present your bona fide claims of ARRL honesty from disinterested
> third-party source references and they will be considered fairly.

No, I don't think they will. You've demonstrated no open-mindedness on this topic.

> Note: Continuing statements of the ARRL, its employees, or ARRL members
> are NOT disinterested third-party sources. Those are, rightly, to be
> considered as prejudicial.

But not dishonest, lacking evidence of dishonesty.

>>That's understandable
>>since an opinion that is based purely on faith rather than reason is not

>>susceptible to proof or disproof.
>
> Opinions can be based on suspicion alone. That does not require any
> "faith." That does not require "prejudice."

But it does require evidence if the opinions are to have any merit.
Lacking any evidence, yours don't.

> Where is your proof from disinterested third-party source references
> that the ARRL is honest in all its claims?

I see, you demand proof of honesty for every single statement that ARRL
has ever made while being unable to identify even one case where ARRL was
dishonest. By that standard, you must suspect every single person and
organization of dishonesty, since noboby's entire body of actions and
statements can be PROVEN to be honest.

As for disinterested third parties, do you suppose these organizations
consider ARRL to be dishonest?
http://www.arrl.org/FandES/field/mou/

The bottom line is that there is are many ways in which what ARRL does can
be verifiable -- and is verified. Meanwhile, you can't adduce a single
case of dishonesty. Your "beliefs" are based on nothing more than your own
fevered imagination.

True also. My township still holds a license to use one of the old
"abandoned" low band police frequencies. I never hear any activity on
it, but the police cars still have the capability to switch there, so I
imagine they do from time to time, when they want to talk to each other
without being monitored by county dispatch.

I misunderstood you. You're talking about modifying ham gear to bootleg
on commercial freqs. I was talking about hams modding commercial gear to
use on the ham bands, since they are usually more dependable and rugged.

Why would people monitor a supposed "dead" frequency?

I have caught wind of some people doing things like that. I don't know
if they take the trouble to get their cheaply purchased commercial rigs,
reprogrammed for different freqs, or they just bootleg on the one(s)
that's already there. Frankly, I don't want to know. I don't want any
part of people playing in the public service bands.

Steve,

No need for the pejoratives. Perhaps Mr. Anderson is having trouble
with his computer.

Last night I received an unsolicited email with attachment from
"Lenof21", which is one of Mr. Anderson's many screen names seen in
rrap. The attachment file was 1.8 meg, zipped, and there was no
explanation of what it contained. An email requesting further
information has not been answered yet. I do not unzip or open email
attachments unless I know what they are and who they are from.

Steve, I'm going to simply drop the subject. Facts are being taken as flames. Certainly MURS is not currently a vast wasteland; given time, I'm afraid it will become so. The fact is that the FCC has checked a bit and has come to the realization that most business band radios are not being licensed. So I have to assume that the 27 MHz problem is now moving into marine and business band segments of the spectrum. With the FCC stating that over 1 million dollars a year is being spent in the Los Angeles area alone JUST FOR FALSE DISTRESS SIGNALS, I am of the opinion that there are a lot of folks who need a new hobby. Like making license plates. Are the MURS users aware that at 144 MHz, the Hawaii to California path has been made many times? Do they understand tropo? Have they a clue as to scatter (the mode that will give a few hundred watts coverage out 70 miles or so even on a 35 foot tower)? Certainly, one guy with an amp still won't have anyone to talk to more than perhaps 20 miles away; however, with that website selling amps, I doubt he'll have long to wait.

I'd like the FCC to mandate that all new transmitter and transceivers be equipped with a CPU with a rom burned into it that continuously sends the unit's serial number out at perhaps a 10% level. Anything caught where it shouldn't be or with a high level sends the FCC to the manufacturer. Check the sales receipt. Go to the retailer. Check the sales receipt. Go to the individual. Did he sell it? If so, check the receipt. The 1st person with no receipt of to whom he sold it is on the hook for a NAL. Who cares if you gave it away? Produce a receipt or you are stuck. Current equipment would be exempted for a period of 10 or 20 years; after that, no id - NAL. I would suspect after the first hundred or so of NALs, things would quiet down. MURS users would have MURS back, business users would have their channels back. Amateur bands would no longer have intruders. 27 MHz might actually become useful again. File a bankruptcy? Ah, new law. You can't go chapter 7; You'd have to pay at least part of that NAL.

You are exactly correct. They use GMRS and don't want the interference. A few miles away it is no problem, of course; but on company property it could pose a problem.

2358. Unused frequencies

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-26 18:04:45 UTC
From: Jim Hampton <aa2qa@FrontierNet.net>
Message-ID: <uk33om3l9lkjb9@corp.supernews.com>
Source record: 50172

I've read a lot of posts concerning freebanding, MURS, frs, cb, and amateur radio. I've a question for all. Suppose a bunch of us are renting in an apartment complex. I didn't pay my phone bill and my telephone is shut off. I want to make a call, so I go to the phone box in the hall and jumper into a neighbor's telephone. I make my call. Hmmm ... why pay the phone bill? I just make sure the frequency is not being used ... oops, I mean you aren't using your telephone and I make my calls. Hmm .. this gets interesting. Now I call the telephone company pretending I'm you and pay for (well, actually, YOU are going to get the bill) a distinctive ring for the 'kids' (yeah, you're a grandparent and don't have kids, but follow the reasoning) along with a second number. It is cheap, but anyone dialing the kids' phone (me, actually) will ring your phone with a distinctive ring. Now, someone calling me will ring your (and my) telephone with a distinctive number and I can pick up! This sure is neat and only costs you a couple of bucks every month. Well, sure enough, you are home one day and a funny ring comes over your phone. You pick up and find me talking with someone else - on the line YOU are paying for. Hey, buddy, this telephone wasn't being used! You've gotta share it! Hey, what is going on here? Now, I contact my other buddies in the apartment complex. We all stop paying our bills (why should we take a test or pay for a license? Ooops, I meant to say "why should we pay for a telephone?). There is one in the building that is hardly ever used (well, maybe only 15 minutes out of 24 hours). Soon, there are 10 people sharing your line and all kinds of funny funky rings going over the telephone. You are starting to get mad. Hey, you weren't using the frequ ... I mean you weren't using the telephone, share the dumb thing! I mean, heck, you can likely get your line several times during the day and if you wait until 2:00 AM until 5:00 AM you will have your telephone all to yourself!

Now I am just curious if someone would enjoy that. If you would, I can save you a lot of trouble moving to an appartment. I'll just send you my telephone bill and you can pay it. BTW, I'd enjoy it if you also paid for my DSL.

Thanks and 73 from Rochester, NY
Jim

155.115 MHz is in the PSP and designated "PX" according to the
following list:

PF--Fire Coordinator
PH--Highway Maintenance Coordinator
PM--Emergency Medical Coordinator
PO--Forestry-Conservation Coordinator
PP--Police Coordinator
PS--Special Emergency Coordinator
PX--Any Public Safety Coordinator, except the Special Emergency
Coordinator

So if the freq was used for police it can be changed to fire, highway,
forestry, etc.

To see if it's really dead. Some of these scanner 'enthusiasts' aren't satisfied with the FCC's listings so they constantly scan for 'secret' freqs. Sometimes they get lucky and sometimes they get freeloaders.

It's too easy to reprogram many of the older rigs. I think I had an old Regency that was already modified with the programming switch wired to the front panel, all you had to do was enter your ten freqs in the keypad. It even scanned the programmed channels. Come to think of it I still have that radio, but it's in pieces right now. Anyway, all that was required was to solder one wire to an existing switch. That's all. (And before anyone emails me an offer, it only covered 138 to 151 MHz, no police bands.)

Quite so, as all readers have discovered in the last week.

That should be rectified with file "Attach L.ZIP" which you received. The same will be sent to the other two requestors.

>Last night I received an unsolicited email with attachment from >"Lenof21", which is one of Mr. Anderson's many screen names seen in >rrap. The attachment file was 1.8 meg, zipped, and there was no >explanation of what it contained. An email requesting further >information has not been answered yet. The file should be over 2 MB since it contains only two images, scans of the front and back of my First Phone first license. It does not contain any known viruses. The scan is at 300 DPI to preserve as much detail as possible, knowing the high probability of unkind remarks...:-)

Another ZIP, done at 150 DPI each image, is smaller at about 635 KB total size, still fairly readable. That is available on request.

The original "Attach" file seems to be a JPG of a converted B-26 with the moon visible from the nose. It is quite funny to all but the Amish Radio Service who are terribly mature and grown-up. :-)

The thought-corrected second file "Attach2" seems to be another mistake, being a PowerPoint type (file extension ".PPS"). It contains a nice day's greeting with an avian theme. PowerPoint readers are free for the download from the software producer's site.

2366. Why I will never ask a DXCC award

Newsgroup: rec.radio.amateur.policy
Date: 2002-07-26 23:05:16 UTC
From: Joker <qrp@radio.net>
Message-ID: <2002727-0516-44363@foorum.com>
Source record: 50195

Because it's a lame award. There is no control of any kind about the power used by hams. Most hams use 5 or 10 times the legal power to smash people on pile-ups and obtain their DXCC. Nobody cares. Ham-radio is became a war of amps. The real ham spririt has disapeared, there is no more friendship on the overcrowded bands (like the 6m band during an opening) because there are too much hams considering ham-radio not as a hobby but like a war "Oh he got a 3.5 kW amp, I will get a 6 kW soon !". That's the spirit now : to have the bigger equipment and to collect awards to put on the walls of his shack and have his picture in QST.
This bad spirit is now totally spreaded by the amp sellers that say in their ads "No time to waste on pile-ups" (i.e "Smash other hams with our amps").
How can you compare a DXCC obtained in FRANCE where the VHF power is limited to 120W (for example) with the Italian stations that use 2 to 6kW on 6m ?? It's evident that the result is not the same.
Most of the "DX" are done by clusters. No need to have understood the call and locator, just look at the cluster and ask the guy what you have missed.
So where is the merit to have a DXCC ? There is none ... and when you think that EVERY state in USA is a DXCC entity, it's totally a joke !

This was discussed at the FCC some 20 years ago as an interference resolution measure. The enforcement people who had to run around in the cold/dark/wet to find the intermittent/stuck/dirty transmitters loved it. The rules and policy people who issued the licenses didn't (too much work for them that they didn't do now), and got their allies, the manufacturers, to make sure that it wouldn't happen.

It survives today in data transmissions from 406 MHz marine Emergency Position Indicating Radiobeacons, small floatable emergency transmitters required on each ocean-going vessel, and which are serialized and can be traced back to specific vessels.

The cellphone system of Electronic ID Numbers was meant to do the same thing but the wireless thugs figured out a way to jimmy the EIN as part of "cloning" to the point that it is meaningless for that purpose.

I used to be a subscriber to CR, total of six years. I DID verify that
their claims were not always true; that cannot be absolute since I
did not check out ALL of them. But this isn't about CR, is it?

>No, the evidence is legion. You have a rich posting history of trying to
>change the subject when you're losing the debate.

Is someone "winning" while others are "losing" debates? :-)

>Sometimes, like now, you
>just try to change the subject, but often you diverge from the issue into
>personal attacks designed to distract your debating opponent from the real
>issues. (Example: Calling Jim, N2EY, "Jimmie boy.")

Now, now, Jon, try to be fair and mature. :-)

You are welcome to spend hours in Google to your hearts content
on searching out "personal attacks." Be as biased or unbiased
as you want. All you will be doing is triumphing in your own mind
after finding some iota and you will not, repeat NOT change much of
anything in the flow of messages now.

On the small subject of the above paragraph: How is a "familiar"
turn of phrase (some describe it as "diminutive") a "personal attack?"
That sort of address is very common among families in the midwestern
USA addressing other family members. Isn't that use more affectionate

than "attacking?"

Okay, so how do you explain all the others who have used the exact same form of address. Begin with Jim Kehler long ago. Continue on to over two years of such use by an extra who regularly tags his messages about me with a Yiddish-ethnic synonym for "dickhead."

Is that somehow "okay" but someone else (conveniently of opposite opinion) doing the same thing is now "wrong?" Curious double standard there.

>Just ducking uncomfortable questions seems to be another one of your
>principal debating techniques.

Misdirection and false allegations of wrong-doing seem to be a standard operating technique of "superior" (and "mature") extras.

Those, like yourself here, are simply trying to win message points by painting others in nasty colors.

Jon, Jon, Jon...no one has to answer each and every "question" posed by someone else in a newsgroup. If you want to keep implying that (for example) "I am still beating my wife," I won't bother with such...or...I may pose an equally-nonsensical "question" right back at you or anyone else.

Jon, I don't know what has gotten into you recently, but a self-righteous demand to "answer the question (you put)!" is simply a self-righteous demand. It doesn't have to be followed nor does it have to be answered in any way. No one is the "Dill Sergeant" addressing the troops who demands the "correct answers" and feels all those who do not answer "correctly" to "fall down and give me 10 (push-ups)." :-)

>> There is NO evidence that the ARRL is honest...except in ARRL statements
>> that they are honest.
>
>Sure there is. There are plenty of ways you can verify ARRL's honesty.

Jon, Jon, Jon...try to stay with the original statement.

The ARRL says it is "honest." The proof of such "honesty" cannot be more of the same. :-)

The ARRL says it speaks for all [US] radio amateurs. Obviously it doesn't if less than a quarter are ARRL members. Obviously it doesn't if there are many, many individuals who challenge the ARRL "honesty," who have challenged that "honesty" for many years.

The ARRL would be honest if it said "the ARRL represents its membership" and let it go at that (or words to that same effect). I have NO problem with that.

The ARRL cannot possible "represent" anyone who is interested
or just wants to learn more about amateur radio and is not yet
licensed as an amateur. Yet, the ARRL insists that it knows all
about "how to get into amateur radio" and fails to qualify that by
the "how to" being based on what the "how to" was in the minds
of members's experiences of many years in the past. Times have
changed and many more unlicensed in the amateur service people
have knowledge and experience in other radio.

Do you want the ARRL to continue to talk down to newcomers?
Do you want the ARRL to lead everyone by a parental hand as if
they were all ignorant lambs? Do you want the ARRL to appear
as some superior judge and arbiter of behavior when the evidence
is clear that they are simply "representing" the thoughts of long-
time members thinking their way is the "only" way?

>ARRL promises services to members and delivers on those promises. That's
>honesty.

That's NOT the WHOLE honesty. The whole honesty area includes
policy and lobbying the FCC "on behalf of the [US] ARS community."

As a non-member, I can't comment on the services to members or
their delivery. I do know that the goods produced or resold by the
ARRL are for the same amounts of money as required in stores
(but shipping charges are extra). Except for a large shipping charge
I have no quarrel with that.

Let's go to POLICY of the ARRL "for the [US] ARS community."
How does anyone KNOW that "ARRL Policy" truly represents
the wishes of the ARRL membership? Few do since the proof is
displayed by the ARRL claim that "the ARRL is honest." The
ARRL says it so it must be true? Sorry, not a reasonable proof.

Political parties have used the same sort of technique for
centuries. They say their viewpoints, statements, opinions are
all "true" and keep repeating it so often that some folks will
simply believe it. The ARRL is also a political organization
whether it accepts that or not...it just doesn't have any other
political party to politic against...it is the ARRL members
against all the ARRL non-members. The ARRL must resort to
political spin in order to continue existance.

If its not politics, then it revolves around the pseudo-religion of
Groups. A Group appears powerful and mighty if it acts with
a loud voice for a long time. Groups promise many things,
make many claims, but are just people and the Group is led
by a small core group of "movers and shakers" who do the
deciding and leading. The majority of Group members sit
back and follow. "Good" Group members embrace everything
and become Believers. Skeptical Group members are shunned
by the Believers, sometimes refused or even cast out. Believers
do not allow disbelief to exist, however slight.

While minutes to board meetings are made public, they are made public by the ARRL. The ARRL controls what is revealed. Others in here have stated that BoD meetings have covered items not in public view. Which is then correct? No one can say for the ARRL controls the public content of the meetings.

Believers bring out the "black paintbrush" and say all skeptics are paranoid, are "lying," or are simply heretics. All that finger-pointing by Believers is still no proof of honesty.

Then we have the Section Managers, the "freely elected representatives" in national areas. The ARRL people urge others to communicate with their Section to make their feelings-desires-etc known on issues and matters.

A problem there since "freely elected" is ONLY by the membership...which is less than a quarter of all US radio amateurs. Section Managers cannot "represent" non-members and they certainly cannot "represent" the un-licensed. Some matters of regulation and policy concern entrance to amateur radio. It would seem that most SMs are a long time since their entrance to amateur radio and the times and regulations have changed in the interim.

The "free election" is NOT anywhere close to the same sort of "free election" as is done for elected government officials. To say it was the same would be an unabashed lie. To imply that it is "the same" is also groundless...but the implication is a favorite gambit of the Believers and the Officials of the ARRL.

>ARRL sells products to
>members and nonmembers alike. There, too, promises are kept.

There are some small differences on sales relative to member-ship. It is pointless to argue it here due to the obvious tone of your response.

>... ARRL
>says it's working on Amateur Radio matters in Washington, Geneva and
>elswehere. There's plenty of public record available with which to verify
>that ARRL is in fact doing that, as it says.

Using a phrase "[the] ARRL says it's working on it..." is more self-serving and prideful than it is a statement of "honesty."

Yes, the ARRL is "working on things" but is that "work" truly representative of even the membership? It sure isn't the "work" that many of the non-members want. It isn't "representative" of anything but what the ARRL wants.

In recent years the public record will show that the ARRL does NOT "represent" enough of the US ARS. To bring up a very dead horse again, look at the difference between the ARRL position on license classes and code testing versus the final

Report and Order on 98-143...along with all the comments
received by the FCC on that NPRM. The ARRL lost most
of its position items as quoted in the R&O, still refusing to
recognize the FCC's own regulatory position on code testing.

On 90-53, the NPRM for creation of the no-code-test
Technician class license, the ARRL's position on policy was
essentially against it or for forcing allocated operation well
above 30 MHz. The ARRL lost and refused to accept the
FCC's own reason for elimination of the code test.

Look at the ARRL position relative to that of the IARU on
ITU-R S25.5 or the four principal action items concerning
amateur radio for WRC-03. NOT the same policy.

The problem of the SW BC interference to amateurs in the
40 meter band has been around since WARC-79 and, so
far, very little has been done despite all the claims of "the
ARRL is working in Washington, Geneva, and elsewhere."
By WRC-03 the 40m problem will have been around for 24
years with no signs of easing. The IARU has been more
aggressive in that matter...see their strong, colorful
presentation on their own website. What has the ARRL
done as effectively as the IARU or other amateur
organizations in the past 23 years? Make excuses?
Make promises? Make claims?

>The problem, of course, is that you dislike some of ARRL's policies but
>are unable to mount effective arguments against them.

Wrong wording. You are acting as a Believer and trying to
wield that black paintbrush again. You don't have any paint.

See some major topics up above.

The EFFECTIVENESS is due to a number of policy issues
in which the ARRL lost. 90-53. 98-143. The on-going 40m
interference problem which still isn't decided after 23 years.

>So, you mutter vague
>intimations of dishonesty while lacking any evidence to support those
>claims.

Jon, you are like a man tied to a post in front of a firing squad
trying to argue that the on-coming bullets don't exist. :-)

>> The only evidence presented is what the ARRL submits to the public.
>
>Ah, so there is no independent evidence of what the "will of the
>membership" is yet you believe that it isn't being followed. On what
>grounds?

Skepticsm. Where is the disinterested third-party reference to
report that everything is on the up-and-up?

Skeptics can't read minds. Skeptics don't get Divine Revelations
to the Truth. Skeptics are stuck with public observation.

Believers refuse to accept skeptics. Skepticsm challenges a
Belief System by its existance and the Believers MUST retain
their Belief.

>> The only evidence presented is what the ARRL submits to the public.
>
>What other evidence could there be? This is one of those "have you stopped
>beating your wife yet" deals.

I could write for hours on the "inherent honesty" of such "true
statements" but it would be wasted time in trying to change the
minds of Believers. :-)

There were skeptics who observed the activity of Worldcom
executives many months ago...and now Worldcom is under
investigation of many nasty things. All of the lawyers for the
Worldcom executives say "they are innocent and haven't done
anything wrong!"

There were skeptics who observed the activity of the Adelphia
founding family many months ago...and now that family has
been arrested and Adelphia operations are under investigation.
The defense lawyers all claim their clients are "innocent!"

Need I mention Enron? Many Enron employees Believed
in their company sufficiently to invest, thinking everything
was on the up-and-up there. :-)

>> The only evidence presented is what the ARRL submits to the public.
>
>Nope. Go to a large hamfest and attend the ARRL forum, or just hang around
>the ARRL table.

Oh, so the "proof" exists in Dayton? :-)

>You'll hear plenty of exchanges between the ARRL
>leadership and the ham-in-the-street.

I've gone to many various gatherings of different organizations and
heard their leadership and the member-in-the-hall. That includes
ham clubs, Jon. The leader-ship can never do wrong...because
the leadership says they can never do wrong. :-)

>If the ARRL's actions were counter
>to the interests of those people, the exchanges would be largely negative
>in tone. But they aren't.

Get away from an ARRL-controlled fest and do it, Jon. Use
Mark Twain's novel as an example...be pauper instead of
prince. The tone will change. Trust me... :-)

>The evidence is there, and people who actually
>participate in ham radio are well aware of it. What you fail to understand
>is that the interests of the BoD and staff aren't different from those of
>the members or of hams in general.

How do I know the above is true? Jon Bloom says it is true!
:-)

Jon, the problem is that you won't recognize negative criticsm
plus you demonstrate all the symptoms of a Believer.

Personally, I believe in Christianity, the Trinity, and the existance
of a Higher Power. I can't offer evidence of any of that, pro or con!
Am I "mistaken?" To a non-believer I would be.

This isn't about a Belief system in something organized by
humans for other humans. In such affairs it is possible to be a
skeptic and not considered a heretic.

>>>When an opinion is held without supporting evidence it is merely a
>>>prejudice.
>>
>> I disagree. I'd call it suspicion.
>
>When suspicion is based on no evidence it's paranoid.

Under that definition -

Then all police investigators are "paranoid" in looking for
evidence...because they have NO evidence to start with.
Not a good reason, Jon.

Most research scientists would be classified as "paranoid"
because they are looking for evidence that a particular
science is not quite that of established theory. Based on
"gut feel" sometimes, by being skeptical about existing
theory. Not a good reason, Jon.

>> Where is the un-biased evidence that the ARRL is always truthful?
>
>Answered above. Once a baseline of truthfulness is established, you have
>to have EVIDENCE of untruthfulness to make a substantive claim of
>dishonesty.

Until someone other than the ARRL, ARRL officials, or ARRL members
can come up with disinterested third-party references to the total
honesty of all ARRL claims, positions, and policies, I will remain the
skeptic. Not a Believer, a skeptic. Call me all the names you want,
apply all the black paint you want, insult me, my family, my ancestors,
my city, county, state...and you haven't yet provided that "baseline
of truthfulness."

The ARRL says it is honest in everything. It's a Belief system.

Under the "baseline of truthfulness" description, ANY propaganda
would be truthful. It isn't.

>> The argument was over opinion, not religion.
>
>In your case there's not much difference since you form your opinions
>without evidence.

I believe in God and Christianity. I have NO tangible evidence to confirm
of any of it. Nonetheless, I have a belief that it is true.

I am a skeptic concerning the human-organized and run ARRL,
based largely on general human behavior in Groups. The ARRL
is not a religion per se. I have NO tangible evidence to confirm
that it is honest in its policies, statements, and claims.

Which of my statements is "correct?" Which are "incorrect?"
You make a false allegation against an individual based on your
own Belief System? What is that called elsewhere?

>> Miccolis wished to paint
>> opinions opposite to his as "mistakes." Opinions are only opinions.
>
>But not all opinions are equal.

We can operate under the Latin oxymoron, "Primus inter pares?"
:-)

>Opinions which are based on a reasonably
>objective evaluation of the available facts, aided by public discussion of
>those facts and evaluations, are substantive.

Be careful on making such a sweeping, blanket absolute! :-)

What you've just written is a prime example of the intellectual
output of nearly every single religion in human existance!

>Opinions, such as yours,
>which are based on unreasoned emotion are quasi-religious and add nothing
>useful to the public debate.

Tsk, tsk. There goes that paintbrush again! :-)

Basically, I'm just against the morse code test for a radio license,
Jon. I seem to be arguing against a Belief System there.

Let's see...if I've been IN radio communication for a large part of
the last half century and I've never used morse code once (or had
to use it for any purpose) and I've seen all kinds of evidence that
morse code is slow, inefficient, error-prone in communications even
though the ARRL has constantly pushed morsemanship as the
ultimate communication mode for all radio amateurs and I've found
some inconsistencies between ARRL statements-policies-stands
on amateur radio issues...then I am acting on "emotional bias" in
"quasi-religious" misunderstanding? :-)

OK. Call it what you will. I've been pretty well insulted three ways from Sunday in here for quite some time by a lot of emotionally-driven pseudo-religious zealots about morse code. Should I add your name to the list? :-)

Maybe I'll take it all up with Pastor Ralph (Midtlyng) next Sunday. He can consult with higher church members on this weightly issue which concerns separation of church and BoD. We'll get back to you after a while. You hang in there with your Divine Truth.

Dave, I passed them yet do not have the priveleges. And I've previously
stated why I don't have those priveleges. Can you not envision how a person
can pass the exams and not gain priveleges?

>
> ...not if I go by what you've stated here.

Dave, you don't go by what I've stated here. You go by a pre-conceived idea
that whatever I do is wrong.

You've obviously missed how I passed all of the exams and yet gained no
additional priveleges.

> > > > > > When I've got a pile-up, I run it.

>licensees
>have chosen to remain at the entry point?
>

1) Because the license gives them everything they want today.
2) Because they cannot use HF/MF at the present time.
3) Because they expect the requirements for the higher classes of license to
become even easier in the future.
4) Because they are working towards an upgrade.
5) Because they have lost interest and are inactive.

Remember, too, that since April of 2000 the FCC has been renewing Tech Pluses
as Techs. In 7-1/2 years or less there will be no Tech Pluses at all.

While the total number of Techs has grown since restructuring, the total number
of Techs and Tech Pluses has decreased by over 14,000. In fact, the total
number of hams with "entry class" licenses (Novice, Tech, Tech Plus) has
decreased by over 26,000, while the total US ham population has increased by
over 8,000 in the same time period. .

As of May 14, 2000:

Novice - 49,329
Tech - 205,394
Tech Plus - 128,860
Tech + Tech Plus: 334,254
Novice + Tech + Tech Plus: 383,583

As of July 15, 2002:

Novice - 37,424 (decrease of 11,905)
Tech - 242,219 (increase of 36,825)
Tech Plus - 77,447 (decrease of 51,413)
Tech + Tech Plus: 319,666 (decrease of 14,588)
Novice + Tech + Tech Plus: 357,090 (decrease of 26,493)

Obviously lots of hams who held these licenses ARE upgrading to General or
Extra.

All that the written license tests have done since about 1960 is to insure that the person who passed them got at least the minimum number of multiple-choice questions correct. Although the test cover lots of stuff, passing them does not mean that a person knows all of the material covered.

As I recall the questions, the ham involved had been inactive for quite some time and was in the process of getting active again. He was checking to see if the rules had changed.

More like 30, but let's see what ya got.

>As a Navy electronic tech, the ships at sea used no
>radio morse code at all for any communications at all. The only time I
>saw morse used at all was an occasional "drill" excersize.
>From my experience, by 66, all long haul comms were
>via HF RTTY (encrypted).

So, in the 1966-70 time frame, the US Navy retained Morse code capability but
did not use it except for drills and in the rare case of an RTTY failure.

Was this on all USN ships? From the records and accounts I've seen, the smaller
and older ships were the last to get new radio gear. In the early 1960s, many
of the older, smaller ships were still equipped with WW2 vintage RBA/RBB/RBC
receivers, transmitters of similar vintage, and were heavily dependent on
Morse. But that is a few years before the time period you refer to. It's quite
possible that even the oldest and smallest USN ships had been refitted or
retired by 1966.
>
>Voice radio comms were usually all local UHV/VHF.only.
>
Makes sense.

Some intersting points:

- While it is claimed that all branches of the US military decided to eliminate Morse in 1948, almost 20 years later the capability was still retained by the Navy as a backup.

- The FCC of the 1960s not only supported Morse code testing for all ham licenses but actually raised the standards by requiring 20 wpm instead of 13 wpm for full-privileges after November of 1968.

Thanks for the info, Bill

>Okay, so how do you explain all the others who have used the exact
>same form of address. Begin with Jim Kehler long ago. Continue on
>to over two years of such use by an extra who regularly tags his
>messages about me with a Yiddish-ethnic synonym for "dickhead."

Well, Lennie, the "problem" is that you whine about it, cuss about it and
then do it yourself to people who do NOT do it to you.

>Is that somehow "okay" but someone else (conveniently of opposite
>opinion) doing the same thing is now "wrong?" Curious double
>standard there.

You're the one with the double standard, Lennie. Jim Miccolis only calls
you "Len" or ID's you by the screen names you yourself use. I have never seen
him call you "Lennie" or anything OTHER than names or tags you yourself have
used.

>Those, like yourself here, are simply trying to win message
>points by painting others in nasty colors.

Hmmmmm......

You 'complain" about how you are addressed, but then do it virulently to
an "opponent" who does no such thing to you.

You promise to provide 'evidence' of your GROL or professional licensure,
but instead send a picture of an unknown person doing something that would get
him incarcerated in many states.

You assert falsehoods and dishonesty of persons and organizations where no
evidence exists.

You assert that you are "only" interested in the Morse Code test issue,
yet your myriad of posts in just this week prove otherwise.

You asserted that you were going to get your "extra lite" "out of the
box". Still no Lenonard H. Anderson on Lanark with an Amateur Radio license of
ANY class as of today.

>Jon, Jon, Jon...no one has to answer each and every "question"
>posed by someone else in a newsgroup.

Or ANY question, obviously. So far your one and only e mail to me, and one that you yourself offered to provide, was a picture of an obscene gesture.

>If you want to keep
>implying that (for example) "I am still beating my wife," I won't
>bother with such...or...I may pose an equally-nonsensical
>"question" right back at you or anyone else.

That's ALL you "provide", Lennie. Still waiting on your microwave discussion, your extra lite, the list of volunteer organizations you belong to, the number of kids that you have raised or worked with in youth groups that validate your "age restriction" proposals, etc etc etc...

>Jon, I don't know what has gotten into you recently, but a
>self-righteous demand to "answer the question (you put)!" is
>simply a self-righteous demand.

Cute coming from the keyboard of the one who only this past week "demanded" specific knowledge of my Armed Forces service and later said it "was" his business when I refused the "demand".

>The ARRL says it is "honest." The proof of such "honesty" cannot
>be more of the same.

Lennie, Lennie LENNIE! In American jurisprudence, a lack of evidence "proving" dishonesty IS prima facia evidence of HONESTY.

You are asking the "beating your wife" question again. Very tacky.

>The ARRL would be honest if it said "the ARRL represents its
>membership" and let it go at that (or words to that same effect).
>I have NO problem with that.

Not being a member of the organization lends that last sentence to the question "Who cares if you DID have a problem with it?"

>Yet, the ARRL insists that it knows all
>about "how to get into amateur radio" and fails to qualify that by
>the "how to" being based on what the "how to" was in the minds
>of members's experiences of many years in the past.

What qualifications, Lennie?

Present ARRL publications on the subject provides specific material that is germane ONLY to PRESENT Amateur qualifications.

Other than "reprints" of old QST's and pubs, the only currently published ARRL text on Amateur matters of "years in the past" is a historical text called "Two Hundred Meters And Down".

>Times have
>changed and many more unlicensed in the amateur service people
>have knowledge and experience in other radio.

There are NO "unlicensed" persons in the Amateur Radio service. One cannot be "in" the Amateur service unless they are licensed.

Refer to recent enforcement letters on the ARRL website.

There may be persons who do not posses an Amateur license that are INTERESTED in it AND have other related interests, ...certainly many who know "reams" about "other radio" than many licened Amateurs, but if they themselves are not licensed per Part 97, they are simply radio afficionados...nothing more.

>Do you want the ARRL to continue to talk down to newcomers?

Do you want the neighbors to know you still beat your wife?

>Do you want the ARRL to lead everyone by a parental hand as if
>they were all ignorant lambs?

If they are ignorant, yes. Someone led you once. Didn't do much of a job, but you got through.

>Do you want the ARRL to appear
>as some superior judge and arbiter of behavior when the evidence
>is clear that they are simply "representing" the thoughts of long-
>time members thinking their way is the "only" way?

Evidence, Lennie...evidence....

>While minutes to board meetings are made public, they are
>made public by the ARRL. The ARRL controls what is revealed.
>Others in here have stated that BoD meetings have covered
>items not in public view. Which is then correct? No one can
>say for the ARRL controls the public content of the meetings.

Evidence of wrongdoing or dishonesty, Lennie..Where is it?

>Believers bring out the "black paintbrush" and say all skeptics
>are paranoid, are "lying," or are simply heretics. All that finger-
>pointing by Believers is still no proof of honesty.

I believe the ARRL is honest, Lennie. All I ask of YOU is EVIDENCE that your assertions of DIShonesty are valid.

So far all you have done is trot out the insistence that since anyone who says they support the ARRL is "biased", they can't accept anything else.

You are wrong.

Show me REAL evidence of dishonesty..a willful and concious effort to deceive on the part of the ARRL, and I will cancel my membership immediately and will do everything I can to convince others to do likewise.

>Yes, the ARRL is "working on things" but is that "work" truly
>representative of even the membership? It sure isn't the "work"
>that many of the non-members want. It isn't "representative"
>of anything but what the ARRL wants.

If "non-members" want the ARRL to do something else, then can become members and change it's direction.

>The ARRL lost most
>of its position items as quoted in the R&O, still refusing to
>recognize the FCC's own regulatory position on code testing.

How is the ARRL "refusing to recognize ANY FCC jurisdiction, Lennie.?

>On 90-53, the NPRM for creation of the no-code-test
>Technician class license, the ARRL's position on policy was
>essentially against it or for forcing allocated operation well
>above 30 MHz. The ARRL lost and refused to accept the
>FCC's own reason for elimination of the code test.

What ARRL "policy" refuses to accept ANYthing of the FCC's, Lennie? They may not LIKE it, but that's no different than YOU asserting YOUR dislike for anything...well..for everything, acutally...

>>The problem, of course, is that you dislike some of ARRL's policies but
>>are unable to mount effective arguments against them.
>
>Wrong wording.

Nope...right on the money. Sorry you didn't like it....

>>So, you mutter vague
>>intimations of dishonesty while lacking any evidence to support those
>>claims.
>
>Jon, you are like a man tied to a post in front of a firing squad
>trying to argue that the on-coming bullets don't exist.

Nice dodge, Lennie. Grossly inaccurate, of course.

We ARE waiting for your "evidence" of dishonesty on the part of the ARRL.

>Skepticsm. Where is the disinterested third-party reference to
>report that everything is on the up-and-up?

How about the Attorney General of the State of Connecticut? The ARRL is organized under CT laws, and I don't see any pending litigation against the ARRL for dishonesty, fraud, etc.

How about the Postmaster General of the United States? If the ARRL were doing something fraudulently and that act were supported, promulgated or otherwise conducted via the pages of QST, QEX or other League publications, federal law would apply.

Nothing there, either....

>Skeptics can't read minds. Skeptics don't get Divine Revelations
>to the Truth. Skeptics are stuck with public observation.

And so far "public observation" is such that the Better Business Bureau of CT reports no violations by ARRL. Neither does any law enforcement agency that reports such things.

(that didn't take much work......)

>Believers refuse to accept skeptics. Skepticsm challenges a
>Belief System by its existance and the Believers MUST retain
>their Belief.

There are no skeptics or "belief system" working here...Just facts...NO EVIDENCE OF ANY WRONGDOING IN 80+ YEARS of existence of the American Radio Relay League.

Of course we DO have the accusations and paranoia of one crochety old retiree in southern California...A place known to incubate some of America's most assinine and bizzare nut cases...

Let's see...WHO am I going to believe? An obviously biased and bigoted antagonist ranting and raving of perceived dishonesty...

OR...reputable agencies such as the AG's office of CT, the BBB and the Postmaster General of the United States...????

WHAT am I going to believe? The 80+ years of honest, earnest service of an organization who's service has been lauded in the Federal Register by Congress, the Department of State, Department of Defense, American Red Cross, Slavation Army, the Federal Emergency Management Agency (and others...)...

OR...Lennie...???

Hmmmmmmmmm.....Lemme think on THAT one for a while...NOT!

> > > > > > > > > > > > > > > > > can pass the exams and not gain priveleges?
```

About the only way I could see that happening is if you didn't pass ALL
the required exams. If you didn't pass all of the required exams, you
weren't rewarded. Those who pass all the exams ARE rewarded.

> that whatever I do is wrong.

You've certainly made statements about what you thought to be DXing.
Some of them have even been made in this series of exchanges between us.
Lots of them were just plain wrong. I don't have the opinion that
everything you do is wrong. I don't even know about everything you do.

> You've obviously missed how I passed all of the exams and yet gained no
> additional priveleges.

There's only one way that could happen. You didn't pass all of the
required exams.

> > > > > > > When I've got a pile-up, I run it.

>
> I know how. I've done it. Just like I said, "one at a time."

That's pretty much descriptive of almost any amateur radio QSO.
Funny--most of the DXers I know have a more complex idea of how a pileup
is handled from the DX end.

> Do you work them two at a time? five?

Divine it from the ether. You're a DXer. You've said so.

> > > > > > > QSLing was a huge chore.

My QSL manager of fifteen years isn't a stamp collector. No one in his
family is a stamp collector. Any other guesses?

You asked me to tell him something. You can't have meant that I should
direct comments to a DX entity. That'd be like talking to a door.

>
> So you were contesting.

Not necessarily. I may not have even sent a log to the sponsoring
organization. I was handing out DX contacts to those who were in a
contest. As you stated, many of them are not really planning on
submitting a score. Some are just chasing countries.

> > > > > > > The DX station can do likewise if he's not a serious contester.

I think you're very worthy of operating from foreign soil and I think
you're very worthy of the countries you've worked. I just don't think
you're a DXer.

> > > > > > > What differences have you noted in goals and

No, I have a couple of towers and lots of antennas.

>>>information has not been answered yet.

That alleged e-mail hasn't been RECEIVED yet. [You will now
get real busy and write, send one to "prove" you did it...]

>>The file should be over 2 MB since it contains only two images,
>>scans of the front and back of my First Phone first license.
>
>"First Phone first" license?

In that time period a First Phone was valid only for five years.
Mine was granted on March 29, 1956, and expired on March
29, 1961. One had to renew the license by mail, sending in

the one to be renewed. A new certificate was then mailed back
along with the old certificate, the old certificate stamped either
"Expired" or "Cancelled."

I call it my "first First Phone" but it is really the first Form 758A
received. Are you going to be pedantic again on nomenclature
and get all stuffy and full of yourself?

>I did not request it - why send it to me?

Why not? Now that you have it, do you want to argue little
picayune details of it, make Himilayas out of anthills?

>I don't want it. I'll take your word that you once had an FCC commercial
>license.

Now you have near-tangible PROOF. If you want to make an
ISSUE out of it, go to the FCC.

>My Second Class Phone license was issued on July 26, 1972. I was 18 then ;-)

You never got a First...yet you could have done it at the same
test sitting. Why didn't you? It should have been a no-brainer
to a kid with all those claimed smarts and earlier exploits.

>>The thought-corrected second file "Attach2" seems to be another

>>contains a nice day's greeting with an avian theme.
>
>Do lots of people greet you that way?

Only those pedantic, stuffy, self-righteous easterners looking to
be some kind of "father figure" to show their "superiority" to
people they think are "lesser." Fortunately most of those that I
meet are only on the Internet, very few managed to survive in the
most populous state in the USA without changing attitudes..

One of the major problems of pedantic, stuffy, self-righteous
easterners are a serious lack of sense of humor. Neither can
they take being set up when they damn well deserved such
treatment.

Okay, you got my first Form 758A. What are you going to do
about it? Make more nastygrams?

Have a nice day.

So, by all that you've said in here, you've never been IN any
military branch. Further, you haven't done much research in
the matter either.

Think on this: The USN has a lot of shore stations. Those
shore stations are considered "fixed-point" stations; i.e., they
do not move. The shore stations communicate with one
another.

>Was this on all USN ships? From the records and accounts I've seen, the
smaller
>and older ships were the last to get new radio gear. In the early 1960s, many
>of the older, smaller ships were still equipped with WW2 vintage RBA/RBB/RBC
>receivers, transmitters of similar vintage, and were heavily dependent on
>Morse. But that is a few years before the time period you refer to. It's quite
>possible that even the oldest and smallest USN ships had been refitted or
>retired by 1966.

I'm sorry, but how did you derive "...heavily dependent on morse?" You saw
one code key on a photo of a radio bench and enlarged that?!?

Had you done enough research you would have found out that the
USN was using RTTY both in-clear and on-line-encrypted in 1940
on cruisers and heavier ships.

>Some intersting points:
>
>- While it is claimed that all branches of the US military decided to
eliminate
>Morse in 1948, almost 20 years later the capability was still retained by the
>Navy as a backup.

I'm not sure who Miccolis uses for the source of that factoid, but I said that
the US military had decided to eliminate OOK CW for (capitals to make
sure the poor-of-seeing have aid) FIXED-POINT TO FIXED-POINT HF long-
haul communications in 1948. Hello? The largest "traffic" of the US
military communications over radio occured on fixed-point to fixed-point
HF long-haul communications. The reasons are: Much higher throughput,
much fewer operator mistakes, encryption can be integrated with in-clear
communications means using TTY.

As late as 1965 land force HF radio equipment still had OOK CW
capability up to Division level. But, having the capability does not infer
that OOK CW was much used. The use of OOK CW communications
on land was steadily decreasing. Teleprinter was the favored written-
message mode of that time. Radio equipment with carrier on-off
switching capability was re-adapted to station control; stations having
easier shut-down or the capability to quickly switch from transmitter to
transmitter.

The major communications mode of US military land forces in the
1950s to time-now period is voice. Second mode is data/(TTY-like). Third
mode is imagery. Since about 1994 the US military has been advancing
the "digital battlefield" concept...and succeeding.

>- The FCC of the 1960s not only supported Morse code testing for all ham
>licenses but actually raised the standards by requiring 20 wpm instead of 13
>wpm for full-privileges after November of 1968.

Unrelated comparison but not unexpected in here.

The FCC no doubt was heavily lobbied then by the ARRL for that
"incentive" plan from the more-influential ARRL members who were either

retired (and wanting to strut their stuff with nice titles and status) or had morsemanship as a personal favorite. SSB voice was coming on strong on HF. More and more ready-manufactured equipment was becoming available and behind-panel, hands-on work on the hardware would begin a downturn that would continue until now. The emphasis was on operating. The solid-state era was beginning in earnest and would take over nearly all active electronics functions. New methods of technology were being introduced. The old methods known by the old-timers who began before or during WW2 were being replaced by new technology. The old-timers wanted their skills-while-young to be "worth something" so they pushed for morsemanship as a criteria for "excellence" in amateurism.

Did the "FCC" push for the "incentive plan?" No. The ARRL was doing the pushing. The FCC probably didn't much care one way or the other since it was facing a great heaping amount of new radio services using ever-increasing technology. Regardless of the political phrasing concerning "national importance" of amateur radio, it was still a hobby activity. It was not broadcasting, not a common carrier, not inter-connected with foreign telecommunications, not directly related to public safety, not related to business activities. It was avocational. Important to individuals, yes, but each station did not directly tie in with national needs. But, the FCC must listen to its citizens so it did what amounted to a compromise in the 1960s...it listened to the only large amateur radio membership organization of the time, the ARRL. There was nothing at all approaching the level of individual citizen contact such as possible by the Internet now and back to a decade ago.

The FCC effectively rubber-stamped the ARRL proposal and the ARRL proceeded to take the credit for it ever since...until the 98-143 NPRM and eventual restructuring of license classes and testing. There can be no mistake that the ARRL took the credit for the "incentive plan" and it is pointless to now "blame" the plan on the FCC.

Good historians consult as much research material as is possible, from as many sources as possible. Bad historians limit their research and interject their own personal desires into their histories.

I know you didn't request it, Len, but I'm thinking about sending you a copy of my first amateur radio license. Maybe I'll include a jpeg of my Extra Class certificate too. A couple of mb shouldn't be much trouble for you.

Let's see if you stuffy westerners have a sense of humor.

Once you claim someone to be dishonest it becomes about them, in part. I'd
be interested to hear the specifics of CR's untruths. I'd also be
interested in hearing how you determined that CU knew it was printing
untruths.

>>No, the evidence is legion. You have a rich posting history of trying to

I'm not painting, Len, I'm just pointing out the features of the image
you're painting.

> Jon, Jon, Jon...no one has to answer each and every "question" posed by
> someone else in a newsgroup.

Of course not. You are under no legal obligation to answer questions posed
here. But when you accuse others of dishonesty, you have an ethical
obligation to back up the accusations with specific evidence. I'm just
attempting to get you to live up to that ethical obligation. If you prefer
to hide behind legalisms, so be it.

> If you want to keep implying that (for example) "I am still beating my

Ignoring the presented evidence isn't the same as there not being any.

> The ARRL says it speaks for all [US] radio amateurs. Obviously it
> doesn't if less than a quarter are ARRL members. Obviously it doesn't
> if there are many, many individuals who challenge the ARRL "honesty,"
> who have challenged that "honesty" for many years.

Oh? Who, specifically? In what way, and using what evidence? Claiming that a lot of people agree with you is an old, weak rhetorical trick. Unless you can show where these supposed "many, many" challenges have been made, you're just blowing smoke.

> The ARRL would be honest if it said "the ARRL represents its membership"
> and let it go at that (or words to that same effect). I have NO problem
> with that.
>
> The ARRL cannot possible "represent" anyone who is interested or just

> amateur radio" and fails to qualify that by the "how to" being based on
> what the "how to" was in the minds of members's experiences of many
> years in the past.

Nope. ARRL's take on "how to get into Amateur Radio" is: Pass the license exams, then get on the air. That's as relevant today as it was 80 years ago. (It's also blindingly obvious.)

> Times have changed and many more unlicensed in the amateur service
> people have knowledge and experience in other radio.

Where that experience is relevant to Amateur Radio they can apply it. Where it is not relevant to Amateur Radio, it is not germane. So?

> Do you want the ARRL to continue to talk down to newcomers?]

It doesn't.

> Do you want
> the ARRL to lead everyone by a parental hand as if they were all
> ignorant lambs?

It doesn't.

> Do you want the ARRL to appear as some superior judge
> and arbiter of behavior when the evidence is clear that they are simply
> "representing" the thoughts of long- time members thinking their way is
> the "only" way?

What evidence, specifically?

>>ARRL promises services to members and delivers on those promises. That's
>>honesty.

> membership? Few do since the proof is displayed by the ARRL claim that
> "the ARRL is honest." The ARRL says it so it must be true? Sorry, not
> a reasonable proof.

So, let's see how you think the world should work: When someone is accused
of dishonesty, it's not up to the accuser to prove the charge, it's up to
the accused to prove innocence. And you accuse ME of Torquemadan
tendencies!

ARRL policy is judged by its members. If ARRL policy doesn't hew to the
members' interests the members can "vote with their feet." But they don't.
So, please explain why ARRL members remain as members when, in your
opinion, ARRL is acting against their best interests.

> Political parties have used the same sort of technique for centuries.
> They say their viewpoints, statements, opinions are all "true" and keep
> repeating it so often that some folks will simply believe it. The ARRL
> is also a political organization whether it accepts that or not...it
> just doesn't have any other political party to politic against...it is
> the ARRL members against all the ARRL non-members. The ARRL must resort
> to political spin in order to continue existance.

It's easy to characterize statements you disagree with as politicl spin.
It's more difficult to challenge the statements with substantive
discussion. But try taking the harder route if you expect to make a

convincing argument.

> If its not politics, then it revolves around the pseudo-religion of
> Groups. A Group appears powerful and mighty if it acts with a loud
> voice for a long time. Groups promise many things, make many claims,

> everything and become Believers. Skeptical Group members are shunned by
> the Believers, sometimes refused or even cast out. Believers do not
> allow disbelief to exist, however slight.

Again, where are the specifics? Just claiming that "they're being mean to me" doesn't have much substance.

> While minutes to board meetings are made public, they are made public by
> the ARRL. The ARRL controls what is revealed. Others in here have
> stated that BoD meetings have covered items not in public view.

Specifics? Evidence? Why is it, Len, that your arguments are so often presented in terms of "(unidentified) others have said," with no citation of who, where and when? It leads one to suspect you're just making it all up.

> Which
> is then correct? No one can say for the ARRL controls the public
> content of the meetings.

"Prove you're innocent."

> Believers bring out the "black paintbrush" and say all skeptics are
> paranoid, are "lying," or are simply heretics. All that finger-
> pointing by Believers is still no proof of honesty.
>

> cannot "represent" non- members and they certainly cannot "represent"
> the un- licensed. Some matters of regulation and policy concern
> entrance to amateur radio. It would seem that most SMs are a long time
> since their entrance to amateur radio and the times and regulations have
> changed in the interim.

SMs don't make ARRL policy, Len. If you're going to criticize an organization's structure, you really ought to first learn what it is.

> The "free election" is NOT anywhere close to the same sort of "free
> election" as is done for elected government officials.

Sure it is. In each case the electorate is restricted. In the case of governmental elections, it's restricted to the citizens of the jurisdiction the electoral office represents. Citizens of other jurisdictions can't vote for officials of a particular jurisdiction just because they happen to be interested in that election. In the case of ARRL, voting is restricted to ARRL members. Nonmembers and nonhams can't vote just because they are interested in the election. (Which, frankly, few are.)

> To say it was the
> same would be an unabashed lie. To imply that it is "the same" is also
> groundless...but the implication is a favorite gambit of the Believers
> and the Officials of the ARRL.

Yet another groundless charge. Just repeating "ARRL is dishonest" doesn't convince anyone. Pony up some evidence.

>>ARRL sells products to
>>members and nonmembers alike. There, too, promises are kept.
>
> There are some small differences on sales relative to member- ship. It
> is pointless to argue it here due to the obvious tone of your response.

Translation: Here'e yet another accusation for which there is no evidence whatsoever.

>>... ARRL
>>says it's working on Amateur Radio matters in Washington, Geneva and
>>elswehere. There's plenty of public record available with which to
>>verify that ARRL is in fact doing that, as it says.
>
> Using a phrase "[the] ARRL says it's working on it..." is more
> self-serving and prideful than it is a statement of "honesty."
>
> Yes, the ARRL is "working on things" but is that "work" truly
> representative of even the membership? It sure isn't the "work" that
> many of the non-members want.

That's certainly true. Nonmembers such as some of the Part 15 manufacturers, for example, would love to suppress the work that ARRL does. Hmmm... where's the proof that you're not secretly being paid by them to undermine ARRL? :-)

> It isn't "representative" of anything but what the ARRL wants.

"What the ARRL wants" is for the Amateur Radio Service to flourish. It's true that ARRL's activities aren't representative of anything except that. Which explains why so many hams have aligned themselves with ARRL's activities. They, too, want the ARS to flourish. What do you want, Len?

> In recent years the public record will show that the ARRL does NOT
> "represent" enough of the US ARS. To bring up a very dead horse again,
> look at the difference between the ARRL position on license classes and
> code testing versus the final Report and Order on 98-143...along with

> all the comments received by the FCC on that NPRM.

Most of the comments were closer to ARRL's position than to the one
finally adopted in the R&O.

> The ARRL lost most
> of its position items as quoted in the R&O, still refusing to recognize
> the FCC's own regulatory position on code testing.

"Refusing to recognize" how? Has ARRL instructed VEs to give code tests
other than those required by the FCC? Or what, exactly?

> On 90-53, the NPRM for creation of the no-code-test Technician class
> license, the ARRL's position on policy was essentially against it or for
> forcing allocated operation well above 30 MHz. The ARRL lost and
> refused to accept the FCC's own reason for elimination of the code test.

Uh, the NCTs were restricted to operation above 30 MHz, Len.

> Look at the ARRL position relative to that of the IARU on ITU-R S25.5 or
> the four principal action items concerning amateur radio for WRC-03. NOT
> the same policy.

So?

> The problem of the SW BC interference to amateurs in the 40 meter band
> has been around since WARC-79 and, so far, very little has been done

> that matter...see their strong, colorful presentation on their own
> website. What has the ARRL done as effectively as the IARU or other
> amateur organizations in the past 23 years? Make excuses? Make
> promises? Make claims?

This is funny! Len, the ARRL is part of the IARU. IARU is the mechanism by
which ARRL and other national AR societies present the case of Amateur
Radio in international matters, particularly HF allocations. When you see
IARU doing things, you ARE seeing ARRL and it's sister socities in action.

Nothing has been done? How do you suppose that realignment of the 7-MHz
band got onto the agenda for WRC-03? How is it that the FCC's preliminary
view on the issue, released for public comment last spring, called for a
300-kHz-wide amateur primary allocation at 40m? Are you even aware that
said preliminary view was formulated by an FCC-appointed advisory
committee to which ARRL contributes and of which an ARRL employee is vice
chairman? If you are unaware of all of those things then you are making
comments about a topic about which you are woefully uninformed. If you did
know those things, then you are being dishonest in claiming that nothing
has been done. Which is it? We skeptics want to know!

>>The problem, of course, is that you dislike some of ARRL's policies but
>>are unable to mount effective arguments against them.
>

In short, you have NO evidence.

> Skeptics can't read minds. Skeptics don't get Divine Revelations to the
> Truth. Skeptics are stuck with public observation.

Observation of what? Surely if you have observed something that gives
grounds for skepticism you can cite it. I'm still waiting for you to do
so.

> Believers refuse to accept skeptics. Skepticsm challenges a Belief
> System by its existance and the Believers MUST retain their Belief.

It's only because you lack any real argument that you keep trying to turn
the discussion into a conflict of "belief systems." You haven't presented
anything to give substance to your belief system.

>>> The only evidence presented is what the ARRL submits to the public.
>>
>>What other evidence could there be? This is one of those "have you
>>stopped beating your wife yet" deals.
>
> I could write for hours on the "inherent honesty" of such "true

> statements" but it would be wasted time in trying to change the minds of
> Believers. :-)

Meaning you have no answer to give. Just a string of baseless and
unsupported accusations accompanied by assertions that there is no
proof that the accusations aren't true.

> There were skeptics who observed the activity of Worldcom executives
> many months ago...and now Worldcom is under investigation of many nasty
> things. All of the lawyers for the Worldcom executives say "they are
> innocent and haven't done anything wrong!"

There is evidence against the Worldcom executives. Where's the evidence
against ARRL?

> There were skeptics who observed the activity of the Adelphia founding
> family many months ago...and now that family has been arrested and
> Adelphia operations are under investigation. The defense lawyers all
> claim their clients are "innocent!"

There is evidence against the Adelphia owners. Where's the evidence
against ARRL?

> Need I mention Enron? Many Enron employees Believed in their company
> sufficiently to invest, thinking everything was on the up-and-up there.
> :-)

There is evidence against the Enron executins and the auditors. Where's
the evidence againt ARRL?

Anyody can make accusations without evidence. But it's unethical to do so.

>>> The only evidence presented is what the ARRL submits to the public.
>>
>>Nope. Go to a large hamfest and attend the ARRL forum, or just hang
>>around the ARRL table.
>
> Oh, so the "proof" exists in Dayton? :-)

Among other places.

>>You'll hear plenty of exchanges between the ARRL leadership and the
>>ham-in-the-street.

> says they can never do wrong. :-)

If the leadership does do wrong they get voted out.

>>If the ARRL's actions were counter
>>to the interests of those people, the exchanges would be largely
>>negative in tone. But they aren't.

>
> Get away from an ARRL-controlled fest and do it, Jon. Use Mark Twain's
> novel as an example...be pauper instead of prince. The tone will
> change. Trust me... :-)

There are no "ARRL-controlled" hamests, Len. You really should learn
something about the topics you address.

>>The evidence is there, and people who actually participate in ham radio
>>are well aware of it. What you fail to understand is that the interests
>>of the BoD and staff aren't different from those of the members or of
>>hams in general.
>
> How do I know the above is true? Jon Bloom says it is true!
> :-)
>
> Jon, the problem is that you won't recognize negative criticsm plus you
> demonstrate all the symptoms of a Believer.

I'm just looking for evidence to support the chages you're making, Len. So
far, you haven't presented any.

> Personally, I believe in Christianity, the Trinity, and the existance of
> a Higher Power. I can't offer evidence of any of that, pro or con! Am I
> "mistaken?" To a non-believer I would be.

Ah, so your belief that ARRL is dishonest came in the form of a
revelation. No wonder you have no evidence to present!

> This isn't about a Belief system in something organized by humans for
> other humans. In such affairs it is possible to be a skeptic and not
> considered a heretic.

Yep. But if you want your skepticism to be accepted, you should present
something to justify it.

>>>>When an opinion is held without supporting evidence it is merely a
>>>>prejudice.
>>>
>>> I disagree. I'd call it suspicion.
>>
>>When suspicion is based on no evidence it's paranoid.
>
> Under that definition -
>
> Then all police investigators are "paranoid" in looking for

They have evidence of a crime to start with. Where's the evidence. Len?

> Most research scientists would be classified as "paranoid" because they
> are looking for evidence that a particular science is not quite that of

> established theory. Based on "gut feel" sometimes, by being skeptical
> about existing theory. Not a good reason, Jon.

Research scientists don't start with suspicion, they start with questions.
And they require verifiable evidence before deciding that someting might
be true. Where's your verifiable evidence, Len?

>>> Where is the un-biased evidence that the ARRL is always truthful?
>>
>>Answered above. Once a baseline of truthfulness is established, you have
>>to have EVIDENCE of untruthfulness to make a substantive claim of
>>dishonesty.
>
> Until someone other than the ARRL, ARRL officials, or ARRL members can
> come up with disinterested third-party references to the total honesty

In short, "prove you're innocent."

> Not a Believer, a skeptic. Call me all the names you want, apply all
> the black paint you want, insult me, my family, my ancestors, my city,
> county, state...and you haven't yet provided that "baseline of
> truthfulness."

I've not insulted any of those things. Are you claiming I have?

> The ARRL says it is honest in everything. It's a Belief system.

It's easy to find cases where ARRL has acted honestly, which supports the
assertion that it does so act. You can't cite one example of where it has
acted dishonestly. The objective evidence is that ARRL is honest. Your
"belief system" simply ignores the objective evidence. Which is better, a
belief that is supported by avilable evidence or one for which there is no
supporting evidence?

> Under the "baseline of truthfulness" description, ANY propaganda would
> be truthful. It isn't.

Nope. The "baseline of truthfulness" consists of those statements that can
be verified. There are plenty of those from ARRL, as you well know.

>>> The argument was over opinion, not religion.
>>
>>In your case there's not much difference since you form your opinions
>>without evidence.
>
> I believe in God and Christianity. I have NO tangible evidence to
> confirm of any of it. Nonetheless, I have a belief that it is true.

Like I said, revelation. And I have no problem with your belief that ARRL
is dishonest being of the same nature. I just wanted to clarify that it
is, in fact, an article of faith on your part rather than a conclusion
based on the rational evaluation of observed events.

> I am a skeptic concerning the human-organized and run ARRL, based
> largely on general human behavior in Groups. The ARRL is not a religion
> per se. I have NO tangible evidence to confirm that it is honest in its
> policies, statements, and claims.

Sure you do, you just prefer to ignore it because it doesn't conform to
revealed truth as you see it.

> Which of my statements is "correct?"

1) That there is no absolute proof that ARRL is honest. Such proof is
impossible, of course. On the other hand, there is EVIDENCE of ARRL's
honesty that you won't acknowledge.

2) That your belief in ARRL's dishonesty is akin to a religious faith.

> Which are "incorrect?"

That ARRL is dishonest.

> You make a
> false allegation against an individual based on your own Belief System?
> What is that called elsewhere?

I've made no allegations. I've only pointed out the fallacies in your
belief system, the principal one being the complete lack of supporting
evidence.

>>> Miccolis wished to paint
>>> opinions opposite to his as "mistakes." Opinions are only opinions.
>>
>>But not all opinions are equal.
>

> :-)
>
>>Opinions which are based on a reasonably objective evaluation of the
>>available facts, aided by public discussion of those facts and
>>evaluations, are substantive.
>
> Be careful on making such a sweeping, blanket absolute! :-)

Why?

> What you've just written is a prime example of the intellectual output
> of nearly every single religion in human existance!

No, religious debates aren't settled by "reasonably objective evaluation of
the available facts." They're settled by schism.

But I don't approach the question of whether or not a person or an
organization is honest on the basis of religion. I approach it on the
basis of evaluation of the evidence. That seems to be the fundamental
difference between your opinions and mine. Yours are based on revelation,
mine on evaluation.

>>Opinions, such as yours,
>>which are based on unreasoned emotion are quasi-religious and add
>>nothing useful to the public debate.
>
> Tsk, tsk. There goes that paintbrush again! :-)

Glorioski, promoted to the Sanhedrin and here I thought I was a minor
flunkey. Course I got promoted by someone else who likes unidentified
potshots so maybe it don't count.

And noting the pita.alt.net I will bet this is one of the sub-humans from
the alt-ghetto with a case of sore hemorrhoids on a fine Saturday morning.
Oh well, the promotion was fun while it lasted.

This has got to me a troll right? No one is this stupid...Yeah I said
stupid and not ignorant. Whats the diff 'Joker' asks? You can fix
ignorant...but you just cain't fix stupid. How goes it Joker?

'Every state in the US is a DXCC entity'... now thats STUPID.

>Because it's a lame award.

Yeah...that's why there are so many people competing fot it.

Except you, of course.

>Nobody cares.

Somebody does, or (1) no one would apply for it, and (2) you wouldn't have
wasted bandwidth on it.

>How can you compare a DXCC obtained in FRANCE where the VHF power is limited
>to 120W (for example) with the Italian stations that use 2 to 6kW on 6m ??

You don't. DXCC is typically an HF award. And even if you do, it's still
an individual award. It's "value" is what you put into it.

>So where is the merit to have a DXCC ?

Where indeed. If you don't want one, don't waste your time. Otherwise
shut up and dig in.

>and when you think that
>EVERY state in USA is a DXCC entity, it's totally a joke !

The "joke" is that you are some anonymous putz who obviously has an axe to
grind. Also, you don't seem to have your facts right.

Reminds me of someone else I know who has an axe to grind and poor mastery
of any facts........

>Cheers,
>Bill K2UNK

I've got to (grudgingly) agree with Len Anderson on this one.

Consumer Reports does suffer from enough built-in agendas, bias, subjectivity, and sampling problems to make any consumer take its pronouncements with a huge grain of salt. Specific examples:

- Statistical problems with automobile reviews, including self-selected samples from voluntary surveys, setting expectations, lack of clarification about what is a "serious" problem, and insufficient factoring out of the resulting anomalies. For example, widely varying results from identical sibling models made on the same assembly line differing only in "brand engineering" of labels, grills, etc. This is most acute when one model wears a foreign make (e.g., Mitsubishi or Toyota) and another one wears a domestic make (e.g., Chrysler or Chevrolet):

http://www.allpar.com/cr.html

Even if the objective measurements are done well, what should the reader's reaction be to subjective commentary like, "No one needs a car this big" when reviewing the Ford Crown Victoria?

- Excessively alarmist and flawed stories about pesticides, with insufficient disclosure about the amount of funding that CR takes from groups that have a strong anti-pesticide agenda:

http://www.quackwatch.com/03HealthPromotion/cu.html

- "Consumer Distorts" when it steps outside the area of fairly objective testing of consumer products into the nebulous area of strong environmental advocacy. Often this advocacy is not grounded in good science and is alarmist, presented out of proportion to other risks in society:

http://www.junkscience.com/consumer/consumer_about.htm

- Flawed editorial coverage of industry deregulation of telecommunications, airline travel, and power. In particular, failing to acknowledge reduced prices (in inflation-adjusted dollars) to the consumer, and completely ignoring the positive outcomes of deregulation in areas like freight transportation. Its advocacy of "redistributive" versus "public interest" regulation is a clear, and non-consensus, agenda:

http://www.cato.org/cgi-bin/scripts/printtech.cgi/research/articles/vandoren-firey-020627.html

- Presuming to give medical advice, and sometimes making dangerous mistakes as a result. For example, advising women as young as their 40's to take the drug Tamoxifen and have regular mammograms, despite medical research and patient experiences that have indicated that such interventions have greater risks to those women than no intervention:

http://www.junkscience.com/consumer/consumer_index.html

- CR's past perfect record of never being successfully sued in court ended with the Isuzu rollover debacle where the courts agreed with Isuzu that the CR review of its vehicle made false statements (though stopping short of finding libel or product defamation):

http://www.cbsnews.com/stories/1999/11/29/60II/main72161.shtml

CR makes mistakes in minor ways as well, and the reader should be aware of this when making purchase decisions based on test results. For example, it's my personal experience that some product testing is unavoidably subjective, CR doesn't properly acknowledge this degree of subjectivity, and this may result in outcomes that do not stand up well in the fullness of time (i.e., when the market speaks and eventually favors one product over another). The review of so-called "gift pens" (expensive writing instruments) from 1992 or 1993 was an example of a mostly subjective test given a coat of scientific varnish to make it look "objective." Their favorite pick? The Parker Place Vendome. It was a very narrow, stick-like pen with a very rigid, narrow nib which was too small to take a standard-sized ink reservoir. This pen is no longer made. Parker has replaced it in its price range with fatter, more ergonomic, instruments like the Frontier and the Poetry with

larger, more flexible nibs. According to the article, the testers were employees of CR who could, or preferred to, hand-write. One reasonable conclusion was that their testers were mostly women and preferred small, narrow, writing instruments. Larger instruments more comfortable to those with bigger hands (i.e., men) were unfairly downgraded in the test results.

>Make promises? Make claims?

Traceroute tells me that the IARU's own website, www.iaru.org, is on a machine whose real name is www.remote.arrl.org which is also the home for www.arrl.org. I noticed that someone with an ARRL business card (W4RI?) has a permanent document cubby hole in the ITU building in Geneva where they hold meetings (or at least had one when I was there), which I assume means he attends meetings there quite frequently. The ARRL is the IARU's "International Secretariat", which seems to mean that they pay a lot of the bills. I don't know how long ago it was when the IARU's President was a ham from somewhere other than the US, certainly not in the last 8 years or so.

While it is probably too politically incorrect for Jon to mention it I suspect that much of what the IARU wants to do is actually done by employees of the ARRL and paid for by ARRL members. I can't figure out why these guys would be so effective when working on IARU stuff but so ineffective when working on ARRL stuff.

>> truthfulness."

Eighty+ years of continuous operation pretty establishes a clear baseline.

>> OK. Call it what you will. I've been pretty well insulted three ways
>> from Sunday in here for quite some time by a lot of emotionally- driven
>> pseudo-religious zealots about morse code. Should I add your name to
>> the list?

I'd be asking myself why I was being so targeted and questioning my own
conduct, regardless of WHO was doing the "insulting".

One or two people you can discount as being social misfits or just plain unsocialable.

Every other respondent kinda set's up a trend, however. And Lennie is on the downside of that curve.
